THY TSELT HIVE MINUTED

CONGRESSIONAL RECORD.

FORTY-NINTH CONGRESS. FIRST SESSION.

vide for the erection of a public building at Charlotte, N. C.; which was read a first and second time, and referred to the Committee on Public Buildings and Grounds.

PUBLIC BUILDING AT OWENSBURG, KY.

The SPEAKER also laid before the House the bill (S. 1536) for the purchase of suitable grounds in the city of Owensburg, in the State of Kentucky, and the erection thereon of a public building for the post-office, United States collector's office, United States commissioner's office, and for the use of other United States officers in said city, and appropriating money for said purpose; which was read a first and second time.

Mr. LAFFOON

Mr. LAFFOON. I ask unanimous consent that this bill be taken up now and put on its passage. The Committee on Public Buildings and Grounds of this House has unanimously reported a similar bill.

The bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. BYNUM. I object.

The bill was referred to the Committee on Public Buildings and Grounds.

Mr. McMILLIN. Let us have the regular order.
The SPEAKER. This is the regular order.

PUBLIC BUILDING AT HAVERHILL, MASS.

The SPEAKER also laid before the House the bill (S. 2194) for the erection of a public building at Haverhill, Mass.; which was read a first and second time, and referred to the Committee on Public Building at Haverhill, Mass. ings and Grounds.

PUBLIC BUILDING AT LA CROSSE, WIS.

The SPEAKER also laid before the House the bill (S. 2242) to change

the limit of appropriation for the public building at La Crosse, Wis.; which was read a first and second time.

Mr. THOMAS, of Wisconsin. I ask unanimous consent that this bill be considered at the present time. It merely extends the limit of appropriation.

The bill was read.
The SPEAKER. Is there objection to the consideration of this bill at the present time?
Mr. STORM. I object.

The bill was referred to the Committee on Public Buildings and Grounds.

MILITARY POST NEAR DENVER, COLO.

The SPEAKER also laid before the House the bill (S. 2477) making appropriations for the erection of a military post near the city of Denver, in the State of Colorado; which was read a first and second time, and referred to the Committee on Military Affairs.

CLAIMS AGAINST THE GOVERNMENT.

The SPEAKER also laid before the House the bill (S. 2643) supplemental to an act approved March 3, 1883, entitled "An act to afford assistance and relief to Congress and the Executive Departments in the investigation of claims and demands against the Government;" which was read a first and second time.

Mr. SPRINGER. I ask unanimous consent that this bill be considered at the present time, my object being to propose an amendment to the bill and have the matter sent to a conference committee with the understanding that the committee shall not report until the next session. This measure embraces the subject of the consideration of private claims, and it is desirable that there be reported by a committee of conference to the two Houses at the next session a measure which will cover the whole subject of adjudication of private claims and the ascertainment of facts in such cases. I ask unanimous consent for the present consideration of the bill for the purpose I have stated.

The SPEAKER. The gentleman from Illinois [Mr. SPRINGER] asks unanimous consent for the present consideration of this bill for the pur-

pose of having an amendment adopted and the bill sent to a committee

of conference.

Mr. RANDALL. What is the bill?

The SPEAKER. The bill had better be read.

The bill was read.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. REED, of Maine. I shall have to object. This is too impor-tant a matter to be passed upon without a word of explanation. Mr. SPRINGER. I desire to make an explanation. The amend-

ment I propose to offer embraces three sections-[Cries of "Regular

Mr. REED, of Maine. What is it the gentleman desires?
Mr. SPRINGER. If the gentleman from Maine will permit, I will

explain.

The SPEAKER. But the gentleman from Maine has not control of the matter. Three or four other gentlemen have demanded the regu-

Mr. SPRINGER. I ask unanimous consent to make a statement.
The SPEAKER. Is there objection?

Mr. RANDALL. I object. These explanations of measures which are not under consideration take up time to no profit.

The bill was referred to the Committee on Claims.

LAND OFFICE AT LAMAR, COLO.

The SPEAKER also laid before the House the bill (S. 2796) to establish a land office at Lamar, Colo.; which was read a first and second time.

Mr. VOORHEES. I ask unanimous consent for the consideration of this bill at the present time.

The bill was read, as follows:

The bill was read, as follows:

Be it enacted, &c., That all that portion of the State of Colorado bounded and described as follows: Commencing at a point on the eastern boundary line of said State where the second correction line south intersects said boundary line, and running thence on said second correction line south to the line dividing ranges numbered 52 and 53; thence south on said range line to the southern boundary line of said State; thence east on the southern boundary line of said State; thence east on the southern boundary line of said State to the eastern boundary line of said State; thence north on the castern boundary line of said State to the place of beginning, be, and is hereby, constituted a new and separate land district, to be called the Bent land district, the land office for which shall be located in the town of Lamar, county of Bent, in the said State of Colorado.

SEC. 2. That the President, by and with the advice and consent of the Senate, shall appoint a register and a receiver of public moneys for said district; and said officers shall reside in the place where said land office is located, and shall have the same powers and shall discharge similar duties and receive the same fees and emoluments as other officers discharging like duties in tife other land offices of the State of Colorado.

There being no objection, the House proceeded to the consideration

There being no objection, the House proceeded to the consideration of the bill; which was ordered to a third reading, read the third time, and passed.

Mr. SYMES moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

SENATE BILLS REFERRED.

The following Senate joint resolution and bills were respectively

read a first and second time, and referred as indicated:
Joint resolution (S. R. 73) authorizing the Secretary of War to grant
a permit to John F. Chamberlin to erect a hotel upon the lands of the United States at Fortress Monroe, Va .- to the Committee on Military Affairs.

The bill (S. 368) for the relief of Susan E. Alger—to the Committee on Invalid Pensions.

The bill (S. 2587) granting a pension to Elizabeth Ward—to the Committee on Invalid Pensions.

The bill (S. 2682) granting a pension to Thomas W. Egan—to the Committee on Invalid Pensions.

The bill (S. 2686) granting a pension to Maurice T. Mantor-to the Committee on Invalid Pensions.

The bill (S. 2790) granting a pension to Catharine M. Lee—to the Committee on Invalid Pensions.

The bill (S. 2730) granting an increase of pension to Elizabeth S. De Krafft-to the Committee on Invalid Pensions.

The bill (S. 2797) granting a pension to Lizz'e Wright Owen—to the Committee on Invalid Pensions.

The bill (S. 2868) granting a pension to Mary Ann Dougherty—to the Committee on Invalid Pensions.

DEATH OF VICE-PRESIDENT HENDRICKS.

The SPEAKER also laid before the House the following concurrent resolution of the Senate:

Resolved by the Senate (the House of Representatives concurring), That the proceedings of the Supreme Court, as they appear on page 707 of volume 117 of the Supreme Court Reports, on the death of Thomas A. Hendricks, late Vice-President of the United States, be printed with the memorial addresses already authorized by Congress.

Mr. HOLMAN. That seems to be a very proper resolution, and I ask that it be disposed of now.

Mr. RANDALL. There is no objection to that.

The concurrent resolution was agreed to.

Mr. HOLMAN moved to reconsider the vote by which the concurrent resolution was agreed to; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

LOANS AND CURRENCY.

The SPEAKER also laid before the House a concurrent resolution of the Senate providing for printing a compilation of the laws of the United States relating to loans and currency, &c.; which was referred to the Committee on Printing.

PUBLIC BUILDING, OWENSBOROUGH.

Mr. LAFFOON. Mr. Speaker, a few moments ago I asked unanimous consent to consider the bill (S. 1536) providing for the purchase of suitable grounds in the city of Owensborough, in the State of Kentucky, for the erection of a public building, which request was objected to by the gentleman from Indiana [Mr. BYNUM]. I understand he now desires to withdraw his objection.

The SPEAKER. The gentleman is in his seat.

Mr. BYNUM. I withdraw the objection.

Mr. STORM. Let this bill be read again.

The bill was read at length.

The SPEAKER. Is there further objection to the consideration of the bill?

Mr. REED, of Maine. Before this matter gets beyond the point of objection, I would like to ask the Chairman of the Committee on Public Buildings and Grounds how many unanimous consents have been granted on the other side? It looks to me as if this were all one way?

The SPEAKER. The gentleman will understand that the Chair is simply laying these bills before the House as they come from the Senate; and any gentleman upon the floor on either side has the right to ask consent for their consideration.

Mr. REED, of Maine. Of course I understand that. I am making no reflection whatever upon the Chair.

Mr. HEMPHILL. The gentleman from South Carolina the chairman of the Committee on Public Buildings and Grounds is not present. It appears as though the South is to be pretty Mr. REED, of Maine.

nearly covered with public buildings. Mr. HIESTAND. Has that bill been before the House committee?

This is a Senate bill. The SPEAKER.

Mr. LAFFOON. A similar bill has been before the House commit-

Mr. BURROWS. I gathered from the reading of this bill that there is no United States court held there. I wish to inquire of the gentleman from Kentucky if that is correct, whether there vis a court held there or not?

Mr. LAFFOON. No, sir; they have had no building for one.

Mr. BURROWS. I understand then there is no court. May I ask

what the population is? Mr. LAFFOON. Ab About 15,000.

Mr. SOWDEN. I demand the regular order.

Mr. BURROWS. I do not object

The SPEAKER. The regular order is demanded, which is equivalent to an objection.

LEAVE OF ABSENCE.

Leave of absence was granted by unanimous consent as follows:

To Mr. Cutcheon, on and after Thursday next, for the remainder of
the session, on account of an important engagement.

To Mr. Fisher, indefinitely, on account of sickness.

To Mr. Dibble, for three days, on account of business.

WITHDRAWAL OF PAPERS.

By unanimous consent leave was granted to Mr. Grosvenor to withdraw the petition of Isaac Carleton from the files of the House without leaving certified copies of the same.

IMPROVEMENT OF MISSISSIPPI RIVER.

On motion of Mr. DUNN, by unanimous consent leave was granted to print the following communication:

[The Mississippi River Commission; president's office, Army building, 33 West Houston street.]

NEW YORK, June 11, 1886.

My Dear Sir: In answer to your letter of the 27th of May, and in response the suggestions and questions contained therein, I have the honor to submit

New York, June 11, 1886.

My Dear Sir: In answer to your letter of the 27th of May, and in response to the suggestions and questions contained therein, I have the honor to submit the following:

First. If I understand the river and harbor bill, as it passed the House on the 6th ultimo, those portions of it appropriating \$2,250,000 for the improvement of the Mississippi below Cairo, and defining the authorities under which it shall be expended, are left in a most awkward and impracticable shape. The money is to be expended under direction of the Secretary of War, without the intervention of the Mississippi River Commission, provided that the works on the Lake Providence and Plum Point reaches are to be completed, by whom it does not say; and provided that the commission may build and repair levees as heretofore, as part of the system of improvement.

The commission has also to decide about spending \$100,000 for dredging Vicksburg Harbor. It would be entirely feasible to expend the appropriation in completing the works on the two reaches named, and in carrying on improvements at the several points mentioned below, as exempt from the commission's supervision, namely, New Orleans, Red, Atchafalaya, and Old Red Rivers, Greenville, Memphis, Hickman, and Columbus, and to do all this in such a manner that not a dollar would be available for the two items left in charge of the Mississippi River Commission. There can, of course, be no want of accord between the Secretary of War and the commission, because the latter would most cheerfully accele to any decision the former might make. You will doubtless agree with me, however, that the duties and responsibilities of the commission should be rather sharply defined in the bill, otherwise the friends of the improvement who look for certain results may meet with bitter disappointment in the way the money is allotted. The useful functions of levees in the scheme of improvement have been reaffirmed with more or less emphasis in every report of the commission where they have been

ment is restricted to localities hemmed in by bad river above and below. Two or three additional reaches of shoals and bars should be attacked with the money that first becomes available, with a view to gradually extending the limits of improved navigation. As we already have a fine plant, fully equipped for service, nearly all the money allotted for works of improvement would be applied directly to them.

Third. The provision of the House bill for beginning the rectification of the Red and Atchafalaya would doubtless be satisfactory to the commission if the source of responsibility for expending the \$250,000 were definitely fixed. The members of the commission are in substantial accord with regard to the initial stages of this work, which provide for preventing the further enlargement of the Atchafalaya and restricting its outlet capacity by the construction of six low dams in that stream near its head. These dams ought to be begun at the earliest possible day. The only suggestion I have to make with respect to the work provided for in the House bill at Old Red River, Greenville, Vicksburg, Memphis, Hickman, and Columbus is the same as the one last named, as to the responsibility for devising plans and expending the appropriations. This should not be left in doubt.

Fourth. In submitting the foregoing suggestions, I have tried to avoid the ex-

routh. In submitting the foregoing suggestions, I have tried to avoid the expression or implication of any desire on the part of the Mississippi River Commission to retain any control or supervision over works of improvement on the Mississippi River. They entertain no such wish beyond a laudable desire to see the river improved, but nothing beyond this. I greatly fear that the outlet fallacy, by which it is persistently claimed that destructive floods can be prevented by drawing off the flood waters and conveying them by separate routes to the Gulf, is destined to have a costly and abortive trial at Government expense. The commission has held this great disaster at bay for six years. There never was anything to support it that could withstand the logic of facts for one moment. Its plausibility, however, commends it strongly to many persons, and especially to those whose superficial knowledge blinds them to the essential difference between a clear stream like the Saint John, the Hudson, and the Penobscot, with a firm-bottom capable of resisting erosion and scour, and a sedimentary stream flowing through an alluvial bed of its own creation, like the Missouri and Mississippi. In the cases first named, the opening of an outlet will invariably lower

He plausibility, however, commends it strongly to many persons, and especially to those whose superficial knowledge bilinds them to the essential difference between a clear stream like the Saint-John, the Hudson, and the Penobscot, with a firm-bottom capable of resisting crosson and soon, and a sedimentary stream flowing through an alluvial bed of its own creation, like the Missouri and Missouri and Missouri them to the property of the current in a sedimentary stream is diminished from any cause or at any stage of the river, a dechannel depths can ensue from the diminished velocity in the main stream. It is an undeniable fact that whenever the velocity of the current in a sedimentary stream is diminished from any stage of the river, a dechannel depths and the property of the current in a sedimentary streams flowing through alluvial beds, and its operation has enabled us, on the Pinnb Point and Lake Providence reaches, to narrow the water way and build up new banks and new shore lines by means of permeable dikes, which check the current without deflecting or arresting it. It is equally true, and has been thoroughly verified by instrumental measurements, that the immediate can develop the property of the stream strange, due to a diminition of volume; but this condition of lowered flood surface is temporary; it will last until the sectional area of the bod of the stream is so far reduced by the fill or shoaling referred to as to render it incapable of carrying even the diminished volume except structive overflow. In other words, the stream below the outlet was made being smaller, all its elements, including its channel depth, are correspondingly smaller. If the outlet remains open the fill below goes on until an equilibrium is restored with the reduced channel below the outlet and a velocity capable of carrying the structure of coverflow. In other words, the structure of c

therefore, the not extraordinary flood of 1880 came, it encountered a big bar in the main stream, and one outlet partially closed, and therefore rose to a higher level in effecting a discharge than it otherwise would have done.

Fifth. The bill before Congress to make the Lake Borgne outlet, in order to improve the low-water navigation of the Mississippi River from New Orleans, La., to Cairo, Ill., is no novelty. The idea was advanced by Charles Ellet, jr., in 1852, was afterward discussed, by Humphreys and Abbot, and rejected by them as impracticable. It was again investigated by the Levee Commission in 1875, and by the Mississippi River Commission in 1880, and rejected by both. Evidence based on measurements proved that the effects of an outlet are never felt more than about 100 miles above. On this head attention is invited to the report of the board of engineers on the low-water navigation of the Mississippi River below Cairo, in which they say of the great Bell crevasse, which occurred just above New Orleans, on the right bank, in 1853:

"Its maximum discharge occurred August 1-17, and was 80,000 cubic feet per second. This lowered the water surface 1.5 feet at its site, and produced no sensible effect at Baton Rouge, 124 miles above. The Red River and Raccourci cutoffs, which shortened the Mississippi 39 miles, near the mouth of Red River, lowered the high-water mark there 4.6 feet in the flood of 1851. This beneficial effect diminished rapidly at points higher up, and was not felt at all at a distance of 100 miles."

Even the influence of the Gulf tides upon the river at high stages is not felt.

of 100 miles."

Even the influence of the Gulf tides upon the river at high stages is not felt above the mouth of Red River, 315 miles distant. Numerous additional instancemight be cited on this point, but are deemed unnecessary. In view of the cares ful observations that have been made, very few will question the correctness of the statement that "the effect of lowering the river surface at a given point dies out rapidly in ascending."

A scheme which, by means of a simple outlet at Lake Borgne, proposes, as this does, to improve the channel of navigation over the shoals as high up as Cairo, 970 mil.s distant, and protect the valley lands of the Mississippi River and tributaries from overflow, must be regarded as visionary in the last degree. I can not believe that a single hydraulic engineer of respectable standing in his profession can be found among its advocates.

We have seen that Cubit's Gap or crevasse occasioned an average fill in the main stream below, amounting to nearly one-seventh of the flood river section, over an area of 2½ square miles. Evidence of the same character is furnished by other outlets and cut-offs.

The Bell crevasse, 2 miles above New Orleans, and the Lebranche crevasse, 20 miles higher up, both on the right bank, occurred in 1858. Mr. G. W. R. Bayley says:

20 miles higher up, both on the right bank, occurred in 1858. Mr. G. W. R. Bayley says:
"Soundings taken by A. S. Phelps, in 1856, across the Mississippi River opposite the upper line of New Orleans, established the fact that 120 feet was the maximum river depth then at that point. Again, in February, 1859, Messrs. Phelps and D'Hernecourt found the maximum depth to be 78 feet."
Mr. Bayley further says:
"The mean depth in February, 1859, below both of these crevasses, and before the river had again risen to its ordinary high-water mark, was ascertained to be 42 feet less than in 1856, and beyond question the diminution was caused by the two great outlets of 1858."

The great Bounet Carré crevasse took place in 1850, attaining a width of nearly 7000 feet and discharging over 100 000 cubic feet per second. On the 30th of July

the river had again risen to its ordinary high-water mark, was ascertained to be 42 feet less than in 1856, and beyond question the diminution was caused by the two great outlets of 1858."

The great Bounet Carré crevasse took place in 1850, attaining a width of nearly 7,000 feet and discharging over 100,000 cubic feet per second. On the 30th of July, after the fall of the river, examinations by Professor Forshey and others showed that the section of the river below the crevasse had 12 feet less mean depth than the section above. As there were no soundings taken here before the crevasse occurred, the evidence is not conclusive that the shoal was caused by it; but a comparison of the surveys of 1882 and 1883, the former of which was made before and the latter after the crevasse was closed, shows that a scour below the site of the crevasse of approximately 12 per cent. of the low-water area promptly followed the closing of this outlet, and can not be attributed to any other cause. The history and effects of Cubit's Gap or crevasse have been described at some length, for the reason that the conditions accompanying and surrounding it are essentially the same as those which will be produced by an outlet at Lake Borgne. We are not justified in looking for exemption from any of the threatening and unpromising results developed in the parallel case. There will be gradual and progressive shoaling in the main stream below the outlet, and there will be a gradual closing of the outlet itself, from natural bank-building and delta-forming processes, carried on after the mischief has been accomplished in the main stream. An ordinary flood arriving at that time will find opposed to its discharge not only a contracted river, but a contracted and contracting outlet also. These two causes, acting in conjunction, as they would in all cases, might convert into a damaging overflow a flood which would have passed off harmlessly before the outlet was formed.

There is no room for doubt that the first or initial effect of an outlet of

of the Mississippi River. Its low-water navigation would then be improved, &c.

On this it may be remarked that one of the leading points to be settled by the outlet experiment is whether or not a Lake Borgne outlet will produce an improvement in low-water navigation for nearly a thousand miles up-stream, and the assertion that it will seems to be begging the whole question. I feel quite certain that it will have no such result, and there are few, if any, hydraulic engineers of experience and standing who will not concur with me in this view.

The committee quotes General A. A. Humphreys, Chief of Engineers, United States Army, as saying that "if outlets are to be made, Lake Borgne is the place to try them." This was only General Humphreys's choice of the least of several evils. It is known that he was opposed to outlets, and he is on record officially and unofficially to that effect.

The committee also state that—

"The revetment and abutment systems of the river commission, at an expense of about \$3,000,000, have resulted equally disastrous," &c.

In reply to this I have to state that the plan of the Mississippi River Commission has not in any sense been a failure or resulted disastrously. Two of the worst stretches of the river, where there was only 4½ to 5 feet of water over a length

of 70 miles before the commission began its work, have been improved so that there is a continuous low-river channel 15 feet deep through one reach and 12 feet through the other. The entire cost of the works below Cairo, including the first cost and maintenance of plant, less its present value, but not including the cost of levees, has been less than \$5,000,000. The aggregate loss and damage of works amounts to 24 per cent. of their cost, which can not be considered unreasonable, in view of the novel character of the work.

The committee further say that—
"By opening that outlet the water of the river will reach the same ocean level in only 10 miles, whereas by the jetties the same river reaches the same ocean level by coursing 110 miles. That fact seems the only argument necessary."

I concur in this last stated opinion, but the argument proves that the outlet should not be made, for the steep slope at high water, between the river and the lake, amounting to 2½ feet per mile, would be most disastrous in its effects, and the outlet would be impracticable as a channel for navigation.

Very respectfully, your obedient servant,

Q. A. GILLMORE,

Q. A. GILLMORE,

Col. Engs., Bvt. Maj. Gen. U. S. A., Pres. Miss. River Commission.

Washington, D. C.

FORFEITURE NORTHERN PACIFIC LAND GRANT.

The SPEAKER announced as the conferees on the bill (H. R. 2172) forfeiting lands granted to the Northern Pacific Railroad Company Mr. Cobb, Mr. Van Eaton, and Mr. Payson.

ENROLLED BILLS SIGNED.

Mr. FISHER, from the Committee on Enrolled Bills, reported that the committee had examined and found duly enrolled bills of the following titles; when the Speaker signed the same:

wing titles; when the Speaker signed the same:
A bill (H. R. 3551) granting a pension to George W. Culter;
A bill (H. R. 3851) granting a pension to William P. Shelton;
A bill (H. R. 3948) granting a pension to James F. Salyers;
A bill (H. R. 4032) granting a pension to John McGowan;

A bill (H. R. 5041) granting a pension to Sallie A. Stone; A bill (H. R. 5389) granting a pension to Ann Kinney

A bill (H. R. 5950) granting a pension to Catharine Reisinger; A bill (H. R. 6425) granting a pension to Jonathan S. Lents;

bill (H. R. 6606) granting a pension to Sallie B. Bent; bill (H. R. 6824) granting a pension to James Savercool;

A bill (H. R. 6824) granting a pension to James Savercooi;
A bill (H. R. 7163) granting a pension to Peter Adams;
A bill (H. R. 7169) granting a pension to James Robinson;
A bill (H. R. 7234) granting a pension to Susan Hawes;
A bill (H. R. 7244) granting a pension to Robert B. Kirkpatrick;
A bill (H. R. 7517) for the relief of Warren L. Rice;
A bill (H. R. 7712) granting a pension to Virginia Taylor Randall;
A bill (H. R. 7721) granting a pension to Virginia Taylor Randall;

A bill (H. R. 7721) granting a pension to Virginia Taylor Randal A bill (H. R. 7728) granting a pension to Ellen J. Welch; A bill (H. R. 7728) granting a pension to Mrs. Elizabeth Collins; A bill (H. R. 7736) to increase the pension of George W. Parks; A bill (H. R. 7749) granting a pension to Aretus M. Butler;

A bill (H. R. 8046) granting a pension to Erastus W. Kennedy; A bill (H. R. 8057) for the relief of Theodore Dunmire;

bill (H. R. 8333) granting a pension to Lucinda Sawyer;

A bill (H. R. 8334) for the relief of Jacob Nix;

A bill (H. R. 8352) for the relief of Levi A. Cronkhite;

A bill (H. R. 8374) granting a pension to Mrs. Mary M. Gillham; A bill (H. R. 8556) granting a pension to Abraham Points;

A bill (H. R. 8635) granting a pension to Irene Googins; A bill (H. R. 8663) to increase the pension of Jonas Schoonover; A bill (H. R. 8963) granting a pension to Michael Fitzpatrick; A bill (H. R. 8977) to restore to the pension-roll the name of Samuel

Bulman:

A bill (H. R. 9050) granting an increase of pension to Capt. John F. Morris; and
A bill (H. R. 9457) granting a pension to Martin V. Curry.
Mr. NEECE, from the Committee on Enrolled Bills, reported that the

committee had examined and found duly enrolled bills of the following titles; when the Speaker signed the same:

A bill (H. R. 260) for the relief of Margaret S. Fain; A bill (H. R. 578) for the relief of Emma J. Halloway; A bill (H. R. 658) for the relief of Francis W. Haldeman;

A bill (H. R. 887) granting a pension to Thomas S. Duvall; A bill (H. R. 1249) for the relief of Margaret F. Ryan; A bill (H. R. 1511) for the relief of Sidney R. Smith;

bill (H. R. 1584) for the relief of Aurelia C. Richardson;

A bill (H. R. 1617) for the relief of George H. Laurence; A bill (H. R. 1681) for the relief of William Hicks; A bill (H. R. 1802) for the relief of Moses B. Walker;

A bill (H. R. 1802) for the relief of Moses B. Walker;
A bill (H. R. 2027) granting a pension to Joshua Armstrong;
A bill (H. R. 2475) to amend an act approved May 25, 1882, entitled
"An act for the construction of a public building at Galveston, Tex;"
A bill (H. R. 2964) to restore to the pension-list the name of Abel

Mishler, of Pennsylvania;
A bill (H. R. 3118) granting an increase of pension to William H.

A bill (H. R. 4503) to authorize the Secretary of War to permit the Carrollton and Lock Number One Turnpike Road Company to locate and construct its road on land belonging to the United States at lock
No. 1, on the Kentucky River, in the State of Kentucky;
A bill (H. R. 5552) for the relief of James Cain;
A bill (H. R. 5872) for the relief of R. D. Beckley and Leon Howard;
A bill (H. R. 8481) granting a pension to Thomas Walsh; and

A bill (H. Res. 138) to print 10,000 copies of the Report of the Commissioner of Agriculture on the International Sheep and Wool Show held in Philadelphia in September, 1880.

ORDER OF BUSINESS.

Mr. SPRINGER I ask unanimous consent that there be considered at this time a resolution that on Thursday, July 29, the House take a recess at 5 o'clock p. m. until 8 o'clock p. m.; the evening session to be devoted to the consideration of Senate bills on the Private Calendar to which there may be no objection, and the session not to continue beyond 11 o'clock p. m.

Mr. RANDALL. I object, until the appropriation bills have been

taken care of.

Several members called for the regular order.

The SPEAKER. The regular order is the call of committees for re-

Mr. RANDALL. I move to dispense with the morning hour for the call of committees.

The motion was agreed to, two-thirds voting in favor thereof.

LEGISLATIVE APPROPRIATION BILL.

Mr. HOLMAN. I desire to submit as a privileged question the report of a committee of conference.

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 8974) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes, having met, after full and free conference have been unable to agree.

WM. S. HOLMAN,
GEO. C. CABELL,
J. G. CANNON,
Managers on the part of the House.
W. B. ALLISON,
H. L. DAWES,
F. M. COCK RELL,
Managers on the part of the Senate.

The SPEAKER. The rule does not require any statement when

Mr. HOLMAN. The report merely presents the same facts which I submitted to the House a few days ago. The conferees have found it impossible to agree on the first subject of disagreement, the item for clerks for Senators who are not chairmen of committees. As has been stated to the House twice already, I think there is no material difference between the conferees of the two bodies in regard to the other two amendments. The stumbling-block is the Senate provision appro-priating \$23,250 for clerks for Senators. The conferees upon the part of the Senate will not consent to yield that point. I believe this is the third time that this report has been made to the House that the conferees are not able to agree. I mentioned also on a former occasion the fact that this bill materially reduces the number of employés in the Departments, so that there is necessarily a loss of several thousand

dollars every day this bill fails to go into effect.

Mr. WILLIS. How many?

Mr. HOLMAN. I can not state at this moment, but several thousand dollars are lost every day by the failure of the two Houses to agree upon this bill.

Mr. BLOUNT. You mean by the failure to put into effect the reduction in the force which the bill would make.

Mr. HOLMAN. Yes. The bill effects a material reduction in the number of employés, and of course in the amount required for their compensation; but, necessarily, the basis of expenditure is present law until there is further legislation. I have always heretofore held, as a member of the House, that the Senate provision, which has been now upon the appropriation bills for three successive years, once as a part of the contingent fund of the Senate and twice as an independent poposition, was subject to severe criticism, inasmuch as it is an indirect method of increasing the compensation of Senators, and I have thought heretofore that the House should not recede from its disagreement. Nevertheless the House has uniformly receded, and it would appear that this bill can not become a law unless the House recedes in this case, the conferees on the part of the Senate asserting that this is an item affecting solely that branch of the public service, and that the views of Senators should be regarded in the matter, inasmuch as they do not interfere with the action of the House in making provision for its own employés. is further stated, also, that the Senate has been all along a unit on this subject and is so still, and that this bill can not pass unless the House yields the point.

Mr. REED, of Maine. Have the conferees agreed upon everything

Mr. HOLMAN. Substantially.
Mr. REED, of Maine. Then why not put the disagreement upon that point, and let us see if the Senate will make an extra session on account of it.

Mr. HOLMAN. That is exactly where we want to put it, but my friend is sufficiently familiar with the course of transactions between the two Houses to know that in a case like this neither body permits the question to come directly upon one single point, and as a matter of 1

course we can not agree upon the other two points of difference so as to report an agreement to the House and Senate while this provision

stands undisposed of.

Mr. REED, of Maine. Agree on the others and try that.

Mr. HOLMAN. The Senate declines considering the other two unless this also is considered; but there is no substantial disagreement as to the others.

Mr. PAYSON. What are the other two points?
Mr. HOLMAN. One is the increase of the appropriation for gaugers, storekeepers, and other employés of the Internal Revenue Bureau, and the other is the appropriation of \$10,000 to provide for collecting statistics of marriage and divorce.

Mr. CUTCHEON. What is the amount involved in this amend-

ment?

Mr. HOLMAN. Twenty-three thousand two hundred and fifty dollars, I think

Mr. CUTCHEON. And about what is the daily loss which the gentleman says is sustained by the failure of this bill to go into effect?

Mr. HOLMAN. I have not had time to ascertain the exact amount,

Mr. HOLMAN. Have not had this baseliant the baseliant but it is several thousand dollars daily.

Mr. PAYSON. How is there any loss?

Mr. HOLMAN. By the fact that this bill materially reduces the number of employés in the service of the Government, and that that

reduction is delayed by our failure to pass the bill.

Mr. DUNN. Is the gentleman from Indiana [Mr. HOLMAN] will-

ing to make the motion that the House recede?

Mr. HOLMAN. I wish to say this—

Mr. DUNN. I hope the gentleman will supplement his speech with a motion to recede.

Mr. HOLMAN. The gentleman sees very clearly that I think that

is the proper course to pursue. I have no concealment about it.

Mr. DUNN. I am satisfied that if the gentleman will make the
motion the House will recede, but I do not think it will until he does make the motion.

Mr. WARNER, of Ohio. If the committee recommend that the House recede and the gentleman makes the motion—
Mr. HOLMAN. The committee does not recommend it. On the

contrary, a portion of the conferees on the part of the House are op-posed to the House yielding this point. I have stated why I think it should be done, but it has not been the custom for the conferees in either House to make such a motion. I voted yesterday in favor of the House receding and will so vote again.

Mr. DUNN. I think the House will sustain the gentleman from Indiana if he will make the motion to recede.

Mr. HOLMAN. Oh, well, Mr. Speaker, the gentleman suggests that as a matter of form I make the motion to recede, and accordingly make the formal motion for the purpose of testing the sense of the House

Mr. WILSON. Mr. Speaker, when the last vote was taken on the motion to recede from our disagreement on this point I voted in favor of receding, although in all previous votes on this subject cast in the last Congress and in this I had voted to insist upon the disagreement.

Mr. WARNER, of Ohio. That is true of many others also.
Mr. WILSON.. I understand the report made by the chairman of
the committee of conference to be this: That although the country is losing several thousand dollars every day by this protracted disagreement notice has been practically served upon the House conferees, and through them upon the House, that unless the House will recede from its disagreement to this small item that great bill for the expenses of the legislative, executive, and judicial departments of the Government shall by the action of the Senate fail. Now, when that issue is tendered to the House I for one am in favor of accepting the issue; and I rise now to move that the House instruct its conferees to recede from the disagreement as to the other two items of difference between the two Houses, and thus reduce the matter of disagreement to the single one upon which the Senate insists; and then let us understand whether the Senate is willing that the legislative, executive, and judicial ap-propriation bill shall fail at this session if we do not concede this matter which Senators ask for their own personal convenience.

Mr. HOLMAN. The House can not properly recede as to the two matters which the gentleman from West Virginia [Mr. Wilson] indicates. The appropriation proposed by the Senate for the Internal Revenue Bureau is believed to be largely beyond what is required; and I feel authorized to say that the Senate would recede to the extent of \$80,000 upon that item. The increase proposed by the Senate amendment is \$150,000; but I think I can say with entire safety that there will be no trouble in coming to an agreement upon the basis of the Senate receding to the extent of \$80,000 and the House assenting to

that modification of the Senate amendment.

I therefore think the proposition that the House shall recede from its disagreement as to those two amendments, leaving pending alone the amendment in regard to clerks of Senators, is not a practical solution of the difficulty. The House, it seems to me, can not properly yield the point as to the amount to be appropriated for the Internal Revenue Bureau; at least that is the judgment of the majority of the conferees

on the part of the House.

I will yield now for a few moments to the gentleman from Virginia

Mr. BURROWS. Before the gentleman from Indiana takes his seat, allow me to say I think there is some misunderstanding in this part of the Hall. Some gentlemen here understand the gentleman from Indiana to move that the House recede from its position with regard to

Mr. HOLMAN.

That is my motion.

The gentleman makes that motion.

The SPEAKER. Mr. RANDALL. The motion is that the House recede from amendments numbered 2 and 17.

The SPEAKER. Amendments numbered 2 and 17.

What course does the gentleman from Indiana Mr. McMILLIN. propose shall be taken with regard to the other two amendments?

Mr. HOLMAN. As to those I hope the House will further insist. Mr. Speaker, I feel that I am occupying time which ought to be devoted to other business. I will therefore ask my friend from Virginia [Mr. CABELL] how much time he wishes.

Mr. CABELL. Three minutes will suffice. Mr. HOLMAN. I yield to the gentleman I yield to the gentleman for that time.

Mr. CABELL. Mr. Speaker, I merely wish to call the attention of the House to the fact that one of these matters of disagreement between the Senate and House conferees has been twice voted upon by the House. The House, I take it for granted, understands that perfectly. I think there is a likelihood of our agreeing upon that question; and I do not think that my friend from West Virginia [Mr. WILson], a member of the Committee on Appropriations, ought to make the motion which he has indicated, that we recede from the amendment relating to internal-revenue agents, &c. I think the conferes can come together. Certainly the House at this stage of proceeding ought not to order us to recede from the remaining amendments before another attempt has been made to reach an agreement.

The House knows perfectly well my ideas as one member of the conference committee upon the amendments with regard to clerks to Senators. I do not think we ought to agree to those amendments; and I have not yielded on that point, nor do I intend to do so unless in-

structed by the House.

Mr. WILSON. I understood the gentleman from Indiana to say that the Senate conferees would not consider the other two matters of dis-

agreement until that point had been conceded.

Mr. HOLMAN, The other two matters have been substantially

agreed upon, though not formally.

Mr. CABELL. After the consultations we have had, the point of disagreement now is substantially in regard to clerks to Senators; and we come to the House now and ask the House to instruct us upon that question, because the House conferees do not altogether agree upon it. For myself, as I have said, I am against yielding to the Senate.

Mr. HOLMAN. I yield five minutes to the gentleman from Georgia

[Mr. BLOUNT].

Mr. BLOUNT. Mr. Speaker, it does seem to me we have taken up enough time about this matter, and that there are other important measures which the country would like to see considered. The gentleman from Texas [Mr. REAGAN] has in charge the interstate-commerce bill; the Committee on Public Lands have important reports ready for consideration. There are various questions which ought to be considered by the House, and which are kept back for no practical purpose, because, I take it, every gentleman on this floor who has been here for any considerable length of time understands perfectly well that we are ultimately to concede the demand of the Senate in reference to these

Mr. HOPKINS. Will the gentleman yield for a question?
Mr. BLOUNT. I do not want to answer questions. I rose to state briefly the reasons for my course in reference to this question, and I trust gentlemen will not interrupt me.

No gentleman on this floor has been more persistent than the gentleman from Indiana in attempting to keep out of the appropriation bills the addition of clerks to Senators. Nobody knows better than that gentleman how useless this struggle is. It has been with more reluctance he has yielded than any other gentleman would have had in this

The gentleman has already stated, finding himself in this situation, that the postponement of the enactment of this bill into law was costing every day more than the amount contended for on account of the delay in the reduction of the number of employés, and the gentleman from Indiana has stated to the House that he felt it to be his duty from that standpoint, as well as from the other, that there was no hope from past experience of the two Houses that anything would come from it but failure. He was not willing longer to continue the struggle. And for one, sir, I am not willing to continue it.

The gentleman from West Virginia [Mr. Wilson] has stated he would be to continue to the struggle.

not consent to a motion to recede on the question and wanted to make a square issue with the Senate on the question of the Senate employés. He asserts his determination is to stand to it if the Senate shall throw down the gage. I am not willing to do it even if the Senate are willing to throw down the gage.

Mr. WILSON. I voted to recede.

Mr. BLOUNT. Yes; I understand. I am not willing to do it if the Senate shall throw down the gage. I am not willing to take every gage which may be thrown down. I want the House to stand by the gentleman from Texas [Mr. REAGAN], so that he may be able to take up and have acted upon the interstate-commerce bill, or in order that the Public Lands Committee may take up some other measure of importance. I am willing to do that, and not trifle away the time of the House, for it is neither more nor less than that.

I care not whether somebody thinks he will be able to find in the record somewhere that it will disclose I have voted to allow these salaries. aries. My position I have taken and acted on as far as I could consistaries. My position I have taken and acted on as far as I could consistently. Whatever it has been, I am not now willing to trifle away the time of the House. I am not willing to say, as the gentleman from Arkansas [Mr. Dunn] has said, that if the gentleman from Indiana will move to recede the House will go with him. I am not disposed to follow any such suggestion, and I do not care from whence it comes or by whom the motion may be made.

Mr. REED, of Maine. I am glad to find that gentlemen on the other

side have grown so harmonious. [Laughter.]

Mr. TOWNSHEND. Mr. Speaker, what is the question before the

House? [Laughter.]
The SPEAKER. The gentleman from Indiana moves that the House recede from the disagreement to the amendments of the Senate num-

bered 2 and 17, and agree to the same.

Mr. TOWNSHEND. But what does it do with the other?

The SPEAKER. The House insists on its disagreement to the other,

and requests a conference.

Mr. WILSON. I withdraw the motion which I made.

Mr. TOWNSHEND. I am glad, Mr. Speaker, that the Senate stands up to their amendment in regard to the appropriation for the revenue.

A MEMBER. They do not stand to it.

Mr. TOWNSHEND. I am glad they firmly stand by that amendment, and I hope they will stand there, for I feel convinced this House has not appropriated a sufficient sum for the efficient carrying on of the internal-revenue system of the country. In a few days undoubtedly the oleomargarine bill will become a law, and there will be thrown upon that Internal Revenue Bureau additional duties and additional expense. The amount appropriated by the Senate for the internal revenue is not more than sufficient to meet the requirements of the service. the purpose, Mr. Speaker, of expressing the hope the House will recede from its disagreement to that Senate amendment concerning the Internal Revenue Bureau.

Mr. HOLMAN. I will yield now for three minutes to the gentleman from Illinois [Mr. CANNON]. [Cries of "Vote!"]
Mr. CANNON. Mr. Speaker, I think if the House will consider this matter for a few moments we may save, possibly, a good deal of time.

A MEMBER. And money.

Mr. CANNON. Yes; and money. It is a great bill, which has to pass in some shape or the other before we adjourn. If it is not passed we must extend the law until the next session as we have done during the present month.

In view of that necessity I thought it well to take up the time of the House for a few moments. Now this matter of clerks for Senators had its inception in the first session of the Forty-seventh Congress by the payment of those clerks from the contingent fund of the Senate. House, when it came to appropriate for the contingent fund of the Senate, refused to do it unless the Senate would put in specifically that it was for the payment of clerks for Senators. The Senate did it.

Mr. REED, of Maine. I do not think the gentleman is substantially

Mr. CANNON. It is substantially correct. From that time to this the appropriation has been made specifying in each case the appropriation was to pay these clerks for Senators, until the present Congress. The Senate regarded this matter as one concerning their own business. They are willing the House shall have anything it may deem for its own interest. The Senate is determined to adhere to its position. If it does and the bill fails we will have to pass a resolution continuing the appropriation until the next session, and that continuance of the appropriation will carry along with it the contingent fund, as it has done during the present month, and also provision for the employment and payment of these clerks for Senators. Therefore, while we shall not accomplish anything in this matter by refusing to recede, we shall deprive the country of the benefit of the proposed reduction of employés which this bill carries with it.

Now, I am perfectly willing to admit that I have always felt somewhat mortified at this distinction between the House and the Senate, but I am not altogether prepared to say that it is the fault of the Senate. We have not had the courage to enact proper legislation providing necessary clerical assistance for ourselves. I hope to see the time come when the House, looking to the future so that there can be no backpay grab to scare gentlemen, will insist upon proper legislation in this regard. But I am satisfied that in some shape or other, either in this shape or by continuing the appropriations as now existing until the next session of Congress, there must be the adoption of this bill; and the House will be called upon to recede, so that we had just as well do

it now as hereafter.

The question being taken on the motion of Mr. HOLMAN, that the House recede from its disagreement to the amendments of the Senate numbered 2 and 17, there were on a division—ayes 122, nays 43.

Mr. PAYSON demanded the yeas and nays. The yeas and nays were ordered.

The question was taken; and there were-yeas 143, nays 94, not voting 85; as follows: YEAS-143.

So the motion was agreed to. On motion of Mr. STORM, by unanimous consent the reading of the names was dispensed with.

The following pairs were announced until further notice:

Mr. DAVIDSON, of Florida, with Mr. GALLINGER. Mr. ARNOT with Mr. THOMAS, of Illinois.

Mr. Dawson with Mr. Ranney. Mr. Barksdale with Mr. Davenport.

Mr. BRAGG with Mr. CASWELL.

Mr. Robertson with Mr. Steele.

Mr. Anderson, of Ohio, with Mr. Hanback. Mr. Rogers with Mr. E. B. Taylor, of Ohio. Mr. Barbour with Mr. Libbey.

Mr. THROCKMORTON with Mr. WADSWORTH.

Mr. Harocknorfon with Mr. Wadsv Mr. Hammond with Mr. O'Donnell. Mr. Riggs with Mr. Haynes. Mr. Candler with Mr. Louttit. Mr. Wellborn with Mr. Phelps. Mr. Sadler with Mr. Van Schaick. Mr. Hill with Mr. Houk.

Mr. Dibble with Mr. Milliken, until 31st July.
Mr. Adams, of New York, with Mr. Ketcham, for to-day.
Mr. King with Mr. Baker, for this day.
Mr. Campbell. of Ohio, with Mr. Morrow, for this day.

Mr. MULLER with Mr. ROCKWELL, on this vote.

The result of the vote was then announced as above recorded.

Mr. HOLMAN. I move that the House further insist upon its disagreement to the remaining amendments of the Senate, and agree to a further conference on the same; and on that I demand the previous

question.

Mr. WEAVER, of Iowa. I ask the gentleman to allow me to move to concur in the amendment numbered 179 with an amendment striking out "10,000" and inserting "5,000."

Mr. HOLMAN. I hope that will not be done.

Mr. RANDALL. Let it go into conference as it is.

Mr. WEAVER, of Iowa. Very well; I will not insist.

The motion of Mr. HOLMAN was agreed to.

The SPEAKER appropried the appointment of Mr. HOLMAN Mr.

The SPEAKER announced the appointment of Mr. Holman, Mr. Cabell, and Mr. Cannon as managers at the conference on the part of

Mr. RANDALL. I yield to the gentleman from Missouri to make a motion in reference to the deficiency bill.

DEFICIENCY APPROPRIATION BILL.

Mr. BURNES. I am instructed by the Committee on Appropriations to report back the general deficiency bill with the Senate amendments, numbering 122. In many of these amendments the committee have recommended concurrence. In many others they recommended nonconcurrence. I ask unanimous consent that this bill may now go at once into conference with the amendments specified in the report

The Clerk read as follows:

The Clerk read as follows:

The Committee on Appropriations, to which was referred the bill (H. R. 9726) making appropriation to supply deficiencies in the appropriations for the fiscal year ending June 30,1886, and for prior years, and for other purposes, together with the amendments of the Senate thereto, having considered the same, beg leave to report as follows:

They recommend concurrence in the amendments numbered 1, 2, 6, 8, 9, 19, 29, 37, 38, 39, 40, 41, 42, 44, 47, 48, 68, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 86, 87, 88, 89, 90, 91, 94, 95, 96, 97, 101, 188, and 121.

They recommend non-concurrence in the amendments numbered 3, 4, 5, 7, 10, 11, 12, 13, 14, 15, 16, 17, 18, 20, 21, 22, 23, 24, 25, 26, 27, 28, 30, 31, 32, 33, 43, 33, 43, 44, 46, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 69, 70, 71, 85, 92, 93, 99, 100, 102, 103, 104, 105, 106, 107, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, and 122,

Mr. BURNES. I move the adoption of the report.
Mr. BLOUNT. I ask the gentleman to yield to me for a moment to make a request.

Mr. BURNES. Certainly.

Mr. BLOUNT. I ask unanimous consent to be allowed to print some remarks in reference to the postal administration.
The SPEAKER. On this bill?
Mr. BLOUNT. Yes, sir.

There was no objection, and leave was granted.

The SPEAKER. The gentleman from Missouri [Mr. BURNES] moves that the House agree to the report of the committee. That motion is a proper one unless some gentleman desires separate votes on some of the amendments

Mr. BURROWS. I notice from the reading of the report of the committee that there are something over one hundred amendments. In a portion of these the committee recommend concurrence; to a portion of them they recommend disagreement. I have sent for the bill containing the Senate amendments, and learn that it has not yet been printed.

The House has not the slightest knowledge of what these amendments are; and I must make the point of order that they must have their first consideration in the Committee of the Whole House on the state of the Let the amendments meanwhile be printed and numbered.

The SPEAKER. The gentleman from Michigan makes the point of order that the Senate amendments must have their first consideration in the Committee of the Whole House on the state of the Union. The Chair thinks an order was made to print the Senate amendments.

Mr. BURNES. An order was made to print them, and the amend-ments have been printed and are before the House now, printed and

numbered as completely as they can be.

The SPEAKER. The gentleman from Michigan [Mr. Burrows] makes the point of order, and the Chair sustains it.

EVIDENCE IN CERTAIN STATE CLAIMS.

Mr. TUCKER. I present the report of a committee of conference. The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (8, 71) "for the benefit of the States of Texas, Colorado, Oregon, Nebraska, California, Kansas, and Nevada, and the Territories of Washington and Idaho, and Nevada when a Territory," having

met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendments numbered 1 and 3 and agree to the same.

That the Senate recede from its disagreement to the amendment numbered 2, and agree to the same with the following amendment: Strike out all after the word "copy," in line 14, down to and including the word "evidence," in line 18, where it occurs a second time, and insert in lieu thereof the words "of such paper may be certified by the proper officers of such State or Territory under their seals of office, or, if such copy can not be furnished, any other competent secondary evidence of the contents of such paper;" And add at the end of the section the following words: "All provisions of this section applicable to States shall be equally applicable to the Territories;" and the House agree to the same.

J. R. TUCKER,

D. B. CULBERSON,

L. B. CASWELLI,

Managers on the part of the House.

J. N. DOLPH,

J. N. DOLPH, JNO. C. SPOONER, GEO. GRAY, Managers on the part of the Senate.

The statement of the conferees on the part of the House was read, as

follows:

House of Representatives, United States,
Washington, D. C., July 14, 1886.

The undersigned, managers on the part of the House, make the following statement in respect to the conference report on Senate bill No. 71:

First. The Senate disagreed to the amendment of the House numbered 2, which restricted the latitude in admitting evidence in these cases allowed by the Senate bill; and recede from the disagreement upon condition that a copy of an original paper be admissible when certified under official seals by the proper officers of State or Territory; and if such copy can not be given, then that competent secondary evidence of the contents be admitted. With this limitation, the undersigned agree with the Senate.

Second. By verbal omission in the original text of the bill the word "Territories" was omitted after the word "States," and the benefit of the bill might by construction have been denied to Territories. Hence the added words, which have Senate propose as a condition of receding from its disagreement.

The Senate recede from their disagreement to amendments numbered 1 and 3 of the House and agree thereto.

And the undersigned recommend to the House the adoption of the conference report herewith presented.

J. R. TUCKER

J. R. TUCKER. L. B. CASWELL. D. B. CULBERSON.

Mr. HOLMAN. I hope there will be a word of explanation. I do not understand from the reading of the report and the statement the force and character of the bill as it stands now.

Mr. TUCKER. The gentleman from Indiana [Mr. Holman] is aware that this bill passed the Senate, having reference to the claims of the State of Texas and other States and a number of Territories against the United States for expenditures in matters of military operation. The bill provides for the settlement of those accounts, and the disagreement between the two Houses was upon the question of the evidence that might be adduced in reference to the claims. The bill as amended by the House provided that certain papers other than original papers might be introduced as evidence. The result of the conference is that the only thing that is now admissible is the original paper in reference to the claim, which shall be certified by the proper officer, and if that can not be furnished, then secondary evidence of the contents of the paper shall be admitted.

Mr. HOLMAN. I would ask the gentleman how many States does this apply to and how far back does it go?
Mr. TUCKER. It goes pretty far back. It applies to the States of Texas, Colorado, Oregon, Nebraska, California, Kansas, and Nevada, and the territories of Washington and Idaho, and Nevada when a Territory. And it applies to claims arising under acts of Congress approved July 27, 1861, and June 27, 1882.

Mr. HOLMAN. These are claims arising out of Indian wars? Mr. TUCKER. Yes, sir.

Mr. REAGAN. An amendment to this bill was made by the Senate, appropriating \$10,000 to aid in the investigation of claims of various States for the expenses incurred in the public defense. I understand there is a recommendation of non-concurrence.

Mr. TUCKER.

Mr. TUCKER. Oh! no.
Mr. REAGAN. I trust it will be the pleasure of the committee not to non-concur.

Mr. TUCKER. This is a conference report in which we agree. The Senate has already adopted it, and it is here for adoption now.

The report of the conference committee was agreed to.

Mr. TUCKER moved to reconsider the vote by which the report was agreed to; and also moved that the motion to reconsider be laid on the

The latter motion was agreed to.

SUNDRY CIVIL APPROPRIATION BILL.

Mr. RANDALL. I ask consent of the House to consider the Senate amendments to the sundry civil appropriation bill in the House as in Committee of the Whole.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent that the Senate amendments to the sundry civil appropriation bill be considered in the House as in Committee of the Whole. Is there

Mr. REED, of Maine. I object, if I understand the request cor-

in the House as in Committee of the Whole. I do not see that it makes any particular difference; and I do not know why the gentleman from Maine objects.

Mr. REED, of Maine. If the gentleman does not intend to use the difference of forms to lessen the amount of discussion, all right. If

we can have that understanding, I will not object.

Mr. RANDALL. It is not my intention to restrict reasonable dis-But it is quite evident I am in duty bound to endeavor to cussion. But it is quite evident I am in day bound to chack to abridge discussion within strictly reasonable limits. I do not make this request with any view of cutting off discussion.

Mr. REED, of Maine. I do not make the objection.

Mr. RANDALL addressed the Chair.

Mr. HEPBURN. I did not understand that the gentleman from Maine had withdrawn the objection. I renew it.

Mr. RANDALL. I think that comes too late. I had taken the

Mr. HEPBURN. I was under the impression the gentleman from Maine had made the objection and insisted on it.

Mr. RANDALL. There will be no advantage taken of the gentleman, I assure him.

Mr. REED, of Maine. The gentleman from Iowa [Mr. HEPBURN] had no opportunity to hear my withdrawal. I had made the objec-tion, and he did not know that I had withdrawn it. I spoke in a low tone of voice, not thinking that anybody else was disposed to insist

upon the objection. Mr. RANDALL. I assure the House that there is no purpose on

my part at least to abridge discussion.

Mr. REAGAN. I hope there will be no assurance given by the gentleman from Pennsylvania that will enable other gentlemen to waste the balance of the time of this session upon this bill to the exclusion of other measures.

The SPEAKER. The Chair will entertain the objection of the gentleman from Iowa [Mr. HEPBURN] upon his statement that he did not know that the objection of the gentleman from Maine [Mr. REED] had been withdrawn, and that if he had known it he was ready to object

Mr. RANDALL. Then I move that the House resolve itself into Committee of the Whole for the consideration of the Senate amendments to this bill.

The motion was agreed to.

The House accordingly resolved itself into Committee of the Whole, Mr. BLOUNT in the chair.

The CHAIRMAN. The House is now in Committee of the Whole for the purpose of considering the Senate amendments to the sundry

or the purpose of considering the Senate amendments to the sundry civil appropriation bill.

Mr. RANDALL. I desire to say to the committee that there are two hundred and forty-three of these amendments. The net addition made to the bill by the Senate amounts to \$3,106,850.08. The bill as it passed the House appropriates \$21,311,525.24. The bill as it passed the Senate appropriates \$24,413,375.32. The first forty-five amendments related appropriates \$24,413,375.32. The first forty-five amendments related appropriates \$24,413,375.32. ments relate to public buildings under the Treasury Department, and I think that time would be saved if the committee would from time to time in the consideration of this bill group the amendments which relate to particular subjects. I now ask that the Clerk be allowed to read the first forty-five amendments, all relating, as I have said, to public buildings under the Treasury Department. I shall then have a motion to make as to the action of the committee upon those amend-

Mr. ADAMS, of Illinois. I desire to ask the gentleman from Pennsylvania whether it will be necessary for gentlemen desiring action on amendments to call the attention of the committee to each amendment as it is read? I desire to occupy two or three minutes in calling attention to a particular amendment, and I do not desire to be cut off by a technical objection.

Mr. RANDALL. I do not design to take any advantage or to restrict any member of the House in any particular in discussing this bill, but it occurred to me that time would be saved by considering the amendments relating to particular subjects in groups, as I have suggested.

Mr. ADAMS, of Illinois. I do not object to that, and I shall not delay the committee more than two or three minutes.

Mr. HEPBURN. It seems to me, Mr. Chairman, that the better course to pursue is to follow the usual order prescribed by the rules. The Clerk read the first amendment in the paragraph providing for repairs to custom-house and post-office at Buffalo, N. Y., as follows:

Strike out "for approaches complete, exclusive of iron fence, \$5,000," and insert "for repairs to building and sidewalk, \$16,000."

Mr. RANDALL. The committee recommend non-concurrence in that amendment.

Mr. FARQUHAR. I move concurrence in the amendment of the Senate.

The amendment was non-concurred in. Amendments numbered 2, 3, and 4 were non-concurred in. Amendment numbered 5 was read, as follows:

Mr. RANDALL. I ask to have the Senate amendments considered S55,000." For custom-house and post-office at Chicago, Ill., for extra repairs,

Mr. ADAMS, of Illinois. What is the recommendation of the committee as to that amendment?

Mr. RANDALL. The committee recommend non-concurrence.
Mr. ADAMS, of Illinois. I want to bring to the attention of the committee this particular amendment. I am perhaps to blame for not having endeavored to have it incorporated in the bill before it left the

Mr. TOWNSHEND. If my colleague will allow a suggestion, I had myself intended to move concurrence in this amendment in the Committee on Appropriations, but it was thought best to let all these amendments relating to public buildings go into conference. The matter can

doubtless be arranged there.

Mr. ADAMS, of Illinois. I do not wish to detain the committee. All I want to say to the gentlemen of the Committee on Appropriations is that I have personal knowledge of the necessity of these repairs and that they are required not for the convenience of the office-holders there, but absolutely for the protection of the Government property. I had a misunderstanding about the \$200,000 that was in the bill before or I should have endeavored to get this provided for while the bill

was still in the House.

Mr. RANDALL. I think the gentleman had better accept the suggestion of his colleague [Mr. Townshend] and let it go to conference.

Mr. ADAMS, of Illinois. I will not detain the committee by mak-

ing any motion.

Mr. RANDALL. Let it go into conference and be fairly considered there.

The amendment was non-concurred in.

Amendments numbered 6 and 7 were non-concurred in.

Amendment No. 8 was read as follows:

For custom-house, court-house, and post-office at El Paso, Tex.: For procuring site, commencing the erection of-building, \$50,000.

Mr. RANDALL. The committee recommend non-concurrence in that amendment. Since this bill passed the House there has been a separate act passed in relation to this building.

Mr. HISCOCK. Has there not been a bill passed providing for a

public building at El Paso?

Mr. RANDALL. Yes, since the passage of this bill by the House a separate bill has been passed and has become a law.

The amendment was non-concurred in.

Amendments numbered 9, 10, and 11 were non-concurred in.

The twelfth amendment was read, as follows:

Insert the following:
"For court-house and post-office at Fort Wayne, Ind.: For heating apparatus, elevator, and approaches complete, \$20,000."

Mr. RANDALL. The committee recommend non-concurrence in this amendment

Mr. LOWRY. The facts in this case warrant concurrence in the amendment. I understand, however, that it is the arrangement that all these matters shall go into conference—
Mr. TOWNSHEND. We propose that they all go to the conference

Mr. RANDALL. It is best to let them all take that course. will have the fullest consideration at the hands of the conference com mittee; and we shall be enabled to ascertain the exact grounds on which the Senate has inserted these various amendments.

Mr. LOWRY. There was a full statement of the facts before the Senate committee at the time of the insertion of the amendment.

Mr. RANDALL. The conferees will have the benefit of that statement when the question comes before them.

The amendment was non-concurred in.

The fourteenth, fifteenth, sixteenth, seventeenth, eighteenth, nine-teenth, twentieth, twenty-first, twenty-second, twenty-third, twenty-fourth, and twenty-fifth amendments were read and non-concurred in in accordance with the recommendation of the Committee on Appropri ations.

The twenty-sixth amendment was read, as follows:

Insert the following:
"For custom-house at Saint Louis: For reconstructing and paving Eighth and Ninth streets adjacent to the Saint Louis custom-house, \$4,053.26."

Mr. RANDALL. The Committee on Appropriations recommend

non-concurrence in this amendment.

Mr. GLOVER. The facts in this case justify concurrence in this amendment; but as I understand the order now being pursued by the House is to pass these matters without discussion for the present of the merits, I will ask permission to print some remarks on this subject.

There being no objection, leave was granted.

The amendment was non-concurred in.

The twenty-seventh amendment was read, as follows:

Insert the following:
"For post-office at New Bedford, Mass.: For the purchase of land adjoining and additional to that authorized to be purchased by the act of February 20, 1885, \$50,000."

Mr. RANDALL. I am directed by the Committee on Appropriations to move non-concurrence

Mr. LONG. Mr. Chairman, recognizing the propriety of the order of procedure which is being pursued here, I desire merely to say that this priation is in violation of the rule of the House.

amendment is recommended by the Supervising Architect upon an inspection made by a special representative from his office. Since the original occupation some years ago of the present post-office building New Bedford has grown from a town of some seven or eight thousand population to a city of thirty-seven or thirty-eight thousand. There are some four million pieces of mail matter handled at that office every year. The room in which the business of the post-office is transacted is only 48 feet by 12, and in it there are engaged more than twenty employés. There are ninety-two mails a day at that office. I desire to lay the facts before the conferees.

Mr. RANDALL. I hope the gentleman will be kind enough to furnish to the conferees, whoever they may be, all the information he has on the subject.

Mr. LONG. The information is very clear in favor of the adoption

of this amendment.

The amendment was non-concurred in.

The twenty-eighth amendment was read, as follows:

Insert the following:
"For the post-office, custom-house, internal-revenue office, and court-house at New Haven, Conn.: To pay an assessment for the connection with the city sewer, \$210."

Mr. RANDALL. The committee recommend non-concurrence in that amendment.

Mr. BUCK. I desire to ask the gentleman from Pennsylvania [Mr. RANDALL] who has charge of this bill whether the Committee on Appropriations recommend non-concurrence in all these amendments.

Mr. RANDALL. Yes, sir, for the purpose of getting the information

on which the Senate acted.

Mr. BUCK. I do not wish to occupy time; but this amendment in relation to New Haven and the next one in reference to Hartford ought to prevail. However, as the Committee on Appropriations recommend that all these propositions be non-concurred in for the purpose of having the questions considered in conference, I will not resist that course.

The amendment was non-concurred in.

The twenty-ninth, thirtieth, thirty-first, thirty-second, thirty-third, thirty-fourth, thirty-fifth, thirty-sixth, thirty-seventh, and thirty-eighth amendments were read and non-concurred in.

The thirty-ninth amendment was read, as follows:

Insert the following:

"For court-house and post-office at Savannah, Ga.: For purchase of site and commencing the erection of building, \$100,000."

Mr. RANDALL. The committee recommend non-concurrence.
Mr. NORWOOD. I trust the gentleman from Pennsylvania will give

some explanation for the reasons for that recommendation.

Mr. RANDALL. The bill authorizing the construction of this building was enacted after this appropriation bill had been passed by the House. Since the Senate inserted this amendment, we have not had opportunity to examine the law. There are at least two cases of this kind, with regard to public buildings at El Paso and Savannah; and there may be one or two others. We have recommended non-concurrence in regard to El Paso as well as Savannah. That does not imply adverse action by the conference committee; but we desire to investigate the law.

The amendment was non-concurred in.

MESSAGE FROM THE SENATE.

The committee rose informally; when a message from the Senate, by Mr. Johnson, one of its clerks, announced that the Senate further insisted on its amendments, disagreed to by the House (including the clauses referred to in the message of the House), to the bill (H. R. 7480) making appropriations for the construction, repair, and preservation of cartain miblic works on rivers and harbors, and for other nurroses. certain public works on rivers and harbors, and for other purposes, agreed to the further conference asked by the House on the disagreeing votes of the two Houses, and had appointed as conferees on the part of the Senate Mr. McMILLAN, Mr. CONGER, and Mr. RANSOM.

SUNDRY CIVIL APPROPRIATION BILL

The Committee of the Whole House on the state of the Union resumed its session.

The fortieth and forty-first amendments were read and non-concurred in.

The forty-second amendment was read, as follows:

Insert the following:

"For the completion of the public building at Montpelier, Vt., in addition to the sum appropriated by the act entitled 'An act for the erection of a public building at Montpelier, Vt.,' approved March 3, 1885, \$50,000."

Mr. RANDALL. The Committee on Appropriations recommend

non-concurrence.

Mr. GROUT. The provisions of this item are embodied in a bill which has already passed the Senate and been favorably reported by the Committee on Public Buildings and Grounds of this House. I hope the gentleman in charge of this bill will see the distinguishing grounds which justify concurrence in this amendment.

Mr. RANDALL. As the gentleman states, a bill extending the limit of the appropriation for this building has passed the Senate; but it is not a law. I believe the full limit of appropriation authorized by exnot a law. I believe the full limit of appropriation authorized by existing law has been given in this case; and of course a further appro-

Mr. GROUT. The Senate bill has been reported favorably by the House committee.

Mr. RANDALL. But it is not a law. There is no law authorizing this increase

Mr. GROUT. I do not understand what rule of the House is violated.

Mr. RANDALL. The rule that there shall be no legislation on a general appropriation bill. This proposition does legislate by increasing the limit of appropriation for this public building. The committee recommend non-concurrence.

Mr. GROUT. I do not desire to interrupt the progress of the Committee of the Whole at this time in reaching a conference, unless—

Mr. RANDALL. I will state that the Senate rules in this particular are similar to our own; but for some reason or other the Senate in this case has not adhered to its rule.

Mr. GROUT. This will be found to be an exceptional case as it stands; but if the gentleman does not see fit to move concurrence without further discussion-

Mr. RANDALL. I am acting under instructions from the Committee

Mr. RANDALL. I can not make any promise of that kind.

The amendment was non-concurred in. Forty-third amendment of Senate:

Add the following:
"To put the Treasury building in a proper sanitary condition by improved plumbing, sewerage, and drainage, \$67,000, to be expended under the direction of the Secretary of the Treasury."

Mr. RANDALL. The Committee on Appropriations recommends

I hope the amendment will be concurred in. Mr. GLOVER. an urgent case. Agreement in the Senate amendment would not only tend to the protection of life and health of the employés of the Treasury Department, but also to a wise economy on the part of the Government.

Not wishing to detain the committee, I ask to print some remarks on

this subject.

There was no objection, and it was so ordered.

Mr. TOWNSHEND. Mr. Chairman, I want to say that I have been fully impressed with the necessity of the appropriation being adopted. As a member of the Committee on Appropriations, I have been well arrived of the propriety of making this provision. I do not wish to As a member of the committee on Appropriate convinced of the propriety of making this provision. I do not wish to disturb the order of the committee, but will allow this to go with the shall urge the appropriation be made. I am convinced the appropriation should be made and the work done as soon as possible.

Mr. HEPBURN. What is the necessity of non-concurrence when

there seems to be agreement?

Mr. RANDALL. There is none.

Mr. HEPBURN. I understand the gentleman from Illinois proposes to agree to this amendment?

Mr. RANDALL. I never heard of it.

Mr. TOWNSHEND. I said so far as I am concerned individually. I did not refer to the committee's action.

Mr. HEPBURN. It seems to me matters of this kind should be con-

Mr. HEPBURN. It seems to me matters of this kind should be considered in the committee and not remanded to three members as a conference committee to put in what things they want and preclude others from securing things they regard as necessary.

This bill comes to the House carrying \$3,000,000 in addition to the sum it bore when it left the House. Suppose this was an original appropriation carrying \$3,000,000, would not the House insist on its proper consideration, the consideration of every item in it? Would they consent the whole subject should be remanded to three gentlemen to fix it up as they pleased in conference committee? It seems to me this is mere child's play in this wholesale way to give to the committee the power child's play in this wholesale way to give to the committee the power to indulge in such trades as they may think just. I do not think that, Mr. Chairman, is in compliance with the rules of the House. I do not think it conforms with the dignity of the subject-matter or the character of the legislation which ought to be indulged in.

Mr. RANDALL. There has been no effort whatever to restrict de-Mr. RANDALL. There has been no effort whatever to restrict debate. If any gentleman desires it, all he has to do is to rise in his place. In regard to this item the committee recommend non-concurrence. This Treasury building has been occupied for many years, and we have not heard about its sanitary condition being bad until the advent of the present officials. We now find the present officers desire to secure an appropriation of \$67,000, a very large sum for such a purpose.

Mr. TOWNSHEND. I wish to remind my friend from Pennsylvania that he is mistaken when he says this subject has not been heretofore considered. Its sanitary condition has been considered by the sanitary condition to the sanitary condition to

considered. Its sanitary condition has been considered heretofore.

Mr. RANDALL. This is the very first time formal application has been made, in this connection, to Congress.

Mr. BUCHANAN. I desire to say simply this: Before the Committee on Labor abundant testimony was produced showing the present condition of the Treasury building has led to serious impairment of the health of the large number of employés in that building, especially

those engaged in the lower rooms, and in some instances life itself has been seriously endangered. Unfortunately that testimony was not

taken down, and so not printed.

I had hoped the committee would recommend concurrence in this item. As I understand, under the order under which we are proceeding non-concurrence will not be taken as final, but this amendment will go unimpaired to the conference, and I hope the conference on the part of the House will carefully consider this amendment, and consent to withdraw their non-concurrence and allow it to pass unanimously. is in the interest of the life and health of the employés of that Department, and, as remarked by the gentleman from Illinois [Mr. Town-SHEND], will virtually increase the efficiency of their service.

The amendment was non-concurred in.

Amendments numbered 44 and 45 were non-concurred in.

Mr. RANDALL. The amendments from No. 46 to and including No. 66 relate to the same subject, that is, with reference to the lighthouses and fog-signals. The committee recommend non-concurrence, the object being to get correct information upon the subject as to what were the reasons that induced the Senate to insert these amendments. I therefore ask unanimous consent that the amendments I have named be considered as read and a vote be taken upon them in gross, so as to save time.

I have no objection to that. I simply desire to say that Mr. LONG. the most of these have been reported by the Committee on Commerce, and would have been put into the bill originally if the law had been passed in time. I have no objection to having them considered together.

Mr. SKINNER. I do not want to object to the request of the gentleman from Pennsylvania, but I ask unanimous consent, so as to avoid taking up the time of the committee, to be allowed to print a few remarks at the end of the sixty-sixth amendment.

There was no objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

Mr. HEPBURN. I think they had better take the usual course. The CHAIRMAN. The Clerk will report the amendments. Amendments numbered 46, 47, 48, 49, 50, and 51 were non-concurred

in.

Amendment numbered 52 was read, as follows:

Insert as a new paragraph:

"(52) Castle Hill light-house and fog-signal, Rhode Island: For the establishment and completion of a light-house and fog-signal on Castle Hill, Rhode Island, at the entrance to Newport Harbor, \$10,000: Provided, That a suitable site for the same can be obtained without expense to the Government, upon terms and conditions to be agreed upon by the Light-House Board with the owner of the land at Castle Hill."

Mr. DAVIS. Mr. Chairman, I would simply say that that bill has already passed the House, but if it is thought best to non-concur I shall not make objection. Mr. RANDALL. We

We want to have an opportunity of examining all of these laws

The amendment was non-concurred in.

Amendments numbered 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, and 67 were non-concurred in.

Amendments numbered 68 and 69 were concurred in.

The Clerk proceeded to read amendment numbered 70. Mr. BLAND. I have an amendment that I desire to offer to amend-

ment numbered 69. Mr. RANDALL. I suggest to the gentleman that we had better allow the whole paragraph as proposed to be amended by the committee to be read and get it into proper shape, and then he may offer his proposition as a substitute. There will be no advantage taken.

Mr. BLAND. Very well.

Amendments numbered 70, 71, 72, and 73 were concurred in.

Amendment numbered 74 was read, as follows:

Strike out the words—
"And shall be redeemable in standard silver dollars on demand, and when paid into the Treasury shall be reissued, subject to the provisions herein for the redemption of the same,"
And insert:
"Provided, That said denominations of one, two, and five dollars may be issued in lieu of silver certificates of larger denominations in the Treasury, and to that extent said certificates of larger denominations shall be canceled and destroyed."

Mr. RANDALL. I have an amendment to this which I will send

up.
The Clerk read as follows:

In lieu of the matter proposed to be inserted insert the following:

"And denominations of one, two, and five dollars may be issued in lieu of silver certificates of larger denominations in the Treasury or in exchange therefor upon presentation by the holders; and to that extent said certificates of larger denominations shall be canceled and destroyed."

Mr. RANDALL. Mr. Chairman, the committee recommend concurrence in this amendment numbered 74 with an amendment; and in order that the House may clearly understand the language which will remain in the paragraph in case the recommendation of the Committee on Appropriations is concurred in by the House, I will read the paragraph in full as it will stand if amended:

(69) And the Secretary of the Treasury is hereby authorized and required to issue silver certificates in denominations of one, two, and five dollars, and the

silver certificates herein authorized shall be receivable, redeemable, and payable in like manner and for like purposes as is provided for silver certificates by the act of February 28, 1878, entitled "An act to authorize the coinage of the standard silver dollar and to restore its legal-tender character."

And denominations of one, two, and five dollars may be issued in lieu of silver certificates of larger denominations in the Treasury, or in exchange therefor, upon presentation by the holders; and to that extent said certificates of larger denominations shall be canceled and destroyed.

It will be observed that the Senate amendment in the first place gives to the silver certificates authorized here the exact character and right that is given under the act authorizing the original issuance of the certificates. In other words, it gave it a legal-tender quality different from the coin upon which it is issued, and confined it only to the payment of customs, for taxes, and other public dues. The provision of the Senate amendment also was in the opinion of the Committee on Appropriations somewhat indefinite. The use of the words, "provided that said denominations," would seem to imply some connection with the denominations authorized in the first part of the paragraph. The Committee on Appropriations, it will be observed, by their amendment leave the first part of the paragraph as it stands as a substantive proposition, and make a further substantive proposition relating to the exchange of one, two, and five dollar certificates in lieu of larger certificates, whether in the Treasury or held by the citizen.

Mr. BLAND. I offer an amendment to the amendment of the com-

mittee.

The Clerk read as follows:

Provided further, That said certificates shall be issued on all surplus standard silver dollars in the Treasury, and paid out on the expenditures and obligations of the Government; and when received in the Treasury shall be reissued.

Mr. BLAND. Mr. Chairman, the provision as it passed the House and the object the House had-

Mr. HEWITT. I reserve the point of order on that amendment before the discussion begins.

Mr. BLAND. It is not subject to any point of order. This is simply reinserting the matter which was stricken out by the Senate.

Mr. LONG. It is new legislation.

Mr. HEWITT. A vote of non-concurrence would meet the case.
Mr. BLAND. This is matter which has been stricken out by the

Mr. HEWITT. I submit if it has been stricken out in the Senate the motion of non-concurrence is the proper remedy.

Mr. HOLMAN. You can concur with an amendment.

Mr. LONG. This is not a law, and you propose to make it a law; therefore it is new legislation.

Mr. BLAND. The time to make the point that it is new legislation was when it was first offered in the House.

Mr. HEWITT. But it has been stricken out by the Senate and you must either concur or non-concur.

Mr. LONG. I make the point I have indicated as an additional point to that made by the gentleman from New York [Mr. HEWITT]. Mr. BLAND. The amendment is simply an amendment to the

amendment offered by the committee.

The CHAIRMAN. The Chair understands the gentleman from New

York to raise the question of order. That must be first disposed of.

Mr. BLAND. I was speaking to the point of order, and I say the Committee on Appropriations have proposed an amendment that no point of order is raised upon, and this is simply an amendment to that amendment, and it is germane to the whole paragraph. And further-more, Mr. Chairman, I desired to offer that amendment when the matter stricken out was being read, but the gentleman from Pennsylvania [Mr. RANDALL] asked me as a matter of form and courtesy to wait until all of the amendments on this subject were before the committee.

Mr. RANDALL. I take no advantage of that arrangement.

The CHAIRMAN. The Chair will submit the amendment to the

committee, believing it is in order.

Mr. BLAND. I was about to remark one of the main objects the House had in authorizing the issue of these certificates was to utilize the coin now in the Treasury, the standard silver dollars. Therefore the House incorporated this provision that one, two, and five dollar certificates should be issued on all the standard silver dollars in the Treas ury, and that they should be paid out on the appropriations in this bill and on other public expenditures and obligations of the Government.

That is substantially the provision that was stricken out by the Sen-Yet without that provision there is nothing in the whole thing. The object of this provision was to utilize the coin in the Treasury. The amendment as it comes from the Senate, and as it is proposed to be agreed to by the committee, simply leaves it discretionary with the Secretary of the Treasury-and I do not know he would even have that discretion-to issue upon coin in the Treasury. It simply provides that these ones, twos, and fives may be issued in lieu of certificates now outstand-So that we have accomplished nothing except to convert larger denominations into smaller; that is the effect of the Senate amendment

as proposed to be concurred in.

Now what the House wanted, what the House adopted, and what we ought to adhere to is that these certificates shall be issued on the coin in the Treasury in order to utilize it; not only that certificates outstanding and in circulation may be converted into ones, twos, and fives, but that the Secretary of the Treasury shall utilize this coin in payment of this Government of dollars that are not worth 100 cents for debts and

Government expenditures; and shall do so by issuing ones, twos, and fives and paying them on the expenditures of the Government. I hope the House will adhere to the provision as it passed the House. The amendment I have offered simply restores to that provision the efficiency it had when it went to the Senate. If the House agrees to the amend-ment as proposed by the committee and by the Senate it simply authorizes the Secretary of the Treasury to convert large denominations of certificates now outstanding into ones, two, and fives, and that is all there

I say we desire this money to be paid out on Government expenditures; that the coin in the Treasury shall be utilized; and that that shall be done by issuing one, two, and five dollar certificates on the silver dollars now in the Treasury and paying them out on Government expenditures. That is the proposition which went to the Senate, and it is the proposition I desire to maintain by that amendment; and I hope this House will maintain its position on this matter, and not permit the whole thing to be nullified and made a farce of in that way.

Mr. DINGLEY. I hope, Mr. Chairman, the committee will reject the amendment of the gentleman from Missouri [Mr. BLAND] and concur in the recommendation of the Committee on Appropriations. We all agree that silver certificates of the denominations of one, two, and an agree that silver certificates of the denominations of one, two, and five dollars shall be issued, but if issued they should be issued in the same manner, be receivable for the same purpose, and redeemable in the same way as all other certificates. It is objectionable certainly to attempt to issue silver certificates of the denominations of one, two, and five dollars in a manner different from that in which we issue all other certificates. A certificate relates to that which has been deposited, and very properly the act of 1878 provides that silver certificates shall issue on the deposit of silver dollars, which is strictly the use of a silver certificate.

Now, the gentleman from Missouri proposes to issue certificates of the denominations of one, two, and five dollars, not on the deposit of silver dollars, as all other certificates are issued, but to issue them on the silver dollars in the Treasury that have not been deposited.

It is certainly objectionable in the highest degree to issue these certificates, ones, twos, and fives, in a different manner from that in which we issue all other certificates. Secondly, the gentleman's amendment is objectionable for the reason that it provides that these silver certificates shall be paid out first and before any other money, for expenditures authorized by this bill and for all other expenditures of the Govthree authorized by this bill and for all other expenditures of the covernment. Certainly an amendment of that kind requiring the payment of \$96,000,000 at once in ones, twos, and fives, withholding higher denominations, would be objectionable from any point of view. I hope this committee will concur in the recommendation of the Committee on Appropriations.

Mr. BAYNE. I hope the amendment of the gentleman from Missouri [Mr. Bland] will be voted down. I think the legislation of this kind already embraced in the bill is subject to very serious objection. It is perfectly manifest upon the face of that legislation that it creates a discrimination in favor of silver as against the other money of the It creates a discrimination in favor of silver as against the gold coin in the Treasury, and the result of the amendment proposed by the gentleman from Missouri, if adopted, would be to compel the Government to go on coining silver and hoarding it, issuing silver certificates—ones, twos, and fives—and paying them out broadcast over the country and reissuing them as they might disappear. In my opinion the provision already adopted is fraught with serious consequences to the Government and to the people of this country. I believe it to be about as certain as anything can be that the silver certificates, whether ones, or twos, or fives, will flow to the money centers of the country, notably to New York. We can not prevent even the subsidiary coin from flowing into that great money center, and since these certificates will be available for the payment of all dues to the Government, will be receivable for customs duties and all other debts due to the Government, they will be used for that purpose to a very considerable extent,

and the Government will be deprived pro tanto of gold.

The effect must be—and it will be developed sooner or later just as surely as water runs down hill-that the Government will be taking 74-cent or 75-cent dollars, or whatever they may depreciate to, for 100-cent dollars, the kind it ought to have, not only for the protection of the industries of the country, but also in the interest of a sound financial system and of having for this country the best money in the world. I hope that the "surplus resolution" introduced by the chairman of the Committee on Ways and Means and passed through the House, which has gone to the Senate and been amended, will pass and go to the President, because I believe that that resolution, if signed by the President, will bring this silver craze to a culmination at an earlier day than it would otherwise be arrived at. But I object to having go on, contemporaneously with that, the creation here of money which in the transactions of the people will supplant the good money that we now have and lead inevitably to the hoarding of gold and to the use of this inferior money among the people of the country. I protest against it, not only in the name of a sound theory of finance, but as a discrimination made in favor of silver against all the other money of the country. I protest against it as leading to the acceptance by

obligations due to the Government and for the revenues which the Government must derive from its impost duties, and I hope this amendment will be voted down.

For the purpose of showing whither we are drifting on the silver question, I ask leave to add to my remarks the extract from the Lancaster (Pa.) New Era, which I hold in my hand. This is the extract:

(Pa.) New Era, which I hold in my hand. This is the extract:

One of the most significant lessons presented to our Government in a long time was the sale last week of fifty-one hundred and fifty-nine silver trade dollars by the comptroller of the city of Buffalo to the highest bidder. These coins had been lying in the city treasury for years, in consequence of the Government's failure to redeem them, and, having use for the money, the city determined to sell them. They were sold at 75.4 cents each, resulting in a loss of nearly 25 cents on each coin sold. The "trade" silver dollar contains 420 grains of pure silver; the legal-tender silver dollar which the Government is now coining contains 412 grains of silver, and is, therefore, 7½ grains lighter than the trade-dollar, and therefore worth several cents less. If the legal-tender feature was taken away from the Bland dollar, it would be worth only the silver which it contains; if sold in the open market, as the trade-dollars above mentioned were sold, it would fetch, perhaps, 72½ cents. Yet this is the coin which the Government coins by millions monthly, and issues to the people for 100 cents. It has repudiated the trade-dollar; what is there to prevent it from repudiating the Bland dollar? It would result in a direct loss of \$50,000,000 to innocent holders. Is it not time to call a halt on this 74-cent coin?

Mr. WARNER, of Ohio. Mr. Chairman, I think the gentleman from Missouri, if I understand him rightly, somewhat misapprehends the force of this paragraph or the force it will have when amended as proposed by the committee. As explained by the chairman of the committee, it will then contain two substantive propositions: First, anybody desiring to have one, two, or five dollar certificates can obtain them just as he can now obtain ten-dollar certificates or certificates of larger denominations. He can deposit silver coin or accept certificates in lieu of coin on payments tendered him, as has been the practice of the Treasury Department since the passage of the act of 1878— Mr. BLAND. I do not dispute that at all, Mr. Chairman; but my

point is this, that the only way to get ones and twos out is to require them to be issued on the coin in the Treasury. We all understand that parties having silver dollars can go and get certificates of \$10 or up-ward, and under this amendment they can get ones and twos and fives. Mr. WARNER. Not only that, Mr. Chairman, but whenever money

is paid out now the person to whom payment is made has the option of taking certificates. He is not required to take the coin first and then redeposit it and get certificates. He can have the certificates in the first instance if he desires them.

Mr. BLAND. But the money is not paid out. That is the difficulty. Mr. WARNER, of Ohio. And in reply I remind the gentleman from Missouri that his amendment does not get any more money out of the Treasury than will come out otherwise. Money can come out of the Treasury only upon appropriations by Congress, or in payment of the public debt. His amendment will simply require that what does go out shall be money of a particular kind; that is all. It does not increase by a dollar the amount that is paid out. It does not change in the least the store of money in the Treasury. I think, therefore, the amendment offered by the committee to the amendment of the Senate accomplishes all the good that can be accomplished in this direction.

I am in favor and always have been in favor of allowing the one who receives money to take it in such denominations as he pleases, reserving always to the Treasury the right to determine the kind of money in which it will pay; that is an option that always rests with the payer. Without that there would be no force in the legal-tender laws. But as to the denominations, the man who receives payment from the Treasury ought to be permitted to say what denominations of money he will take. When we authorize the issue of one, two, and five dollar notes on silver in the Treasury I think we have gone as far as the existing condition of things requires. I think therefore the amendment as reported by the Committee on Appropriations accomplishes all that is necessary and should be adopted as reported.

Mr. BLAND. Mr. Chairman, I am somewhat astonished at the posi-tion of my friend from Ohio [Mr. WARNER]. I have always regarded him heretofore as an advocate of the coinage of silver and its circulation when coined. I supposed he understood very well that ever since we commenced the coinage of silver each successive Secretary of the Treasury has done what he could to discriminate against that coinage, has refused to pay out silver when it could be avoided, and has denounced the silver coinage as we hear it denounced here to-day on this floor. Hence we may assume that unless the law compels the Treasury officials to pay out silver they will not do so. What is the necessity of going on and coining silver at the rate of \$2,000,000 worth of bullion

a month and hoarding it in the Treasury?

Mr. WARNER, of Ohio. But the Morrison resolution which we have passed carries it out.

Mr. BLAND. The Morrison resolution has not passed; that is the

difficulty.

Mr. WARNER, of Ohio. It has passed the House.

Mr. BLAND. It has not become a law, and there is no knowing

whether it will or not.

Mr. WEAVER, of Iowa. There is no probability of it.

Mr. BLAND. No friend of the silver dollar, it seems to me, can oppose my proposition on principle. I am not astonished that the gentleman from Pennsylvania [Mr. BAYNE] and the gentleman from Maine

[Mr. DINGLEY], who have denounced the silver coinage from the very beginning because they favor the gold standard, should oppose my amendment. They have given good reasons from their standpoint for the faith which is in them. They do not want the silver paid out, because they say it is an inferior currency. Their position, if they thus believe, is consistent and intelligible; but when the gentleman who claims to be in favor of silver coinage opposes a provision by which that coin can be utilized, I do not understand his position.

The House adopted the original proposition on this subject almost unanimously; but I repeat, unless some such provision as I now offer be adopted the provision will be almost worthless so far as regards getting the silver out of the Treasury. We can to-day obtain silver certificates

of \$10, \$20, and upward on deposit of silver.

Mr. WARNER, of Ohio. But we do not propose to get the silver only to get the certificates instead of the coin.

Mr. BLAND: It does not matter whether it be the coin or the pa-

Mr. WARNER, of Ohio. Let the people have their own choice.
Mr. BLAND. So say I—let the people have their own choice, as they have to-day. Let them have their choice in regard to one, two, or five dollar bills the same as they have to-day in regard to tens and twenties.

But this proposition aims at another thing—to condemn the manner in which the Treasury officials of this Government have up to

this time treated the coinage of silver. I want to see the man on this floor who claims to be a friend of the silver dollar who will vote against sir, when this question was up a short time ago we had a vote of 200 against 84. Two hundred received as the control of the co against 84. Two hundred members of this House voted against suspending the coinage of silver. Did they mean by so voting that they intended to have the money coined and locked up in the Treasury? Certainly not. Then, why should not these two hundred members join with me in saying that this silver coinage shall be utilized?

Mr. WEAVER, of Iowa. One of them at least will do so.
Mr. BLAND. I do not understand how any gentleman can claim that the simple deposit of silver will get the silver out of the Treasury, when you can not deposit a dollar of it until it is paid out; and the Treasury officials at present refuse to pay it out. The object of my proposition is to compel the payment of this money from the Treasury to utilize the silver dollars after they are coined. That is my ob and that was the object of the House when it passed the measure. That is my object,

Here the hammer fell.

Mr. ADAMS, of Illinois, obtained the floor.

Mr. RANDALL. I would like to have some understanding touching the length of debate on this proposition. I am willing to make it ten or fifteen minutes

Mr. ADAMS, of Illinois. I believe I have been recognized. I do not intend to occupy the floor more than one or two minutes.

Mr. RANDALL. I did not mean to interrupt the gentleman, but

only to reach some conclusion as speedily as possible.

Mr. ADAMS, of Illinois. Mr. Chairman, this discussion about one and two and five dollar notes seems to have drifted—perhaps rather naturally, in view of the remarks of the gentleman from Pennsylvania Mr. BAYNE —into one phase of the silver discussion. But I think there is an objection to the provision proposed by the gentleman from Missouri [Mr. Bland] which would be equally valid if the proposition were to issue the same number of one-dollar and two-dollar and five-dollar gold certificates, or one-dollar, two-dollar, and five-dollar greenbacks. subject was adverted to, but not at as much length as it ought have been, by the gentleman from Ohio [Mr. WARNER]. He said he was in favor of allowing the citizens of the country perfect liberty to receive from the Treasury such denominations of money as they may choose. Now, the fact is there is a general commercial law which governs the amount of each denomination of currency which can be easily and conveniently kept in circulation at a distance from the Treasury; and that law applies not only to one-dollar, two-dollar, and five-dollar notes, but also to tens and twenties and fifties in almost the same way.

There is a certain number of small bills which, in a given state of the business of the country, can be kept in circulation. When that amount is exceeded the small bills become unpopular, and every one who handles them gets them into some central depository. This tendency to crowd these small bills from distant parts of the country toward the money centers would be precisely the same whether the small bills represented silver or represented gold. I believe in the doctrine of the gentleman from Ohio, that there should be the largest possible freedom on the part of citizens to determine whether they will take the small or the large denominations in payments which they receive from the Treasury, because the result of this will be after a while that precisely the amount of ones, twos, fives, tens, and twenties which the business interests of the country require in circulation will settle generally over

the country away from the great business centers.

As the law is now the silver dollar in the Treasury sustains the onedollar certificate and also the twenty-dollar certificate. And when the gentleman from Missouri [Mr. BLAND] claims that no friend of the silver dollar could vote for this resolution it seems to me that he is wrong. The silver dollar might far better be allowed to represent in a natural way small denominations as well as large than for an inordinate amount of small denominations to be issued perforce and thereby lead to a tendency all over the country to make them drift back to the money centers of the country.

[Here the hammer fell.] Mr. RANDALL. I hope Mr. RANDALL. I hope by unanimous consent some arrangement will be come to for closing debate on the pending Senate amendment. I suggest the debate be closed at half past 2 o'clock.

There was no objection, and it was so ordered.

Mr. PETERS. Mr. Chairman, the provision the Senate struck out, as I understand it, provides that for a certain amount of money now in the Treasury which does not form a part of our circulating medium it shall be lawful to issue ones, twos, and fives. The great objection to paying out these silver dollars in the Treasury is based on the score of inconvenience in handling them, in carrying them, and in transporting them. That is the objection made to issuing this money as a circulating medium. The object of the proviso inserted in the House bill was to supply evidence of that circulating medium which would not be lightly to the objection made. not be liable to that objection, namely: Silver certificates in ones, twos, and fives, which would be as convenient to carry and to use in the ordinary transactions of business as one, two, or five dollar greenbacks or five-dollar national-bank notes.

The objection made to this provision, emasculated as I think it is by the Senate amendment, the real objection, is they do not want this circulating medium added to the circulating medium of the country I desire the silver dollar in the Treasury shall be in fact a part of the circulating medium of the country. If we can secure that object by issuing one, two, and five dollar silver certificates, then I am in favor of it, and consequently would be opposed to anything that would tend to destroy the effect sought to be accomplished by this

original provision.

My friend from Maine [Mr. DINGLEY] says this is the creation of a new money. No; that is not the case. The silver dollars in the Treasury are money, and the creation of these silver certificates does not create any new money, but simply creates a convenient representative of the silver dollars in the Treasury. No man would object to taking a five-dollar silver certificate any more than he would object to taking a five-dollar greenback or a five-dollar national-bank note. One is as convenient as the other.

It seems to me, Mr. Chairman, the truth is that the silver in the Treasury should be added to the ordinary body of the circulating medium of the country. Our business is rapidly increasing, our country is enlarging, our population is every day growing larger, every interest is being developed, and we need every dollar of circulating medium provided by law. Therefore I think the proposition which the gentleman makes to non-concur in the amendments of the Senate should be

Mr. WEAVER, of Iowa. Mr. Chairman, the objection of the gentleman from Pennsylvania [Mr. BAYNE] is to the silver dollar. This silver certificate will be of equal value to the dollar it represents. Hence his position in this: He is opposed to paying out the silver dollar for the current expenses of the Government. I am glad to have him take

the current expenses of the Government. I am giad to have limit take that position here to-day.

The amendment offered to this bill by the gentleman from Missouri is designed to compel the Treasury officials to pay out the silver dollar now discriminated against. It is true it can only be paid out on appropriation. The gentleman from Ohio [Mr. WARNER] is correct, it will not put any more money in circulation. That is true; but it does make an issue strong and sharp between the law-making power and the Treasan issuestrong and sharp between the law-making power and the Treasury officials. It gives a construction on the part of Congress to the Treasury officials. They must obey the law and issue any form of money declared to be so by the law-making power. And for one I shall support the amendment of the gentleman from Missouri, being unwilling to consent, now that it is in the bill, that it shall ever be taken out of the bill, but on the contrary that it shall be obeyed and become the law

of the country.

Mr. WARNER, of Ohio. Mr. Chairman, the gentleman from Missouri [Mr. Bland]—I do not see him now in his seat, but he is in the Hall—very energetically calls on the advocates of silver to support his Hall—very energetically calls on the advocates of silver to support his amendment and reads out of the party gentlemen who do not support his particular views of the question, or who propose to vote against his amendment. Now, Mr. Chairman, I hope I can advocate the cause of silver without becoming crazy on that subject. [Laughter and applause.] For one, I do not believe the proposition of the gentleman from Missouri would prove any advantage to silver. You will get no more money out of the Treasury by that proposition than by the amendment proposed by the committee. As I said before the money will ment proposed by the committee. As I said before, the money will come out of the Treasury on appropriations and in no other way; and I do not think it is in the interest of silver to compel the Treasury to pay out silver certificates on all the silver in the Treasury in denominations of one, two, and five dollars, whether the people want these de-

I think this would be overdoing the matter, and by forcing the use of silver in this form would tend to make it odious. Besides, what would be gained by requiring that the next hundred millions paid out should be all in the form of one, two, and five dollar certificates? I want to see as much coin go into circulation as possible, and I see no reason why

the people should not be left to choose between certificates in any denominations and the coin.

But suppose the next hundred millions paid out to be in the form of small silver certificates. Will that in itself reduce the surplus in the Treasury or put any more money in circulation? No; not a dollar. will simply change the form of the reserves or surplus retained in the Treasury. That is all. Now, for my part, I would as soon have silver held in reserve as any other kind of money. What difference can it make? It is only by drawing down the entire surplus that more money can be put into circulation, and when it comes to that I do not care much which kind of money is paid out first. I will leave the option in that respect to the Government. There is where it should always rest.

Mr. BLAND. Your crazy spell is the same as that of the Treasury Department against silver. Mr. WARNER, of Ohio.

Mr. WARNER, of Ohio. I do not yield to the gentleman now.
When, therefore, we provide for the issuance of certificates in denominations of ones, twos, and fives for those who prefer them to coin we have gone just as far, it seems to me, as prudence would dictate.
Why should we discriminate against other kinds of money and in favor of silver? I have believed in and advocated the absolute equality of

I want silver to stand, so far as the Government is concerned, upon precisely the same ground that gold stands upon and greenbacks stand upon; that no discrimination shall be made by the officials of the Government or others for or against either kind of money; and when we have put them in that position we have done all that can be done in this regard. Anything further is, in my judgment, overdoing it, and will react against silver and not in its interest.

Mr. BAYNE. I ask leave to print with my remarks made this morning an extract from a Pennsylvania newspaper with reference to this

question.

There was no objection.

[The article is printed with Mr. BAYNE's remarks above.]

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Missouri to the amendment of the gentleman from Pennsylvania.

The question was taken; and on a division there were-ayes 53, noes 77

Mr. BLAND. No quorum has voted.

The CHAIRMAN. The point of order being made that no quorum has voted, the Chair will order tellers.

Mr. BLAND and Mr. RANDALL were appointed tellers.

The committee again divided; and the tellers reported-ayes 81, noes 87.

So the amendment to the amendment was rejected.

The question recurring upon the amendment of Mr. RANDALL, it was agreed to.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. DOCKERY having taken the chair as Speaker protempore, a message from the Senate, by Mr. SYMP-SON, one of its clerks, announced that the Senate still further insisted on its amendments disagreed to by the House of Representatives to the legislative appropriation bill, and agreed to the further conference asked by the House on the disagreeing votes thereon; and had appointed Mr. Allison, Mr. Dawes, and Mr. Cockrell as conferees on the part of the Senate.

Also, that the Senate had passed without amendment the bill (H. R. 3014) providing for terms of court in Colorado.

Also, that the Senate requested the House to return to the Senate the bill (H. R. 28) to provide for the appointment and compensation of a district judge for the southern district of Alabama.

The Committee of the Whole resumed its session.

SUNDRY CIVIL APPROPRIATION BILL. The CHAIRMAN. The Clerk will report the next amendment. Amendments 75, 76, and 77 were non-concurred in. Amendment 78 was read, as follows:

Saint John's River, Florida; Columbia and Willamette Rivers, Oregon; Great Kanawha River, West Virginia.

Mr. RANDALL. I am directed by the committee to move to concur in that amendment with an amendment, by adding after the word "Virginia" the words "Tennessee River."

The amendment was agreed to.

Amendments numbered 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, and 116 were non-concurred in.

Amendment numbered 117 was concurred in.

The CHAIRMAN. The Chair is informed that the committee's report recommend non-concurrence in this amendment.

Mr. RANDALL. That is a mistake. Amendments numbered 118, 119, 120 were non-concurred in.

Amendment numbered 121 was read, as follows:

Fish-hatchery at Duluth, Minn.: For the establishment of a fish-hatchery on Lake Superior, at or near Duluth, Minn., \$10,000.

Mr. RANDALL. The committee recommend non-concurrence in

this amendment, with some sort of an understanding that if the Senate

was to insist it ought to be amended——
Mr. NELSON. If the gentleman from Pennsylvania will yield to me I shall move concurrence in the amendment with an amendment.

Mr. RANDALL. If the gentleman will hand me his amendment, and let this be non-concurred in, I think the object he has in view can be reached in some way.

Mr. NELSON. Very well, I withdraw the motion to concur. The amendment was non-concurred in.

Amendments 122 to 130 inclusive were non-concurred in.

Mr. WILSON. The committee recommend non-concurrence in amendments 131 to 134 inclusive. I ask that they be non-concurred in without reading. Mr. HEPBURN.

Mr. HEPBURN. I object. Amendments 131 to 143 inclusive were non-concurred in.

Amendment 144 was concurred in. Amendment 145 was non-concurred in.

The committee recommended non-concurrence in amendment 146; which was read, as follows:

In line 1600 strike out "\$90,000" and insert "\$75,000;" so that it will read:
"Protecting public lands: For the protection of public lands from illegal and
fraudulent entry or appropriation, \$75,000."

Mr. HOLMAN. I desire to submit an amendment to the Senate amendment. I move that the House concur in the Senate amendment with an amendment making the sum \$125,000 instead of \$75,000.

I wish to submit a word on the subject. It will be observed this appropriation to enable the Commissioner of the General Land Office to take measures for protecting the public lands from illegal and fraudulent entry or appropriation was in the first place \$90,000. The Senate lent entry or appropriation was in the first place \$90,000. The Senate reduces the amount from \$90,000 to \$75,000. And the motion made by the chairman of the Committee on Appropriations is that the House I move concurrence, with an amendment, making the amount \$125,000 instead of the \$90,000 in the bill as it passed the

The House will remember that the year before last the then Commissioner of the General Land Office, Mr. McFarland, asked for an appropriation of \$400,000 for this purpose, alleging that the frauds on the land laws in the land States and Territories were widespread, and that at least \$400,000 should be appropriated to enable him to prevent those frauds, and restore the public lands to the public domain and to prevent fraud in the future. But Congress only appropriated \$90,000. The present Commissioner asked for the appropriation for that purpose of \$300,000, and pointed out with great elaborateness the importance to the public interest of this appropriation. He showed that millions and millions of acres of the public lands were being monopolized, entered unlawfully entered in large estates entered the public land. tered unlawfully, entered in large estates, entered through fraud, and asked Congress to give him the means to restore these lands to the public domain that they might be disposed of for the benefit of the homestead settlers.

Now, if there is any high duty resting on Congress at this hour it is to protect what remains, growing smaller every year, of the public lands for the benefit of actual settlers. I think every quarter-section of land saved from monopoly and speculation for homesteads is a blessing, the benefit of which in the future can not be overestimated. I do not hesitate to say from the examination I have given to the subject that millions of acres of land, with proper power placed in the hands of your Interior Department—millions of acres now doomed to monopoly and speculation can be restored to the public domain and secured for the benefit of actual settlers.

I think, sir, that this opens up a field that ought to challenge the earnest inquiry and thought of every member of this House. I know of nothing so well calculated to inspire earnestness and even eloquence on the part of any man who is capable of uttering grand thoughts in grand words inspired by a theme such as this—the saving to coming generations and to the landless now among us to the extent of millions of acres from speculation and the building up of great landed estates. The future of this country, like its past, is to depend largely on the number of your freeholders; and I know of no higher duty that can rest on Congress than the promotion of any line of policy that can secure the largest possible number of freeholders among our people. I ask but a small amount, an increase of \$35,000.

Mr. RYAN addressed the committee. [See Appendix.]

Mr. TOWNSHEND was recognized and offered to yield additional

Mr. RYAN.

Mr. RYAN. I am perfectly willing to have the vote taken now.

Mr. TOWNSHEND. The very fact that the gentleman is in favor of an appropriation of \$90,000 for this purpose is evidence that there is of an appropriation of \$90,000 for this purpose is evidence that there is need for a force of this character. Therefore, Mr. Chairman, it is simply a question as to how much money is needed for this purpose. The gentleman from Kansas [Mr. Ryan] certainly will not claim that he has had as full opportunity of knowing the needs of the service as the former Commissioner of the General Land Office, who held that position for a number of years, who was a very honest and upright officer, and who had had more than the former than the service who had been constructed for the property of the content of the co who had had great opportunity for knowing just what the public service required in order to protect the Government from these frauds. Neither will my friend from Kansas, I imagine, claim that he has any

better opportunity of forming an accurate judgment upon this point than the present Commissioner of the General Land Office, who was a member on this floor for some eight years, and who has been for one year past in charge of the Land Office. It is simply, then, a question as to the amount that ought to be appropriated. Now the gentleman from Kansas [Mr. Ryan] says that \$90,000 is enough to guard the public domain from the land robbers that are constantly marauding upon it. The former Commissioner of the General Land Office, a gentleman who was in political accord with my friend from Kansas, declared that \$400,000 was required for that purpose.

Mr. Ryan. No.

Mr. RYAN. No.

Mr. TOWNSHEND. Am I not correct in that?

Mr. RYAN. No.

Mr. TOWNSHEND. I appeal to the gentleman from Indiana [Mr. HOLMAN] upon that point.

Mr. HOLMAN. I think the amount asked for was \$400,000.

Mr. RYAN. It was \$300,000. Mr. HISCOCK. How much did you appropriate for this purpose

after full investigation?

Mr. TOWNSHEND. The Committee on Appropriations at the last session recommended, I believe, \$90,000, but the committee of the prior year recommended \$100,000, and it was voted by both Houses of Congress. So, gentlemen will see, after all, that it is simply a question as to the amount that is required to guard the public domain against the robberies and frauds that we who live in the West know are constantly being perpetrated. Mr. RYAN. T

The gentleman does not live far enough West to know

anything about it.

Mr. TOWNSHEND. But I have been far enough West, and I have indisputable evidence that these frauds are being constantly perpetrated

and have been going on for years.

Mr. RYAN. How long has the gentleman had that information?

Mr. TOWNSHEND. I have had it for years.

Mr. RYAN. Then why did you not insist upon raising the appropriation to the amount which the former Commissioner of the Land

Office, Mr. McFarland, asked for?
Mr. TOWNSHEND. If I had been a member of the Committee on Mr. TOWNSHEND. If I had been a member of the Committee on Appropriations then, as I am now, I would have joined hands with the gentleman from Kansas [Mr. RYAN] and with other gentlemen upon this floor who desired to protect the public domain.

Mr. RYAN. But you were a member of the House, occupying a seat

upon this floor.

Mr. TOWNSHEND. Well, I am not going to debate that question with the gentleman, for I have only a few minutes. Mr. Chairman, what harm can result from this appropriation? For what purpose is

Mr. RYAN. To make places for political friends.

Mr. TOWNSHEND. The money is asked for the purpose of protecting the public domain from fraud. Would any one who wants to protect the public domain complain of an appropriation of \$200,000 if it were needed for that purpose? The object that this money is intended to be used for is to protect the public domain. There are men who sometimes raise their voices here in denunciation of the robbery of the public domain by railroads, but when a question of this kind comes up they do not seem to realize that the railroads are not the only robbers of the public lands. They do not seem to realize that there are others who commit frauds upon the public domain as well as the rail-roads. We have turned our faces in the direction of protecting the public lands from the railroads; let us also strengthen the hands of hon-est officers of the Government who desire to guard the public domain as well from private robberies and fraud.

Mr. RANDALL. Mr. Chairman, I would like to have consent to limit the debate on this paragraph to twenty minutes.

Mr. HISCOCK. I wish to ask the gentleman whether he believes

there is in conference any such question as the increase of the amount above that contained in the House bill, or whether it can be put in

Mr. RANDALL. I do not think a conference committee has a right to increase the amount above what the two Houses have indicated as a

Mr. TOWNSHEND. Where is the rule to that effect?

Mr. HOLMAN. There is no such rule.

The CHAIRMAN. The Chair will submit the request of the gentleman from Pennsylvania [Mr. RANDALL] that all debate on this paragraph and amendments thereto be closed in twenty minutes. Is there objection? The Chair hears none.

Mr. COBB addressed the Chair.

Mr. RANDALL. I will make it ten minutes, if the House will agree to it.

Mr. BURROWS. The gentleman had better make it ten minutes.
Mr. RANDALL. I modify my proposition, and ask that the debate
on this paragraph and amendments thereto be closed in ten minutes.
We want to finish this bill if possible before 5 o'clock.
The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent that debate on this paragraph and amendments thereto

be closed in ten minutes. Is there objection?

My colleague [Mr. COBB] has the floor, I believe, Mr. HOLMAN.

and I hope he will be heard.

Mr. RANDALL. He will be heard.

The CHAIRMAN. Does the gentleman from Indiana [Mr. Hol-MAN object?

Mr. GAY. I object

Mr. RANDALL. Then I move that the committee rise for the purpose of closing debate.

Mr. TOWNSHEND. I think the gentleman from Indiana [Mr. COBB] has the floor.

The CHAIRMAN. The gentleman from Pennsylvania moves that the committee rise.

Mr. HOLMAN. I rise to a question of order. Was not my colleague

[Mr. Cobb] recognized?

The CHAIRMAN. He was not. The gentleman rose, and the Chair intended to recognize him, when the gentleman from Pennsylvania submitted his request for unanimous consent.

Mr. RANDALL. I presume the Chair would be bound to give pref-

erence to the member in charge of the bill.

The CHAIRMAN. The Chair of course observes the practice in that respect

Mr. HENDERSON, of Iowa. The twenty-minutes' limitation was agreed to by unanimous consent.

Mr. RANDALL. I desire to modify the proposition so as to fix ten minutes as the limitation.

Mr. HENDERSON, of Iowa. But if the ten-minutes' proposition

fails I suppose the twenty-minutes' arrangement obtains.

The CHAIRMAN. The Chair thinks the gentleman from Iowa is correct. The Chair submitted the proposition to close debate in twenty minutes; there was no objection, and the Chair declared it was agreed to. If objection is now made the Chair does not feel at liberty to ignore the order which was made by unanimous consent. The gentleman from Indiana [Mr. COBB] will proceed.

Mr. COBB. Mr. Chairman, I have heretofore discussed this question

to some extent, and I do not know that I can advance anything which has not already been said. But I must say I am astonished that the gentleman from Kansas [Mr. RYAN] should come here and declare to this House that frauds are not now being committed every day upon The evidence is overwhelming against the gentlethe public lands. man's statement.

Mr. RYAN. Can the gentleman point to any evidence that frauds on the public lands have been perpetrated within the last year?

Mr. COBB. Of course I can.

Mr. RYAN. I do not think you can.

Mr. COBB. I have not the proof here, because I can not carry the documents constantly in my pocket; but the evidence is on file in the Interior Department showing frauds in the gentleman's own State-

Mr. RYAN. Frauds perpetrated three or four years ago. Mr. COBB. Perpetrated within the last year.

Mr. RYAN. I contend that no frauds have been perpetrated there

within the last year.

Mr. COBB. The gentleman, although he thinks he knows all about this subject, is mistaken. I take issue with him, and call his attention to evidence now on file in the Interior Department showing frauds in his own State and in every other State of the Union where there are public lands.

Mr. RYAN. I do not wish to be misrepresented. I do not deny that there have been frauds perpetrated in the past, but I do not believe there is any evidence of frauds perpetrated in connection with the public lands either in my own State or elsewhere within the last year.

Mr. COBB. All I have to say is that the evidence does not bear out

the gentleman's statement.

Now, I do not ask any larger expenditures with reference to the public lands than are necessary to afford protection against fraud. But I say the evidence is overwhelming against the gentleman that his own State is honey-combed to-day with frauds, committed in the past and to-day. Why gentlemen come here and make these assertions without proof and against the proof on file I can not conceive. I know they are honorable men, but they ought not to make statements which are not sustained by the evidence. No longer ago than yesterday I talked with a special agent who has been in Dakota, and he told me that so far as he has examined 90 per cent. of the recent entries in that Territory have been fraudulent.

Mr. ROWELL. Is the evidence which the gentleman speaks of as being on file the ex parte statements of agents, or is it evidence taken according to the forms of law and with proper opportunity for crossexamination?

Mr. COBB. I can only say that this agent told me he put the evi-

dence on file the day before yesterday.

Mr. ROWELL. But it was the ex parte statement of an agent, and not testimony taken according to ordinary judicial forms and upon proper cross-examination. Is not that true?

Mr. COBB. These agents are officials of the Government as much so as the gentleman or myself; they are as solemnly bound to do their duty, to report the facts which they ascertain, as the gentleman and I are bound to do our duty on this floor; and I presume those officials

are honest men and do their duty. These facts have been testified to by agents of the Government under former administrations as they are testified to to-day. The reports are coming in every day. last four months an agent has reported seventy-three cases of fraud where he has taken the affidavits of the men themselves who made the entries; they swear to their own fraudulent acts. Those affidavits with hundreds of other such affidavits are upon record.

I have talked with the Commissioner of the General Land Office and I have talked with these agents. I have informed myself as best I could with reference to the needs of the Government in the protection of the public lands. These officers inform me that if the force of the Land Department be cut down below what it is the work can not be efficiently done. They all concur in saying that we ought to increase in-

stead of diminishing the appropriation.

I say \$125,000 is too little. Two hundred thousand dollars could be used profitably and would hand down to posterity hundreds of thousands of acres to be occupied by bona fide settlers, which otherwise without these investigations of land frauds would be taken up by speculators and entered without their having seen an acre of them.

Here the hammer fell.

Mr. NELSON. I move to strike out the last word. Mr. Chairman, I had intended not to say a word on this subject, but to let the matter pass in silence. But I am surprised to have it iterated and reiterated again and again on this floor that 90 per cent. of the entries of public lands in the Northwest are fraudulent. The gentleman from Indiana [Mr. COBB] must bear in mind that Dakota has a population of half a million or more and that they are farmers and tillers of the soil. Nearly all the men who have gone into that Territory are men who have gone

there to take up the public lands for actual settlement and cultivation.

Mr. COBB. I simply give the affidavits.

Mr. NELSON. They are men who go there under the homestead law; and when the gentleman undertakes to say that 90 per cent. of these people, or those who go and enter upon the public lands—I say that when he or any other man says it-

Mr. COBB. I say it.
Mr. NELSON. I say that he or the man from whom he gets his authority slanders the people of the Northwest.

Mr. COBB. It is not a slander at all; it is true.

Mr. NELSON. I wish to submit a word or two in reference to these special agents. These special agents of the Interior Department are a lot of cheap men. I can tell the gentleman from Indiana they have a bad reputation. In my State and district the land frauds have been committed in connection with pine lands, and not in connection with agricultural lands. These special agents go there, and what do they do? It is a notorious fact that the big men, who make large entries and who send out men from the mills to enter the lands, are not touched. These special agents levy tribute on them. The small fry, the men who take up a quarter or a half section, are pulled up. In my district, which is in the northwest corner of the State, this administration last fall sent up an agent into the Crookston district. He remained there some weeks. He discovered what three brothers were at, but the great monopolists he never discovered at all; he found out these three men, and they were reported to the Government. He was an agent appointed by this administration, and he was so corrupt this administration were compelled to get rid of him.

Mr. REED, of Maine. Horrible! [Laughter.]
Mr. NELSON. In districts where it is said the greatest frauds have been found out these special agents with \$1,000 or \$1,500 a year have been stopping at hotels, paying \$3 and \$4 a day, riding in carriages, and living otherwise in an extravagant way. It is a fact they levy tribute. Now, what you are asked to do here is to increase the appropriation

to pay for these political pets-to keep up these political bummers under the pretense they are attending to the public service. It may be possible for you to deceive the people here, but let me tell you, gentlemen, that in the Northwest this whole thing is looked upon as very cheap clap-trap. [Laughter.] There the whole thing is not misapprehended nor misunderstood. [Laughter and applause.]

Here the hammer fell.

Mr. COBB. These speeches, Mr. Chairman, come from the districts where the fraud is asserted to prevail and where it is proved to exist. The gentleman speaks of his district and other districts and of Dakota. If he will go and examine the affidavits on file in the Interior Department, if he will examine the reports of the special agents who have gone there and examined into these matters-

Mr. NELSON. Allow me a question.
Mr. COBB. If the gentleman would examine the proof he would find lands are being entered without being occupied.

Mr. NELSON. Let me make a statement.

Mr. COBB. That there is not one out of a thousand acres which is occupied by the man who entered it.

Mr. NELSON. I ask the gentleman to allow me to make a statement. I want to say to the gentleman from Indiana that in ninety cases out of one hundred the people of the Northwest would not believe these special agents on oath.

Mr. PERKINS. They know better than to do that.

Mr. NELSON. Yes; they know better.

Mr. COBB. Yes, you all know better; but the proof is on file that these great frauds have been committed, and that the facts are just as they have been stated.

Mr. RYAN. Why, there have not been half a dozen men sent to

the penitentiary for frauds on the public lands.

Mr. COBB. No, but there may be, and probably will be, a number. The truth about the matter is that it is not the honest men who are objecting to these investigations. It is the men whose entries are fraudulent, whose rights are not properly acquired. That is the fact about

it, and the evidence shows it.

I have myself a hundred letters at my room, letters coming from the gentleman's own State, and from other States and Territories; letters from honest men, who say that they do not object to these investigations, but that it is the men around them, men that are guilty of the frauds, who are making the objection. I take it that is true, and if you were to put the question before a jury the proof would be overwhelming against them as to the fraudulent character of many of the

Mr. CUTCHEON. Then why do you not put it before a jury?

Mr. NELSON. There is a difference between asserting a thing and proving it

Mr. COBB. The gentleman asks why it does not go before a jury. I tried to get your Commissioner to do it. I tried to get Commissioner McFarland to do it without success

Mr. DORSEY. Does the gentleman know how many of Mr. Com-missioner Sparks's decisions have been reversed by the Secretary of the Interior in my district, those decisions in which he claimed that fraudulent entries were charged?

Mr. COBB. Ido not know, nor does the gentleman know the number.
Mr. DORSEY. In every case filed in the last few months, some seven
or eight in the third district alone, they have been overruled.
Mr. COBB. How many fraudulent entries are charged that have not

Mr. DORSEY. Hundreds are charged, and they will be reversed as soon as the Secretary of the Interior gets to them on the appeals.

Mr. COBB. That is just what I wanted the gentleman to say. evidence shows that where a wrong decision has been made it is corrected under the law; and hence there can be no wrong done to the actual and bona fide settlers. That is the case everywhere. If an agent happens to make a mistake in reporting one of these cases, his mistake is corrected by the Department. If a man has a good case who is ruled against by the Commissioner, he has his appeal to the Secretary of the

Every man will get his rights, no injustice will be done, and his title will be perfected as soon as the proper proofs are presented. If it turns out that he has got a good case, if the evidence is shown in his favor, he has nothing to fear. But you gentlemen are not willing to allow the frauds to be examined into. It is a good deal like the reports of the agents—they say that good men out there enter into conspiracies against the Government, men whose characters are good, and I do not impugn their characters, but I do impugn their acts. When you come to investigate the cases they are all alike; they all got a piece of the pork, and they are willing to stand by it. It illustrates the condition of affairs there, and my friends over the way occupy that position. do not mean to say that they got any of the pork, but their neighbors have, and their constituents have, and they are simply standing by them in their frauds against the Government and the law.

Mr. DORSEY. There is no fraud.
Mr. COBB. Yes; you say so. You are one of the men perhaps the agent had in view.

Mr. DORSEY. No, sir; the gentleman must not make that remark to me. He charged that once before on a gentleman from Nebraska, but do not charge it against me; you charged it against one of my col-

Mr. COBB. The gentleman is speaking out of time. I have the cor. I am not making any charge, and shall not make any that the proof does not show.

Mr. DORSEY. You must not make any charge against me.
Mr. COBB. I make no charge against the gentleman; I am speaking of the general principle that seems to govern these entries.

Mr. DORSEY. Well, you said I was one of the men—

Mr. COBB. No; I meant that you were like one of the men the agent reported.

Now this \$125,000 ought to be appropriated. It is necessary to protect the public lands. These officers have no interest as I can conceive in making reports that are false.

[Here the hammer fell.]

Mr. PERKINS. Mr. Chairman, the gentleman from Indiana suggests that it is remarkable that the Representatives from the Western States, those who have the honor to speak on this floor for the settlers who are defamed, traduced, and vilified by men who should be engaged in better business, should do so-that it is remarkable that we stand and speak in their defense. The men who make these accusations know that the Representatives of all the Western States and Territories, as well as the people living there, are most anxious that these public lands should be preserved to the honest and bona fide settlers. It is not to

our interest that they should be occupied by cattle syndicates or rings organized to secure unlawful control of the public lands, thereby robbing the settlers of the possibility of acquiring homes upon the public

We, of all others, are interested in protecting the settlers, in strengthening the arm of the Government so that the lands may be preserved for honest occupants. But we do protest against titles being disturbed; we do protest against entries being stricken down; we do protest against honest frontiersmen being defamed, traduced, and vilified in this way by the Executive Departments of the Government and their apologists upon this floor. They have said that there are 90 per cent. of these settlements fraudulent; and yet the men who know the character of these settlers, who know the condition of affairs existing in those Western communities, know when they make that insinuation that they falsify the facts and defame as honest men as ever contributed to the growth and development of any community.

Is it possible that the great Territory of Dakota is settled by men 90 per cent. of whom are engaged in making fraudulent land entries? Is it possible that the rapidly growing and newly organized counties of Kansas are devoting themselves to a larceny of the public domain? Is it true that the people of Nebraska and the new West are devoting their energies and consuming their time in plundering lands from the Gov-

ernment of the United States?

Men go to the West with as honest purposes as they go into any other section of the country, and they settle upon these vacant prairies to make homes for themselves and to bear their full share of the burdens of honest government, and I protest against any appropriation that is to be used to take from them their honest settlements or to embarrass them

in their struggle for life.

Instead of engaging in the investigation of entries that may be fraudulent and promoting the unlawful occupation of public lands I have information recently from home that the Commissioner of the General Land Office is now sending his spies and informers into communities where there has not been an acre of public land for ten years. morning I was at his office for the purpose of finding out the condition of an entry that was made on the 2d of July, 1877. Nine years ago that entry was made and was proved up according to law and the requirements of the act of 1876, and I find that entry not approved but held up until some spy and informer can be sent there to secretly investigate the antecedents of the man who occupied the land nine years ago and

men went there, invested their money, built houses, broke the prairie, made fences, and cultivated the fields—they have done this for years, and in many instances sold to those who came subsequently, and yet they can get no patent, no title, because the Commissioner wants to send some spy and informer into that community to investigate a settlement made nine years ago for 160 acres of the public lands. And what is true of the tract of land I particularly speak of is true of all that ter-

ritor

Here the hammer fell.

Mr. RANDALL rose.
The CHAIRMAN. The gentleman from Pennsylvania is recognized for the three minutes that remain of the time allotted for debate on this

Mr. RANDALL. I think in this connection I may claim to be a dispassionate man. On the one side great frauds are alleged. On the other they are denied. It does not matter to me as to this particular paragraph whether the amount is \$90,000 or \$75,000. If there be frauds they ought to be investigated.

Mr. TOWNSHEND. And you ought to give money enough to in-

investigate them.
Mr. RANDALL. Mr. RANDALL. The Committee on Appropriations based their action not upon allegations, on the one side that the object of increasing the appropriation was to give additional patronage to the officials, nor on the other hand that it was sought to make the amount low so as to prevent the discovery of frauds in this connection. The committee based their recommendation on the expenditures of the two past years.

Mr. TOWNSHEND. Will the gentleman allow me?

Mr. RANDALL. You had your time; allow me to proceed.
Mr. TOWNSHEND. The Commissioner expended the amount that

was appropriated. The reason he did not expend more was because you did not give him more to expend.

Mr. RANDALL. We gave him, in 1885, \$100,000, and there was expended \$91,000. We gave for 1886, \$90,000, and there was, during the first six months of that year only \$31,000 expended. But rather than give any reason whatever for the allegation that there was not money enough given in this connection we gave the \$90,000 in this bill; and I anticipate the House will adhere to that position.

But suppose the Commissioner of the General Land Office and the Secretary of the Interior should find an additional number of officials was essential to the securing to the Government lands fraudulently entered, I suggest that we will be here again in a few months, and if enough is not given now, we can correct it then. That is about the position of the matter; and there is no danger, in my judgment, in adhering to \$90,000. I trust the committee and the House will adhere to The CHAIRMAN. Debate on this amendment is exhausted.

Mr. RYAN. I ask leave to extend my remarks in the RECORD.

There was no objection.

The CHAIRMAN. The question is on the motion of the gentleman from Indiana [Mr. HOLMAN] to concur with an amendment making the amount \$125,000.

The question being taken, there were—ayes 56, noes 111.

So the amendment was not agreed to.

The CHAIRMAN. The question is now on the motion of the gentleman from Pennsylvania [Mr. RANDALL] to non-concur in the Senate amendments.

The motion to non-concur was agreed to. Amendment 147 was concurred in.

Amendments 148 to 155, inclusive, were non-concurred in.

Amendments 156, 157, and 158 were concurred in.

Amendments 159 to 169, inclusive, were non-concurred in.

Amendment 170 was concurred in.

Mr. LONG. I ask that the reading of amendment 171 be dispensed with. The committee recommend concurrence.

There was no objection.

Amendment 171 was concurred in.

Amendment 172 was non-concurred in.

Amendment 173 was read, as follows:

For the education of the children of school age in the Territory of Alaska, without regard to race, \$25,000.

The committee recommended non-concurrence

Mr. NEECE. I object to non-concurrence. The Territory of Alaska belongs to the United States and is being opened up to settlement. It equals in extent of territory one-sixth of the United States, and has 30,000 inhabitants, with no power to levy one cent of school tax. If you do not make some provision of this kind, it will be left without a school. I think we ought to adopt this amendment of the Senate. school. I think we ought to adopt this amendment of the Senate. Having opened up that vast Territory to settlement, you deprive the people there of the power to levy a school tax. Books have been bought, the schools are ready to run, but you close up the school-houses, and you will not give them a single dollar to carry them on with.

Mr. RANDALL. The committee recommend non-concurrence in this amendment. We have provided elsewhere for the object for

which the gentleman contends.

Mr. NEECE. Where? Mr. HOLMAN. In the Indian appropriation bill.

The amendment was non-concurred in.

Amendment number 174 was read, as follows:

That the sum of \$37,500 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, for the purchase of a school farm and the repair of old and the erection of new buildings and outhouses for the Indian industrial school at Carlisle, Pa., to be expended under the direction of the Secretary of the Interior.

Mr. RANDALL. The committee recommend non-concurrence in that amendment

Mr. NELSON. If it is agreeable to the chairman of the Committee on Appropriations, I should be glad to hear a statement of the reason why this item is to be non-concurred in. It seems to me that it is necessary for the institution to have an additional farm. I am not advised, however, in the premises, and I ask this question rather for in-

Mr. RANDALL. Regardless of the question whether or not an additional farm should be provided for that institution, it came to the knowledge of the Committee on Appropriations from what we considered the considered was a superior of the considered was a lateral to the considered was a l ered a reliable and authentic source that the price asked was altogether

Mr. McCOMAS. In support of that I can state to the gentleman from Pennsylvania that the actual price paid for that farm when it was purchased by the present holder was \$18,500.

Mr. RANDALL. How long ago was that?

Mr. McCOMAS. Within the last month or two.

Mr. RANDALL. That is the reason that the committee have recommended non-concurrence.

Mr. NELSON. Well, for the present I make no adverse motion.

The amendment was non-concurred in.

Amendment number 175 was, on motion of Mr. CANNON, considered as read, and non-concurred in.

Amendment number 176 was non-concurred in.

Amendment number 177 was read, as follows:

For construction of a fire-proof building to be used as a milling-shop, \$30,000.

Mr. ROCKWELL. Mr. Chairman, in reference to this matter I will say that it was recommended in the Book of Estimates. A hearing before the Committee on Appropriations was asked for in the early part of the session. When the time for that hearing arrived it was decided by the chairman that this being an application for an appropria-tion for a new building at the Springfield arsenal, should be referred under the new rule to the Committee on Public Buildings and Grounds. A bill was introduced and referred to that committee, and that committee have made a favorable report, which is House Report No. 2233. In that report is cited a letter from the acting Secretary of War, General Benét, setting forth the reasons why this new building is necessary.

He says that there is great danger of fire, that the building is old, and that there is urgent necessity for the erection of a new one.

In addition to the age of the building, its overcrowding with machinery, insufficient light, the dangerous condition of the floors saturated with oil, the danger from fire, which might destroy the machinery and suspend work, and the generally unsafe condition as set forth in the letter referred to in the report and the other reasons given in the report of the Committee on Public Buildings and Grounds, I desire to call attention to the fact that if a fire should occur there, or any accident arising from the unsafe condition of the building, besides the pecuniary loss that the Government would suffer there might be great loss of life, because the building is now thoroughly crowded and weighted down with machinery and the floors are saturated with oil. It is an old building, which was constructed originally for a storehouse, and was not intended for what it is now used. The workmen employed have a right to ask that a safe building be erected.

A new building is a necessity. Wise forethought and true economy demand that it be built. This is an item that should receive attention, and I make these few remarks in order that the committee may not

pass it over without realizing the urgency of the case.

Mr. RANDALL. The committee found no law authorizing the insertion of this paragraph, and were not convinced of the immediate

necessity for a new building there.

Mr. ROCKWELL. I should like to inquire of the gentleman from Pennsylvania how the committee can say that they were not convinced of the necessity for this appropriation when they gave no hearing on the subject, while another committee did give a hearing and were convinced.

Mr. LONG. It is a very proper matter to go to a conference.

The amendment was non-concurred in.

Amendments numbered 178, 179, 180, 181, 182, 183, 184, 185, 186, and 187 were non-concurred in.

Mr. WILSON. I ask unanimous consent that amendments numbered 188 to 201, inclusive, relating to the Signal Service, be considered as read and non-concurred in.

Mr. SPOONER. Amendments 189 and 190 of the Senate are sub-

stantially the same provisions

The CHAIRMAN. Does the gentleman from Rhode Island [Mr. SPOONER] object to the request of the gentleman from West Virginia [Mr. WILSON]?

I do not think he will. Mr. LONG. Mr. LONG. I do not think he will.

Mr. SPOONER. I object only for the purpose of saying a word.

The amendments to which I have just referred are substantially the same provisions which were inserted in this bill by the House Committee on Appropriations, and which, when the bill was under consideration here, went out on a point of order. I had hoped the Committee on Appropriations would recommend concurrence in these amendments of the Senate without the necessity of carrying the matter to a conference; but I do not desire to interfere with the progress of the bill; and if the committee has determined that it is best to allow this matter to go into conference, I will not object, trusting that in the conference the

matter may be satisfactorily disposed of. The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia [Mr. WILSON] that the amendments down to 201 inclusive be non-concurred in without reading? The Chair

hears no objection, and it is so ordered.

MESSAGE FROM THE SENATE.

The committee rose informally, when a message from the Senate, by Mr. SYMPSON, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on amendments numbered 88, 179, and 180, to the bill (H. R. 8974) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes.

SUNDRY CIVIL APPROPRIATION BILL

The two hundred and second and two hundred and third amendments were read and non-concurred in.

The two hundred and fourth amendment was read and concurred in. The two hundred and fifth, two hundred and sixth, two hundred and seventh, two hundred and eighth, two hundred and ninth, two hundred and tenth, two hundred and eleventh, two hundred and twelfth, two hundred and thirteenth, two hundred and fourteenth, two hundred and fifteenth, two hundred and sixteenth, and two hundred and seventeenth amendments were read and non-concurred in.

The two hundred and eighteenth amendment was read and con-

curred in.

The two hundred and nineteenth, two hundred and twentieth, two hundred and twenty-first, and two hundred and twenty-second amendments were read and non-concurred in.

The two hundred and twenty-third, two hundred and twenty-fourth,

and two hundred and twenty-fifth amendments were read and concurred in.

Amendments numbered 226, 227, 228, 229, and 230 were read and non-concurred in.

Amendment numbered 231 was read and concurred in.

Amendment numbered 232 was read, as follows:

Insert the following:
"For the purchase of the painting of 'The First Fight of Ironclads,' by W. F. Halsall, \$7,500."

Mr. RANDALL. The committee recommend non-concurrence.

Mr. LONG. In regard to this amendment, I desire only to say that I trust the conferees will assent to the purchase of this picture. gress has entered upon the policy of buying every year one or two pictures for the Capitol. This certainly is a very desirable picture, on account of the subject it commemorates as well as its artistic execution.

The amendment was non-concurred in.

Amendments numbered 233, 234, 235, and 236 were read and non-

concurred in.

The two hundred and thirty-seventh amendment was read, as fol-

Insert the following:

"And the scientific reports known as the monographs and bulletins of the Geological Survey shall not be published until specific and detailed estimates are made therefor, and specific appropriations made in pursuance of such estimates; and no engraving for the annual reports or for such monographs and bulletins, or of illustrations, sections, and maps, shall be done until specific estimates are submitted therefor and specific appropriations made based on such estimates: Provided, That these limitations shall not apply to the current fiscal year, nor to any of the reports, mineral resources, monographs, or bulletins that may have been transmitted for publication to the Public Printer prior to the passage of this act: Provided further, That all printing and engraving for the Geological Survey, the Coast and Geodetic Survey, the Hydrographic Office of the Navy Department, and the Signal Service shall hereafter be estimated for separately and in detail, and appropriated for separately for each of said bureaus."

Mr. RANDALL. The committee resources and the stable resources.

Mr. RANDALL. The committee recommend that the House nonconcur in this amendment.

Mr. LONG. Why not concur in it? Mr. RANDALL. We do not fully understand the scope of the proposition.

Mr. BOUTELLE. I would like to hear some reason given for nonconcurrence

Mr. RANDALL. The committee proposes that the whole paragraph in relation to public printing go into conference with a view to more clearly learning what the Senate desires.

The amendment was non-concurred in.

The two hundred and thirty-eighth amendment was read, as follows:

Insert the following:
"To enable the Public Printer to comply with the provisions of the law granting fifteen days' annual leave to the employés of the Government Printing Office, \$95,000, or so much thereof as may be necessary."

Mr. RANDALL. The Committee on Appropriations recommend non-concurrence in this amendment.

Mr. ADAMS, of Illinois. I move that the House concur.

Mr. RANDALL. The question involved here is whether the appropriation embraced in the previous paragraph is not sufficient to cover this expenditure of \$95,000.

Mr. ADAMS, of Illinois. I fully agree that many of these provisions may advantageously go into conference where information is desired on the part of the House; but the question presented by this amendment is so simple it seems to me our duty to express at once our opinion one way or the other. I do not care to detain the Committee of the Whole with any remarks.

Mr. REAGAN. I want to express my opinion here and now that it is not the duty of Congress to pay men for doing nothing. Our constituents at home are not paid for doing nothing, though they work harder than these employés of the Government and get less pay. I hope this House does not intend to go on with this business of creating an official class to batten and fatten in comparative idleness upon the labor of other people. It seems to be the idea that when a man gets into a Government office he is employed to be a gentleman, to have elegant leisure, and to do little work. I hope the House will go no further in this matter.

Mr. CANNON. I wish to ask the gentleman whether it is not true that legislation has already been had granting fifteen days live of absence with pay to these employés, and whether this is not merely an

appropriation to comply with the existing law.

Mr. RANDALL. We do not propose to nullify any law; but I for Mr. RANDALL. We do not propose to nullify any law; but I for one am tired and sick of the attempt on the part of the employes of this

Government to run this House.

Mr. CANNON. Still, I understand that legislation authorizing this

eave of absence has already been had.

Mr. RANDALL. That is not disputed. I have given as a reason thy this matter should go into conference that we want to discover whether the appropriation embraced in the preceding paragraph is not

sufficient to cover this expenditure.

Mr. PLUMB. Mr. Chairman, it seems to me that we should concur in the Senate amendment. There is already in force, as I understand, a provision of law giving to employés of the Government Printing Office fifteen days' leave of absence with pay in each year. Here is an appropriation to meet that expenditure. There is no need of raising any question whether some other appropriation may not be sufficient to cover this expenditure; for if this appropriation be made, it can not be used unless the expenditure be required by law. I do not think we ought to run any hazard of leaving this expenditure unprovided for;

and we should not appear as seeking to withhold from the employés in the Government Printing Office that which we promised by law to give them.

Mr. BUCHANAN. Mr. Chairman, it seems to me that this proposition is, as the gentleman from Illinois [Mr. ADAMS] has well said, so plain, that this House ought to act upon it at once and without awaiting further information. It is not a specific appropriation of a certain amount, but the appropriation of that amount or so much thereof as may be necessary.

My apprehension in the matter is this: In case this item fails to become the law the authorities will hold that there is no distinct appropriation for this leave of absence, and they will nullify it, and the employés will be deprived of that leave of absence which this Congress I wish it to be so arranged there can be no misapprehen-

sion. If all the sum here provided is not required it will not be used. I do not believe in the employés of the Government running this House, nor do I believe in submitting so simple a matter as this is to three conferees on the part of this House. The three hundred and twenty-five members of this House are as competent to vote on this matter as when it is brought back with a report of the conferees on the subject.

I wish to say my only apprehension in reference to the matter is that this item may not be adopted, and under cover of the law these employés may be deprived of this leave of absence which Congress has resolved to give them. I yield the remainder of my time to the gentleman from Pennsylvania [Mr. BAYNE].

Mr. BAYNE. Mr. Chairman, in my judgment we ought to pass this appropriation for the payment of these men during their leave of absence. We ought not to have passed the law granting the leave of absence unless

we intended to pay them during that time.

Mr. RANDALL. There is no effort to nullify the law.

Mr. BAYNE. Of course we do not want to nullify that law. do not want to keep the promise to the ear and break it to the hope. I ask, therefore, we will concur in the amendment and appropriate this amount, or so much thereof as may be necessary. There is no fear

they will pay out more than is necessary to pay these men.

Mr. RANDALL. As I have already stated there is no effort to evade
the law, but this should be non-concurred in so the exact amount may be provided. When that is ascertained it will be put in the bill.

The question recurred on concurrence in the Senate amendment.

The committee divided; and there were—ayes 56, noes 84.

Mr. BAYNE. No quorum.
Mr. RANDALL and Mr. ADAMS, of Illinois, were appointed as tellers.
The committee again divided; and the tellers reported—ayes 77, noes 90.

So the amendment was non-concurred in.

The Senate amendments numbered 239 and 243 were non-concurred in, and amendments numbered 240, 241, and 242 were concurred in.

Mr. RANDALL moved that the committee rise and report the amendments of the Senate to the House.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. BLOUNT reported that the Committee of the Whole House on the state of the Union had had under consideration the amendments of the Senate to the bill (H. R. 9478) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes, and had directed him to report the same back with various recommendations.

Mr. RANDALL. I move the House concur in the report of the Committee of the Whole; and on that motion I demand the previous ques-

Mr. BLAND. I demand a separate vote on the Senate amendments numbered 69, 70, 71, 72, 73, and 74, in reference to silver certificates. The SPEAKER. The committee recommend concurrence, with an amendment.

The House divided; and there were-ayes 115, noes 35.

Mr. BLAND demanded the yeas and nays.

The House voted; and there were 27 in the affirmative.

Mr. BLOUNT. Count the other side.

The other side was counted, and 27 voted, which was not one-fifth of those present.

Mr. BLAND. Tellers on the yeas and nays. Tellers were not ordered.

So the yeas and nays were refused.

The amendments of the Senate were concurred in, with the amendment of the House.

On motion of Mr. ADAMS, of Illinois, a separate vote was asked on the following amendment of the Senate.

The Clerk read as follows:

Add the following:
"To enable the Public Printer to comply with the provisions of the law granting fifteen days' annual leave to the employés of the Government Printing Office, \$95,000, or so much thereof as may be necessary."

The SPEAKER. The Committee of the Whole recommend non-con-

Mr. RANDALL demanded a division.

The SPEAKER. The question recurs on the recommendation of the committee to non-concur.

The House divided; and there were-ayes 81, noes 74. Mr. ADAMS, of Illinois, demanded the yeas and nays. The yeas and nays were ordered.

Mr. RANDALL. I ask by unanimous consent that the adjournment be extended beyond 5 o'clock and until after this bill has been disposed of, and also until the gentleman from Indiana [Mr. HOLMAN] has submitted a conference report on the legislative bill. There was no objection, and it was ordered accordingly.

The question recurred on the report of the committee to non-concur in Senate amendment numbered 238, on which the yeas and nays had been ordered.

The question was taken; and it was decided in the affirmative—yeas 117, nays 105, not voting 100; as follows:

Kelley,

Ely,

So the amendment was non-concurred in. On motion of Mr. RANDALL, by unanimous consent the reading of the names was dispensed with.

Mr. SNYDER with Mr. WAIT, for the remainder of the day. Mr. SPRIGGS with Mr. MILLARD, for the rest of the day. Mr. REESE with Mr. PAYNE, for the rest of the day.

Mr. CRAIN with Mr. HARMER, for the rest of the day.

Mr. KING with Mr. WEBER, for the rest of the day.

Mr. LAWLER with Mr. ATKINSON, for the rest of the day. Mr. O'NEILL, of Missouri, with Mr. WAKEFIELD, for the rest of the

Mr. GEDDES with Mr. HAYNES, for the rest of the day.

The result of the vote was then announced as above recorded.

The recommendation of the Committee of the Whole House on the state of the Union as to the other amendments was agreed to.

Mr. RANDALL moved to reconsider the several votes taken; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

Mr. RANDALL. In order now to expedite the progress of this bill, I ask that the conferees be appointed at once, and also that the House request a conference with the Senate on the disagreeing votes of the two Houses.

There was no objection, and it was so ordered.

The SPEAKER appointed as managers at the conference on the part of the House Messrs. RANDALL, FORNEY, and RYAN.

COMMITTEE REPORTS.

Mr. BROWN, of Pennsylvania. I rise to ask unanimous consent that those having reports from committees may be permitted to file them with the Clerk for to-day.

The SPEAKER. Is there objection?

There was no objection, and it was so ordered.

BRIDGE ACROSS THE SAINT LOUIS RIVER.

Mr. HENDERSON, of Iowa, by unanimous consent, introduced a bill (H. R. 9987) to authorize the construction of a bridge across the Saint Louis River at the most accessible point between the States of Minnesota and Wisconsin; which was read a first and second time, referred to the Committee on Commerce, and ordered to be printed.

LEGISLATIVE, ETC., APPROPRIATION BILL.

Mr. HOLMAN. I desire to submit a conference report on the legislative bill.

The Clerk read as follows:

The Clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate numbered 88, 179, and 180 to the bill (H. R. 8974) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 179.

That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "\$1,970,000;" and the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate numbered 180, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "\$52,960;" and the Senate agree to the same.

WM. S. HOLMAN,

GEO. C. CABELL,

J. G. CANNON,

Managers on the part of the House.

W. B. ALLISON,

W. B. ALLISON, H. L. DAWES, F. M. COCKRELL,

Managers on the part of the Senate.

The statement of the conferees is as follows:

The managers on the part of the House of the conference on the disagreeing votes of the two Houses on the amendments of the Senate numbered 88, 179, and 180 to the bill (H. R. 8974) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year 1887, submit the following written statement in explanation of the action agreed upon by the conference committee, as submitted in the accompanying report:

"On amendment numbered 88: Fixes the amount for salaries and expenses of agents and surveyors, for fees and expenses of gaugers, for salaries of store-keepers, and for miscellaneous expenses of the internal-revenue service, at \$1,970,000.

"On amendments 179 and 180: Strike out the proposed sum of \$10,000 for the

\$1,970,000.

"On amendments 179 and 180: Strike out the proposed sum of \$10,000 for the collection of statistics relating to marriage and divorce."

The total amount appropriated by the bill as it has been finally agreed upon is \$20,654,346.37, being \$899,219.25 less than the estimates submitted for 1887, \$722,362.33 less than the law for 1886, \$80,786 less than it was passed by the Senate, and \$70,117,20 more than it was passed by the House.

WM. S. HOLMAN,

GEO. C. CABELL,

J. G. CANNON,

Managers on the part of the House.

Mr. HOLMAN. Mr. Speaker, I wish to add a few words. It will be seen by this report that this bill, when it becomes a law, will appropriate \$869,219.25 less than the estimates for this branch of the public service and appropriates \$722,362.33 less than the corresponding bill for the last year. While this reduction is considerable in a bill of this proportion, it is not in my judgment, and I think in the judgment of other members of the Committee on Appropriations, anything near what it should have been. There has been such a steady and persistent growth of appropriations on this bill from year to year for many years, and so many personal interests connected with it, that it is one of the most difficult bills to deal with in the whole round of our legis-The following additional pairs were announced:

Mr. Tucker with Mr. Stewart, of Vermont, until further notice. lation, the pressure being constantly in favor of new employments and increased appropriations. I trust, sir, with the experience that has

been acquired in the last eight months, that the bill can be framed for the next fiscal year with a better understanding of the requirements of the public service, as there are many sources of expense that can mani-festly be largely reduced with increased efficiency. The steady growth of this bill from year to year ought to arrest public attention, as it is in a large degree the measure of the growth of public employments in the ciril service. the civil service.

I wish to add to my remarks a table showing the appropriations carried by this bill for the last fourteen years.

Mr. HISCOCK. I wish to ask the gentleman whether the table to which he refers for the last fourteen or fifteen years adds the items provided for in the deficiency bills wherever they have occurred?

Mr. HOLMAN. I am not aware of any material deficiencies that

have occurred in the appropriations covered by this bill.

Mr. HISCOCK. Oh, yes.
Mr. HOLMAN. I do not think they would reach beyond a few thousand dollars in any one year. It is a mere bagatelle as compared with other bills. In this bill, except the contingencies, the appropriations are specific.
Mr. HISCOCK.

Mr. HISCOCK. I think the gentleman is mistaken in that.
Mr. HOLMAN. I think that from 1873 down to the present time
the whole amount of deficiencies in the appropriations covered by this

bill will be found a comparatively small sum.

Mr. HISCOCK. Do you know the amount of the deficiency in the items carried by the legislative bill for the last fiscal year which should be included in such an estimate?

Mr. HOLMAN. It is very inconsiderable.

Mr. HISCOCK. Have you estimated them?

Mr. HOLMAN. I repeat they are very inconsiderable, but I have not the figures before me. This bill has never been a subject of any material deficiency except as to occasional contingencies. The appropriations have been generally up to the current expenses of the Government for salaries of the civil officers and employés. The great de-

ficiencies occur elsewhere.

The table of the appropriations under this bill since 1873, showing the amount appropriated for each of the following years, is as follows:

Amount ap	propriated.
1874	\$17, 120, 496
1875	20, 783, 900
1876	18, 902, 236
1877	15, 417, 933
1878	15, 450, 345
1879	15, 438, 881
1880	16, 287, 457
1881	16, 274, 223
1882	17,677,679
1883	20, 038, 000
1884	20, 454, 246
1885	21, 393, 141
1886	21, 376, 708
1887	20, 654, 346

I now demand the previous question on the adoption of the report. The previous question was ordered; and under the operation thereof the report of the committee of conference was agreed to.

Mr. HOLMAN moved to reconsider the vote by which the report was agreed to; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

REPORTS OF COMMITTEES.

Under the previous order of the House reports from committees were filed with the Clerk and referred as follows:

PUBLIC BUILDING AT DETROIT, MICH.

Mr. WORTHINGTON, from the Committee on Public Buildings and Grounds, reported back with a favorable recommendation the bill (8. 1131) to amend an act to provide for the purchase of a site and the erection of a public building thereon at Detroit, Mich., approved March 2, 1885; which was referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report, ordered to be

JAMES H. KING.

Mr. MATSON, from the Committee on Invalid Pensions, reported back with a favorable recommendation the bill (S. 362) granting a pension to James H. King; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

MARY ANN VARS.

Mr. LOVERING, from the Committee on Invalid Pensions, reported back with a favorable recommendation the bill (S. 1570) granting a pension to Mary Ann Vars; which was referred to the Committee of the Whole House on the Private Calendar, and, with the accompanying report, ordered to be printed.

JUDITH PLUMMER.

Mr. LOVERING, from the Committee on Invalid Pensions, also reported back with amendments the bill (H. R. 4038) for the relief of Judith Plummer; which was referred to the Committee of the Whole

House on the Private Calendar, and, with the amendments and accompanying report, ordered to be printed.

LIGHT-HOUSE, GREAT WICOMICO RIVER.

Mr. CLARDY, from the Committee on Commerce, reported, as a substitute for H. R. 3732, a bill (H. R. 9988) for the establishment of a light-house at the mouth of Great Wicomico River, Virginia; which was read a first and second time, referred to the House Calendar, and, with the accompanying report, ordered to be printed.

PUBLIC BUILDING AT LA CROSSE, WIS.

Mr. BROWN, of Pennsylvania, from the Committee on Public Buildings and Grounds, reported back with a favorable recommendation the bill (S. 2242) to change the limit of appropriation for the public building at La Crosse, Wis.; which was referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report, ordered to be printed.

PUBLIC BUILDING AT WILKES BARRE, PA.

Mr. BROWN, of Pennsylvania, from the Committee on Public Buildings and Grounds, also reported back with an amendment the bill (H. R. 2147) to authorize the purchase of a site and the erection of a suitable building for a post-office and other Government offices in the city of Wilkes Barre, Pa.; which was referred to the Committee of the Whole House on the state of the Union, and, with the amendment and accompanying report, ordered to be printed.

ELLEN SPAULDING.

Mr. REED, of Maine, by unanimous consent, introduced a bill (H. R. 9989) for the relief of Ellen Spaulding; which was read a first and second time, referred to the Committee on Claims, and ordered to be

ENROLLED BILLS SIGNED.

Mr. FISHER, from the Committee on Enrolled Bills, reported that the committee had examined and found duly enrolled bills of the fol-

lowing titles; when the Speaker signed the same:
A bill (S. 1227) granting a pension to William P. Squires; and
A bill (S. 2349) granting a pension to Catharine Lanigan.

ORDER OF BUSINESS.

Mr. SPRINGER. I ask unanimous consent to have an evening session to-morrow assigned for the consideration of private Senate bills on the Calendar against which there is no objection.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolved, That the House will on Thursday, July 29, take a recess from 5 o'clock p. m. until 8 o'clock p. m., the evening session to be devoted to the consideration of Senate bills on the Private Calendar to which there may be no objection, and the session not to continue beyond 11 o'clock p. m.

Mr. McCOMAS. I object, unless the order includes House bills on the Private Calendar to which there is no objection.

Mr. SPRINGER. The Senate bills are the only ones that can go through this session.

Mr. McCOMAS. I object. Mr. SPRINGER. I will agree to what the gentleman suggests, and

Mr. SPRINGER. I will agree to what the goald and agree will modify my resolution accordingly.

Mr. BLAND. I move that the House adjourn.

The SPEAKER. It was the order of the House that it should adjourn as soon as the business specified was completed.

Mr. BRECKINRIDGE, of Arkansas. The objection to the resolution of the graphsman from Illinois [Mr. SPRINGER] as now modified tion of the gentleman from Illinois [Mr. Springer] as now modified is withdrawn. [Cries of "Regular order!"]

The SPEAKER. The condition was that no other business was to

be transacted.

The House accordingly, under its previous order (at 5 o'clock and 15 minutes p. m.), adjourned.

PETITIONS, ETC.

The following petitions and papers were laid on the Clerk's desk, under the rule, and referred as follows:

By Mr. DOUGHERTY: Petition of M. M. Levey, for increase of pension—to the Committee on Invalid Pensions.

By Mr. MOFFATT: Resolution of Albert Jackson Post, No. 300,

Grand Army of the Republic, in favor of the passage of Senate bill 1886-to the same committee.

By Mr. MORRISON: Petition of citizens of Illinois for the passage of Senate bill 1886, granting pensions to dependent soldiers-to the

By Mr. REAGAN: Memorial and protest of the Teachers' Association of Texas, on the subject of Federal aid to education in the States-to the Committee on Education.

By Mr. SENEY: Memorial of Thomas W. Prentiss and others, of Putnam County, Ohio, against pension bills indicating the objects to be taxed for the payment of pensions-to the Committee on Invalid Pen-

stores, &c., taken and used by the United States Army-to the Com-

mittee on War Claims.

By Mr. TAULBEE: Petition of William G. Dunn, administrator estate of Cooper Dunn, deceased, of Garrard County, Kentucky, asking compensation for stores, &c., taken and used by the United States Army-to the same committee.

By Mr. J. M. TAYLOR: Petition of Robert Brown, sr., of Madison County, Tennessee, asking that his claim be referred to the Court of

Claims—to the same committee.

By Mr. ZACH. TAYLOR: Petition of Benjamin Holt, of Wayne County, and of Grace Ann Mitchell, of Shelby County, Tennessee, asking that their claims be referred to the Court of Claims—to the same committee.

Also, papers relating to the claim of Holmes Sells, of Atlanta, Ga.-

to the same committee

By Mr. TUCKER: Petition of Rev. Byron Sunderland and others, for such action as will avoid sessions of Congress on the Sabbath day—to

the Committee on Rules.

By Mr. WILLIAM WARNER: Petition of Israel Blagg, of Barbour County; of Miles Harrington, and of Sarah A. Cox, administrator of William G. Cox, deceased, of Platt County, Missouri, asking compensation for stores, &c., taken and used by the United States Army the Committee on War Claims.

The following petitions, asking for the passage of House bill 7887, repealing timber-culture, pre-emption, and desert-land acts; of House bill 7021, for adjustment of railroad and other land grants; of bill forfeiting all railroad land grants the conditions of which have not been strictly complied with; of House bill organizing the Territory of Oklahoma; of Senate bill opening a portion of the great Sioux reservation to settlement; of bill prohibiting aliens from holding land in the United States; of bill making Presidential and Congressional election days holidays, and punishing bribery; and of bill directing disbursement of at least \$200,000,000 Treasury surplus, and substituting Treasury notes for bank notes retired, were severally referred to the Committee on the Public Lands:

By Mr. ATKINSON: Petition of Morris Snider and 18 others and of H. D. White and 120 others, citizens of the eighteenth district of Penn-

sylvania.

By Mr. BLISS: Petition of John Roach and 61 others and of Frank Flippinger and 31 others, citizens of the fifth district of New York. By Mr. DOWDNEY: Petition of Charles Newman and 39 others and

of Albert A. Rowlett and 46 others, citizens of the twelfth district of New York.

By Mr. LAFFOON: Petition of L. H. Page and 75 others, citizens of

the second district of Kentucky.

By Mr. WADE: Petition of John Maynard and 206 others, of James Kennedy and 110 others, of J. A. Sweeds and 126 others, of F. Gibson and 175 others, of J. Fairbanks and others, and of C. H. Allen and others, citizens of the thirteenth district of Missouri.

SENATE.

THURSDAY, July 29, 1886.

The Senate met at 11 o'clock a. m.

Prayer by the Chaplain, Rev. J. G. BUTLER, D. D. The Secretary proceeded to read the Journal of yesterday's proceedings, and after reading for seven minutes, Mr. CULLOM. I ask that the further reading of the Journal be dis-

pensed with.

The PRESIDENT pro tempore. If there be no objection the further reading of the Journal will be dispensed with.

Mr. INGALLS. Is there a quorum present? We might as well hear the Journal as do anything else if there is no quorum. The PRESIDENT pro tempore. The Chair does not find a quorum

present. Mr. CULLOM. I withdraw the request if there is no quorum pres-

The PRESIDENT pro tempore. The roll will be called.

Several SENATORS. Let the Journal be read.

The PRESIDENT pro tempore. The Secretary will call the roll. Where a quorum does not appear, and that statement is made by the Chair, the rule requires peremptorily that the roll shall be called.

The Secretary called the roll, and the following Senators answered to their names:

Allison, Spooner, Teller, Vance, Van Wyck, Voorhees, Walthall, Whithorne, Edmunds, Mahone, Allison, Beck, Berry, Blackburn, Blair, Brown, Call, Cockrell, Cullom, Dawes. Eustis, Evarts, Frye, Gibson, Hale, Harris, Palmer, Payne, Plumb, Pugh, Ransom, Riddleberger, Saulsbury, Harrison. Wilson of Iowa, Wilson of Md. Hawley, Hoar, Ingalls, Sawyer, Sewell, Sherman, Dolph,

The PRESIDENT pro tempore. Forty-two Senators having answered | endar.

to their names, if there be no objection further proceedings under the call will be dispensed with, and the further reading of the Journal will also be dispensed with if there be no objection. The Journal will stand approved.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore presented the proclamation of the gov-The PRESIDENT pro tempore presented the proclamation of the governor of Utah relative to violation of the law in respect to marriage by members of the Church of Jesus Christ of Latter Day Saints; which was referred to the Committee on Territories.

Mr. CALL presented the petition of C. M. Furman and others, citizens of South Carolina and Florida, praying for the confirmation of land grants in Florida; which was referred to the Committee on Public Lands.

Mr. DAWES. I present a petition of the executive board of the Woman's National Indian Association, praying for an appropriation for education in Alaska. I move that the petition lie on the table, inas-

education in Alaska. I move that the petition lie on the table, inasmuch as the Senate has already taken favorable action upon the matter. The motion was agreed to.

Mr. McMILLAN presented a memorial of La Grange Post No. 79, Grand Army of the Republic, of Windom, Minn., remonstrating against any tax on the pension system; which was referred to the Committee

on Pensions.

Mr. McMILLAN. I present a petition of ministers and other citizens of the District of Columbia, praying Congress to so regulate the final adjournment as to avoid a session on Sunday, which I ask may be printed in the RECORD.

The petition was referred to the Committee on Appropriations, and

ordered to be printed in the RECORD, as follows:

To like honorable Senate and House of Representatives of the United States:

The undersigned would respectfully petition your honorable bodies to so order the day of your adjournment as to avoid a session upon the Sabbath. The day has been guarded by both Divine and human laws. The Sabbath sessions of Congress in the past have done violence to the deepest and most sacred convictions of multitudes of our fellow-citizens. With the hope that your honorable bodies will take such action as shall avoid this result, we will ever pray.

Washington, D. C., July 27, 1886,
B. SUNDERLAND.

WESTEL WILLOUGHBY.

Mr. PALMER presented the memorial of John J. Bagley & Co. and 24 other manufacturers and dealers in tobacco, of Detroit, Mich., remonstrating against the passage of House bill 8738, changing the method of packing tobacco; which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. BLAIR, from the Committee on Pensions, to whom was referred the bill (S. 2532) for the relief of Mary H. Casler, reported it with amendments, and submitted a report thereon.

Mr. MAHONE, from the Committee on Public Buildings and Grounds, to whom was referred the bill (H. R. 2539) authorizing the Secretary of the Treasury to exchange property purchased at Abingdon, Va., as a site for a public building for more suitable property, reported it with an amendment.

Mr. SAWYER, from the Committee on Post-Offices and Post-Roads, to whom was referred the bill (S. 1968) to authorize the Postmaster-General to allow to the American Bank Note Company in the settlement of its account credit for the cost of certain postage-stamps furnished to the Post-Office Department, reported it without amendment, and submitted a report thereon.

Mr. PALMER, from the Committee on Fisheries, to whom was referred the bill (H. R. 5538) relating to the importing and landing of mackerel caught during the spawning season, reported it with an amend-

ment, and submitted a report thereon.

Mr. SEWELL, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment,

ferred the following bills, reported them severally without amen and submitted a report thereon:

A bill (H. R. 7698) granting a pension to Robert K. Bennett;

A bill (H. R. 6819) granting a pension to William Conner;

A bill (H. R. 8826) granting a pension to John Patton;

A bill (H. R. 8835) granting a pension to Jacob Case; and

A bill (S. 2486) granting a pension to John Spruce.

Mr. McMILLAN, from the Committee on Commerce, to whom was referred the bill (H. R. 3504) to amend section 4414 of the Revised Statutes, relating to inspectors of hulls and boilers, reported it without amendment.

Mr. TELLER, from the Committee on Public Lands, to whom was referred the bill (S. 2877) to promote the efficiency of the General Land Office, reported it without amendment, and submitted a report thereon.

Mr. BECK. I am directed by the Committee on Finance, to whom was referred the bill (H. R. 8585) to provide for the inspection of to-bacco, cigars, and snuff, and to repeal section 3151 of the Revised Statutes, to report it without amendment. There is no report in the case

The PRESIDENT pro tempore. The bill will be placed on the Cal-

Mr. CONGER, from the Committee on Commerce, to whom was referred the bill (H. R. 9728) to authorize the Chicago, Saint Louis and New Orleans Railroad Company and the Illinois Central Railroad Company, or either of them, to construct a bridge over the Ohio River at or near Cairo, Ill., reported it with amendments.

He also, from the same committee, to whom was referred the bill (S. 1718) authorizing the Chicago, Saint Louis and New Orleans Railroad Company and the Illinois Central Railroad Company, or either of them, to construct a bridge over the Ohio River at or near Cairo, Ill., moved it is independent. its indefinite postponement; which was agreed to.

AMERICAN ANNIVERSARY CELEBRATION.

Mr. HOAR. I am directed by the Committee on the Library to report the following resolution, and ask its present consideration:

Whereas the approaching centennial anniversary, in 1889, of the adoption of the Constitution of the United States, and that of the four hundredth anniversary, in 1892, of the discovery of America by Christopher Columbus, are two important historical events, fraught with great patriotic interest, not only to the citizens of this Republic and of the governments of the western hemisphere, but also mark occasions of transcendent importance in the history of the civilized world; and

Whereas it is proper that the people should commemorate these great events in a manner becoming the greatness and dignity of the United States: Therefore.

fore, Be it resolved, That a committee of five members of the Senate, of whom the President of the Senate shall be one, be appointed to consider, formulate, and report at the next session of Congress a plan for properly celebrating, at the capital of the Republic, these two illustrious anniversaries. Said committee are authorized to act in concert with any similar committee of the House of Representatives, and to sit during the recess.

The PRESIDENT pro tempore. Is there objection to the present consideration of this resolution?

Mr. HALE. I object.
The PRESIDENT pro tempore. The Senator from Maine objects, and the resolution goes over under the rule.

COMMITTEE ON RULES.

Mr. FRYE. I am directed by the Committee on Rules to report the following resolution:

Resolved, That the Committee on Rules be, and is hereby, continued and authorized to sit during the recess of Congress, and that the necessary expenses thereof be paid out of the miscellaneous items of the contingent fund of the Senate.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

Mr. VAN WYCK. Let it go over until to-morrow.

The PRESIDENT pro tempore. The resolution goes over under objection.

PACKING AND SELLING CUT TOBACCO.

Mr. ALDRICH. I am directed by the Committee on Finance to ask that House bill 8738, Order of Business 1725, be recommitted to that committee for further consideration.

The PRESIDENT pro tempore. The Senator from Rhode Island moves to recommit to the Committee on Finance the bill (H. R. 8738) to so further amend section 3362 of the Revised Statutes, as amended, and section 3363, as makes a distinction in the mode of packing and selling cut tobacco. If there be no objection the bill will be recommitted to the Committee on Finance.

Mr. EUSTIS. I should like to have the Senator from Rhode Island give the reasons for a recommittal.

Mr. ALDRICH. I said for further consideration by the Committee on Finance, the fact being that the report was ordered to be made under a misapprehension of the facts in the case. It was supposed that the bill

was satisfactory to the trade as well as to the Department.

Mr. BECK. If I may be permitted, I will state that I reported the Mr. BECK. If I may be permitted, I will state that I reported the bill from the Committee on Finance some time ago, by order of the com-mittee, on a letter from the Commissioner of Internal Revenue, addressed to myself, saying that he had prepared the bill, he believed it was right, and would save the Department from embarrassment, and that the Secretary of the Treasury had made a similar request of the House of Representatives, and the bill was passed by that body upon his statement. The letter was printed and laid upon the desks of

Since that time men from various parts of the country have sent pro-tests against the bill, asking to be heard, and I think they ought to be heard, and that the committee ought to look further into it. Although I can see nothing wrong in it, yet very many people engaged in the trade believe that it is objectionable, and they have had no hearing and no chance to be heard.

Mr. EUSTIS. Under ordinary circumstances I should interpose no objection to the motion to recommit, but as it involves the defeat of the bill, on account of the late hour of the session, I deem it my duty to explain to the Senate the reasons why I oppose the motion.

I will first state that it is a very unusual motion. I do not recollect that at this session I have heard such a motion made; that is, when a bill has been passed by the House of Representatives, referred to a committee of the Senate, and favorably reported to the Senate, that the Senate should not consider that bill because a few rich manufacturers make a protest against such legislation.

The PRESIDENT pro tempore. The Senator from Louisiana will

The Chair is of opinion that this motion is not debatable, but goes over under objection. If the Senator objects the motion goes over until to-morrow, and therefore it is not debatable.

Mr. EUSTIS. I would just as lief have it acted upon now if I can

The PRESIDENT pro tempore. According to the express rule morning business can not be interrupted by debate. Therefore if there is objection made, the motion must go over under the rule.

Mr. VANCE. Can not the Senator from Louisiana be heard by unan-

imous consent?

The PRESIDENT pro tempore. If there be no objection.
Mr. MILLER. The other side has to be heard.
Mr. HALE. This will evidently lead to debate.

Mr. ALLISON. I think it is rather too important a matter to debate this morning

The PRESIDENT pro tempore. Objection being made, debate is not in order, and the motion goes over under objection.

COMMITTEE ON EXPENDITURES OF PUBLIC MONEY.

Mr. CULLOM, from the Committee on Expenditures of Public Money, submitted the following resolution; which was read:

Resolved, That the Committee on Expenditures of Public Money, or a subcommittee thereof, be, and is hereby, authorized to sit during the recess of the
Senate to continue the investigation ordered by the Senate resolution of January 27, 1886, with the same authority given by said resolution. Said committee
shall have power to employ a clerk and a stenographer, and the expenses of
such investigation shall be paid from the appropriation for expenses of inquiries
and investigations ordered by the Senate.

I ask that the resolution be acted upon at this time. The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

Mr. COCKRELL. That had better lie over. The PRESIDENT pro tempore. The resolution goes over under the

BILLS INTRODUCED.

Mr. WHITTHORNE. Mr. President, is it now in order to move to

take up from the table a bill which I introduced some days since?

The PRESIDENT pro tempore. Morning business is not yet concluded. The introduction of bills and joint resolutions is next in order.

Mr. BERRY introduced a bill (S. 2882) for the relief of Levander Jenkins; which was read twice by its title, and referred to the Committee on Claims.

Mr. SAWYER introduced a bill (S. 2883) granting a pension to James E. Abbs; which was read twice by its title, and referred to the Committee on Pensions.

Mr. PALMER introduced a bill (S. 2884) granting a pension to Mrs. Anna Etheridge Hooks; which was read twice by its title, and referred to the Committee on Pensions.

Mr. BROWN introduced a joint resolution (S. R. 79) referring the title of Mary A. Washington to property referred to in 92 United States Reports, page 698, to the Court of Claims; which was read twice by its title, and, with the accompanying memorial, referred to the Committee on Private Land Claims.

STATISTICS OF WHEAT CROP.

Mr. WILSON, of Iowa, submitted the following resolution; which was read:

Resolved, That the Commissioner of Agriculture be directed to report to the Senate, at the commencement of the next session of Congress, the amount in bushels of wheat harvested in each wheat producing country during the present year, and the amount harvested in each during the preceding five years; the average increase or decrease in the world's consumption of wheat during said years; the probable requirements of each wheat-importing country prior to September 1, 1887, and the probable surplus in each wheat-exporting country to meet such requirements; with the number of acres of wheat in the ground in each to make the crop of 1887 at the date of said report as compared with like date in 1885; said report to be as brief and concise as a clear statement of the information called for will admit.

Mr. PLUMB. I object to the consideration of that.

The PRESIDENT pro tempore. Objection being made, the resolution goes over.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had agreed to some and disagreed to other amendments of the Senate to the bill (H. R. 9478) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes, asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. RANDALL, Mr. FORNEY, and Mr. RYAN the managers at the conference on the part of the House.

TREASURY SURPLUS.

Mr. ALLISON. I move that the Senate proceed to the considera-

tion of the joint resolution (H. Res. 126) directing payment of the surplus in the Treasury on the public debt.

Mr. McPHERSON. Before considering that question, let me ask the Senator from Iowa if he would not yield to me long enough to call up a resolution to place back where they belong certain naval cadet engineers in their proper place in the Navy. It is a Senate resolution and must go to the other House for concurrence. If it provokes a particle of discussion I am perfectly willing to have it displaced, but I think it will not. They were restored by the action of the courts, and all we

wish to do is to place them in their proper positions.

Mr. ALLISON. I should like very much to yield, but—
The PRESIDENT pro tempore. No debate is in order.

Mr. ALLISON. I should like to yield to the Senator, but I can not

The PRESIDENT pro tempore. The Senator from Iowa moves that the Senate proceed to the consideration of the joint resolution indicated by him.

The motion was agreed to.

Mr. BLAIR. I suppose the majority of the Senate may deem that a more important measure to attend to, but I give notice that as soon as there is opportunity I shall move to take up the pension cases, as I have previously given notice.

Mr. COCKRELL. I should like to ask the Senator from New Hamp-

shire if he proposes to take up the vetoed pension bills in the order in

which they appear on the Calendar?

Mr. BLAIR. That was my desire. I wish to begin with the first one on the Calendar. I do not know how it may be subsequently. It may be that if there are particular cases subsequently which Senators choose to call up I should interpose no objection.

TREASURY SURPLUS.

The Senate, as in Committee of the Whole, proceeded to consider the joint resolution (H. Res. 126) directing payment of the surplus in the Treasury on the public debt.

The joint resolution was reported from the Committee on Finance

with an amendment, to add the following proviso:

with an amendment, to add the following proviso:

Provided, That no call shall be made under the provisions of this resolution until a sum equal to the call is in the Treasury over and above the reserve herein mentioned: And provided further, That the Secretary of the Treasury, in his discretion, may have in the Treasury, over and above the foregoing sums, a working balance not exceeding \$20,000,000; and in the case of any extraordinary emergency, and when, because thereof, in the opinion of the Secretary of the Treasury, the public interests shall require it, he may, by written order, suspend the further call for the payment of such indebtedness for such period of time as shall be necessary to maintain the public credit unimpaired.

Man ALLISON. The President this injurt receiving the organization in every connection.

Mr. ALLISON. Mr. President, this joint resolution in one sense is an important one. In the consideration of it naturally the whole scope and range of financial discussion would be in order, but at this late stage of the session and under the circumstances surrounding the measure I think it will be apparent to every Senator that the discussion upon it should be confined to the real questions involved here.

There are two distinct points involved in the joint resolution. first relates to the currency; the next, to the management of the current business of the Government; and in the discussion I hope these

two things will not be confounded.

The joint resolution of the House of Representatives denominated the Morrison resolution is a resolution respecting, first, the reserve in the Treasury which is to be held for the redemption of United States notes, and secondly, as to what shall be done with the surplus revenue in the Treasury after disposing of the current expenditures of the Gov-

ernment.

It has been a mooted question whether up to the time of this resolution there has been any distinct setting apart of any specified sum for the purpose of maintaining the redemption of United States notes. For myself I do not believe there is any specific legislation now upon the statute-book requiring the absolute reserve of any particular sum of money, although I think it can be fairly stated that there is in the Treasury a reserve which, without further legislation, we are bound under existing statutes to use only for one purpose.

The statute of 1875, which authorized the resumption of specie payments on the 1st of January, 1879, gave a very large power to the Sec-

ments on the 1st of January, 1879, gave a very large power to the Secretary of the Treasury to make preparation for that purpose and to maintain that resumption when it once began. Under the law of 1875 the Secretary of the Treasury was authorized in his discretion to gather into the Treasury by the 1st of January, 1879, such surplus revenues as he might deem necessary, and in addition to that he was authorized in his discretion to sell bonds of the United States to any extent that he deemed necessary for the purpose of making resumption effectual. Under that authority the presiding officer of this body, then Secretary of the Treasury, did dispose in the market of \$95,500,000 of bonds for the purpose of beginning and maintaining the resumption of specie pay-

That authority to him was specific. He was authorized to sell bonds, That authority to him was specific. He was authorized to sell bonds, not for the general purposes of the Government, but for this one purpose and this one purpose only. So I take it a fair interpretation of the original law of 1875 would dedicate the proceeds of the sale of these bonds to this single purpose and to no other. So, while a specified sum was not set apart by the Secretary of the Treasury for the purposes of resumption, I take it that that \$95,500,000 which the Secretary of the Treasury purchased under this authority of law could not, without further authority of law, be diverted from that purpose.

In 1882 there was further legislation on this subject in connection with the act to authorize the reorganization of national banks whose

with the act to authorize the reorganization of national banks whose

charters had expired or were about expiring. Under the twelfth section of that act gold certificates were authorized to be issued by the Secretary of the Treasury upon deposits of gold in sums of \$20 or multiples of \$20; and as a proviso to that section this provision was in-

Provided, That the Secretary of the Treasury shall suspend the issue of such gold certificates whenever the amount of gold coin and gold bullion in the Treasury reserved for the redemption of United States notes falls below \$100,000,000.

Although this was not a dedication or a setting apart of \$100,000,000 for the redemption of United States notes, it was a recognition of the obligation of the resumption act of 1875 whereby if this contingency should arise that reserve for resumption should not fall below \$100,000,-

So, then, there has been, as I maintain, by these two acts of Congress a devotion or dedication of \$100,000,000 to be held in the Treasury for the purpose of maintaining at par in coin all the paper money issued by the Government of the United States.

At this moment or at any time I shall not undertake to discuss the question whether \$100,000,000 is enough for the purpose indicated in these two acts to which I have called the attention of the Senate, or whether it is too much. That question at this stage of the proceeding under this resolution is not involved. I can only say that since the 1st of January, 1879, up to this present moment only about \$22,000,000 of United States notes have been presented under the redemption act for redemption.

Mr. INGALLS. From what date?

Mr. ALLISON. From the date of resumption, the 1st day of January, 1879, up to the present moment. But I take it that that reserve fund of \$100,000,000 is held there for the purpose of meeting any extraordinary emergency that might arise requiring the redemption of United States notes, not intended, certainly not required, for the ordinary purposes of the redemption of these notes from time to time, as experience has shown. That is the situation of the law up to this mo-

Now what is the resolution of the House of Representatives? That resolution in specific, in absolute terms sets apart, dedicates, and devotes \$100,000,000 for this specific purpose of redeeming United States notes and for no other purpose whatever. If this resolution as it came to us from the House of Representatives should be passed without the dotting of an "i" or the crossing of a "t," it would compel the Secretary of the Treasury from that moment to set aside and devote \$100,tary of the Treasury from that moment to set aside and devote \$100,000,000 to that purpose; and if to-morrow the Secretary of the Treasury was compelled to send the Government of the United States to protest upon any of its current obligations outside of United States notes this House resolution would stand in his pathway if he undertook to disturb one single dollar of that \$100,000,000 surplus dedicated and devoted to the redemption of United States notes.

Mr. PLUMB. Will it embarrass the Senator if I ask him to read the resolution or that part of the resolution on which he bases that extraor-

dinary statement?

Mr. ALLISON. I will do so with great pleasure. The unequivocal designation and devotion of this resolution. That is the plain

Mr. TELLER. Did you not say that was the law by the acts of 1875 and 1882?

Mr. TELLER. But the Senator said it was the law all the same.

Mr. ALLISON. I did not say it was the law. Mr. ALLISON. I did not say it was the law. I said it was to be fairly inferred that Congress intended to devote \$100,000,000 by the act of 1882 or \$95,500,000 by the act of 1875 for the purpose of redeeming United States notes.

Mr. TELLER. I should like to ask the Senator a question, if he

will allow me?

Mr. ALLISON. Certainly.
Mr. TELLER. Has he any idea that when Congress passed the act of 1875 they had in mind how much was to be forever dedicated to the

of 1875 they had in mind how much was to be forever dedicated to the purpose of the redemption of greenbacks?

Mr. ALLISON. No, sir, I do not suppose they had. It was impossible for them to have. Of course it would require very much more to redeem all of them. There was a maximum limit. The Senator from Kansas [Mr. Plumb] asks me to read that portion of this resolution, and I will do so with pleasure, although I think there can not be a single question as to its construction:

That whenever the surplus or balance in the Treasury, including amount held for redemption of United States notes, shall exceed the sum of \$100,000,000, it shall be, and is hereby made, the duty of the Secretary of the Treasury to apply such excess, in sums not less than ten millions per month, during the existence of any such surplus or excess, to the payment of the interest-bearing indebtedness of the United States payable at the option of the Government.

That is the first part of the resolution. Then, when the House of Representatives undertook to state and to limit and crib and confine the Secretary of the Treasury with reference to this first clause which I have read, they say:

The surplus or balance herein referred to shall be the available surplus, ascertained according to the form of statement of the United States Treasurer, of the assets and liabilities of the Treasury of the United States employed on June 30, 1896.

If this House resolution had incorporated in the body of it in specific words, in hac verba, the debt statement of June 30, 1880, they could not more definitely or more distinctly have given direction as to how this surplus should be devoted and handled with reference to this statement which is made an absolute part of the House resolution and every word of it. Under this statement the Treasurer of the United States has reserved for the redemption of United States notes by the acts of 1875 and 1882 \$100,000,000.

Then taking the words of the resolution, stating the surplus, and stating how that surplus is to be ascertained and devoted and what

means are specifically set apart, they make distinct reference to this statement of the Treasurer of the 30th day of June, 1886.

So, Mr. President, I repeat that this resolution as it comes to us provides and sets apart what was of doubtful statement before, and so you make \$100,000,000 which can be devoted to no other purpose than the redemption of United States notes; and a Secretary of the Treasury who would undertake to use any portion of the \$100,000,000 after this House resolution shall have pessed if it posses with our property of the states and the states are stated in the states are stated as the stat House resolution shall have passed, if it passes without amendment, would violate a distinct and clear provision of law.

This being the plain and manifest interpretation and intention of this House resolution, as we are bound to draw from its terms, what is the situation of the Treasury? It is that unless we amend this resolution in some form this great Government of ours will be compelled to run upon its current receipts with reference to all its daily expenditures. That is the situation according to this resolution of the House

of Representatives. So the Senate Committee on Finance, a majority of them, believed that it was not wise to undertake to run the Government upon its daily receipts without having one dollar of surplus beyond this \$100,-000,000, dedicated and devoted as it is to a single and specific purpose. Therefore, having this \$100,000,000 set apart and segregated from all the ordinary uses and purposes of the Treasury, we felt that before the Secretary of the Treasury should be required to make a call for bonds he should have in the Treasury a sufficient sum of money to justify him in making that call, and that he should not rely wholly upon any surplus beyond the current expenditures that might come in within the thirty days next forthcoming.

Therefore we provided by this amendment that the Secretary may make a call for bonds, whether it be a million, or two millions, or three millions, or four, or even ten millions, and no Secretary of the Treasury who would administer the Treasury wisely would call for \$10,000,000 of bonds at one time when he could call for two, or four, or five, or six millions. He would distribute and divide the calls so as not to disarrange in any way the current operations of the business of the country or the current operations of the Treasury. So when the Secretary of the Treasury had \$1,000,000 above the amount necessary for the ordinary receipts and expenditures of the Government, under this proviso he is at liberty to make a call.

That is the first proviso, to make perfectly clear and distinct what it is said by the promoters of this resolution is already its meaning. If

so, that first proviso can do no harm.

The second proviso is one which provides—

That the Secretary of the Treasury, in his discretion, may have in the Treasury, over and above the foregoing sums, a working balance not exceeding \$20,-000,000.

That is a discretionary provision inserted in order that the Secretary of the Treasury, if he think it necessary so to do, may hold over and above this \$100,000,000 and the sum necessary for the call \$20,000,000

as a working balance in the Treasury.

In the ordinary operations of our Government with the amount of revenues we now have, and if no extraordinary expenditures should intervene, \$20,000,000 of working balance would not be required. deed, in my judgment, it is more than is necessary, although I think, if we are to give any discretion to the Secretary of the Treasury, who now has all discretion, no great harm would result from extending it even a few million beyond what in our wisest judgment, not having

all the facts at all times before us, might seem to be sufficient.

Why should this be \$20,000,000? Every one familiar with the oper-Why should this be \$20,000,000? Every one laminar with the operations of our Government knows that at certain times extraordinary payments are to be made. I have seen, and you have seen large sums appropriated and devoted by single acts of Congress. We saw of money appropriated and devoted by single acts of Congress. We saw here some years ago an act passed by Congress known as the arrears-ofpensions act, which by its terms added from \$25,000,000 to \$30,000,000 per annum to the expenditures of our Government.

If this resolution of the House of Representatives had been in existence at that time the Government of the United States would have been obliged to go to protest. I believe just and fair principles require that we should now provide additional legislation respecting pensions. The Senate of the United States at this session has passed a law which confessedly will add to the pension-list from twelve to fifteen million dol-lars perannum, which bill lies now in the committee-room of the House of Representatives and is likely to be brought forth before this session closes, as I hope it will be and become a law. If that shall be true, here is an extraordinary annual expenditure not provided for, and yet if this resolution of the House of Representatives were in full play at this moment it would have to be repealed or changed before we could

apply the sums of money which we pledge by legislation to the payment

pensions. So I might go on.

Take for instance the Alabama claims award for an illustration. am assuming now that we are down to the working balance proposed in this amendment. On the 2d day of June we passed a law respecting the Alabama claims, so called. That law prescribed certain methods of computation in the Treasury and certain requirements on the part of the claimants, and when those requirements are fulfilled \$6,000,-000 will go out of the Treasury in a single day to pay these Alabama claims. If this resolution of the House of Representatives was in full play, that could not be done until we had accumulated revenue sufficient to meet that obligation; in other words the Government of the United States would be compelled to go to protest and wait for the ordinary processes of the collection of taxes from internal revenue and other sources in order to meet a claim against the Government of the United States. But the ordinary expenditures of our Government running from time to time vary, as we know, very largely from month to month. Take for example the pension appropriation law. At this session of Congress, that appropriates \$75,000,000 for the payment of pensions. We know that these pensions are to be paid quarterly. At the beginning of each quarter warrants are issued from the Treasury amounting in round numbers to \$18,500,000. If this House resolution was in full play, that payment of \$18,500,000 could not be made, because there would not be money in the Treasury on which to draw the warrants. There is a single item of \$18,500,000 under existing law if we pass no more statutes.

It will not do for us to say when we are putting a law on the statute-book that current receipts will meet current expenditures. Current receipts and current expenditures vary from month to month and from time to time. I have before me a statement of the receipts from customs month by month, beginning in July, 1885, and ending in June, 1886. I find on a comparison of these monthly receipts from customs

that there are variations amounting to \$10,000,000 in a month.

Now suppose it shall turn out that the month when these extraordinary payments are to be made happens to be a month when the receipts fall down \$10,000,000? Then you have a dedication and devotion of eighteen and a half millions of payments on one side and a reduction of receipts from duties on imports of ten millions, making a variation in a single month of \$28,500,000. So the Committee on Finance believed that it was necessary in the prudent administration of the great affairs of a great Government like ours, having an annual expenditure in round numbers of \$300,000,000, and an annual revenue of a considerably greater amount, to be reduced undoubtedly if this resolution stands to the amount of our current expenditures, it may be-we believed it wise to have \$20,000,000 as a pliable, flexible fund that could be drawn upon at times when the Treasury was depleted. That could fill up again and be used in the discretion of the Secretary of the Treas-

init up again and be used in the discretion of the Secretary of the Freasury for the purpose of placing the Treasury in such condition as, come what will, it can pay its current obligations.

I have stated as briefly as possible the reason why the committee recommend this working balance of \$20,000,000. Perhaps it should be more; perhaps it should be less; but on a fair adjustment and comparison of views those who favored these provisions and favored a working balance believed that \$20,000,000 was a fair sum.

Now I come to the last provision in the committee's amendment:

And in the case of any extraordinary emergency, and when, because thereof, in the opinion of the Secretary of the Treasury, the public interests shall require it, he may, by written order, suspend the further call for the payment of such indebtedness for such period of time as shall be necessary to maintain the public credit unimpaired.

I have been told on this floor privately by Senators-it has not been publicly stated—that this last proviso leaves the Secretary of the Treasury with precisely the same discretion he now has. If that be true, or if there be the slightest occasion for the justification of that statement, I desire that provision so amended as to make it absolutely clear that no such construction can be placed upon it by a Secretary of the Treasury. What do we mean by an "extraordinary emergency?" Do we mean the present condition, the present status? Some people think we are in an "extraordinary emergency" now. I do not so believe. This amendment implies that something must arise which does not now exist, and it is only to be used when such condition arises. I can imagine two or three such cases. I can illustrate by one that was in my mind when I agreed for one to this provision, although I would much prefer that this discretion should be exercised by the President rather than by the Secretary of the Treasury. Let me illustrate an "extraor-dinary emergency" which I think comes within the meaning of this

Suppose it shall turn out six months from now, instead of the greenback being what it now is, the most popular currency in our country, and the most sought after, that there is a run made upon the Treasury for coin for the redemption of greenbacks, and the \$100,000,000 which by this resolution is dedicated and devoted only to that purpose shall run down to a million, then what is the duty of the Secretary of the Treasury? It is his duty under the laws as they stand to-day to go into the markets of the world and sell bonds if need be, and secure coin to continue the redemption of greenbacks in coin.

Mr. TELLER. Suppose he had ninety-six million silver dollars at

that time in the Treasury; would he sell bonds?

Mr. ALLISON. Not if he knew what he was about. He would redeem these greenbacks in silver dollars or in gold dollars, whatever he had in the Treasury. This House resolution has dedicated \$100,000,000 in coin—I do not say what coin—for the redemption of United States notes. I say suppose that runs down to a million, then he is bound to sell bonds to maintain the credit of the Government so far as the redemption of United States notes is concerned. If this proposed law stands as it came to us from the House, the Secretary of the Treasury would be engaged in the ridiculous and absurd performance of selling bonds on one side and giving notice to redeem them on the other.

I have stated what I understand to be an extraordinary emergency as

defined in this last proviso; and as we are putting here on our statutebook a law which is to remain a permanent law and which undoubtedly if it remains will find the conditions indicated here, not this year nor next year, as I shall presently show, but possibly five years or ten years

or twenty years hence.

So, in making these provisos we take into account the fact that this is a permanent statute and not a statute made to condemn the existing policy of the Secretary of the Treasury only, because that is what it clearly does. This House resolution, if passed as it came from the House,

clearly does. This House resolution, if passed as it came from the House, or if passed as proposed to be amended by the Senate Committee on Finance, is a condemnation of the present policy of this administration. Mr. CULLOM. I desire to inquire of the Senator from Iowa whether, if this resolution as proposed to be amended by the committee were to pass and become a law, if the Secretary of the Treasury were to determine immediately after \$10,000,000 of money had come into the Treasury over and above the \$100,000,000 that an emergency existed such as would prevent him from paying out this surplus that is designed to be placed in the Treasury he would be violating this law in coming to that conclusion?

that conclusion?

Mr. ALLISON. Beyond question; and a Secretary of the Treasury who would do that would deserve to be impeached by the House of who would do that would deserve to be impeached by the House of Representatives, and if I would not be giving judgment in advance I should say he would at least be tried by this body. We are to presume in dealing even with political opponents that they have some honor, that they have some integrity, that they do not regard the statutes of the United States as toys and playthings; and a Secretary of the Treasury who in the face of this statute would say next month or is reacher from now, where some of the conditions of a discussion. six months from now, unless some of the conditions of a disruption which I have already alluded to are in existence creating an extraor-dinary emergency, that he could use this power as a plaything to meet his own caprice would be unworthy of the position he holds or of any position of trust.

Mr. CULLOM. The reason I made the inquiry of the Senator is because I have been told myself by prominent gentlemen, members of Congress, that this amendment was simply to leave the question entirely in the hands of the administration and that the administration

would determine that the emergency always existed.

Mr. PLUMB. I should like to ask the Senator from Iowa in that

connection, in view of his recognized authority upon the laws of finance, whether since this administration came in he knows of any defect in the financial horizon, of any occurrence or occurrences which have taken place which indicated that the country was on the verge of a panic or that the Treasury was confronted by an emergency? Does he know of any such?

Mr. ALLISON. I know of no such. I not only do not know of any such, but I do not see it within my brief vision.

Mr. PLUMB. Does not the Senator know that the present head of the Trasury believed the such an emergency existed just about twelve months ago, to wit, on the 20th day of July, 1885, if he did not resort to some considerable genuflexion (if I may use that term in regard to the operations of an impersonal body like the Treasury Department) to avoid what he believed to be impending disaster of the greatest possible consequence to the people of the United States?

Mr. ALLISON. The Senator may have some letter of the Secretary of the Treasury—I think I know to what he alludes—when the Secretary of the Treasury deposited with New York bankers \$10,000,000 of fractional silver coin which, in the statement we are called upon by the House of Representatives to indorse, is not money at all. The present Secretary of the Treasury and the Treasurer of the United States, in the statement which the House of Representatives ask us to vote in this resolution, say twenty-nine and a half millions of it is not money at all, and yet they deposited \$10,000,000 of that with the associated banks of New York, and placed in the Treasury \$10,000,000 of gold instead. Why? Because they knew that under the law the men who held this \$10,000,000 of fractional currency could at any hour of any day they saw proper cart it over to the subtreasury in New York and demand

for it greenbacks, because that is the law.

Mr. PLUMB. Then I ask the Senator from Iowa, if the present Secretary of the Treasury believed that there was an emergency of that kind last year, is it not fair to presume that he thinks that emergency has continued, or he would have paid out this money; and if he does so believe, however mistaken he may be, I should like to know what foundation there would be for the extraordinary proposition impeach-

ing him of which the Senator has spoken?

Mr. ALLISON. The Senator from Kansas takes no account of the fact that the Secretary of the Treasury was new in July last in his

Mr. PLUMB. He knows more now, the Senator thinks.

Mr. ALLISON. Let me proceed. The Secretary of the Treasury at that time was not as familiar with the affairs of the Treasury and of our Government as he doubtless is now. They accumulated money in the Treasury, already plethoric, because when the Republican administration went out of power, under the guidance of Mr. Hugh McCulloch, who was Secretary of the Treasury for three or four months preceding the 4th of March, 1885, there was an accumulation in the Treasury, and the Democratic party hammered it home on the Republicans dur-ing the contest of 1884 that we were holding in the Treasury more money than was needed there for its ordinary operations, and that that money should be devoted to the payment of the public debt, and upon that pretense and pretext they carried enough votes certainly in the State of Indiana to make the change.

In July, 1885, after they came in, under a new guidance and under a new direction, this Democratic administration changed the policy of the Republican party, which had a uniform and steady purpose, which was to pay the debt of the Government of the United States, reserving only a sufficient sum to meet the current obligations and demands, and to meet what this \$100,000,000 of money was devoted to, the redemp-

tion of the greenback currency.

Many of us believed that the Secretary of the Treasury at that time held more than he ought to have held; but none of us had the responneid more than he ought to have held; but none of us had the responsibility that the Secretary had; and, therefore, while we were disposed now and then to quarrel with our own Secretary upon the pretenses and pretexts of the Democratic party of 1884, we supposed that this policy would be reversed when the Democratic party came into power in 1885; but, as I say, with a Treasury fuller in March, 1885, than it had been at any time since resumption because of the accumulations made by Secretary McCulloch in the last two or three months, this administration beginning on the 4th of March, 1885, accumulated surplus money from that hour until the 29th day of December last, when they made the first call of \$10,000,000 for payment of the public debt.

I think the country owes a debt of gratitude to that distinguished Democrat who sits on the other side for exposing the shams of the Treasury policy between the 4th day of March, 1885, and the 1st day of January, 1886; and when he in his speech, able as it was, showing how this Democratic party, with all its pretensions and promises, had accumulated money in the Treasury for nine long months without paying out a single dollar, then it was that the Treasury Department reversed its policy of July, 1885, to which the Senator from Kansas has alluded,

and has paid out from time to time, as calls have been made, until within the last six months they have called \$54,000,000 of bonds.

Mr. McPHERSON. Will the Senator from Iowa yield?

Mr. ALLISON. So I say to my friend from Kansas that I believe light has been thrown in upon this darkened Treasury Department of

the year 1885.
Mr. PLUMB. I wish to ask the Senator from Iowa in that connection if he does not know personally and Senatorially that the present head of the Treasury, its vital power, believes to-day that all the money in the Treasury ought to be retained there for the purpose of meeting just such emergencies as are spoken of in the concluding portion of this

Mr. ALLISON. Well, Mr. President, I do not hesitate to say that if by construction or otherwise that last provision can be tortured into a suggestion that the status quo is to remain, I should vote against it a thousand times if I had the votes; but I understand that we are legislating now with reference to the existing status of things. We are only putting this proviso here for an extraordinary emergency, which has not existed, which does not exist, and which we hope never will exist; but if it should come and in the mean time Congress not be in session, that we may do the small thing of suspending for the time these calls for bonds, if need be, it is necessary to do so in order to maintain the credit of the Government unimpaired, and I should be willing to trust any Secretary of the Treasury upon that statement of facts. But if this is a mere juggle, if we have instead of a Secretary of the Treasury having responsibility and trust and power and having a station so high that he will not violate that trust, then there is, in my judgment, no harm in this last provision.

Mr. McPHERSON. Will the Senator from Iowa now be so kind, that he has got through with the Senator from Kansas, as to answer me specifically what he means by the "shams" in the Treasury Department which were exposed by a distinguished Senator on this side of the Chamber?

Mr. ALLISON. I do not know what language I used.

Mr. McPHERSON. The Senator made a very grave charge against the Treasury Department. I should like to have it specifically stated.

Mr. ALLISON. I thank the Senator for giving me that opportunity, because I may have done them injustice. My statement was that this administration came into power by criticising adversely the financial policy of its predecessors, saying that we held more money in the Treasury than was necessary to carry on its ordinary operations and to maintain the paper money of the country at par with coin, and, thus coming into power, from the 4th day of March until the 29th day of December,

1885, they reversed the policy of the Republican party, which was to apply the surplus to the public debt, and hoarded the money until they had more than \$50,000,000 in the Treasury over and above what they found there, which was a plethoric Treasury on the 4th of March, 1885, because Mr. McCulloch being rather an intermediary Secretary, and only in for a few months, did not desire to establish a policy with reference to the payment of the public debt.

So when the Democratic party came into power they came there with a Treasury fuller than it had been for three or four years, if I am not mistaken in my recollection, and instead of carrying out the promises and pledges they had made to the people, and which they put in their platforms, they straightway reversed the policy of the Republican party by hording money for nine months until the speech of the Senator from Kentucky [Mr. Beck] brought them forth and they made the first call

for \$10,000,000 of bonds.

Mr. McPHERSON. Then, if I understand the Senator from Iowa correctly, the sham consists in the campaign stories that were told that brought the Democratic party into power; but the Democratic administration came into power pledged in its platform to carry out the policy of honest money and honest payment of obligations. But when your party went out of office it left the Treasury depleted of gold; and it has been the desire and the earnest effort of the Treasury Department since that time to lay up a gold surplus in order that it might redeem the silver dollar and the silver certificates presented for redemp-tion to the Treasury. That is the policy of the Democratic party; and if you call that a sham policy it is the same policy pursued by your party.

If you had left the Treasury full of gold, as you ought to have done at the end of your administration, there would have been no difficulty with a Democratic Secretary of the Treasury in pursuing the like policy and paying the Government obligations faster than he has done.

Mr. ALLISON. Well, Mr. President, whatever the policy was or is, here is a resolution that comes from the House of Representatives ut-

terly and absolutely condemning it, and while we have modified and in some respects sugar-coated this condemnation, we propose by the amendments which we have here to condemn that policy, and it will stand condemned when this resolution passes either with or without these amendments before the country. Of course I do not care to go

into a debate on political questions.

Mr. McPHERSON. I should like to have the Senator from Iowa or any other Senator point me to one single word in the Democratic plat-form adopted in 1884 which encourages or in the least form countenances any such resolution, with the necessary results which follow in its wake, as has come to us from the House of Representatives. I will show you from the reading of that platform that it goes exactly in the opposite direction. The Democratic party in that convention declared in favor of an economical administration of this Government and the honest payment of the public debt in honest money.

Mr. ALLISON. I hope we shall have no political debate. I do not

wish to be drawn into it if I can avoid it.

Mr. President, I have explained (and that was all I intended to do) what I conceive to be the provisions recommended by the Commit-tee on Finance to the Senate. These provisions we think are neces-essary provisions in order to maintain the public credit in view of the facts which I have stated respecting the House resolution unamended. We believe that it is necessary that the Secretary of the Treasury should have a working balance to enable him to meet extraordinary demands and extraordinary contingencies, and this resolution having by its terms especially and specifically set apart this one hundred millions so that it will not be touched for any purpose except the one I have named, it seems to me that the House of Representatives would at once, their attention being called to it, agree to the several provisions which I have named, unless it be the last amendment.

Now, what is to be the effect of this resolution if amended or without amendment? It will not come into play under the amendments of the Committee on Finance until April next. In the ordinary course of affairs, unless we meet with some great reverse, this resolution as amended by the committee will not come into play before April or May. What will be the condition then? This Forty-ninth Congress will have been dispersed and a new House of Representatives elected, with eight or nine months intervening before their assembling. I ask Senators whether it is wise, with our shifting and changing revenues—I know increasing now, but taking into account the possible legislation of next winter—whether it is wise to leave the Treasury Department of our Government without one single dollar to play as a balance to meet current expenditures, as will be the case if this resolution should be passed

as it came to us from the House of Representatives.

Mr. McPHERSON. May I ask the Senator from Iowa a question entirely for information? I should like to have his construction of the resolution, because it may be of vital importance hereafter, the Senator from Iowa having charge of the resolution as the organ of the commit-tee. Although a member of the committee myself, there are certain features of the resolution which had not suggested themselves to me forcibly until the Senator took the floor to debate the resolution. I should like now to ask whether, in his opinion, the resolution as it now stands would include, as the payments under the resolution are to be

made monthly, the amount already provided by law to go into the sinking fund? In other words, there is a law to-day which requires that the sinking fund shall be 1 per cent. of the amount of the national debt. This resolution proposes to pay out, if it be in the Treasury, \$10,000,000 monthly, but let the Senator observe that there is a limit in both directions, the limit of \$100,000,000 which shall not be impaired, as he says, without further legislation, and the limit of \$20,-000,000 additional which shall be the extreme working balance of the Treasury. I take it then, whatever may have been the form of book-keeping in the past, the United States Treasurer under the law will be required to deduct first the amount due the sinking fund. pose there are \$15,000,000 at the end of a given month in the Treasury, we will suppose that \$4,000,000 of that belong to the sinking fund, will the Senator tell me, under his construction of the resolution, how much money that month will be applicable under the provisions of this

Mr. ALLISON. This resolution does not deal with the sinking fund; it leaves it out of the account entirely. The debt statement is a part of the resolution; but as we are paying \$10,000,000 a month of the debt, it is presumed that the framers of this resolution intended that pro tanto the sinking fund should be provided for, and by this pro-

vision it is not only provided for but far beyond, so that there is no question of difficulty respecting the sinking fund in my judgment.

Mr. McPHERSON. Then, if I understand the Senator aright, the \$4,000,000 would be put into the sinking fund, and then if \$6,000,000

were paid out of the surplus in the Treasury it would answer all the requirements of the law under the resolution.

Mr. ALLISON. No doubt of it. The sinking fund is not applied each month. It is applied during fiscal years.

Mr. McPHERSON. I want to say that I am not satisfied that the resolution makes such provision in express terms. However, I wanted to get the opinion of the Senator who has charge of the resolution.

Mr. ALDRICH. I wish to say a few words in answer to the Senator from Kansas. I am not here as the defender or the exponent of the Secretary of the Treasury, but justice to that officer demands that some answer should be made to the rather extraordinary statement of the Senator from Kansas

He believes and states that in the opinion of the Secretary of the Treasury such an extraordinary financial emergency arose last July and still continues as would authorize and require him, under the last proviso of the amendment, to practically nullify the provisions for the pay-

ment of the debt.

Now, what are the facts? On the 29th of December last, when the Treasury was practically in the same condition that it is to-day, when the available surplus was within two or three million dollars, as I remember it, of the very amount that it is this day, the Secretary of the Treasury commenced calling bonds and has continued to call the species of bonds in the manner provided for in this resolution to the extent of \$10,000,000 a month. In other words, he has practically complied with the provisions of the resolution, which shows conclusively to my mind that in his opinion no extraordinary emergency has existed within this time which required him to suspend the payment of the debt to the extent at least which is provided for in this pending resolution either as it came from the other House or as it is proposed to be amended in the Senate. I know of no reason why the Secretary of the Treasury should not proceed to call bonds to the amount of \$10,000,000 a month as he has done for the last seven months, unless some extraordinary emergency should arise.

Mr. PLUMB. I only want to say that the Senator will bear in mind that the sinking fund was got hold of at the time they commenced under the requirement that so much each year should be applied to that

The PRESIDENT pro tempore. The Chair will call the attention of the Senate to the fact that interruptions in a debate like this, without the consent of the person speaking and without first addressing the

Chair, are in violation of the rules and greatly promotive of disorder.

Mr. BECK. I desire to say in the first place that Senators on either side of this question may as well dismiss all apprehension relative to the motives and purposes of the House of Representatives in the passage of this resolution; they may as well assume that the House of Representatives, constituted as that body is, in accord with the executive branch of this Government, did not undertake by their action either to the Government, and not undertake by their action either to censure, condemn, or embarrass the action of the executive branch of the Government. It is fair to say, looking at the resolution itself, looking at the objects and purposes of it, carefully considered and fully debated as it was in the House, that the Representatives of the people believed that it would promote the public welfare and would not in any form embarrass the Treasury Department. On the contrary, the House proposed to assume the responsibility of ordering payments to be made, so that the Secretary of the Treasury might be relieved from embarrass-

ment, when urged by interested parties not to do anything, by pointing to the law which Congress required him to obey.

There can be no other purpose that I can imagine in amending it here, because the principle of the resolution is admitted by the amendments, except to assert before the country that a Democratic House of Representatives was not able or willing to pass a proper measure and

that a Republican Senate had to amend it and improve it and deprive it of its vicious provisions. Not believing that there is any vice in it, but on the contrary believing that in view of our failure to reduce taxation, and in the present condition of the Treasury, and the revenues now being daily collected under the existing law, it is fair and just to the administration and can not by possibility bring about any of the embarassments suggested by the Senator from Iowa as even among the possibilities, I shall vote for the resolution just as it came from the House of Representatives.

The first thing to get at always in discussing any question is the exact facts. The first thing to settle is, What does this resolution propose? It proposes to deal only with the existing 3 per cent. bonds now payable. Let me read:

That whenever the surplus or balance in the Treasury, including amount held for redemption of United States notes, shall exceed the sum of \$100,000,000, it shall be, and is hereby made, the duty of the Secretary of the Treasury to apply such excess, in sums not less than ten millions per month, during the existence of any such surplus or excess—

To what?

to the payment of the interest-bearing indebtedness of the United States payable at the option of the Government.

When the interest-bearing indebtedness of the United States now payable at the option of the Government is paid off the mandate of the resolution terminates. The next question is, What is the amount of the present interest-bearing indebtedness of the United States payable at the option of the Government to which this resolution can apply? The Treasurer of the United States tells us that on the 12th day of this month, July, 1886, it amounted to \$136,000,000. No other interest-bearing indebtedness of the United States can be paid at the pleasure or option of the Government until September, 1891—more than five years from this time. Therefore the resolution of the House is limited by its language, by its terms, by its conditions, to the payment of the 3 per cent. bonds now payable at the option of the Government. The next thing to consider is, What is the condition of the Treasury and on what resources can it rely? We must assume that the House of Representatives understood all these questions, looked carefully at them all, and acted in view of all the facts, connected not only with the few bonds, because \$136,000,000 is a small amount compared with the whole number outstanding that will mature in 1907 and 1891—they looked, of course, carefully not only at the condition of the Treasury and the amount of surplus revenue that was coming in month by month, but they looked also at the legislation of Congress, its appropriations and its failures to reduce taxation, so that they knew absolutely what means the Treasury had to meet these and all other obligations with; the closing days of the session had been reached, so that no change could be made in the revenue; they considered what laws had been passed and how they would stand. Therefore they acted advisedly, having only \$136,000,000 that we can pay before 1891, and that this resolution applies to. What does the Secretary of the Treasury show on the same 12th day of this month as to our resources?

Taking out the amount of gold certificates from the gold and bullion he had \$180,000,000 in the Treasury on the 12th day of this month, \$80,000,000 more than the \$100,000,000 required. But assume that he had not that much. The House of Representatives acted in view of the fact also that the \$29,000,000 of subsidiary coin which they if you the fact also that the \$29,000,000 of subsidiary coin which they if you please properly excluded from the calculation is, for all practical purposes as much money, which can be utilized by the Secretary of the Treasury, as any other money. The \$29,000,000 of fractional coin will be gladly received by the laboring people for all the labor they perform on public works, on rivers and harbors, public buildings, Indian contracts—anywhere, by anybody other than a bondholder—and the moment they are paid out they can be taken to any subtreasury and greenbacks can be demanded for them all. They are excluded from this resolution and left as a working balance in the Treasury, in addition to the \$100,000,000 in gold standing upon the \$180,000,000 of gold, or \$160,000,000 if you like, for either is more than enough. I turn to the Bureau of Statistics for the last six years, and have before me a statement which the House of course knewall about and considered. This

is part of the resources they had a right to rely upon.
On the 1st day of July, 1880, the total debt was \$1,942,172,295; on the 1st of July, 1881, it was \$1,840,598,811, a reduction of \$101,573,484. For the year 1882 there was a reduction of \$151,684,351; for the year 1883 there was a reduction of \$137,823,253. In that year we took off half the tax on tobacco and cigars and by our tariff reduced duties on some other things somewhat; still the surplus in 1884 was \$101,040,972, and on the 1st day of July, 1885, \$63,494,708, and on the 1st day of July, 1886, \$96,000,000. The total surplus of revenue received from taxation, beyond all the requirements of the Government for its ordinary expenditures during these six years was \$651,616,768, making an annual average surplus of \$108,602,794 per annum, or over \$9,000,000 per month aver-

The House of Representatives knew all that. It is no chance or accidental sum; it is the average per month for the last six years; over \$9,000,000 a month surplus coming in is a better, surer basis for banking than any bank in the country has. They knew that that ratio would not be reduced during this session of Congress. They knew that the

appropriations have not been increased to any appreciable extent, even with the additional naval appropriations thrown in. They knew that that surplus was coming in with the regularity of death every month far in excess of all requirements; and they only propose that \$10,-000,000 a month shall be paid out of all the vast sums now in the Treasury, supplemented by the \$9,000,000 a month coming in every month to add to that. So in fact they are only taking \$1,000,000 a month from the funds now in the Treasury to add to the \$9,000,000 surplus coming in, and that only to last till the \$136,000,000 is paid. In thirteen and a half months the present surplus in the Treasury will not be reduced \$20,000,000 after all the 3 per cent. bonds are paid off. Our statistics show that all existing conditions are favorable at home and abroad for an increase on duties from imports of about 20 per cent. during this year and of 10 per cent, on all internal-revenue taxes. Our increase of tariff duties is owing to the rise in prices here and the depression in England, Belgium, and Germany.

It is stated that \$20,000,000 revenue will be received this year alone on imported rails and other things for railroads that are being built. In view of these and other facts how can any gentleman assume that the House of Representatives acted imprudently when it directed the Secretary of the Treasury to pay \$10,000,000 a month, with such an immense amount of surplus gold and silver now, and with \$9,000,000 excess a month coming in? In requiring \$10,000,000 a month, to be paid off month by month, how are they seeking to embarrass the Secretary or the administration in the control and management of the Treasury Department? Remember, all I am speaking of is over and above the \$100,000,000 so-called reserve. I do not care to meddle with that. Taxation is not being reduced. Therefore the revenue is not diminished, but, on the contrary, it is increasing and swelling as prosperity returns. Yet it is intimated that this House resolution will

embarrass the administration!

Senators, it will not, it can not do it; it has no such purpose and can not be tortured in face of the facts to have any such meaning. If I may be allowed to guess I could guess that it has a very proper Last year the Secretary of the Treasury was induced to lock meaning. up money in the Treasury, as we all agree now, greatly beyond what the interest of the people required, and very much beyond what was needed for the wants or security of the Government, because of combinations of men of wealth and power in New York and elsewhere, many of whom held bonds as security for national-bank circulation. did not want to have the bonds paid and the circulation based upon them withdrawn, and they determined that they would ruin the country rather than receive any part of their principal or interest in silver coin. They made earnest and successful efforts through their combinations to alarm our Treasury officials. They endeavored to make them believe that they would bring on a panic in regard to the finances of the country unless all the surplus money was held in the Treasury; and their demand for gold, and gold alone, was acceded to. I believe they alarmed the Secretary of the Treasury. I believe that much of the useless locking up of our money was because of that apprehension, and I do not speak of these things without authority. I have before me a very able review, though a somewhat bitter one, of the speech I made in the Senate last winter, by Hon. Horace White, of New York, a very well-informed man. In that review he said, among other things:

well-informed man. In that review he said, among other things:

A sort of panie ensued in the money market, and it came to my knowledge that Governor Tilden was one of a considerable number of persons who, without any concert of action, had bought large amounts of sterling exchange in order to protect themselves against loss in case silver should become our monetary standard. Sterling exchange means gold in London. Why was Governor Tilden buying sterling exchange? Because, happening to have on hand a certain number of dollars worth 100 cents each in gold and apprehending that if left in bank they would presently be worth only 90 or 90 or perhaps 75 cents each, he took the precaution to insure that they should continue to be worth 100 cents. He had only to write a few lines to his banker to insure this result. This was a typical case of the domineering "organizations of wealth" that Mr. Beck has conjured up.

And so on.

A very able man—perhaps as able as Mr. White, and as well informed—Mr. ABRAM HEWITT, of New York, make a speech very lately, in which he said:

in which he said:

I have reason to know when the present administration came into power its first and chiefest concern was to avoid the danger which had been predicted by the Republican Secretary in his official statement and in his private communications. The amount of gold in the Treasury on the 4th of March, 1885, was \$125,000,000. This was a much smaller sum than had usually been held in the Treasury in gold since the resumption of specie payment. It was steadily running down. The public confidence was gone. The hoarding of gold had begun—not by the mass of the people, not in stockings, not in secret hiding places, but by the masters of finance, the men whose business it is to handle millions and to prevent their deterioration; they began to prepare for the hour of danger and the collapse which they thought was impending.

I know three of the greatest institutions in the city of New York—I shall not name them lest it might possibly bring down upon them the condemnation of those who are prejudiced against banks—but I know three institutions in the city of New York which had accumulated more than \$25,000,000 of gold as a preparation for the collapse they thought was coming.

These men ware conspiring to break us down. It was a well-overhan

These men were conspiring to break us down. It was a well-organized effort, no doubt. They sent their emissaries from one end of the land to the other, they held their conventions all over the country, seeking to alarm the laboring masses, and to make good their threats if we dared to say that silver and gold should stand upon an equality before the law and that they should be required to take either at the option of

the Government, like other people. It was these combinations, whose power our executive officers knew, which actuated the Secretary of the Treasury to make, at their suggestion or demand, the miserable, abortive, absurd effort last summer to save the country from ruin by the exchange for gold of \$10,000,000 of fractional currency. That abortion I need not do more than allude to, because it was too contemptible to deceive anybody and fell flat before it was consummated.

Now what does the House of Representatives say? They say, Mr. Fairchild is only acting Secretary; you are a new man; this Congress is about to adjourn. You have about \$180,000,000 of gold; you have \$224,000,000, counting silver and fractional coin; you have \$60,000,000—\$80,000,000 more than you need. We will continue to furnish you additional surplus revenue at the rate of \$9,000,000 or \$10,000,000 a month, month by month, from our custom-houses and from our internal-revenue offices. We insist that it is the interest of the people not to have money locked up in the Treasury; in our opinion no calamity can be greater than that, because it is the worst sort of contraction. We know the pressure put on Secretary Manning last year. Notwithstanding the pressure the combinations of national bankers may seek to put upon you when our backs are turned, notwithstanding they may insist that "you are only acting and your chief is not in his place, and that they do not want to give up the bonds which are the basis of circulation; and that they do not want to give up the bonds which are the basis of circulation; and that they do not want to give up that circulation and deposit greenbacks in lieu of it and surrender bonds when the premium on the others is so high that they can not buy them, we will relieve you from all responsibility or annoyance from any quar-The House of Representatives undertakes to determine what the policy as to future payments shall be. It says: "We furnish the money we, the representatives of the people, have placed in your hands, Mr. Secretary, this great surplus; we are sending it in month by month at a rate almost equal to the amount that we are directing you to pay out. If any mistake or unforeseen accident occurs we meet again in December; whatever happens in the mean time to change present conditions we will correct." In short, the House says: "The power of taxation is in our hands; we order you, Mr. Secretary, not to heed, not to be intimidated by any action of any combinations of men, who care nothing for any interest but their own; pay \$10,000,000 a month, reduce the interest of the tax-payer, keep our money in circulation, and we will take all the responsibility."

The House resolution furnishes the Secretary an answer to every man who seeks to control him because of the assumption that a bad condition of things is coming and that he ought therefore to suspend payment of bonds. All he has to answer is, "I obey the law. I obey the orders of Congress; I obey the representatives of the people; therefore there is no use in appealing to me." It is a relief from embarrassment rather than an embarrassment to our Secretary to tell him that he shall pay out only a moderate sum, a sum far less than Congress might have required him to pay, and have done it with safety, if we had so desired, \$10,000,000 a month, limited only to the 3 per cent. bonds which can now be paid, with a gap of five years or four years before any more can be called in at our option. When Congress says, "Mr. Secretary, you shall do this," we do not reflect upon his integrity, his capacity or fidelity, but we simply announce our policy and say to all the world that we take the responsibility. The Secretary shall not be blamed for any we take the responsibility. The Secretary shall not be blamed for any mistake in regard to it, and no set of men need try to persuade him to deviate from it; the representatives of the States and people have settled that to suit themselves, right or wrong.

It must never be forgotten that the Secretary of the Treasury is only

the fiscal agent of Congress, vested with such discretion as we see fit to give him. When this resolution was first presented by the Senator from Iowa, and it was so published in all the papers, the proposition was to vest in the President of the United States the responsibility of stopping these payments if in his opinion any exigency arose. committee was too wise to do that. We did not propose to hold the President of the United States responsible for the distribution of the revenues Congress had provided. We did not intend to embarrass the Chief Magistrate by requiring him to attend to the distribution of the

proceeds of the taxes imposed by Congress.

The President has quite enough to attend to without that sort of work being imposed upon him. The Secretary of the Treasury is the fiscal agent of Congress. He occupies a different relation to Congress and to the President from any other of the Secretaries. Turn to the old laws organizing the Department and see an act to establish an Executive Department, to be denominated the Department of War, approved Au-

gust 7, 1789, which provides-

That there shall be an Executive Department, to be denominated the Department of War; and that there shall be a principal officer therein, to be called the Secretary for the Department of War, who shall perform and execute such duties as shall, from time to time, be enjoined on or intrusted to him by the President of the United States, agreeable to the Constitution, relative to military commissions or to the land or naval forces, ships, or warlike stores of the United States, or to such other matters respecting military or naval affairs as the President of the United States shall assign to the said Department or relative to the granting of lands to persons entitled thereto for military services rendered to the United States, or relative to Indian affairs; and, furthermore, that the said principal officer shall conduct the business of the said Department in such manner as the President of the United States shall from time to time order or instruct.

Turn to the Navy. In regard to the Navy Department there is the same provision. The act of April 30, 1798, provides

That there shall be an Executive Department under the denomination of the Department of the Navy, the chief officer of which shall be called the Secretary of the Navy, whose duty it shall be to execute such orders as he shall receive from the President of the United States, relative to the procurement of naval stores and materials and the construction, armament, equipment, and employment of vessels of war, as well as all other matters connected with the naval establishment of the United States.

Turn to the Attorney-General's Department. The act of September 24, 1789, says:

And there shall also be appointed a meet person, learned in the law, to act as Attorney-General for the United States, who shall be sworn or affirmed to a faithful execution of his office, whose duty it shall be to prosecute and conduct all suits in the Supreme Court in which the United States shall be concerned, and to give his advice and opinion upon questions of law when required by the President of the United States, or when requested by the heads of any of the Departments, touching any matters that may concern their Departments, and shall receive such compensation for his services as shall by law be provided.

Turn to the act creating the office of Secretary of the Treasury and see how that reads. A Secretary of the Treasury shall be appointed, whose duty it shall be (without reading all) to attend to the collection, &c., of the revenues, "to execute such services relative to collection, &c., of the revenues, "to execute such services relative to the sale of the lands belonging to the United States as may be by law required of him, to make report and give information to either branch of the Legislature, in person or in writing (as he may be required) respecting all matters referred to him by the Senate or the House of Representatives, or which shall appertain to his office, and generally to perform all such services relative to the finances as he shall be di-

rected to perform."

He reports directly to Congress. We have a right to bring him on this floor to question him day after day. He shall report verbally or in writing as either House may direct. He is our officer, and not the President's adviser merely in the sense that the Secretary of War, the Secretary of the Navy, and the Attorney-General are executive officers subject alone to the will and order of the President. "We with the Secretary of the Treasury manage the purse; the President and the other Secretaries control the sword. Therefore it is that we deal with the Secretary of the Treasury and order him what he shall do, and he deals with us and tells us what he thinks is best for us to do, and we take his advice or not as we like. We impose the taxes, place the proceeds in his hands, tell him what to do with them, and that is all that this resolution of the House does. It says, "Mr. Secretary, we have placed this much money in your hands. We know it is much more We know we have done wrong in not reducing taxa-We will do the next best thing; we will pay our debts promptly. We know that money taken from the people ought to be restored to ' them as soon as possible, because we believe that no greater evil can befall the country than to have its circulation locked up in the Treas-Therefore, so believing, we order you as our agent to pay it out. You must not hold or lock it up at the request or the solicitation or the threats of any body of men. We will relieve you of all responsibility on that account. We have furnished you enough at least to pay off the \$136,000,000 of 3 per cent. bonds." That once done, this resolution operates no further. We will wait and see what is needed next. I insist that the House resolution is in the interest of the Secretary. It is better for him, better for everybody, than the present condition of

I am not going to say anything now about or against the \$100,000,-000 reserve; that will not be endangered by the House resolution. I never have believed there was any necessity for \$50,000,000 of reserve; I do not believe it now. It becomes more and more absurd every day to hear about \$100,000,000 guarding greenbacks. I do not believe the credit of this Government would be impaired one penny if we were today to take \$50,000,000 or all of that reserve and pay off the 3 per cent.

bonds with it.

Whatever may have been thought to be prudent in 1879 when the resumption act was an experiment, eight years of experience have shown that the greenback needs no protection. When we paid off \$50,000,000 of 3 per cent. bonds between the 1st day of January and the 1st day of July last, nearly \$40,000,000 of them were paid in greenbacks at the request of the men who held the bonds. When the character of money in which our customs dues were paid at the great port of New York during the month of June was looked into it was found that nearly 82 per cent. of all the taxes were paid in greenbacks, although the law requires coin, and coin alone, for customs dues. The greenbacks in the Treasury held for the redemption of national bank-notes have been increased in the last five months from \$30,000,000 to \$60,000,000. Everybody wants greenbacks; nobody wants to have them redeemed, so that there is no sense in holding or hoarding gold for their redemption, far less \$100,000,000 that costs us \$5,000,000 of interest annually, as we paid 5 per cent. for \$6,000,000 of it, and 42 per cent. for the balance. But I am not going to argue that question now. It will be swept away some day along with the other rubbish.

fire 3 per cent. bonds provided for in the resolution will all be paid off long before it is possible for the surplus funds, backed by the monthly surplus, to come anywhere near low enough to interfere with

this \$100,000,000 so-called reserve. Mr. President, this question has been argued all the time as though the Treasury was a great bank and the people of the United States a great private banking corporation, and as though everybody connected with the Treasury or managing its operations had to keep as much reserve in the Treasury of the people as a private banker would have to keep in order to save himself from unforeseen reverses. There is no analogy between them. Whatever there may be in the theory the common sense of the proposition is all against the comparison and the assumption. The Senator from Maryland [Mr. Gorman] and myself may be carrying on a bank in Baltimore. We may have the best men in Baltimore as our depositors; we bank on our deposits, of course; that is all we want them for. But these depositors, when they see that the Senator from Maryland and myself are making money as bankers, and are making it out of their deposits, may say, "It is too good a thing to let Beck and Gorman have this; we will set up a bank of our own." When they do they of nave this; we will set up a bank of our own." When they do they of course take away the money they deposited with us, and they take away the business of their friends, who are also our depositors. The two banks divide the profits. We must have a reserve to meet unexpected calls like that upon us. If our depositors who are left think that in Chicago, Saint Paul, Minn., or somewhere else money can be loaned at 10 or 15 per cent. instead of 3 per cent., which is all they make by depositing in our bank, they draw their money out. We must have a reserve to meet all these contingencies or fail. have a reserve to meet all these contingencies, or fail.

The United States have no such contingencies to guard against. The United States have no competitor in their financial affairs. The money derived from our custom-houses and our internal-revenue offices and from our miscellaneous sources comes, as I said, with the certainty of death, and the more prosperous the country is the larger the receipts are. Nobody can divide with us or take from us any of our depositors.

Mr. President, no condition of things can break the United States. When the reserve of a private man is gone he fails. When the reserve of the United States is gone the Congress of the United States imposes a "5 per cent. tax on all incomes over \$5,000," and \$30,000,000 flows into the Treasury; or "5 cents a pound on tea; 10 cents a pound on coffee; double up the tax on whisky and tobacco," and untold millons roll in. The world knows that; the plain people of the country un-derstands it; and to argue here that we are no better off than a private man who must keep a reserve because he has no other means of payment except his own property is to my mind preposterous. No man's credit can be compared with that of the United States, whose power of taxation extends over a continent and over all the wealth of 60,000,000 people. Everything every bank has can be called on and be required to come to the rescue of the credit of the United States at any moment when any deficiency is likely to occur. It is therefore an absurd proposition for meaning the reserved to the rescue of the credit to account the reserved that we occur the reserved to the reserve sition from a business standpoint to assume that we occupy the relation of private bankers, although that assumption has alarmed many people and made them believe that we were in danger of being broken down financially unless we keep this reserve intact. Even when at the end of each quarter when pensions and wages are paid, it is thought to be horrible to reduce that \$100,000,000 reserve for a day, although it may be known that it will accumulate and be in large excess for three

months thereafter, or until the next general quarterly pay-day comes.

Suppose Congress had passed my friend BLAIR's educational bill, doubled up if you like, and had taken one hundred or two hundred million out of the Treasury as we might have done, or suppose we had pensioned everybody and given arrears of pensions to everybody, would it have laid in the mouth of the Secretary of the Treasury to have entered a protest against our action because we were taking more money from his vaults than he thought he could afford to let go? We would have said to him, "It is your business to obey the law; pay out these pensions; pay out the money devoted by us to this educational fund; pay out these arrears of pensions. It is our business to impose taxes upon the people to meet them. You have nothing to do with our legislation or demands on the Treasury. That is our business. You must see that our orders are faithfully obeyed. We are not asking you to exercise any discretion; we do not think it well for you or us that you should. You may advise us from time to time as to the state of the Treasury, and if you do not want to do it we can send for you to come here and on this floor we can question you as to anything we want to know; but as to the payment of money of which you are our custodian, that is our business, not yours, and we mean no reflection on you when we tell you so.

Therefore I repeat, whatever alarm may at any time have existed when the reserve seemed to be in dauger, none exists now. There is too much money in the Treasury. There is too much surplus revenue coming in month by month. There is no reduction of taxation—that

is at the root of all our trouble—and consequently no diminution of surplus revenue, unless we squander it by extravagant appropriations

My friend from New Jersey a little while ago asked the Senator from Iowa what about the sinking fund. He inquired seriously, is that provided for? Sir, that sinking fund has been at the bottom of much of our trouble. It can not be provided for any longer; the bonds now man, and Secretary Morrill, who preceded him, prove by their official statements in 1876 and 1877 that we were then \$225,000,000 ahead of tion and high protection, which always go hand in hand, have kept it up to the highest point possible until it has destroyed the national now, which I do not propose to do about a thing the absurdity of main-

banking system by forcing us to pay off all the bonds held for circulation. If we had abolished the sinking fund ten years ago and reduced taxation \$50,000,000 a year we would have had enough bonds to secure our bank circulation until 1891, when the \$250,000,000 of 4½ per cent. bonds mature. The bankers would have kept up their circulation based upon the 3 per cent bonds, which by excessive taxation under pretense of providing for a sinking fund we have taken away from them until they only hold now, as the Treasurer shows, \$275,000,000 all told of our bonds of all denominations, which brings their circulation down to \$250,000,000. Of the bonds they hold nearly \$107,000,000 are of 3 percents which must be swept away in the next year or the money must lie in the Treasury idle, and not only idle but withdrawn from circu-

Mr. McPHERSON. The Senator refused to yield to me a few moments ago, and therefore I had passed over many things that I should like to have asked him some questions about, feeling reluctant to do so.

If not reluctant, perhaps he would answer a question for me just now.

Mr. BECK. Certainly, I will.

Mr. McPHERSON. The sinking fund having been made a condition in the issue and sale of the bonds for the payment of the public debt, let me ask the Senator if in his opinion before the bonds are paid it would be an honest transaction to do away with the sinking fund?

Mr. BECK. In the first place there was no such condition made. We said we would set apart 1 per cent. of the debt and the interest upon the bonds we purchased as a sinking fund in order to give assurance to the people that their bonds would be paid or that we were diance to the people that their bonds would be paid of that we were diminishing the debt rapidly enough. That was what we did. Now, then, what have we done? We so arranged our public debt that we can not pay any more than \$136,000,000 of our bonds until 1891, when we can only pay \$250,000,000, and then we can pay no more until 1907, when the last \$737,000,000 falls due. Does the Senator from New Jursey or any other gentleman contend that we agreed that we would bry at any premium that anybody might ask the bonds of 1891 and 1977 before they were due in order to make a sinking fund? before they were due in order to make a sinking fund? No.

Mr. McPHERSON. But after the issue of the 3 per cent. bonds is paid, the \$136,000,000—let them be paid in any manner, whether by the form proposed by the Senator from Kentucky or that proposed by the Committee on Finance-I claim that we are in duty bound to maintain the sinking fund in order that we may pay the bonds falling due in

Mr. BECK. Then I understand the Senator from New Jersey to contend that we must impose taxation to the amount of \$50,000,000 more than the country needs from now until 1891 to buy bonds at any premium that the holders see fit to ask, or allow \$50,000,000 a year, which is \$250,000,000 in five years, to be locked up in the Treasury and lie there to await the maturity of the bonds.

Mr. McPHERSON. I say we are bound to live up to our contracts

whether they are to our advantage or not.

Mr. BECK. The trouble is, the suggestion of the Senator from New Jersey that we must live up to our contracts is assuming that we made an absolutely ridiculous contract, which we never did make and never thought of making and that nobody ever thought of suggesting when the sinking fund was created. As I showed the other day in an argument that I made, that in order to swell the annual amount required for this sinking fund all sorts of expedients were resorted to. Surely the 1 per cent. on the debt of the United States on which it was based did not mean to charge us as owing all the money in the Treasury. Here is the case. I can state it better by reading it:

.. \$1,800,000,000 400,000,000 Debt in the Treasury. Cash in the Treasury......

Debt, less cash in the Treasury...... 1,400,000,000

Now, the sinking fund is 1 per cent. of the debt. Will the Senator from New Jersey say that 1 per cent. upon the debt is 1 per cent. upon

the \$400,000,000, or 1 per cent. as well on the \$1,400,000,000 so as to charge 1 per cent. on \$1,800,000,000 so as the basis of a sinking fund of 1 per cent. on the debt?

Mr. McPHERSON. I am not going to enter into that question, because it would carry us beyond any point that is necessary for the solution of the difficulty now before us: but I wish to say that when the tion of the difficulty now before us; but I wish to say that when the Congress of the United States or the Government of the United States provided a sinking fund for the liquidation of the public debt, that very moment it increased the value of the bonds outstanding; and when the Senator talks about the great premium to pay upon the mar-ket value of the bonds, that premium has arisen very largely and almost entirely, I might say, from the practice of the Government in maintaining and keeping up the payments in the sinking fund and thereby reducing the measure of the obligation.

Mr. BECK. Nobody has ever denied that we proposed in the law to reduce our debt on the average 1 per cent. per annum, so that our creditors would have assurance that it would be paid at its maturity and not become a permanent debt like that of England. Secretary Sherman, and Secretary Morrill, who preceded him, prove by their official statements in 1876 and 1877 that we were then \$225,000,000 ahead of taining which I think every Senator understands, I would go over it again. I have the official statement of the Treasury Department, showing everything that has been done for the sinking fund, giving in detail every bond, and showing that we are to-day \$501,000,000 ahead in the reduction of our debt over any possible requirement of the sinking fund. Will the Senator from New Jersey claim now, when we have reduced the debt \$501,000,000, according to the Treasury statement, more than the

sinking fund required, that there is a solemn obligation upon us to keep up taxation \$50,000,000 a year beyond the wants of the Government under some pretense of a bargain that we should do so?

There is the statement and the recapitulation. I gave the recapitulation the other day. It shows that we are \$501,000,000 ahead now. But I do not care to argue that question again. The complete table is as follows, with recapitulation attached:

United States interest-bearing obligations, issued, refunded, redeemed for sinking fund and otherwise, and outstanding June 30, 1885.

It shows, however, that we have already paid \$500,000,000 more of the principal of our debt than any creditor had any right to expect or require, and that is all I care to say about it. I have only to add that I am glad that the House of Representatives have taken hold of this subject of payment of money held in the Treasury as they ought. The great mass of the Democratic party, true to the pledges of its plat-form and true to what common sense and sound principles requires, tried to reduce the taxes now needlessly imposed on the country, honestly and earnestly. Eighty-five per cent. of them voted for a measure proposing to give relief from unjust and unnecessary taxation. One hundred and thirty-six Democrats with only four Republicans supporting them, making one hundred and forty in all, struggled, under the lead of Mr. Morrison and my colleague, Colonel Breckingidge, whom I see before me, to reduce unjust taxation. They failed, because the great mass of the Republican party, all but four, protested and voted against their action. What was left for those gentlemen to do? Nothing, except to say "If you will not reduce taxes, let us pay our debts with the money the tax-gatherer takes from the people; then the country will see what the effect of your failure in the reduction of taxes means. You have money enough now locked up, and more than enough, with the revenues that are coming in through the customhouses and internal-revenue offices this year, to pay off every outstanding bond that we can pay before 1891. You have a surplus of \$60,-000,000 or \$80,000,000 now above and beyond all the reserve fund, that anybody asks for. The taxes which Congress insists on maintaining produce about \$10,000,000 a month in excess of all the wants of the Government. All that we demand is that our debts shall be paid out of our surplus, and when they are paid off our true condition will be developed. It will then be seen that we will have to use the surplus revenue which is surely being piled up at the rate of \$110,000,000 a year or over \$9,000,000 a month. When we have no longer any bonds to pay, what is left for us when that is done? Shall we lock it up in the Treasury?

The people will not submit to that. Shall we buy bonds at any premium the holders of them may see fit to ask? The country will rebel against that because it is not fair or even decent to take money by taxation from men that is worth to them 6 or 8 per cent. to pay off bonds bearing 4 per cent. and pay 27 per cent. premium to buy before maturity the outstanding 4 per cent. bonds. Mr. President, we can not, therefore, lock up all that great surplus in the Treasury without bankrupting the country. We can not get the consent of the people to buy the bonds not due at the premium that the holders ask for them. We can not force the holders to surrender them unless we pay whatever premium they ask for them. What remains? Nothing is left except to make extravagant expenditures. The country will not and ought not to allow that. What follows? We must reduce taxation. The House of Representatives in a manly, fair, straightforward, direct way have by this resolution taken the only step that remains to bring the true condition of things before the people after they failed to reduce taxation, that is, to let the country determine whether it will buy bonds at a premium, lock up money in the Treasury, or whether it will make extravagant expenditures? These things being repudiated, then the representatives can with earnestness and force demand a fair and honest reduction of taxation.

That is the issue which I hope the Democratic party will make all over the country, confessing their failure now, but proving, as they can, that it is easier to build up a majority with 136 to start on than for their opponents to reach a majority with only 4 to begin with.

We had one hundred and thirty-six out of one hundred and forty in

a division of the two political parties, both of which were pledged to a reduction of taxation. But I do not want to enter into a political discussion here at this time. I repeat and insist that the only remedy is the reduction of taxation. The House resolution presents that issue It means that instead of reflection on the administration it proposes that Congress shall take the responsibility, instead of holding the Secretary responsible, when he is compelled as he soon will be to purchase bonds at a high premium, this resolution recognizes the fact (and that is one reason why I am in favor of it more than for any other reason) that the Democratic administration shall not be held responsible for any of these wrongs. Congress by its legislation, or failure to legislate, brings about good or bad conditions. This resolution takes the responsibility and says, "Mr. Secretary, pay out the surplus money. As we direct we assume the responsibility. If any wrong or ill comes of it, we are responsible. We say if there is too much of a surplus in the Transport was written to the responsibility. the Treasury you will not be responsible for its being locked up. If you are compelled to buy bonds at a premium throw the blame on us. We forced the money upon you against your will and it may be against your judgment. We will take care that extravagant expenditures are not made. We propose to be in a condition and position to force the issue in regard to the reduction of taxation. If we have adopted an unwise method we will hold you harmless because we have taken the discretion away from you as to the time and amount of payments. have taken the responsibility upon ourselves because we think it devolves on us as the representatives of the people to regulate this matter.

I insist again that the House resolution, so far from being a reflection on the Secretary, so far from being an embarrassment to him, so far possibility of these great combinations of capital being able to intimi-

from crippling the management of the Treasury Department, is in all regards the action that a wise administration would desire Congress to ke. I think that it is wise to throw the responsibility of our financial management on the Congress of the United States; it is the taxing power, the law-making power, whose agent the Secretary of the Treas ury is, and if we by our action or non-action lock up too much of the people's money there will not be any responsibility on the Secretary of the Treasury. As the Committee on Ways and Means of the House have said, stop excessive taxation; bring down the revenues so as to meet only ordinary expenditures; do not bring about conditions that embarrass the Treasury by such exorbitant surpluses as we now have, and which are increasing every day. I protest that we shall not make the people pay interest upon their own money when it is lying idle; let us pay it out and take the responsibility, as the Department of the Government which is responsible for the proper administration of its fiscal affairs. I propose to deal with these questions on the basis of an earnest desire to reduce taxation, and to take responsibility on ourselves, so as not to have it said that our officials have failed to comply with the law, or have usurped authority or power not conferred upon them.

I have spoken a good deal longer than I intended, but for the reasons I have given and many others I might give I shall support the House of Representatives in the resolutions which they have sent to us.

Mr. PLUMB obtained the floor.

Mr. GEORGE. I wish to ask the Senator from Kentucky a ques-

The PRESIDING OFFICER (Mr. EDMUNDS in the chair). Does the Senator from Kansas yield?

Mr. PLUMB. Yes, sir. Mr. GEORGE. I desire to know from the Senator from Kentucky if he regards the power of the moneyed men, to whom he alluded in one part of his speech, to embarrass the Treasury and to throw the finances of the country into confusion, as unequal to the threat which they made to do these things, and therefore whether the Treasury was not justified in entertaining the apprehension which they did entertain from the acts and threats of those men.

A great and influential body of men like that might Mr. BECK. well cause apprehension in the mind of any careful official. I have always thought that much of what our Secretary of the Treasury did not do that I desired he should do was done from an honest apprehension that these men had more power than they had. He might well believe that they could embarrass him. But when you come to look at it there was no reason for apprehension. Only think of it for a moment, We have no debt at home that we can pay except \$136,000,000. We are getting nine or ten million dollars more surplus than we can pay out for ordinary expenditures. Who can make any run upon the Treasury? Who can break us when these conditions exist? And when it is understood, notwithstanding the Senator from New Jersey and others have contended, and although the Treasury still contend, that gold has to be paid to these gentlemen, although they only pay their own bank notes in lawful money and that lawful money is only a silver certificate, for it can be paid off in the standard silver dollar—when they are so contending for untenable propositions I am glad, for the edification of the Treasurer, because I do not think the Secretary undertakes to say so, and for the edification of gentlemen on both sides of this Chamber, to read from the RECORD of July 25 the opinion of the distinguished chairman of the Judiciary Committee, fortifying, sustaining the views given by Mr. Devens when he spoke or wrote as Attorney-General at the request of Mr. SHERMAN in 1877:

Mr. EDMUNDS. It may be that I should agree with the Senator from Kentucky, I certainly agree with him that the silver coin of the United States is just as good a legal tender for every bond and debt of the United States that does not say gold coin exclusively, if there be such a one, as the gold is, and so far and to that extent I am just as strong a silver man as my friend from Kentucky is.

And so every lawyer who has looked at this question will say.

Mr. McPHERSON. Will the Senator from Kentucky permit me to ask him a single question before he takes his seat?

Mr. BECK. I will, if I may be allowed to do so by the Senator from

Mr. McPHERSON. If I understand the House resolution together with the Senate committee amendment, the amendment proposes only to give to the Secretary of the Treasury, a Democratic Secretary of the Treasury who I think has performed every duty in that office in a man-ner very commendable to him and to the interests of the Government, and a member of the same political party with the Senator from Kentucky, himself a distinguished member—the Senate committee amendment simply proposes to give to that Secretary an additional working balance of \$20,000,000 above what the House resolution proposes, a balance that every merchant, every manufacturer, every sagacious, prudent business man of this country keeps as a working balance in his trans-actions, and upon that question the distinguished Senator from Kentucky has even fought himself into a perspiration this morning in his attempt to defeat the effort of those of us in the Senate who think it is wise and prudent to give a working balance of at least \$20,000,000.

In addition to that let me ask another question, considering as I must the answer the Senator made to the Senator from Mississippi as to the

date the Treasury and to make and produce a withdrawal of confidence in the business interests of the country. I ask the Senator from Kentucky if he thinks it is not wise to give the Secretary discretionary power even above that limit, when every other Secretary of the Treasury from the foundation of the Government to this hour has had the exercise of full discretion, and never at any time in the history of the Government has there been such a thing as withdrawing from the Secretary of the Treasury the power to meet any and every emergency? This is the most astonishing thing that I have ever witnessed since I have been a member of this body.

Mr. BECK. The difficulty with the Senator from New Jersey is that he has not got the facts in regard to this resolution in his mind.

that he has not got the facts in regard to this resolution in his mind. If he would sweat a little more perhaps he would think more rapidly and clearly. I showed him that there were about \$80,000,000 of surplus over the \$100,000,000. I showed him that about \$10,000,000 were coming into the Treasury every month above all our expenditures. I showed him that there are only \$136,000,000 of bonds to which the House resolution applies, and I showed, or at least if I have not satisfied him I have everybody else in the Senate but him—

Mr. McPHERSON. Prove it.

Mr. BECK. I have proved it by official records furnished by the Treasurer himself, and by the records for the last six years of our surplus revenue, that we can not by any reasonable possibility come down.

plus revenue, that we can not by any reasonable possibility come down to within ten or twenty or thirty millions of the working balance he speaks of before the 3 per cent. bonds are all paid off, and that the effect of the Senate amendment is to catch just such gentlemen as the Senator from New Jersey by making them believe that we will embarrass the administration, when we are doing no such thing. The Senator from Iowa presented plausible difficulties by supposing troubles that do not, can not exist, and by assuming that they are or may be true when they can not by possibility be true. He has managed to frighten the Senator from New Jersey by charging us with having a lack of confidence in our own officials because we do not follow up every imaginable Will-with-the-wisp that our political opponents may throw in to catch us.

Mr. McPHERSON. Where do you find the \$180,000,000 of gold in

the Treasury?

Mr. BECK. I will read it to you from the Treasurer's statement of July 14. Here it is. My colleague in the other House, Colonel Breck-INRIDGE, wrote the letter and received the answer. It would edify the Senator from New Jersey if he would read two more letters that I read Senator from New Jersey it he would read two hiore levels that I read the other day. They would show him how ridiculous it was to prate about what Jay Cooke said. I hope he will read from my speech of last Saturday the letter of Mr. Sherman, Secretary of the Treasury, and the answer of Mr. Devens, which shows that silver coin is just as available as gold coin in the payment of all our public debts. Mr. Devens was quite as emphatic as the Senator from Vermont [Mr. EDMUNDS] was the other day on that subject, the Senator from New Jersey to the contrary notwithstanding.

Colonel BRECKINRIDGE put the question on the 12th day of July.

TREASURY OF THE UNITED STATES, Washington, July 12, 1886. Sir: Your letter of the 12th instant is before me, asking—
First. What is the number of 3 per cent. bonds now outstanding, and of this number how many have been called for and not presented?

Second. What number of bonds of each issue of 3 percents, 4½ percents, and 4 percents are deposited by national banks to secure national-bank currency?

Third. What was the total cash in the Treasury July 10, and of what did this cash energist? cash consist?

Fourth. What have been the daily receipts of the Treasury during the month Fourth. What have of July?
To the first question I reply as follows:
Amount of 3 per cent. bonds outstanding, to include July 10, 1886...
Of this amount bonds of the one hundred and thirty-eighth call not due until August 1, 1886...
3 per cent. bonds called and matured not yet presented for payment...

7, 770, 200
11, 777, 900 Actually outstanding...
To the second:
Currency sixes.
Four-and-one-halfs.
4 percents...
3 percents... 136, 057, 050 3,565,000 50,821,700 114,212,500 106,783,600 275, 382, 800 To the third:
Total cash in Treasury July 10, 1886:
United States notes...
National-bank notes...
Standard silver dollars.
Gold coin...
Subsidiary silver coin.
Gold certificates.
Silver certificates.
Gold bullion.
Silver bullion.
Minor coin.
In national-bank depositories. 35, 998, 623 296, 309 180, 903, 221 189, 877, 431 28, 786, 635 52, 414, 110 27, 529, 320 42, 137, 404 3, 547, 831 380, 496

A copy of this reply has been forwarded to the Secretary of the Treasury. Very respectfully,

C. N. JORDAN, Treasurer United States. Hon. WILLIAM P. C. BRECKINGIDGE, House of Representatives.

I commend that letter and answer to the careful consideration of the Senator from New Jersey.
Mr. PLUMB obtained the floor.

Mr. McPHERSON. Mr. President—
Mr. PLUMB. I assume the Senator from New Jersey is likely to

make some extended remarks on this subject.

Mr. McPHERSON. No, I do not intend to make any extended remarks, because it is entirely unnecessary, and upon so plain a question as this a waste of valuable time. I hold in my hand the statement made by the Treasurer of the United States June 12, 1886. I find he there makes the statement that he has on hand in gold coin in the Treasthere makes the statement that he has on hand in gold coin in the Treasury \$156,973,748. I find that against this amount there are charges as follows, \$22,791,647, which it has been the practice of the Treasury and the determination of the Treasury so far as it can, except otherwise ordered by Congress, to pay in gold, leaving a balance of gold coin in the Treasury of only \$134,000,000; while the Senator from Kentucky states it to be \$180,000,000 on July 12. If the Senator from Kentucky will take the moneys which have been received by the Treasury from all sources since the 30th day of June, it now being the 29th day of July, he will find that every dollar which has come into the Treasury in gold will not make up a tithe of the amount needed to increase it from \$134,000,000 to \$180,000,000 from \$134,000,000 to \$180,000,000.

Mr. TELLER. How do you make that out?

Mr. McPHERSON. To that is to be added, as a matter of course,

hat has accumulated from the 30th of June.

Mr. TELLER. On the 30th of June they had \$156,973,748, indeendent of certificates, in gold. Since that time they have accumulated still more

Mr. McPHERSON. Against the \$156,973,748 charges will be found as follows: Public debt and interest accrued and unpaid, above twentytwo millions

Mr. TELLER. That is not the only money they have got. There \$156,000,000 in the Treasury against which no certificates are out.
Mr. McPHERSON. Very true.
Mr. TELLER. There are \$30,000,000 more gold in the Treasury

than there was when this administration went into power—net, I mean.
Mr. McPHERSON. At the time this statement was made, that Mr. McPHERSON. At the time this statement was made, that there was \$156,000,000 in the Treasury in gold, there was then due a debt against that amount of money of \$22,791,647 in gold, because it is the policy of the Treasury, it is the policy of the President to continue to make payment of the public debt and interest on the public debt in gold. Therefore, deducting that sum which has already accrued, which is due and payable, there was only remaining \$134,000,000 of gold in the Treasure.

of gold in the Treasury.

Mr. TELLER. Is not that enough?

Mr. McPHERSON. I am coming to that.

Mr. TELLER. You mean after deducting the \$100,000,000 from

\$134,000,000?

11, 994, 308

Mr. McPHERSON. One hundred and thirty-four million dollars. Of course, when I said \$34,000,000 I meant the excess above \$100,000, 000. I had intended somewhat at length to discuss this question when it came before the Senate, but as the time is very short from now till the hour of adjournment, and as the honorable Senator from Iowa who has charge of this resolution, as the organ of the committee, has explained very minutely and very forcibly all its provisions, there is no necessity whatever for my entering into any discussion of the particular features of the resolution. It shows for itself exactly what it proposes to do; and in my opinion unless the amendment of the Finance Committee is agreed to by the Senate it will work very great hardship upon the Treasury.

There is no possibility to my mind of maintaining the parity of gold

There is no possibility to my find of maintaining the partey of gold and silver now in circulation unless you give to the Secretary of the Treasury a large amount of gold reserve with which to do it.

If there is any one thing for which the Republican party is entitled to all commendation, it is for its faithful guardianship of the public faith and the maintenance of the public credit. The public debt at the close of the war, amounting to upward of twenty-seven hundred millions, has been paid off in the very best money known to the civilized world until barely one hundred and thirty-six million remain in sight, this being the amount of 3 percents outstanding and subject to

In addition to the bonds now subject to call there are outstanding two hundred and fifty millions of $4\frac{1}{2}$ percents, which we can not pay before 1891, and which the accumulations in the sinking fund, as now required by law, will be sufficient to pay by the time they become due and payable. In addition to the $4\frac{1}{2}$ percents we have seven hundred and fifty millions of 4 percents outstanding which we can not pay before 1907, too far away, in a growing and prosperous country like ours, to even think about them.

Therefore we have only to deal with one hundred and thirty six

Therefore we have only to deal with one hundred and thirty-six millions of debt in the lifetime of almost every member of the Senate now present. If the Treasury is left unhampered and unrestricted, as it has ever been under former administrations, within two years it can all be honorably paid and at the same time the Treasury reserves so employed as to maintain the parity of gold and silver coins, or their representatives in actual use as money.

More than one-half of the debt has been honorably paid, and because

honorably paid, the interest burden on what remains yields to the holder to-day less than $2\frac{1}{2}$ per cent. on the market value of the bonds, and our credit is higher and better than that of any other nation on earth; and yet it is proposed to take a departure from that policy which wisdom dictated and experience proves to have been best. It is proposed to deal with the surplus now in the Treasury in such a manner as will trench upon the reserve specifically pledged for the redemption of the Treasury notes, or on the other hand in effect require the Treasury to pay the 3 per cent. bonds in silver dollars. To both of these propositions the Democratic President and his Treasury Secretary are unalterably opposed. The President of the United States, when he accepted the nomination of his party, planted himself firmly upon the declarations of the platform, which reads as follows:

We believe in honest money, the gold and silver coinage of the Constitution, and a circulating medium convertible into such money without loss.

The management of the Treasury Department since Mr. Cleveland became President leaves us in no doubt as to how he construed that declaration of the platform. Any other construction before the election would have lost to the party more than 100 electoral votes. The President of the United States has tried, diligently and faithfully, to perform not only this pledge, but each and every pledge made by his party in national convention. It is just to say he has succeeded wonderfully well, considering the obstacles and hinderances that have been thrown in his path.

At the inception of his administration the Treasury was depleted of gold and the retiring finance minister predicted that the country would be upon a silver basis in less than sixty days. This has been avoided by wise and prudent administration of the Treasury, resulting in con-tinuing gold payments to the credit of the sinking fund, and by reason tinuing gold payments to the credit of the sinking fund, and by reason of the gold reserves thus accumulated has maintained the parity between the gold and silvercoins, although the silvercoin is worth intrinsically 27 cents on the dollar less than the gold coin. And now to aggravate the situation you propose to rob the Treasury of its gold reserve while continuing to coin the troublesome silver dollar at the rate of two and one-half millions per month. In short, you propose in this resolution to deal with the surplus in the Treasury and dictate to the Secretary specifically what he shall do with it, and just to the extent Secretary specifically what he shall do with it, and just to the extent you pile up silver dollars in the vaults of the Treasury, which the Treasurer can not get out," his surplus becomes unavailable. I say unavailable, unless it be the purpose of the resolution to compel the holder of the Government obligations to accept silver in payment instead of gold when he had the right to expect gold.

Every bimetallic nation in Europe is strengthening its gold reserve. France has increased hers seventy millions during the past year and is not adding to her silver. Her mints are closed to silver; ours are open. The policy here proposed is to exhaust our gold reserve and at the same time vastly increase the accumulation of silver, except, as I have already stated, you give it to the public creditor. The future policy of France and Germany is made apparent from the fact that both are gradually but surely adding to their gold reserve, while the Bank of England is as steadily and surely diminishing. The reserve in the Bank of England to-day is less than it has been for many years, and its condition already begins to excite alarm.

As England is our market for breadstuffs and raw materials it means low prices for our products. As England in the past and now is the principal market for our bonds and securities, national, railroad, and municipal, it means the return of our securities for the purchase of gold needed in her trade transactions. Every Government creditor can to-day obtain from the Treasury in payment any kind of money he desires, be the same gold, silver, gold or silver certificates, Treasury notes, or national-bank notes. Gold is the unit of value, and all the paper issues rest upon it, with only one hundred millions of gold coin specifically pledged to its redemption. You place behind the gold and the silver certificate dollar for dollar, while behind the paper issues you have a pledged redemption fund of about 29 per cent., and you do not hesitate to say that you are willing that it should be impaired. How this can be done without a weakening in public confidence I can not conceive. Silver and silver certificates on the other hand occupy a different position and are redeemable and interchangeable only in kind.

The Government does not redeem its coin, and the silver certificate has no redeemer save the silver dollar. The silver dollar is to-day worth 73 cents plus the value given it by law. If you dispossess the Treasury of the gold reserve needed to supply the option of creditors, or pay the called bonds in silver dollars, one of which alternatives you or pay the called bonds in silver donars, one of which accentaives you must accept if you pass the House resolution, you are then upon a silver basis at once. It is notice from the Treasury that it can no longer maintain a parity between the two coins, and the public will begin to look out for themselves. I am astonished that any Senator favoring the continued coinage of the silver dollar would tolerate such a scheme as this bill proposes for a single moment. Our safety as bimetallists is found in the other direction. For the brief reasons I have given I am opposed to the House resolution, and for like reasons with many misgivings, because I do not think it goes far enough, though a member of the committee, and voting to report the resolution in its present form to the Senate, I shall vote for the committee amendments.

Mr. PLUMB addressed the Senate. [See Appendix.]

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had passed a joint resolution (H. Res. 295) permitting the public building authorized by act of Congress approved June 30, 1886, at Savannah, Ga., to be located not less than 40 feet from any other building, instead of 50 feet, as provided in said

act; in which it requested the concurrence of the Senate.

The message further announced the House had agreed to the report The message further announced the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the bill (H. R. 8974) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes.

The message also returned to the Senate, in compliance with its request, the bill (H. R. 28) to provide for the appointment and compensation of a district judge for the southern district of Alabama.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills and joint resolutions; and they were thereupon signed by the President pro tempore:
A bill (S. 2794) to amend an act entitled "An act for the erection

and construction of a public building at Oxford, Miss.," approved July

A bill (S. 2796) to establish a land office at Lamar, Colo.;
A bill (H. R. 8974) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1887; and

Joint resolution (S. R. 71) for the benefit of the States of Texas, Colorado, Oregon, Nebraska, California, Kansas, and Nevada, and the Territories of Washington and Idaho, and Nevada when a Territory.

SUNDRY CIVIL APPROPRIATION BILL.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives on the amendments of the Senate to the bill (H. R. 9478) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes, disagreed to by the House of Representatives, and the amendments of the House to the amendments of the Senate numbered 74 and 78 to the said bill.

On motion of Mr. ALLISON, it was

Resolved. That the Senate insist upon its amendments to the said bill disagreed to by the House of Representatives, and disagree to the amendments of the House to the seventy-fourth and seventy-eighth amendments of the Senate to the said bill, and agree to the conference asked by the House on the disagreeing votes of the two Houses thereon.

By unanimous consent, it was

Ordered, That the conferees on the part of the Senate be appointed by the President pro tempore.

The PRESIDENT pro tempore appointed Mr. Allison, Mr. Hale, and Mr. BECK.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had agreed to some and disagreed to other amendments of the Senate to the bill (H. R. 9726) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1886, and for prior years, and for other purposes; that it had agreed to the one hundred and eighth amendment of the Senate to the said bill with an amendment; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. BURNES, Mr. LE FEVEE, and Mr. McComas the managers at the conference on the part of the House.

The message also announced that the House had passed the following

bills; in which it requested the concurrence of the Senate:

A bill (H. R. 1741) for the relief of William E. Bond; and A bill (H. R. 9644) for the erection of a public building at Jefferson,

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills; and they were thereupon signed by the President pro tempore:

A bill (S. 1227) granting a pension to William P. Squires; A bill (S. 2349) granting a pension to Catharine Lauigan; and A bill (H. R. 3014) to provide for terms of court in Colorado.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President of the United States had, on the 28th instant, approved and signed the following acts and joint resolution:

An act (S. 57) for the erection of a public building at Oshkosh, Wis.; Au act (S. 2322) to authorize the Secretary of War to credit the State of Kansas with certain sums of money on its ordnance account with the

General Government; An act (S. 582) for relief of the board of field officers of the Fourth

Brigade of South Carolina Volunteer State Troops; and Joint resolution (S. R. 62) authorizing the publication of an edition of A Digest of International Law, edited by Francis Wharton.

DEFICIENCY APPROPRIATION BILL.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives on the amendments of the Senate to the bill (H. R. 9726) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1886, and for prior years, and for other purposes, disagreed to by the House of Representatives, and the amendment of the House to the one hundred and eighth amendment of the Senate to the said bill.

On motion of Mr. HALE, it was

Resolved, That the Senate insist upon its amendments to the said bill disagreed to by the House of Representatives, and disagree to the amendment of the House to the one hundred and eighth amendment of the Senate to the said bill, and agree to the conference asked by the House on the disagreeing votes of the two Houses thereon.

By unanimous consent, it was

Ordered, That the conferees on the part of the Senate be appointed by the

The PRESIDENT pro tempore appointed Mr. HALE, Mr. ALLISON and Mr. COCKRELL the conferees on the part of the Senate.

TREASURY SURPLUS.

The Senate, as in Committee of the Whole, resumed the consideration of the joint resolution (H. Res. 126) directing payment of the surplus in the Treasury on the public debt.

Mr. VEST. Mr. President, it is not my purpose to detain the Senate

with any elaborate argument upon this question. I just want to emphasize one or two suggestions in regard to the pending resolution.

In the first place, let me say most emphatically that there can, by no possibility, be anything like a political direction given to this debate. The Senator from Kansas who has last spoken is a most emphatic Republican and I am equally as pronounced a Democrat; yet our views are entirely in unison in regard to this House resolution. It is a business question, and the glamour which is thrown over this whole thing under the idea that different principles are to be applied to the business of the Government of the United States and the business of the people of the United States than those which are in the experience of every business man of intelligence throughout the country is simply a monstrous absurdity and a relic of barbarism.

| The same principles apply to the Treasury as to an individual. What would be thought of a business man with \$100,000 idle in his vaults and \$100,000 on 8 per cent. paper outstanding? There is not a merchants' exchange in this country that would not unanimously vote him a lunatic when the facts came to the attention of his brothers in business. But we are told that we are to hold \$228,000,000 of surplus idle money in the Treasury to redeem, forsooth, \$346,000,000 of greenbacks that never will be presented. That is the whole argument, and no other argument can be made.

We have to-day, by the actual figures, \$228,945,560.99, over and above demand liabilities in the Treasury of the United States, lying idle. When the Secretary of the Treasury is told of this his reply is it is to be kept there in order to redeem the greenbacks as they are brought for redemption to the national Treasury. Let us see how many of these greenbacks have come for redemption since January 1, 1879, when we

resumed specie payment.

Out of the \$346,000,000 how many of them have ever come to the Treasury Department where the holders wanted gold for greenbacks? From January 1, 1879, to June 30, 1881, there were \$7,976,000; July 1, 1879, \$3,780,000; the next fiscal year, \$271,000; the next, \$40,000, and in 1883, \$590,000; in 1884, \$2,222,000, and from July 1, 1885, to December 1, 1885, there were \$925,400, making in the whole term of years from the 1st of January, 1879, \$15,806,485 in greenbacks that were brought to the Treasury upon which holders asked gold; and we are to hold \$228,500,000 of money in the Treasury now to meet this enormous demand on the part of the greenback holders of the country for the hard red gold, as Mr. Benton termed it. It is a monstrous for the hard, red gold, as Mr. Benton termed it. It is a monstrous proposition, when we take into consideration at the same time, as shown by the receipts and expenditures of the last year, that we are collecting from the people \$45,000,000 a year over and above the obligations and expenses of the Government, and besides we are required to hold this amount of \$228,000,000.

I have taken the pains to copy from the last London Economist a statement of the reserve fund of the different European nations. Let us look at it. The United States, as I have said, has a surplus of \$228,000,000 over and above demand liabilities. We have some \$343,-000,000, if the demand liabilities are included. England has, by the last statement for June, \$30,000,000 only; France has \$21,299,000; Germany has \$11,500,000. These are the reserves of these great continental nations, and we are to have two hundred and twenty-eight and a half million dollars.

Mr. ALDRICH. Will the Senator allow me to ask him a question?

Mr. VEST. Certainly.

Mr. ALDRICH. Where does the Senator get the authority for making the statement in regard to Germany?

Mr. VEST. I took it from the London Economist. Mr. ALDRICH. I should be very glad to have the Senator point out the page and the place.

Mr. VEST. I will give the Senator the paper and show it to him. Eleven million five hundred thousand dollars are in the Imperial Bank of Germany to the credit of that government. That is the reserve fund of the German people to-day, no more and no less, unless this paper has willfully misstated it, and it is the highest financial authority.

It is an incident, and an unvarying incident of all moneyed institu-

tions, of all individuals that come into the control of them officially or otherwise, to pile up and hoard money. The Senator from Kansas [Mr. Plumb] stated the whole question in one single sentence. It is a fight not between Democracy and Republicanism, it is a fight between gold and silver, gold and greenbacks, between the creditors and the debtors of the country, between the men who want to make money scarce and high and dear and to increase the price of it and the interest of the country, and the men who are laboring and who borrow money; and unless this trouble is terminated upon equitable and fair terms it will result in a sectional struggle between East and West. That is the plain meaning of this whole thing.

Sir, look at the national-bank system. I have here a statement which

I obtained from the acting Secretary of the Treasury this morning. I wish to show to Senators exactly the conditions of these banks to-day

as to their reserve fund:

Statement of lawful money reserve held by all national banks, by those not a reserve cities, by those in all reserve cities except New York, and finally y those in New York.

Here is the statement tabulated:

	Total 1	reserve.	Cash reserve.		
National banks.	Required.	Held.	Required.	Held in cash and with U.S. Treas- urer.	
All in United States Out of reserve cities In reserve cities, exclud-	\$262,758,283 91,760,069	\$394, 192, 310 181, 552, 648	\$163, 911, 218 32, 988, 213	\$261,165,183 88,092,935	
ing New York In New York	96, 810, 237 74, 187, 977	122, 784, 157 89, 855, 515	47, 166, 218 73, 756, 787	83, 216, 734 89, 855, 514	

Thus it will be seen that in the city of New York, the great financial center of the country, the law requires them to hold \$74,187,977. They actually have to-day \$89,855,515. Their cash reserve required by law should be \$73,756,787, and they hold \$89,855,514. That is the state of the national banks of the United States to-day.

Mr. ALLISON. May I ask the Senator to explain why that excess

of reserve exists?

Mr. VEST. I do not know except it is upon the general principle

to get money and to hoard it and to make interest higher.

Mr. ALLISON. Banks are usually supposed to be organized to loan

Yes; that is the supposition.

Mr. McPHERSON. They can not loan the money.
Mr. VEST. The Senator from New Jersey says they can not loan
. Why can they not loan it? It is because they do not get the interest they want to charge.

Mr. McPHERSON. Or the security.

Mr. VEST. Or the security, the Senator says, but it is for one reason or another. There is an exhibit showing the amount of money that to-day is idle in the vaults; that with this amount tied up in the that to-day is idle in the valuts; that with this amount fied up in the financial agencies of the Government we are now to hold \$228,500,000 in order to meet a redemption of \$340,000,000 of greenbacks, when but \$15,000,000 of greenbacks have come to the Treasury for redemption since the 1st of January, 1879.

Mr. HOAR. I should like to ask the Senator before he sits down what he supposes the banks could do with this reserve that he criticises them for holding? Does he suppose that they could loan it at 3 per cent, on good security at this moment?

per cent. on good security at this moment?

Mr. VEST. I am not criticising the banks; I am giving a statement taken from the Treasury of the United States showing the amount of idle money in the Treasury, and I simply give that in order to add force to the argument that we should not now hold \$228,000,000 more of idle money. That is the whole of it. of idle money. That is the whole of it.

Mr. HOAR. I understood the Senator to say that the reason why

the banks hold on to this reserve, larger than they were required to hold, was in pursuance of their policy to hold on to money unless they could get an extravagant rate of interest upon it. I ask him if he believes they could loan it out on good security at 3 per cent.?

Mr. VEST. I do not do business in the East, and I can not speak for the rates of interest in New England. I will inform the Senator and the banks of New York that they can loan every dollar of it in the portion of country where I live for 5 and 6 and even 7 per cent.

with as good security as there is in the city of New York.

Mr. SHERMAN. Mr. President (Mr. HALE in the chair): I do not intend to detain the Senate long, and I wish to regard this question precisely as the Senator from Missouri does, as a purely business proposition.

The joint resolution undertakes to regulate the fund for the redemption of United States notes. Hitherto that has been left to the discretion of the Secretary of the Treasury under certain limits defined by law. There are three reserves in the Treasury of the United States. These are not separated from each other, but still there are three independent reserves either provided for by existing law or made necessary by the daily business of the Government.

First and chief is the fund for the redemption of United States notes and for the maintenance of specie payments. By this measure as reported from the Senate Committee on Finance that is fixed at \$100,-000,000. Hitherto it has not been defined by express terms. The resumption act of 1875 authorized the Secretary of the Treasury to provide for and maintain resumption, and the first step was to accumulate in the Treasury a fund that would be amply sufficient to maintain re-

sumption.

When this matter was discussed before the Committee on Banking and Currency in the House in March, 1878, the whole subject was considered with great particularity. Mr. Buckner, a member from Missouri, was the chairman of the committee. That was at a time when the Department under the law was making preparations for resumption, which was to accrue ninemonths later, and the question of the amount of reserve was the one mainly which was then considered. At that time the history of all the banking institutions of the United States and of the world was carefully and amply explored and fully explained to the committee, and formed the subject of repeated interviews. It was shown that every successful system of banking which had been established, either by a government or by individuals, assumed that from 30 to 40 per cent. in coin was the minimum reserve which should be maintained for the maintenance of specie payment.

Mr. CHACE. And deposits in circulation.
Mr. SHERMAN. Both against deposits and notes in circulation, but the United States hold no deposits except what are kept intact, and I do not refer to these.

At that time there were in the Treasury about \$70,000,000 of gold coin, either the proceeds of bonds that had then been sold for the purpose of resumption, or surplus revenue which had accrued. The Secretary of the Treasury said to the Committee on Banking and Currency that in his judgment in order to prepare for and to maintain resumption upon a sure basis it would be necessary to borrow \$50,000,000 more of gold coin by the sale of bonds, and he stated his purpose to go to New York the next week, if he was not prevented by the action of Congress, and would then raise by the sale of bonds \$50,000,000 in coin, which he could do by selling 4½ per cent. bonds at a premium.

At that time no one pretended that the amount of reserve should be

less than \$100,000,000. On the other hand General Ewing, Mr. Buckner, and others insisted that this sum would not be a sufficient basis for the maintenance of resumption, but that the Secretary was undertaking an impracticable task, and produced evidence from the records of the Bank of England, and from the Bank of Germany, and from the Bank of France and other authorities to show that the amount of reserve that I proposed to establish was not sufficient. I contended, however, that it was sufficient, and mainly because the United States had not to provide against deposits which were fully covered by cash in hand, but only had to provide for the redemption of \$346,000,000 of notes widely circulated and in active use throughout the United States.

Upon that statement members of the Committee on Banking and Cur-

rency tacitly declared that they would not interfere with the plan proposed by the Secretary but that he might take the risk as the discretion was by law left to him to fix the basis of resumption. At that time there was no distinction made between what is called a working balance for the ordinary operations of the Government and the reserve for resumption. At that time bonds were being called very largely, and continued to be called very largely, and it was known that there must be necessarily in the Treasury a reserve equal to the amount of calls to be made within a period of three months. At that time the law required for a call of existing outstanding bonds a notice of three months, and it was conceded that no Secretary could safely call for the payment of bonds until he had the money on hand to pay them. By existing law, however, under the 3 per cent. loan, the length of the call is reduced to thirty days.

So upon the principles thus adopted and acquiesced in by all parties a sum of money should be in the Treasury sufficient at the date of the call to pay the call when it matured, because, forsooth, no one cantell exactly what thirty days will bring forth. In addition to that there is absolutely necessary a working balance to carry on the ordinary oper-

ations of the Government.

Neither Congress at that time nor the Secretary of the Treasury thought it wise to separate the various redemption funds, and it was concluded on the whole, and was announced as the policy of the administration subject to the approval of Congress, that the aggregate reserve in the Treasury to include a working balance, a bond reserve, and the resumption fund, should be about \$140,000,000, which was between 30 and 40 per cent. of the whole amount of greenbacks outstanding, and that this sum was the lowest that could safely be adopted. That was founded treat the received of all patients of the state of the stat founded upon the experience of all nations, our own among the rest, and it is adopted and acted upon by all commercial nations now.

I was somewhat surprised when my friend from Missouri gave us figures a while ago that startled me, but I happen to have before me the last number of the London Economist, which shows that to-day in the Bank of Germany, the Bank of England, and the Bank of France, which are really government institutions, although they are owned to some extent by individual capital, their reserves are larger than that proposed by this measure. I find here in the Economist of July 17, 1886, the statement of the Bank of England. It appears that the circulation, excluding bank post bills, of which there are not many, was £25,335,290-sterling, not dollars, but £25,335,290 sterling, or equiv-

alent to over \$126,000,000.

Mr. TELLER. To what date does that bring it up?

Mr. SHERMAN. The date of the statement is July 14, 1886. The reserve of notes and coin on hand then was £11,555,438; the amount of coin and bullion on hand was £21,140,728. This data extends from 1876 to 1886. It shows that on July 14, 1886, the date of this statement, the amount of cash reserve for all liabilities was 39 per cent. in coin. That is more than is proposed now. Let me give these figures

Mr. GEORGE. Does that reserve mean circulation and deposits

Mr. SHERMAN. Yes, sir.

I have before me the statements of the Bank of France made up to The amount of gold coin and bullion on hand July 15. 1886, was £54,361,000, not dollars; July 8, 1886, £54,614,000; July 16, 1885, a year ago, it was £45,924,000 in gold, not silver. This is the Bank of France, where they have a great quantity of silver. The amount Bank of France, where they have a great quantity of silver. The amount of silver coin and bullion on hand July 15, 1886, was £44,885,000; July 8, 1886, £45,042,000; July 16, 1885, £43,031,000. On the 15th of July, 1886, the circulating notes of the Bank of France were £114,011,000; the government deposits were £7,907,000, and the private deposits were £14,390,000; so that the ratio of actual coin and bullion on hand to the whole liabilities, including circulation and private and public deposits

and notes, was over 60 per cent.

Mr. TELLER. Will the Senator give us the government deposit?

Mr. SHERMAN. I have stated that already. It is £7,907,000.

Mr. TELLER. About \$40,000,000.
Mr. SHERMAN. Yes. That \$40,000,000 is more than we propose

here as the working balance for our operations.

Mr. VEST. If the Senator from Ohio will permit me, I do not want to be put in the position of misstating. My quotation is made from the London Economist of June. I see from that that on the 18th of June the Government of England had on deposit in the Bank of England, exchequer, savings-bank, national debt, dividend account, &c., £6,404,000, or \$30,000,000; and so the Government of France had on deposit in the Bank of France on the 18th of June last, to its credit in

the Bank of France, £4,259,000, which would make \$21,000,000.

Mr. SHERMAN. The Senator will see how easy the explanation is.

Mr. VEST. I only want to set myself right about it. The Senator

ant. VEST. I only want to set myself right about it. The Senator is giving now the entire business of the bank, not the Government account. I quoted from the Government account alone.

Mr. SHERMAN. Now let me answer. In the first place, neither Great Britain, France, nor Germany is responsible for the issue of notes. The notes are issued by private corporations which are organized, a government institution; and the reserve therefore that is held to secure those notes is the money of the bank. The government of Great Britain had, it seems, £8,000,000 as stated.

Six million four hundred and four thousand pounds. Mr. SHERMAN. That is over \$32,000,000. That is over \$12,000,000 more than the working balance we provide, and in France they had \$40,000,000 deposited by the government on call.

Mr. TELLER. I should like to call the attention of the Senator to

the fact that in December last the public deposit of the Bank of England ran below £3,000,000.

Mr. SHERMAN. Three million pounds is \$15,000,000, and under this very measure ours will fall below that no doubt at times, as I will

show you. I do not want to be led into a long debate.

Mr. JONES, of Nevada. I should like to call the attention of the Senator to the fact that in the very last statement made the Government of Great Britain borrowed of the Bank of England £8,500,000 for

Mr. SHERMAN. Certainly; and it is a very good thing to have a powerful institution from which the Government can borrow, and for that very reason they can leave their balances lower than they probably would otherwise do. I hope Senators will not interrupt me because I do not want to be led off into a long debate, for it is too hot.

ause I do not want to be led on lines and will give you the figures and they are here.

Coin and bullion in the Bank of Germany July 7, 1886, £35,317,
Coin and advances, £24,701,000. The notes in circulation 000; discounts and advances, £24,701,000. were £43,613,000; the current accounts, £13,480,000; so that the Bank of Germany was stronger than is proposed here.

Now, let us go a little further. I will show you that this amendment is founded upon the experience not only of other countries but that

it is founded upon our own. As to this \$100,000,000 it would be wrong to tamper with that reserve thus established by the consent of all the branches of the Government and sanctioned further by the currency act of Congress of 1882. This declares that when the gold coin and bullion in the Treasury is less than \$100,000,000 no further coin certificates shall be issued, thus stopping the issuing certificates; so that the hundred million dollars should always remain intact. It has never been proposed by Congress seriously to tamper with that reserve. This Government insists upon issuing its own currency and is subject to the same law of redemption as other banking institutions and must provide the same safeguards. It can only maintain the credit and convertibility of its notes by the same rules applicable to other banks. Legal-tender laws and pains and penalties can not keep United States notes at par in coin, but this can only be done by redeeming them on demand with coin, and to make this sure the coin must be on hand. But the Senators from Kansas and Kentucky and others say that we do not want any such reserve as one hundred million-that \$50,000,000 will be too much, that \$25,000,000 is enough. Experience is a better guide and counselor than they are. The whole of our financial system rests upon that fulcrum of solid coin. Not only would confidence in the bank circulation be affected by it and the stability of our greenback circulation, but the whole financial operations of Government would be disturbed by any serious reduction of this redemption fund.

You may say that men who have devoted their lives to this kind of rou may say that men who have devoted their lives to this kind of business are a little too timid, a little too conservative; but that is the merit and safety of all banking, and no government ought to enter into the business of banking until it adopts all the conservative habits of other successful bankers. Even the United States is not exempt from this duty. Otherwise a Black Friday or some other unforeseen event such as has happened in my legislative experience would topple our whole financial business into ruin. I remember that in 1857 we were here trying to distribute our surplus revenue just as you are doing now. We adjourned in March that year, and when we came back to Congress we had to borrow money to pay the salaries of mem-These sudden changes may occur, and therefore we bers of Congress.

ought always to be strong.

Now, let me go a little further to show that the Government of the United States is subject to sudden fluctuations in its revenue and expenditures. After setting aside this hundred millions as provided by law to protect our currency from depreciation we must provide ways and means to pay our bonds and current expenditures. You must accumulate money for the call of bonds. The amendment proposed by the Senator from Iowa simply says that you can not make a call for bonds until you have the money in the Treasury in excess of the call. You shall call \$10,000,000 a month, but you shall not make the call at any time unless you have money enough to pay that call thirty days hence without trenching on the reserve of \$100,000,000. Is not that a wise provision? Otherwise, in order to issue a call of \$10,000,000 a month you might be compelled whenever your surplus rose above a hundred millions, according to one construction—I think an erroneous one—you might be compelled to call the \$10,000,000. That is a doubt which is removed by the amendment. It is not to be presumed that the Secretary of the Treasury will call \$10,000,000 at a time. Herehe is required to call \$10,000,000 in a month, but he ought to do it in calls ten days apart. He ought not to make a call the first of the month, for that is the pinching time when other liabilities accrue. He ought to call, say, on the fifth, the fifteenth, and twenty-fifth three or four millions to make up the amount in the month; but when he makes the call he must have the three million or the four million dollars on hand, because he can not anticipate and can not take any risks that

when the time comes he will not have the money.

I was caught that way once. In November, 1877, when Congress met they were going to repeal the resumption act. There was passed through the House of Representatives in hot haste a bill repealing the through the House of Representatives in not haste a bill repealing the resumption act. It stopped at once as by a clamp the sale of bonds. In order to save interest, which was a very desirable thing to do, I had made a call of \$10,000,000, in anticipation of the sale of 4 per cent. bonds. The call then ran for ninety days. The sudden action of the House stopped the operations of the Treasury Department, and we had to pay that call out of the current revenues and some of it out of the reserve which had been accumulated by the sale of bonds for re-

sumption purposes.

Certainly Senators do not desire, I do not want, to put this Democratic administration in any worse predicament than Republican administrations have been put in. I want to give them the same degree of confidence, the same degree of reasonable latitude and discretion that has been given to others. Therefore, when you provide that you shall not make a call under this proposed law until you have got the excess on hand you only make a provision which any private citizen would make to be certain to have the money on hand before he offered to pay it, for when the call is made it must be paid. That is the only explanation needed of that provision.

But what more? Under the operations of the resolution as it came to us from the House, without providing any working balance in the Treasury, the Treasury would be compelled at the beginning of every month, especially at the beginning of every quarter, to draw largely upon the reserve, from \$10,000,000 to \$20,000,000. Here is a statement

going back to 1876, running up to this time, which shows that every prudent Secretary would in May commence to provide for July. July 1 is the hard period of the year, because that is the time when a great many expenditures have to be made, new accounts and new appropriations have to be opened, and money distributed to disbursing officers. The quarterly payment of pensions, amounting now to \$18,000,000, has to be provided on the 1st of July, October, January, and April. So with the interest of the debt and other expenditures that come due in monthly or quarterly payments. There has not been a period in a single year, by this statement, when the variations between June and July have not been as high as from \$10,000,000 to \$15,000,000. No one knows beforehand. When General Garfield died the shock and effect upon the public were so great that in a single month \$30,000,000 was drawn from When General Garfield died the shock and effect upon the the Treasury, and the balance on hand was reduced that sum.

Suppose you have no working balance over and above a reserve nothing on hand but that. Under this proposed law, on the 15th of June, when a prudent Secretary, who had been accumulating \$10,000,000 or \$20,000,000 ahead to meet the payments to be made in July, whenever that amount went over \$10,000,000, would be bound to call the That occurred this year. It has occurred while we have whole excess. been here. In June the amount ran up, and in July the Secretary of been here. In June the amount ran up, and in July the Secretary of the Treasury was called upon to pay more than \$20,000,000. So if such a law had been in operation in June when the balance ran up high he would have been compelled to call, under the operations of the law, not less than \$10,000,000, while on the 1st day of July following, a fact that he knew and had provided for, he would not have the money on hand to meet current payments then due except by drawing on the gold redemption reserve in the Treasury.

So it is necessary to provide for a warking balance. The great reserve in the Treasury.

So it is necessary to provide for a working balance. The great governments to which I have referred keep to their credit in bank thirty to fifty millions for this purpose. It always has been deemed necessary. It never has been denied to any administration, and unless you really intend to impinge upon and reduce this great balance-wheel of the Treasury, this \$100,000,000 of coin, you have got to give the Secretary of the Treasury some leeway from month to month. This statement is shown by months. It shows the fluctuations and vibrations up and down, varying anywhere from \$2,000,000 a month up to \$30,000,000 a month; so that under the operations of this joint resolution, taking it as it came to us, the Secretary could not accumulate money to meet the quarterly balances due on the first of each quarter. He would not be able to meet even the monthly variations that occur. The Treasury statements are made on the last day of each month, and on the 30th day of June the balances are the very largest in the whole year. The time when the Treasury statements to which I shall refer in a moment are made up is when the amount on hand must necessarily be larger than at any other period of the year. They are made in view of what is to come on the next day. The interest on the public debt accrues on the 1st day of July, so that \$9,000,000 is to be paid out at once for that, and about \$17,000,000 for pensions, together with the various appropriations made by Congress from time to time. So it is impossible unless you give the Secretary of the Treasury some working balance that he could meet his necessary payments without drawing upon this great reserve.

Now, let us go a little further about this. What amount ought he to have? Some say \$5,000,000. That would not pay one-third of the pensions due on a particular day. Some say \$10,000,000; some say \$20,000,000; some say \$25,000,000. For myself I would have been willing to give him a discretionary power-not an absolute power but

a discretionary power.

Mr. PLUMB. Pardon me if I suggest that we start the Secretary of the Treasury with more than \$75,000,000 to begin with now.

Mr. SHERMAN. I will come to that in a few moments. My friend

will see that I shall not avoid that.

What is a fair working balance no man can say, but the Committee on Finance have placed it at twenty million, the very minimum which any government of our population and wealth ever undertook to carry on its operations. The Senator himself showed that France has about forty million, and Great Britain thirty-odd million of credit in the Bank of England. All I want to do is to give to this Democratic administration such a reasonable and fair balance as may enable them with security and safety to comply with the acts of Congress made from time to time appropriating the public money; no more and no less. Even the sum named I believe is rather less than on the whole it might be, but there are other things that enable me to vote for this proposition.

One of the mistakes I think made by this administration was that the Secretary of the Treasury changed the familiar form of stating the public debt. In the new debt statement they count as accrued interest that which is only accruing; that is, the interest accruing but not due is shown in the last debt statement as \$9,000,000, but this is counted as having accrued when in fact it will not accrue or become due until September when ample revenues will come in to meet it; and therefore I think the Treasury has a margin that way, but I suppose this change was made to excuse their policy of coin and currency accumulation, I would not say to cover up a balance but at any rate to be sure to be on the safe side.

Another thing they have done which was never done before in Republican times, they have failed to count the fractional silver coin as a

part of the money of the country. It is not available for the payment of debts, it is not available for the payment of appropriations, it is only available for paying small sums when demanded by the people, and experience shows that when paid out it soon returns. The amount has now so accumulated that it is \$29,000,000. If you would authorize the Secretary of the Treasury to recoin all that minor coin into standard dollars he could use those or issue certificates based upon them but it is a to could. them, but it is not counted. In one sense it is not an available asset, but all his predecessors got along by counting it. It is true when I was there the amount was not so large as it is now; I think it was about \$12,000,000 to twenty millions, if I remember aright, but we counted it as so much money on hand, although we knew it was unavailable, because that seemed to be the proper thing to do. It is money in one sense, and it is not money in the general sense for broad national payments.

I believe that the amount reported by the Committee on Finance is the very lowest sum that, according to the experience of mankind, it would be safe to provide as a working balance; and I would be willing to give to the Secretary of the Treasury even more discretion. You need not be afraid he will abuse it. Great trusts like his are performed under the light and are not likely to be abused. He has a public policy differing entirely from that of my friend from Kansas about what is necessary in order to maintain the credit and power of the Government. It is an honest difference of opinion; he does not conceal it.

Indeed, when Mr. Fairchild came before us, I could not help but feel a kind of sympathy for him when he declined to give us his opin-ion of this measure, saying at the same time that heretofore this power had been left to the Secretary of the Treasury, and it seemed that Congress did not desire to confer this power on the present administration, or words to that effect, and he thought it was indelicate for him to give any advice. It seemed a kind of an appeal that you should give at least the same opportunities to carry on the operations of the Gov-ernment that you had given to the Republicans who had preceded him, and I believe it was a proper appeal to be made under the circum-

This statement shows the average balance. If the fractional silver coin had not been deducted on the 2d day of January, 1880, the balance in the Treasury would have been \$139,000,000, but deducting the \$18,000,000, Treasury would have been \$139,000,000, but deducting the \$18,000,000, the balance in the Treasury was \$120,426,000. That is about the lowest. I certainly would be willing to give this administration that which we thought necessary at the time to give when the operations or the Government were even less than they are now. Give him a minimum. First there is the minimum of the redemption fund. Let that stand intact. It is said that nobody calls for it. I hope nobody ever will; but dissipate that fulcrum and then you will find plenty of people to call for it. It is the basis upon which the whole thing stands. Let that stand as long as the pyramids stand as the basis of \$346,000,000 of our promises to pay. Senators say that nobody doubts the integrity of the United States or its ability to redeem the greenbacks. Nobody does now, but yet it is only eight years since these notes were at a discount, and within twenty years they have been at a discount. at a discount, and within twenty years they have been at a discount of 40, 50, and 60 per cent.

If Senators will have the kindness to turn to Mr. Jordan's statement

before the Committee on Finance, they will find there the reasons given by Mr. Jordan why this unusual balance had been accumulated. I believe there was probably a little too much timidity in regard to this matter, but still he makes a very strong statement to show that at one time the gold reserve had been reduced to \$123,000,000, and he feared that the great bankers and men interested in our financial system would entertain the fear that at some not far distant day the dollar which they held in their hands as the trustee of great properties would, by some sudden change, by the dissipation of this gold reserve, be payable in silver worth 74 to 80 cents on the dollar. That was a fear.

How is this silver coin maintained at par with gold? It is said that it goes as good as gold everywhere, but why? It is maintained at par with gold in the properties of the properties of

with gold just like your paper money, because it is redeemed, it is received, it is used by the Government in exchange for gold; but if you once establish a fear in the minds of men engaged in large business interests that you will not maintain it at par with gold, then the silver dollar will fall to its market value. It will become the sole standard of value. If the Government were to compel the people to take that which is intrinsically worth less than a dollar, then gold will disappear, and we will have contraction, hoarding, exportation, and all the evils which I have sometimes feared when they did not exist, just as people sometimes frighten themselves with imaginary dreams. Yet if you raise the impression that it is your deliberate purpose to go on with this theory that the standard of 4122 grains of silver shall be the standard and purchasing power of the dollar, you must expect the men who not only represent great private business interests of their own but represent the property of other people to take pains to protect themselves by securing gold coin or its representation. Whether you like it or not they will not do it. It seems Mr. Tilden did it—I did not know that until it was mentioned by my friend from Kentucky—and other great bankers protected themselves by buying foreign exchange. They will do that; the self-interest of mankind will prompt them to do it.

But as long as you maintain your silver at par with gold, as you do ator is correct.

now, and as France does with the utmost care and watchfulness, then there is no danger. I think our friends in New York have a little natural fear and a good deal of artificial fear in regard to that subject. I do not believe the people or Congress of the United States will ever bring us to a single silver standard. If they do, it will be a far greater calamity to the poor men of this country, the men whose wages will be measured by this inferior standard, than it will be to the rich men, who can protect themselves.

Mr. JONES, of Nevada. I should like to ask the Senator if the ca-

lamity which he has so graphically depicted should occur and some \$400,000,000 or \$500,000,000 of gold should be taken out of the country, how the remaining volume of currency could be depreciated in value? Does he mean to say that when the volume of currency becomes less it becomes cheaper?

Mr. SHERMAN. Our silver then will be measured just as our wheat is measured, by its price in the foreign markets. The pound sterling will be worth \$6.25 instead of \$4.84, and the franc 24 cents. But we maintain and intend to maintain the silver at its present standard. I agree with my friend from Nevada that we must do it. We can not do otherwise, although I think if we continue the present policy indefinitely the time will come when we can not do it. It has not been yet reached, but whenever it is done then you will have cheated the laborer out of a portion of the purchasing power of his dollar, while the capitalist, watching eagerly the signs and chances of the market, will place his securities where they will be counted in gold.

Mr. JONES, of Nevada. I should like to have the Senator answer

specifically in what manner gold now protects silver? Silver is not redeemable in gold, and in what manner does the gold in the country protect the value of silver?

Mr. SHERMAN. I will talk to my friend from Nevada some time when we are quietly together about these conundrums.

Mr. JONES, of Nevada. I was afraid the Senator would not answer the question.

Mr. SHERMAN. It is a practical business question with which I deal now, and not one of the theoretical questions in which my friend loves to indulge. I have often talked to him, and he knows my opinions and I know his.

Mr. JONES, of Nevada. I should like to have an answer.

Mr. SHERMAN. To show that the fear at that time was not un-Mr. SHERMAN. To show that the fear at that time was not unnatural, let me take the total net reserve as stated by the Secretary of the Treasury, \$179,689,862, including all forms of money, notes and coin, silver and gold certificates, and all other money except fractional silver coin; the balance is \$179,000,000. At this time we have in the Treasury 82,980,559 silver dollars. We have in the Treasury silver certificates to the amount of \$33,978,767. In all, we have in silver, because the certificates are specifically payable in silver, \$116,959,326.

Suppose we should now force the Secretary of the Treasury to pay

out these silver dollars and the silver certificates, force them upon the people whether they are willing to take them or not, refuse to pay gold, refuse to pay greenbacks, force out this \$118,000,000, what effect would that have at once in bringing you to the silver standard? I will allow every Senator to answer that for himself. Sir, we are only kept from meeting this possible calamity by redeeming and taking in this silver, and the very fact that the silver dollar is safely stored in the Treasury is the best protection to the value of silver.

I have thought all along—and that is another criticism of this administration which I would wish to make in all kindness—that they ministration which I would wish to make in all kindness—that they have not availed themselves of the legal power to use silver certificates in accumulating gold coin and bullion. I never could understand why that process was permanently stopped. There are four distinct provisions of law which authorize the use of any money in the Treasury for the purchase of gold and gold bullion. We have in the Treasury \$32,000,000 of silver certificates. This fall when the demand for cotton and wheat and the other productions of the country begins to be active the gold will come from foreign countries, because there is no active the gold will come from foreign countries, because there is no balance of trade against us to settle. But few of our securities are held abroad, or if they are held they are held firmly. The demand will come here for our natural productions, and I do not see then why the Secretary of the Treasury does not do as his predecessors did, buy gold to fortify the gold reserve. If he has any fear of the disappearance of gold, instead of borrowing a ridiculous sum from the bankers in order to support his reserve, it seems to me he might have got gold in the Treasury in exchange for certificates. His predecessors bought eighty-odd millions of gold by silver certificates; and why? This money is brought here in the form of bullion or foreign coin, not immediately convertible and not in form for ready use.

Mr. COCKRELL. I know the Senator wishes to be accurate. Did

not the last Secretaries of the Treasury under Republican administra-tions cease that process? Was it not stopped long before the present Secretary of the Treasury came in?

Mr. SHERMAN. It was stopped for a time because the certificates

ran out; that is, they had paid out all they had.

Mr. COCKRELL. And it had not been renewed, and has not been

renewed by the present Secretary.

Mr. SHERMAN. It has not been renewed by him.

Mr. COCKRELL. I think he ought to renew it. I believe the Sen-

Mr. SHERMAN. He has in his hands \$32,000,000 of silver certifiates. There is no reason why these should not be converted into gold. It is true the silver certificates come back for customs duties and for all the other operations of the Government. Still to that measure it would be a relief. As they come back they are paid out, if the state of the market will justify it. Why, you may ask, do the owners of gold coin and bullion take silver certificates? Because coin in any form, especially as imported, is not in an available condition for use. If there and bullion take silver certificates? Because coin in any form, especially as imported, is not in an available condition for use. If there was a tightness in the money market, or rather a scarcity of currency, then the issue of these certificates for gold coin or bullion would supply an active currency, while the gold rarely is active currency. It must be represented by some form of paper money, and the silver certificates will be received, sent down to New Orleans, sent West to the great plains and there applied to the purchase of all the productions of the country for export abroad. In due time the silver certificate flows the country for export abroad. In due time the silver certificate flows back into the Treasury, but the gold is there and remains, while the certificate in due course may be again used to purchase more gold or to pay current expenditures, and in that way the reserve may be fortified.

As I said, this is not an administration of which I am any part or lot, but I want to be fair by it, treat it as I would our own. In proposing this amendment, the Committee on Finance, a majority of which is Republican, propose to do by this administration what has been done by a Democratic Senate and by a Democratic House in a Republican administration, not to cripple the Secretary, not to compel him to do what his judgment condemns, but to allow him reasonable discretion. If there is anything clear, Mr. Jordan and Mr. Fairchild are firmly opposed to the House resolution. They said so to us. They gave us their reasons for it. We thought on the whole that they were accumulating a greater reserve than was necessary to protect the public credit and the public interest, yet we did not feel justified in compelling them to go to the extent in dissipating the reserve as required by the House, which they regarded as injurious to the public service, to the credit and public faith of our country. We therefore provided for this movable discretionary balance of \$20,000,000. We put it lower than experience shows has been required every year for the last eight or ten years. The fluctuation, the ebb and flow of the currency, demand this sum of money. The table to which I have already referred shows that even in ordinary times at special periods of the year increased payments in a single day must be made and must be provided for by previous accumulations equal to this floating balance. To deny it is to open the resumption reserve for ordinary wants of the Treasury.

There is another probable effect of this measure to be noticed. My

friend from Kansas and also my friend from Kentucky talked about contracting the currency. There never was a more severe, harsh contraction of the currency than is proposed by this joint resolution. How will that happen? You call bonds. You ought to call them and pay them off. You call them at the rate of \$10,000,000 a month. When you call \$10,000,000 of bonds \$8,600,000 of these belong to the national banks and are the basis of your banking system.

Mr. TELLER. How many? Mr. SHERMAN. Eight million six hundred thousand dollars out of \$10,000,000; that is, there are \$136,000,000 of outstanding bonds redeemable, and the amount held by the national banks is \$114,000,000 or \$115,000,000.

The banks hold \$118,000,000 all told. Mr. TELLER.

Very well. There is some little difference be-Mr. SHERMAN. tween gentlemen.

Mr. ALLISON. I made the calculation that they hold \$106,000,000.

Mr. TELLER. And then they hold \$14,000,000 more.

Mr. SHERMAN. When you pay for the bonds the banks are deprived of their circulation. They are compelled to gather in the United States notes and bring them to the Treasury and there deposit them in the Treasury, which assumes the payment of the outstanding bank notes. But the law of Congress is so firm and strong that every note of the bank which comes into the Treasury has to be sent to Washington and here retired and canceled. At this time under previous calls there are \$60,000,000 of the United States notes tied up by the express provisions of the law which can not be paid out, but will lie there to redeem an equal amount of bank circulation which you have with-

drawn or driven out of circulation. If this measure passes, and they call for \$116,000,000 of these bonds, the banks will be compelled to retire about \$100,000,000 of their circulation, and the pending the presentation of the notes the bank must gather up United States notes equal in amount to the bank bills to be retired and deposit them in the Treasury for the sole purpose of redeeming the bank bills when pre-From the beginning of this operation the volume of currency is reduced to the extent of 90 per cent. of the bonds called held by the bank.

Sir, so sharp a contraction has never happened since our financial, system was started as will be required by the operation of this joint resolution. It was not so designed. The gentlemen who framed this measure and supported it did not intend to contract the currency; but

such is its effect as often happens with unwise financial legislation.

It is said these notes will all come in rapidly. They will not. The fact is, your \$60,000,000 of greenbacks are now held to redeem outstanding notes heretofore retired by the compulsory action of the Government. Experience shows that they do not come in. They are circulating, but the greenbacks are tied up, and the law requires that the greenbacks when deposited shall be kept there intact for the sole and only purpose of redeeming the bank notes retired.

Still, all things considered, the Committee on Finance came to the conclusion that they would report an amendment which would require, according to the House provision, about \$50,000,000 to be retired. That is an enormous contraction. It seems to me that is far enough, I do not want to take the responsibility of going further. Indeed I sometimes doubt whether in interfering with the discretion of the Secretary of the Treasury in regard to this matter we have not gone too At all events he ought to be left free to meet a possible emergency in the future.

There is one amendment and one amendment only which I wish to suggest to my friend from Iowa, that I think would remove a trouble in the minds of some Senators who have spoken. It was said that if we pass the joint resolution as the Senate committee have reported it the Secretary of the Treasury would hold that the contingency provided for here had already arrived and was upon him, and that as an emergency existed he would not obey the law. I take it that a Secretary of the Treasury who disregards the provision of this law would find himself in a very dangerous position. I do not believe he would put that construction upon it. I give Mr. Jordan and Mr. Fairchild credit for supposing that if the law is passed just as we have it they would do just what the law requires in case it became the law; but I would put in after the words "and in the case of any extraordinary emergency" the words "not now foreseen," so as to make an emergency to happen in the future independent of existing fact.

Mr. JONES, of Nevada. I should like to ask the Senator if half a

dozen of these same people in New York can not get up an emergency

to order whenever they want, as they did last summer?

Mr. SHERMAN. Is our credit so poor that half a dozen millionaires can get up a scare and break the Government? I do not fear them at all.

Mr. JONES, of Nevada. Did they not do it last summer?
Mr. SHERMAN. No, sir; they frightened somebody, but why was it?
Mr. JONES, of Nevada. They frightened the Secretary of the Treas-

ury.

Mr. SHERMAN. That may be, but they did not disturb, nor can they disturb, the security of our currency. Nothing will disturb this, unless it should be the settled conviction of the people that Congress is determined to change the standard of all value in this country and make it rest entirely upon 412½ grains of silver instead of 25.8 grains of gold. If Congress is determined to bring us to a single silver standard they can do so, but it will be by Congress not by the bankers. The bankers will take advantage of their opportunities and will protect themselves, and the burden of that loss will be made to fall upon the people, whose daily labor will be measured by a depreciated dollar with less purchasing power than the gold dollar. This is the uniform result of

financial fallacies and depreciated currency.

Mr. President, this is all I desire to say about this matter. I shall vote for the amendment as it stands and against the resolution if not amended.

The tables referred to are as follows:

Subjoined is our usual table, affording a comparative view of the bank returns, the bank rate of discount, the price of consols, the price of wheat, and the leading exchanges during a period of four years corresponding with the present date, as well as ten years back, namely.:

At corresponding dates with the present week.	July 12, 1876.	July 18, 1883.	July 16, 1884.	July 15, 1885.	July 14, 1886.

Mr. TELLER. I do not intend to detain the Senate with any lengthy discussion of this question. I am not intending to vote for the amendment proposed by the Committee on Finance.

The question seems to me to be entirely devoid of politics, as has been suggested, and to be one simply of business. I think every body admits that if this money can be properly paid without disturb-ing the credit of the Government it ought to be paid. So it comes down to the simple question whether we have the means to meet the demands made by this resolution as it came from the House.

As it is amended by the Committee on Finance, it is practically setting apart \$120,000,000, never to be used at all unless some man holding a greenback should go to the Treasury Department to have it re-deemed in gold. The excess over \$100,000,000, which is not to be used at all, will be an absolute dedication forever, until at least the law is repealed or a new administration with different ideas shall come into power, forever to be kept in the Treasury for the purpose of strengthening, it is said, the national credit.

The principal objection I have to this resolution is that it recognizes the necessity of maintaining and keeping at all times in the Treasury of the United States \$100,000,000 in com for the purpose of meeting an imaginary demand, a demand that seven years' experience has taught us is not likely to be made. But I believe it may be necessary and proper for those who believe the public debt should be paid to vote for this resolution in order that the excess over and above the \$100,000,000 may be paid out upon the public debt and the burden of the people so far at least reduced.

I stated that in my judgment this is a practical dedication of \$20,-000,000 in addition to what is already locked up in the Treasury for specific purposes. If there is any merit in that resevation it is that it may meet a possible demand. That twenty millions will not meet any possible demand at all. The Department will regard it as its duty to keep the \$20,000,000 before a call is made, and the call must be made thirty days in advance.

Mr. EDMUNDS. Not by law.

Mr. TELLER. Yes, by law. The call must be made thirty days in advance, and during that time the money will come in.

Mr. COCKRELL. When was that law changed? It used to be ninety

Mr. TELLER. It is thirty days now. I do not remember when it was changed. The Senator from Ohio [Mr. Sherman] I think gave the date, but I did not notice it. I know that is the law now.

During that time the revenues are coming in at the rate of a million dollars a day, and the expenditures are going on fortunately at considerably less than that sum. Everything to-day in the financial world indicates that there will be more money taken by the Government for the fiscal year in which we are now than there was for the last. The imports are increasing, and the revenues from that source and other sources are increasing.

to pay. For the preceding four years before this administration came into power, with no greater revenues, with greater prospects now for revenue than then, the Government of the United States reduced its debt at the rate of something over \$10,000,000 a month.

In 1885 there was a change in the administration and a change in the methods of keeping the books. Every item that could be passed to the liability account was there passed. Interest was accounted day by day and put in the list of liabilities, although it might not be due for months. The hundred millions that had stood as a reserve by order of the Secretary of the Treasury and not by law-by order, I repeat, of the Secretary of the Treasury, and that only, and not by law—was put on the 1st of April, or soon after, in the liability account of the Government; and then when the balance was struck on the 4th day of March, 1885, there was less than \$9,000,000 standing to the credit of the Government of the United States in the Treasury, according to the statement of the Secretary of the Treasury that came to us last November.

Mr. EDMUNDS. Have you the statement? Mr. TELLER. The Senator from Vermont asks me if I have the statement

Mr. EDMUNDS. I do not doubt it at all, but I should like to have it appear in the RECORD.

Mr. TELLER. On page 13 of the Secretary's report it will be found. This is dealing with the time the administration changed, the 4th of March, 1885:

Net balance in the Treasury, \$8,764,590.11.

I read from the report of the Secretary of the Treasury for 1885, signed by Daniel Manning, made up to November last. On page 14 I find this statement:

Net balance in Treasury, \$66,818,292.38. The balance in the Treasury has therefore been increased within the above period by the sum of \$58,053,702.27.

On the 4th of March, 1885, there was in the Treasury of the United States \$379,166,353.40. On June 30 there was in the Treasury, as shown by the financial statement of the Government, \$509,894,109.67. On November 1, 1885, the balance, as I have said, was \$66,818,292,38. On the 30th of June, 1886, the balance was \$104,473,605.61. I am speaking of the net balance now. In other words, there had been \$95,000,000 accumulated in the Treasury from March 4, 1885, to June 30, 1886, and during that time the Secretary of the Treasury had paid of the public debt about \$50,000,000. By my statement it is \$50,135,-000, and according to the statement made by the Senator from Iowa [Mr. ALLISON] it was \$54,000,000.

There, then, are the two sums, \$95,000,000 in the course of a year, the net balance, and \$50,000,000 to add, making \$145,000,000 of net accretion, or what is equivalent to that, in the United States Treasury, or a sum in excess of the ordinary expenditures of the Government of \$145,000,000.

I said a moment ago that it is a simple business proposition. Are we able to pay \$10,000,000 a month on the public indebtedness? I do not think it is a matter of discussion that if we are able we ought so \$72,000,000. Sixty-one million dollars of that amount was by the

cancellation of silver certificates and gold certificates as they came in, and gold was paid out or silver was paid out for them. The balance, nearly \$12,000,000, was for certificates that came in in the ordinary way in the payment of the revenues of the Government, that were canceled and destroyed by the Department. So that, too, must be added to the sums I have mentioned.

It is apparent that during a very long period of years last past there has been an income to the Government of the United States over and above its current expenses, or a surplus, of not less than \$10,000,000 a month, and since this administration has been in power, counting all the sums as charged to liabilities that ought not to be so charged, but allowing them to go there, upon their own book-keeping there has been \$9,812,000 of surplus every month of this administration; and yet we are told that starting with \$101,000,000 of balance they can not

honestly pay \$10,000,000 a month.

Why, Mr. President, if the surplus continues as it has they need to touch the balance in the vaults for only \$200,000 a month. Two hundred thousand dollars a month added to the surplus, if the surplus continues for the next fourteen months as it has continued for the last sixteen, will pay, without any further diminution of the \$104,000,000 standing to the credit of the Government unused, independent of the question of \$100,000,000 for the reserve.

The honorable Senator from Iowa [Mr. ALLISON] and the honorable Senator from Ohio [Mr. Sherman] talk about the danger of putting the Government to paying out this surplus without a working balance when there is a working balance now to begin with of \$104,000,000 practically that can be expended under any view of the case, and \$75,000,000 that may be used, \$75,000,000 if you discard the minor coin, \$75,000,000 with a surplus coming in almost equivalent to the payment that is to be made, with every prospect that the surplus will be increased much in the coming months over what it was in the past, and yet we are told that you must set apart a sum of \$20,000,000, lock it up where it never will draw interest, and keep it out of the circle of business and trade for the purpose of strengthening the public credit. Mr. President will be strengthening the public credit. ident, the public credit will be strengthened by the payment of our honest debts. When the people shall be convinced that the Treasury Department does not intend to create an increased value for money by locking up the funds of the people in the Treasury the credit of the Government will be promoted.

Mr. President, a Senator asks me in an undertone what is the present rate of interest, and I suppose that is for the purpose of intimating to

me that money is already too cheap.

Mr. EDMUNDS. No, I did not mean any such thing.

Mr. TELLER. What does the Senator mean?

Mr. EDMUNDS. I merely mean to get information.
Mr. TELLER. I will admit that every moneyed center is full of money; I will admit that there never has been a time in the history of this country when the coffers of bankers and millionaires were so overflowing as to-day; and it is not only so in this country, but it is so all over the world. It is as much so to-day in England, in France, and in Germany as it is in the United States, and it is owing to the legislation of the various governments of the world carried on in the interest, not of the men who do business, but in the interest of the men who own the money. It is a conspiracy against labor, against production, against industry, in the interest of the men who have grasped the wealth of the world; but it is not a conspiracy that started in this country; it had its origin abroad and we have fallen into it, and the Government of the United States for ten years has been its willing and its active agent. I say that of my own political party, which has been guilty in many instances, and it has been the active, efficient agent of the conspiracy for the purpose of increasing the value of the dollar and decreasing the value of the productions of men everywhere in the world.

Mr. EDMUNDS. What is the present rate of interest? That is my

question

Mr. TELLER. Mr. President, I will say again the interest is not high. The men who hold the money are looking to legislation and are trusting that there shall be an appreciation of their dollars by law as

has been done for ten years.

Mr. EDMUNDS. Why, Mr. President, if the Senator will pardon me, because I am merely a neophyte in this business struggling for information, I want to ask him whether he does or does not know that in Colorado and New York and Vermont and Mississippi and everywhere people can borrow money on a reasonable and fair security at a less rate than they could at any time in the history of this Government for the last one hundred years, and that takes in the whole Government?

Mr. TELLER. That is true the world over.

Mr. EDMUNDS. Yes; but is it not true here?
Mr. TELLER. If a man owns a Government bond he can borrow money upon it, if that is what it means, cheaper than he could at any other time in the history of the world; but if he owns a manufactory that makes cloth, a mill that makes iron, a farm that produces wheat, he can not borrow the money for the same rate that he could fifteen That is what the trouble is. The men who hold money will lend it upon money; they will not lend it upon anything else, and they have wisely held it, and the men, who five years ago put their

money in their coffers and sat down and waited have got more money than they would if they had put it in any enterprise, although it never has moved a wheel or turned a furrow in all that time. The accretion, the increase has been to them more than to have put it in any productive pursuit in the world.

Gentlemen talk to-day about the 74-cent dollar. Why, Mr. President, it will buy more to-day of everything that a man eats and drinks and wears than it would twenty years ago, and I am prepared at any time to show, from the official publications of prices, that this is no mere statement, but a fact. It will buy more to-day than it would in 1876, ten years ago. Why? Because there has been an appreciation of money and a depreciation of everything else in the world in the last decade.

So the Senator asks, "What is the rate of interest." Why is it that men are prepared to loan upon bonds at 2 per cent. who will not loan upon a mill at 5 per cent? They fear that they may be compelled to take the mill in payment of the debt. Men will loan money at 2 per cent. upon bonds who will not put their money in a farm or in a man-Why? They fear ufactory or in a railroad or in any public enterprise. they will get the property and not the money.

With five hundred millions of money locked up in the national Treas ury, with millions locked up by every bank which can lock it up, with all business in the country standing still, with no new enterprises being started, we are told that we must keep locking up the money, that we must keep a great sum of money in the Treasury to preserve our credit! must keep a great sum of money in the Treasury to preserve our credit! A hundred million was locked up in 1879 for the purpose of making the greenback as good as gold. Nobody doubted the propriety of the Treasury strengthening itself at that time, nobody doubted that it was wise and prudent, for nobody could quite foretell what would be the demand made upon the Treasury by the holders of national notes. In the first year \$11,000,000 of greenbacks were exchanged for gold, in the next six years \$4,000,000, or thereabouts, were exchanged for gold. You would have supposed, with a debt that was payable and bearing interest, that the Government might have put forth an effort to take interest, that the Government might have put forth an effort to take in the bonded debt and reduce the interest on the money that experience had demonstrated was not needed and was not wanted for the purpose of maintaining the public credit, so far as the greenback was

But no, it is a part and parcel of the idea that money is not to be used in the ordinary and legitimate channels of trade, but it is to be held for its appreciative power. It is to be held that it may grow, not by performing the functions and duties of money, but lying idle in the coffers—it may grow in potency by the depreciation and by the degradation of everything that goes to make life comfortable and valuable in this country in its material interests.

Mr. GEORGE. Will the Senator from Colorado allow me to ask him

question? Mr. TELLER.

Certainly.

Mr. GEORGE. I am very much impressed by the remarks the Senator has made in reference to the amount of money held in the vaults of the banks and their failure to use it. What I desire to ask the Senator is this: Does he know of any feasible plan by which he can compel the men who have money to put it out in circulation?

Mr. TELLER. I do not.
Mr. JONES, of Nevada. I should like to answer that question.
Mr. GEORGE. I should like to have the answer.
Mr. TELLER. I will yield with pleasure to the Senator from Ne-

Mr. JONES, of Nevada, addressed the Senate. [See Appendix.] Mr. HALE. I move that the Senate proceed to the consideration of executive business

The PRESIDENT pro tempore. The Senator from Colorado [Mr. Teller] is entitled to the floor.

Mr. TELLER. I will yield for a motion to adjourn or to proceed to the consideration of executive business.

Mr. HALE. I move that the Senate proceed to the consideration of executive business

The PRESIDENT pro tempore. The Chair will present certain bills for reference.

HOUSE BILLS REFERRED.

The bill (H. R. 1741) for the relief of William E. Bond was read twice by its title, and referred to the Committee on Finance.

The following bill and joint resolution were severally read twice by their titles, and referred to the Committee on Public Buildings and

A bill (H. R. 9644) for the erection of a public building at Jefferson,

Joint resolution (H. Res. 295) permitting the public building authorized by act of Congress approved June 30, 1886, at Savannah, Ga., to be located not less than 40 feet from any other building instead of 50 feet, as provided in said act.

NORTHERN PACIFIC RAILROAD LANDS.

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 2172) restoring to the United States certain of the lands granted to the Northern Pacific Railroad Company to aid in the construction of a railroad from Lake Superior to Puget Sound and to restore the same to settlement, and for other

Mr. DOLPH. The amendment of the House is to strike out all of the bill except the enacting clause and insert what is known as the House bill forfeiting all the grant west of the Missouri River. I move that the Senate disagree to the amendment and agree to the conference asked for by the House. The House has asked for a conference on the

disagreeing votes.

The motion was agreed to; and by unanimous consent the President votempore was authorized to appoint the conferees on the part of the

EXECUTIVE SESSION.

Mr. HALE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the considcration of executive business. After eleven minutes spent in executive session the doors were reopened, and (at 6 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Friday, July 30, 1886, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate this 29th day of July, 1886. SECOND ASSISTANT SECRETARY OF STATE.

Alvey A. Adee, of the District of Columbia, now Third Assistant Secretary of State, to be Second Assistant Secretary of State, vice William Hunter, deceased.

THIRD ASSISTANT SECRETARY OF STATE.

John B. Moore, of Delaware, to be Third Assistant Secretary of State, vice Alvey A. Adee, nominated to be Second Assistant Secretary.

MINISTER RESIDENT AND CONSUL-GENERAL.

E. Spencer Pratt, of Mobile, Ala., to be minister resident and consulgeneral of the United States to Persia, vice Frederick H. Winston, resigned.

ASSOCIATE TERRITORIAL JUSTICE.

Thomas C. Beach, of Montana, to be associate justice of the supreme court of the Territory of Montana, office created by an act of Congress approved July 10, 1886.

COLLECTOR OF CUSTOMS.

Thomas J. Arnold, of San Diego, Cal., to be collector of customs for the district of San Diego, Cal., vice George A. Johnson, whose com-mission will expire July 29, 1886.

COLLECTOR OF INTERNAL REVENUE.

John B. Redman, of Maine, to be collector of internal revenue for the district of Maine, vice Franklin J. Rollins, who was suspended; the nomination of Charles H. Chase, who was designated and afterward nominated to the Senate, having been rejected.

INDIAN AGENTS.

Melmoth C. Williams, of Statesville, N. C., to be agent for the Indians of the Pueblo agency in New Mexico, vice Pedro Sanchez, resigned. The nomination of Delores Romero for said office, delivered to the Senate December 15, 1885, is this day withdrawn.

Elmer A. Howard, of Fairfield, Iowa, to be agent for the Indians of the Pima agency in Arizona, vice Roswell G. Wheeler, resigned.

FOR PROMOTION IN THE ARMY.

Medical Department.

Lieut. Col. David L. Magruder, surgeon, to be surgeon, with the rank of colonel, July 26, 1886, vice Brown, retired from active service.

Maj. Charles T. Alexander, surgeon, to be surgeon, with the rank of lieutenant-colonel, July 26, 1886, vice Magruder, promoted.

Capt. Henry M. Cronkhite, assistant surgeon, to be surgeon, with the rank of major, July 26, 1886, vice Alexander, promoted.

Twentieth Regiment of Infantry.

Second Lieut. Henry A. Greene, to be first lieutenant, July 24, 1886, vice Low, deceased.

Second Regiment of Cavalry.

Second Lieut. Thomas J. Lewis, to be first lieutenant, July 26, 1886, vice Dinwiddie, retired from active service.

FOR APPOINTMENT IN THE ARMY.

Medical Department.

Freeman V. Walker, of Georgia, to be assistant surgeon, with the rank of first lieutenant, July 27, 1886, vice Cronkhite, promoted.

PROMOTION IN THE NAVY.

Assistant Paymaster Eustace B. Rogers, of California, to be a passed assistant paymaster from the 2d of November, 1884, vice Rand, promoted, and Allen, resigned.

SOLICITOR-GENERAL.

George A. Jenks, of Pennsylvania, to be Solicitor-General, vice Samuel F. Phillips, resigned.

RECEIVERS OF PUBLIC MONEYS.

Thomas B. Davis, of Lincoln, Nebr., to be receiver of public moneys at Lincoln, Nebr., vice Henry D. Root, term expired.

Bradley M. Thompson, of East Saginaw, Mich., to be receiver of public moneys at East Saginaw, Mich., vice George B. Brooks, term ex-

POSTMASTERS.

George E. Lorenz, to be postmaster at Toledo, Lucas County, Ohio, vice Patrick H. Dowling, whose commission expired April 26, 1886.

James L. Mathews, to be postmaster at Ellicott City, Howard County, Maryland, vice James G. Kirkwood, term expires August 4,

WITHDRAWAL.

Henry Stowell, nominated to be postmaster at Seneca Falls, N. Y.

CONFIRMATION.

Executive nomination confirmed by the Senate July 27, 1886. TERRITORIAL JUDGE.

James H. McLeary, of Texas, to be associate justice of the supreme court of the Territory of Montana.

HOUSE OF REPRESENTATIVES.

THURSDAY, July 29, 1886.

The House met at 11 o'clock a. m. Prayer by Rev. Dr. Bullock, of Washington, D. C.

The Journal of the proceedings of yesterday was read and approved. CORRECTION.

Mr. COBB. I desire to make a correction. The RECORD makes me say that 90 per cent. of the people of the Northwest are dishonest men. I did not mean to say that. I meant to say that 90 per cent. of the entries of which I was speaking were fraudulent.

PERSONAL EXPLANATION.

Mr. KELLEY. Mr. Speaker, I desire to say that on the question of concurring in the Senate amendment providing for the pay of clerks to Senators I voted "no" yesterday under a misapprehension, in contradiction of every vote that I have heretofore cast upon that subject. If I had voted otherwise it would not have changed the result, but I feel it due to myself to make this explanation of what must seem an eccentric vote.

LEAVE OF ABSENCE.

By unanimous consent leave of absence was granted as follows: To Mr. SADLER, for the remainder of the session, on account of im-

portant business.

To Mr. Grosvenor, for the remainder of the session, to enable him to attend the Grand Army of the Republic reunion at San Francisco. To Mr. Henley, indefinitely, on account of illness. To Mr. Stone, of Missouri, indefinitely, on account of important

busines

To Mr. Long, on and after July 31.

To Mr. Storm, for the remainder of the session, on account of illness in his family.

WILLIAM E. BOND.

Mr. SKINNER. Mr. Speaker, I ask unanimous consent that the Committee of the Whole be discharged from the further consideration of the bill (H. R. 1741) for the relief of William E. Bond, and that the same be put upon its passage.

The SPEAKER. The bill will be read, after which the Chair will

ask for objections.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Treasury be, and is hereby, directed to pay to William E. Bond, late internal-revenue collector for the first district of North Carolina, the sum of \$398.50, out of any moneys in the Treasury not otherwise appropriated, being the sum paid into the Treasury by the said William E. Bond, while collector of internal revenue, in excess of the taxes actually collected by him.

The SPEAKER. Is there objection to the present consideration of

There was no objection.

The bill was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. SKINNER moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

BARRACKS IN WYOMING AND NEBRASKA.

Mr. DORSEY. Mr. Speaker, I ask unanimous consent that the Committee of the Whole be discharged from the further consideration of Senate bill No. 1935, authorizing and directing the Secretary of War to enlarge, repair, and complete certain military quarters and barracks in Wyoming Territory and in the State of Nebraska.

The SPEAKER. The bill will be read, after which the Chair will ask for objections.

The Clerk proceeded to read the bill.

Mr. RANDALL. There is an appropriation of \$200,000 in the sundry civil appropriation bill to be expended in connection with the military posts.

Mr. DORSEY. But there is an amendment which cuts it down to

\$150,000.

Mr. RANDALL. There is already an appropriation for such purposes, and I object to the consideration of this bill.

PUBLIC BUILDING AT JEFFERSON, TEX.

Mr. CULBERSON. Mr. Speaker, I ask unanimous consent that the Committee of the Whole House be discharged from the further consideration of the bill (H. R. 9644) for the erection of a public building at

Jefferson, Tex., and that the bill be put upon its passage.

The SPEAKER. The bill will be read, after which the Chair will

ask for objections.

The bill was read, as follows:

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Treasury be, and he is hereby, authorized and directed to purchase or otherwise provide a site and cause to be erected thereon a substantial and commodious building, with fire-proof vaults, for the use and accommodation of the United States district and circuit courts, and for accommodation of the post-office, revenue, and other Government offices, and for other Government uses, at Jefferson, in the State of Texas. The site, and building thereon, when completed upon plans and specifications to be previously made and approved by the Secretary of the Treasury, shall not exceed in cost the sum of \$50,000; nor shall any site be purchased until estimates for the crection of a building which will furnish sufficient accommodations for the transaction of the public business, and which shall not exceed in cost the balance of the sum herein limited after the site shall have been purchased and paid for, shall have been approved by the Secretary of the Treasury; and no purchase of site, nor plan for said building, shall be approved by the Secretary of the Treasury involving an expenditure exceeding the said sum of \$50,000 for site and building; and the site purchased shall leave the building unexposed to danger from fire by an open space of a least 40 feet, including streets and alleys: Provided, That no part of said sum shall be expended until a valid title to the said site shall be vested in the United States, nor until the State of Texas shall cede to the United States exclusive jurisdiction over the same, during the time the United States shall be or remain the owner thereof, for all purposes except the administration of the criminal laws of said State and the service of civil process therein.

The SPEAKER. Is there objection to the present consideration of this bill?

There was no objection.

The bill was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

Mr. CULBERSON moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the table.

ORDER OF BUSINESS.

Mr. HAYDEN. Mr. Speaker, I ask by unanimous consent the Committee of the Whole be discharged from the further consideration of the bill (H. R. 1143) authorizing the Secretary of War to deliver four condemned gun-carriages to the Grand Army of the Republic of

Somerville, Mass., to be used for monumental purposes.

Mr. BYNUM. I call for the regular order.

Mr. BURNES. Mr. Speaker, I move to dispense with the morning hour.

The motion was agreed to.

SALLY ANN BRADLEY.

Mr. GROSVENOR. Mr. Speaker, I rise to a privileged motion. I move that the consideration of the bill (H. R. 5394) granting a pension to Sally Ann Bradley, with the veto message of the President, be postponed until the second Tuesday of the next session of Congress.

Mr. HENDERSON, of Iowa. Mr. Speaker, I rise to a parliament-

ary inquiry.

The SPEAKER. In relation to this bill?

Mr. HENDERSON, of Iowa. I desire to know whether the vetoed bills going over to next session will lose their present status.

The SPEAKER. They will not.

The motion of Mr. GROSVENOR was agreed to.

ORDER OF BUSINESS.

Mr. LAIRD. Mr. Speaker, I desire to present a resolution, and ask unanimous consent for its immediate consideration.

The SPEAKER. The regular order is insisted upon.

Mr. LAIRD. I understand that the demand for the regular order has been withdrawn.

The SPEAKER. If it is withdrawn, then the gentleman from Mas-

sachusetts [Mr. HAYDEN] has been recognized.

Mr. RANDALL. I insist upon the demand for the regular order.

Mr. LAIRD. This is a matter which involves the expenditure of \$160,000 appropriated by the Forty-eighth Congress to purchase the Fort Brown reservation in Texas, for which money it is now alleged there is no adequate consideration.

The SPEAKER. The Chair would recognize the gentleman, but the regular order is insisted upon by gentlemen on both sides of the House.

DEFICIENCY APPROPRIATION BILL.

Mr. BURNES. I ask by unanimous consent the House proceed to

the consideration of the Senate amendments to the general deficiency bill as in Committee of the Whole.

Mr. HEPBURN. I object.
Mr. BURNES. Then I move that the House resolve itself into Committee of the Whole on the state of the Union for the purpose of considering the Senate amendments to the general deficiency bill.

The motion was agreed to.

The motion was agreed to.

The House accordingly resolved itself into Committee of the Whole on the state of the Union, Mr. HATCH in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the purpose of considering the amendments of the Senate to the bill (H. R. 9726) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1886, and for prior years, and for other purposes.

Mr. BURNES. These amendments are one hundred and twenty-

Mr. BURNES. These amendments are one hundred and twenty-two in number. They aggregate the sum of \$1,892,195.77. The amount of the increase by the Senate committee on the bill as it passed the House is \$650,850.94. The additional items placed upon the bill by the Senate amount to \$1,241,344.83. As members are aware, the Committee on Appropriations recommend concurrence in a large number of these amendments and non-concurrence in the remainder. the purpose of expediting business, and trusting that with the thermometer showing largely up in the nineties we may be able to pass upon these amendments within an hour, I ask that we proceed to the reading of the first amendment.

Mr. HOLMAN. In order to facilitate the disposition of so large a number of amendments I ask unanimous consent (without, however, having consulted the gentleman from Missouri) that as these various amendments are read by the Clerk and the gentleman in charge of the bill announces concurrence or non-concurrence, the recommendation of the Committee on Appropriations shall be considered agreed to nem. con. unless a vote is called for. This will save the time which would be required for submitting each proposition to a separate vote.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana [Mr. HOLMAN]?

The CHAIRMAN. Is there objection to the request of the german from Indiana [Mr. Holman]?

Mr. HISCOCK. I ask the chairman to state the proposition.

could not hear the statement of the gentleman from Indiana.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent that as each amendment is read, and as the gentleman in charge of the bill indicates the recommendation of the Committee on Appropriations for concurrence or non-concurrence, the action indicated be considered as taken by the Committee of the Whole unless some gentleman objects and asks for a vote.

Mr. BRECKINKIDGE, of Arkansas. Would that ear of esplaintion of any amendment?

The CHAIRMAN. It would not.
Mr. HISCOCK. Well, I object.
Amendments numbered 1 and 2 were read and concurred in.
Amendments numbered 3, 4, and 5 were read and non-concurred in.
Amendment numbered 6 was read and concurred in.
Amendment numbered 7 was read, as follows:

Insert the following:
"To pay Fulton Paul, late consul-general at Bucharest, for protest fees and expenses incurred by him on his draft for contingent expenses for second quarter of 1884, while consul at Odessa, Russia, returned to him on account of the exhaustion of the appropriation for contingent expenses United States consulates for the fiscal year ending June 30, 1884, \$22.50."

Mr. BURNES. The Committee on Appropriations recommend non-

concurrence in this amendment.

Mr. BUCHANAN. Will the gentleman please state some reason for non-concurrence? This money was undoubtedly expended by this officer, and necessarily expended. I trust the gentleman will give us some information in support of the motion to non-concur.

Mr. BURNES. I will answer the inquiry of the gentleman from

New Jersey by saying that the committee was desirous of having the views of the Senate conferees with regard to the twenty-odd dollars charged for protesting a single draft. It is a small matter and will probably be concurred in finally; but in view of the fact that the Committee of the Whole House had a vote on this proposition when the bill was first considered, we desire to learn from the Senate conferees their views with regard to the seeming extravagance of this charge.

Mr. BUCHANAN. Then the motion to non-concur will have no special significance?

special significance?

Mr. BURNES. Not at all. It simply carries the item into confer-

The amendment was non-concurred in.

Amendments numbered 8 and 9 were read and concurred in.

Amendments numbered 10, 11, 12, 13, 14, 15, 16, 17, and 18 were read and non-concurred in.

Amendment numbered 19 was read and concurred in.

Amendments numbered 20, 21, and 22 were read and non-concurred

Amendment numbered 23 was read, as follows:

Insert the following:

"In case where vouchers and accounts based upon expenditures under appropriations heretofore made have been suspended or disallowed since January 1, 1885, the Secretary of the Treasury is hereby authorized and directed to cause to be revised by the accounting officers of the Treasury such disallowed or sus-

pended accounts and vouchers; and upon such revision such accounts and vouchers, and payments covered by the same, shall be allowed by such accounting officers where it appears that the United States received and used or retained the consideration and value stipulated for by the appropriate executive officer of the Government who authorized and directed the payments in such cases to be made, or who authorized or directed the services rendered or the supplies or materials so furnished: Provided, That no fraud appears or is shown in such transaction."

Mr. BURNES. The committee recommend non-concurrence.

Mr. REED, of Maine. Will the gentleman from Missouri explain this paragraph?

Mr. BÜRNES. This may be regarded as a general relief act in regard to all these claims heretofore rejected by the accounting officers. Mr. BURNES.

Mr. REED, of Maine. Rejected since January 1, 1885.
Mr. BURNES. It has occurred to me, and I think it did to the committee, that this would be almost equivalent to the establishment of a new tribunal for the purpose of reviewing the action of the former accounting officers of the Treasury.

Mr. REED, of Maine. Not former accounting officers; the present

accounting officers. Is not that so?

Mr. BURNES. I think it will be found that this proposition is in conflict with all the existing laws with regard to these matters. But I will say to my friend from Maine that we have not given this subject as thorough examination as we desire; we wish to learn from the conferees on the part of the Senate their reasons and views in reference to it, so that ultimately, if necessary, we may report to the House all the facts and law bearing upon the subject.

Mr. REED, of Maine. I suppose this provision results from what is considered on the part of the Senate unreasonable decisions of the Comp-

trollers of the Treasury.

ollers of the freesury.

Mr. BURNES. It may be so.

Mr. REED. of Maine. There have been public rumors of very queer

The amendment was non-concurred in.

Amendments numbered 24, 25, 26, 27, and 28 were read and nonconcurred in.

Amendment numbered 29 was read and concurred in.

Amendments numbered 30, 31, 32, 33, 34, 35, and 36 were read and non-concurred in.

Amendments numbered 37, 38, 39, 40, 41, and 42 were read and concurred in.

Amendments numbered 43 and 44 were non-concurred in.

Amendment numbered 45 was concurred in.

Amendment numbered 46 was non-concurred in.

Amendments numbered 47 and 48 were concurred in.

Amendments numbered 49 to 61, inclusive, were non-concurred in. Amendment numbered 62 was read, as follows:

To enable the Secretary of the Treasury to pay the United States and Brazil Mail Steamship Company for carrying the United States mails during the fiscal year ending June 30, 1886, \$36,000.

Mr. BURNES. The committee recommend non-concurrence.

Mr. DINGLEY. Before the order to non-concur is made on this amendment I will ask if it is a mere formal non-concurrence; for it seems to me it is a claim that should be paid. The Postmaster-General entered into an arrangement with this steamship company to carry the Brazilian mails for \$30,000, or agreed to recommend to Congress the payment of that sum.

Mr. BURNES. At present, so far as the committee has information, it is probably a mere formal non-concurrence for want of sufficient data on which to base action. At the same time I will say we intend in conference to give it a thorough investigation, and if occasion arise will report it back to the House for instruction.

The motion to non-concur was agreed to.

Amendment numbered 68 was concurred in.

Amendment numbered 69 was read, as follows:

Strike out of the original bill, beginning with line 1460, the words: "And hereafter the whole of the compensation and fees paid a commissioner, and to which he may be entitled, for services in the examination of criminal charges, shall not exceed \$800 per annum, or exceed that rate for any time less than a

The committee recommend non-concurrence.

Mr. HENDERSON, of Iowa. I think that is a matter which should be reported back to the House before the conferees finally settle upon it. I would be glad to have my colleague on the committee give his attention to this matter.

Mr. BURNES. I will say to my friend from Iowa that he knows it will be a great pleasure to me to report back any item which any gentleman desires to have further considered by the House. But he will remember that this matter has been heretofore fully considered in the Committee of the Whole; and if I shall be named as one of the conferees, and can get the Senate conferees to recede from their position I

shall be inclined to accept their surrender.

Mr. HENDERSON, of Iowa. That was a matter put through the House hastily, I think, and without much understanding of its provisions. It was subject to a point of order in the House, though none was There is a strong feeling growing in the House that injustice

has been done by this action. For my own part, I think a different result might be had in the House now if it was fully considered.

Mr. BURNES. It will have full consideration; the gentleman can trust the conference, I am sure.

The motion to non-concur was agreed to.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. Lore having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. SYMPSON, one of its clerks, announced that the Senate had passed with amendments the bill (H. R. 9798) making appropriations for fortifications and other works of defense and for the armament thereof for the fiscal year ending June 30, 1887, and for other purposes; in which concurrence was requested.

DEFICIENCY APPROPRIATION BILL.

The Committee of the Whole resumed its session.

Amendments numbered 70 and 71 were non-concurred in.

Amendment numbered 72 was concurred in.

Mr. BURNES. Mr. Chairman, all of the amendments from No. 73 to and including 82, are merely corrections in the spelling of proper names of those parties who are judgment creditors of the United States by the decisions of the Court of Claims. If this statement is satisfactory to the House, I shall ask unanimous consent to concur in all of the amendments I have named.

Mr. CANNON. That is right.

There being no objection, the amendments from No. 73 to 82, inclu-

sive, were concurred in.

Amendments numbered 83 and 84 were concurred in.

Amendment numbered 85 was non-concurred in.

Amendment numbered 86 was read, as follows:

To enable the Secretary of the Senate to pay to Mary C. Miller, widow of Hon. John F. Miller, late a Senator from the State of California, deceased, the amount of compensation as a Senator from March 9, 1886, to March 3, 1887, inclusive, \$4,931.50.

Mr BURNES Mr. BURNES. The committee recommend concurrence. The CHAIRMAN. Without objection—

Mr. PRICE. I object.

The question was taken; and the motion of Mr. BURNES was agreed to.

Amendments numbered 87, 88, 89, 90, and 91 were concurred in. Amendments numbered 92 and 93 were non-concurred in. Amendments numbered 94 to 97, inclusive, were concurred in.

Amendments numbered 98, 99, and 100 were non-concurred in. Amendment numbered 101 was read, as follows:

To pay to the widow of the late Hon. WILLIAM H. Cole the amount of salary and allowance for stationery for the unexpired term of his service as a member of the Forty-ninth Congress, \$3,458.

Mr. BURNES. The committee recommend concurrence.

Mr. PRICE. I demand a vote on that.

The motion to concur was agreed to.

Amendments numbered 102 to 107, inclusive, were concurred in. Amendment numbered 108 was read, as follows:

To enable the Clerk of the House of Representatives to pay A. Vangeuder \$300 for extra compensation as assistant clerk to the Committee on Invalid Pensions during the present session of Congress.

Mr. REED, of Maine. I believe the committee recommended concurrence in that amendment?

Mr. BURNES. Yes, sir.
Mr. REED, of Maine. I offer the amendment I zend to the desk. The Clerk read as follows:

That the House concur in the amendment of the Senate numbered 103 with an amendment as follows: After said amendment insert as a separate paragraph the following:
"To enable the Clerk of the House to pay to the legal representatives of William Blair Lord, late one of the Official Reporters of the House, a sum equal to six months' salary and not exceeding \$500 for funeral expenses; in all, \$3,000."

Mr. REED, of Maine. I understand there will be no objection to

Mr. PRICE.

Mr. PRICE. I object.
Mr. CANNON. Mr. Chairman I would be glad to know what the circumstances of this case are, whether this man left any children or widow?

Mr. REED, of Maine. He did not.

Mr. CANNON. No dependent relatives?
Mr. REED, of Maine. He left a brother, and the son of his wife, to whom he was very much attached, and whom he made a member of his family in every way.

Mr. CANNON. An adult or minor?

Mr. REED, of Maine. An adult.

Mr. CANNON. What amount of property did he leave?

Mr. REED, of Maine. I do not know.

Mr. CANNON. 'I have an impression that he left a very considerable estate

Mr. REED, of Maine. That is a mistake. I do not know the amount, but I have understood that it was not a large amount.

Mr. CANNON. Well, now, I knew Mr. William Blair Lord very

well, and esteemed him very greatly. He was for a long time at the reporters' desk—I do not know how long, but some twenty or thirty

Mr. REED, of Maine. Twenty years.

Mr. CANNON. Twenty years. But I very much doubt the pro-Mr. CANNON. Twenty years. But I very much doubt the propriety of following precedents any further in cases of this kind. Already at this session of Congress it is true we have given by a separate bill a year's salary to a deceased Doorkeeper of the House.

Mr. CUTCHEON. Not to the Doorkeeper; to the other fellow. Mr. OWEN. Nor to his wife, nor his children, nor to his dependent

Mr. CANNON. That is true. But I am not here to talk about that.
Mr. CUTCHEON. I believe that was on the motion of the distin-

mr. COTCHEGN. I believe that was on the motion of the distinguished economist from Texas.

Mr. CANNON. I believe it was under the lead of the distinguished gentleman from Texas; and I think many gentlemen of this House have regretted their action in that particular.

But here is a proposition to pay to the legal representatives, not creditors as I understand, because I understand he did not owe anything, but the level corrections of a man having a considerable setate. but to the legal representatives of a man having a considerable estate— a brother advanced in years, not shown to be a dependent, there being no children—here is a proposition to give him a sum equal to six months'

salary.

Now, if this has been usual, I believe the custom would be honored in the breach and not in the observance. Gentlemen must recollect, and I say it not to excite prejudice against this measure, that after all is said and done the money comes from the Treasury, and is raised by taxation which is inexorable, reaching every man, woman, and child taxation which is inexorable, reaching every man, woman, and child that is a consumer of the whole sixty millions of our people; some of them rich, some of them poor. If, I grant you, there were minor children that had not anything to live upon, if there was somebody dependent, I think it would be well to do this; but I doubt the propriety of following this precedent further. And I feel more free to make the objection here, because I will say of this late employé of the House he was a magnificent man in every respect. But I do not think his memory requires this appropriation. ory requires this appropriation.

Mr. HITT. Will the gentlemen permit me a question?

Mr. CANNON. Yes, sir.

Mr. HITT. Did not the House take exactly the action that is here

proposed in the case of Mr. Hincks, the colleague of Mr. Lord, at the

Mr. CANNON. Possibly; I do not recollect.
Mr. REED, of Maine. Not exactly this action, because in that case a full year's salary was given.

Mr. HITT. And he left a sister? Mr. CANNON. But the sister, as I recollect, was dependent, and it was a somewhat distressing case. Nobody is dependent here. a proposition in the name of the memory of a deceased employé of this House to give this sum, without any showing of necessity therefor, from the Treasury of the people to adults who are in no sense dependent; and I do not know whether they are worth more or less; whether they are worth \$100,000 or \$50,000 or half a million dollars, or nothing. There appears to be no information about that.

Mr. REED of Maine I should not be able to record a market.

Mr. REED, of Maine. I should not be able to reconcile myself to the amendment I have proposed upon the grounds upon which the gentleman from Illinois [Mr. CANNON] announces he would be reconciled to it. I am very glad for my part he has brought up the question, because I do not desire that this thing should be done except by the con-

currence of the judgment of this House.

I do not believe that we ought to encourage the growing disposition of giving sums out of the Treasury to the House officials simply because they are House officials. But I do believe that it is fair and just that we should give a reasonable sum as a recognition of faithful services long continued.

Let me give an example. In this very bill there is a proposition which has been passed over without objection to pay the full salary of the late Assistant Secretary of State, Mr. Hunter, in recognition of his

long and useful services to the country.

Mr. CANNON rose.

Mr. CANNON rose.

Mr. REED, of Maine. Allow me to finish this statement. I believe that such an expenditure, instead of being charity, which we have no right to give, is a fair and legitimate expenditure of the public treasure in order to procure faithful service. I believe that such a recognition of long-continued work, of long-continued faithful service, is an incentive to faithful service, and therefore a justifiable expenditure.

Mr. LONG. Is the gentleman aware that the committee refused to

concur in the amendment to which he has just referred?

Mr. REED, of Maine. They will eventually pay it, no doubt, be-

cause these are only formal non-concurrences.

Now, what is the particular case? For twenty consecutive years Mr. Lord was the reporter of this House, without any superior in the corps. Perhaps it would be invidious for me to say more although I may think it.

Mr. PRICE. At what salary?

Mr. REED, of Maine. Five thousand dollars, subject to his expenses

know. I only know that for services such as he rendered much larger sums have been paid and are being paid to-day throughout the United States. Now, I feel that that is a proper expenditure of money. When his colleague died a sum equal to a full year's salary was given.

I propose that we should give six months' salary and the funeral expenses. He was, as I was saying when interrupted, for twenty years one of the best reporters we had in the House, and was for years before that in the employment of the Senate, giving thorough satisfaction at all times. Now, in this general payment of money to the estates of deceased officers an omission looks like a reflection, and I submit that on the grounds which I have stated it is reasonable and just that this sum

the grounds which I have stated it is reasonable and just that this sum should be paid.

Mr. OATES. Mr. Chairman, I most heartily concur in the views expressed by the gentleman from Illinois [Mr. CANNON]. If the Government owes the estate of the deceased anything, I am in favor of paying it; but, as I do not understand that any such claim is set up, I am opposed, notwithstanding the long line of precedents, to voting a gratuity to this man's or to any other man's estate. If the Government of the United States will payits honest debts it will have enough to do without voting charities. We ought to be just before we undertake to be generous, and I think the sooner Congress abandons the practice of voting six months' or twelve months' pay to the estates of deceased eming six months' or twelve months' pay to the estates of deceased employés or of members of this House or the other, the sooner they will evince by their action a just conception of the rights of the people and of their own powers under the Constitution. I trust that the amend-

ment will not be adopted.

Mr. PRICE. Mr. Chairman, I have but a word to say. I always listen with great interest to everything that is said by the gentleman Isten with great interest to everything that is said by the gentleman from the State of Maine [Mr. Reed], but the only arguments I have heard from him in favor of this proposition are two. The first is that he feels like giving this money. It does infinite honor to the gentleman's heart that he feels that way. So do I feel that way, but that is no reason for gratifying our feelings at the expense of the people of the United States. The gentleman's other reason is that this man worked twenty years for the Government and received \$100,000. Now, it may be possible that there are men in the country doing like work and receiving that amount of money, but is it not equally true that men of receiving that amount of money, but is it not equally true that men of greater skill are pursuing lines of business which require them to work much harder for less pay? In other words, is not this above the average of the wage that is received by the workers of the United States?

Mr. REED, of Maine. Has my friend noticed that there are quite a number of propositions to pay the estates of deceased members of Congress the full salaries of the members?

Mr. PRICE. Yes, sir; and I am the only one in the House that is in a position to oppose all such propositions consistently, because whenever I have had an opportunity to raise my voice or to cast my vote in this Congress or in the last Congress against propositions to pay anybody a dollar of anybody else's money of which I am the custodian, unless there has been value received, I have done so. The gentleman from Maine [Mr. REED] unfortunately is not in a position to consistently take that ground.

Mr. REED, of Maine. I think I am.

Mr. PRICE. And when men appeal to me to do a thing that is wrong Mr. PRICE. And when men appeal to me to do a thing that is wrong because similar wrong things have been done in years past, I must decline to do it unless some better reason can be given. It is sufficient for us to know that the bargain with this man for his services was \$5,000 a year, that he performed the service well, and that we paid him for it in full. That ends the matter. We may feel like relieving the necessities of every man, woman, and child in the world that needs relief, but we must get our philanthropy from our own hearts and put it in practice from our own pockets. tice from our own pockets.

Mr. CANNON. Let me say that the case is not at all upon all fours with the case of voting an allowance for the widows and children of deceased members. There the election is for two years, the man has arranged his business with reference to it, and the expenses of the campaign and other expenses incident to the position must be taken into

consideration.

Mr. PRICE. The cases are not exactly analogous, and there are infinitely stronger reasons for the rejection of this proposition than for the rejection of the other, although there is very little excuse for the other

either. [Laughter.]
Mr. BURNES. Mr. Chairman, I feel that I ought to say something Mr. BURNES. Mr. Chairman, I feel that I ought to say something in regard to the amendment proposed by the gentleman from Maine [Mr. REED]. If this were an original proposition I should not hesitate a moment to oppose it; but when I look back over our proceedings at this session of Congress and at preceding sessions I find almost innumerable instances of appropriations of this character. In this very bill we have half a dozen such instances, to each one of which I am unalterably opposed on principle; but when such allowances are made by the House I am unwilling so far as I am concerned, to draw the by the House I am unwilling, so far as I am concerned, to draw the line at the proposition of the gentleman from Maine, and I shall support it.

Mr. OATES. Allow me to ask how many wrongs it takes to make a right?

Mr. REED, of Maine. I call attention to the fact that we have which he had to pay for work done. What the net result was I do not | passed paragraph after paragraph similar in character to this; and it seems to me that objection, if there were ground for objection, ought to have begun earlier

Mr. PRICE. I did begin the objection earlier to exactly similar

propositions.

Mr. REED, of Maine. But the gentleman did not present the same

forcible arguments.

Mr. PRICE. Because I had no desire to occupy the time of the House; and I would not have discussed this amendment except in reply to the gentleman from Maine [Mr. Reed] and the gentleman from Illinois [Mr. CANNON].

Mr. CANNON. I know of no proposition similar to this on this

bill or at this session of Congress, except the passage of an independent measure for the relief of somebody who represented the late Doorkeeper

of the House.

Mr. REED, of Maine. I have submitted this matter to the House;

that is all the concern I have in it.

Mr. SPRINGER. As this gentleman was drawing a salary of \$5,000 a year this proposition to pay to his legal representatives six months' salary and his funeral expenses involves an appropriation of about \$3,000. and his tuneral expenses involves an appropriation of about \$3,000. I am informed by those who know the facts that when Mr. Lord died he left no children and his wife was not living; that his estate was in good condition; that, in fact, he was well off. His estate now goes to his brothers and sisters, or other legal representatives, who are already liberally provided for from means which he was fortunate enough to acquire from other sources than his earnings as a reporter. It is now proposed to give this additional allowance of six months' extra pay for services never rendered. If there were minor children who were in want or a widow who needed this money to console her declining years I would not object; but to vote \$3,000 to brothers and sisters of this deceased official, when they are already receiving a large sum of money from

his estate, is, I think, carrying this matter of charity a little too far.

Mr. REED, of Maine. You did it in the case of a Democratic Door-

Mr. SPRINGER. In that case I hope there were some mitigating circumstances

Mr. REED, of Maine. You ought to know, as you voted for it.
Mr. SPRINGER. If there were not, then I did wrong in supporting it; but I do know that in the case of the Doorkeeper the money went to pay funeral expenses which the relatives were not able to pay.
Mr. OATES. There was an allowance of \$500 for funeral expenses

besides the salary, which was wrong.

Mr. SPRINGER. Did he not leave a widow?

Mr. OATES. No.

A MEMBER. The money went to his father. Mr. DOCKERY. In that case there were absolutely no mitigating circumstances

Mr. SPRINGER. The gentleman from Missouri [Mr. Dockery] says in that case there were no mitigating circumstances. But if we

says in that case there were no intigating circumstances. But if we did wrong in that case, are we to do wrong again?

I do not know whether this gentleman, Mr. Lord, had any politics or not; I do not think he had. He remained here under all administrations. If he ever had any political views during the eight years of his service while I was here I never knew it; and I do not think any gentleman ever did. The question of politics does not cut any figure here, because this gentleman was entirely outside of all political considerations and sympathies and prejudices, so far as I know. But I do know that he has left a large estate to be inherited by his brothers and sisters; and we ought not to pay to them \$3,000 more.

The question being taken on the amendment of Mr. REED, of Maine,

it was rejected; there being—ayes 57, noes 64.

Mr. BURROWS. I offer the amendment which I send to the desk. The Clerk read as follows:

Insert after amendment 108 the following:
"To pay Henry H. Smith for additional services rendered as Journal Clerk under the resolutions of the House of February 23, 1882, and December 12, 1885, and for services rendered as clerk to the Committee on Rules during the present session, \$500."

Mr. BURROWS. Mr. Chairman, it will be remembered—
Mr. BURNES. I reserve a point of order on the amendment.
Mr. BURROWS. It will be remembered that by resolution of the House the Journal Clerk was authorized to make a compilation of the decisions on points of order and the revisions of the rules from the foundation of the Government, a work not only requiring great parliamentary knowledge, but involving very great labor. For this work he has received no compensation. Besides, he acts as clerk of the Committee on Rules. This amendment appropriates \$500 for the whole of Similar allowances were made in the Forty-sixth and Forty-seventh Congresses. I trust that the amendment may be adopted and that the matter may go to the committee of conference, so that they may have jurisdiction of the subject and make such report upon it as they think just and equitable.

Mr. PRICE. Does the gentleman know what the compensation of this officer is?

Mr. BURROWS. I do not know and do not care.
Mr. PRICE. I do care. But I did not ask the gentleman whether he cared; I asked him whether he knew.

Mr. BURROWS. This is for additional service rendered by order of the House, service which this officer was not called upon to perform at all as Journal Clerk.

The CHAIRMAN. Does the gentleman from Missouri [Mr. BURNES]

insist on the point of order?

Mr. BURNES I understand the point of order is based on the fact that it is the same proposition voted down during the first consideration of the him. tion of the bill.

Mr. BURROWS. I hope the gentleman will not insist on his point of order. Let the committee of conference have jurisdiction of the subject.

Mr. BURNES. I will withdraw the point of order.
Mr. REAGAN. I renew the point of order. I say that it is not Mr. REAGAN. I renew the point of order. I say that it is not authorized by law. It is giving a second salary after giving the first. Mr. BURROWS. But let it go to the conference committee. Mr. REAGAN. I do not want it to go; it has gone far enough now. The CHAIRMAN. The gentleman from Texas renews the point of

order against the amendment of the gentleman from Michigan.

Mr. BURROWS. Does the Chair think his point is good for any-

thing?

The CHAIRMAN. The Chair will have to sustain the point of order.
Mr. BURROWS. I should like to hear on what ground.
The CHAIRMAN. It is the same amendment offered in the Com-

mittee of the Whole when the bill was first under consideration in that committee.

Mr. BURROWS. I submit to the Chair that it is not the same amendment. No such amendment as the one pending was ever offered heretofore in the Committee of the Whole. Therefore that statement is a mistake. The Committee of the Whole never had it before it, and never voted on it. The amount was different; that was a proposition to The Chair will observe by the erasure that it is a different pay \$1,000. proposition.

The CHAIRMAN. The Chair does not think a mere change of

amount alters the character of the amendment.

Mr. BURROWS. It is a different proposition. The changes which have been made make it a different proposition. This substantial proposition has not been acted on in the Committee of the Whole. The substantial part of the proposition has been changed. [Laughter.]

The CHAIRMAN. The Chair sustains the point of order, and the

amendment is ruled out.

The question recurred on Senate amendment 108, which had been al-

ready reported.

The CHAIRMAN. The recommendation of the Committee on Appropriations is that the amendment be non-concurred in. If there be no objection, the amendment will be non-concurred in.

Mr. PRICE. I object.

The Senate amendment was again read.

Mr. PRICE. I ask for a division.

Mr. MORRILL. Before the vote is taken I should like to say a word.

The CHAIRMAN. The House is dividing.

The House divided; and there were-ayes 72, noes 14.

So the amendment was non-concurred in.

The one hundred and ninth amendment of the Senate was read, as

For payment of sixty-five printers regularly employed on the Congressional Record, \$90 each, for time unemployed during the present session, \$5,850.

The CHAIRMAN. The Committee on Appropriations recommend non-concurrence

Mr. FARQUHAR. I move to concur. I wish to say to the House, Mr. Chairman, that under the law creating the Government Printing Office printers of the Congressional Record are allowed 50 cents per thousand ems for composition, according to the scale of prices made in a neighboring city, and according to the scale of the Government Printing Office. These men on the RECORD do our work immediately; they ing Office. These men on the RECORD do our work immediately; they are our workmen; and a year ago, when this proposition was placed on the bill and carried through both Houses, the intention at that time was to amend the organic act so as to give these men 3 or 5 cents per thousand ems extra in order to pay them for the night-work which they performed. By some mistake, or by some misapprehension on the part of the person who was to bring forward the matter, it was not done, and so we find ourselves this year again passing this proposition.

These men, who are employed immediately by Congress, who are doing

Congressional printing, have harder and severer work to do than any other employes in that Government Printing Office, while they are

paid proportionately 20 per cent. less.

I simply ask in the interest of these men who do this Congressional work that they shall receive justice at the hands of this House. I do not wish any point to be made on it, that they are working now under contract, under the law, but I do ask they shall have fair wages—as fair wages as are paid by any firm in the city of Washington, or by any office in any other city of America. Now, 50 cents per thousand ems for composition is regarded as for plain news composition, but these men are compelled to do book-work for that price. I hope no line of economy, no line of precedent will step in this House now to take away from these

men the money they are fairly entitled in equity and justice to receive. I leave it entirely to the good sense of the House to adopt this amendment so it may go into the hands of the conferees with a favorable vote of the House of Representatives, the popular branch of this Government.

Mr. BURNES. There is good deal of truth in what the gentleman says, and the Appropriations Committee in recommending non-concurrence had no other desire than thereby to place the House in a position to ascertain exactly what was the average waiting of these Congressional Record printers.

SIONAL RECORD printers.

I will say, however, to the gentleman from New York [Mr. FAR-QUHAR] that we pay 55 cents instead of 50 cents per thousand ems, and that price is largely in excess of what is paid for similar services in the great printing offices of the country. But be that as it may, the motion to non-concur was made to allow the conference committee to ascertain something as to the average loss of time by waiting on occasions of adjournment and the like. I can assure the gentleman from New York we have no disposition to deal unfairly or illiberally with this class of employés, and will give him and other gentlemen ample oppor-

class of employes, and will give him and other gentlemen ample opportunity to express their views before any action is taken.

Mr. FARQUHAR. I am very glad to hear the gentleman in charge of this bill express his opinion so fairly as he has done. I think on full investigation it will be found that the money compensation as measured by the time is even less than that paid by the employing printers throughout the United States, and less for the standing time than is demanded by any of the typographical unions. With the gentleman's assurance I withdraw the motion to concur.

The metion to non-concurves acrosed to

The motion to non-concur was agreed to. Amendment numbered 110 was read, as follows:

Strike out of the paragraph the following words:

"Except the claims numbered forty-six thousand and fifty, forty-seven thousand three hundred and eighty-one, and forty-seven thousand four hundred and thirteen contained in said Exceutive Document Number Seventy, seventeen thousand one hundred and ninety-seven dollars and thirteen cents," and insert "thirty-nine thousand and twenty dollars and twenty-eight cents."

Mr. BURNES. The committee recommend non-concurrence.

Mr. KELLEY. It was my purpose to have made a different motion in reference to this amendment, but I see the earnestness with which the committee is expediting business, and believing that this motion to non-concur, as the gentleman in charge of the bill has said, is like many others on which we have passed, merely formal; and being convinced that at any rate there will be a better chance for calm and deliberate that at any rate there will be a better chance for calm and deliberate consideration of the facts by the committee of conference than there is here in a heated debate at this time, I merely signalize the fact that I was ready to ask the Committee of the Whole to take another position, but will yield to the good sense and good faith of the Committee on Appropriations in their formal motion to non-concur in this amendment.

The motion to non-concur was agreed to.

Amendments numbered 111 to 120, inclusive, were non-concurred in.

Amendment numbered 121 was concurred in.

Mr. BURNES. The remaining amendment, Mr. Chairman, numbered 122, embraces all the rest of the bill. It will require some time to read it; but, of course, if any gentleman desires to have it read I shall not complain. I ask unanimous consent, however, that it be non-concurred in without reading.

curred in without reading.

Mr. BAYNE. I have no objection to dispensing with the reading of the amendment, which is quite lengthy, but I desire to express the wish and hope that the committee will consider favorably the appropriations herein contained, and especially those cases that have been adjudicated by the Second Auditor and Comptroller.

Mr. BURNES. I will state to my friend from Pennsylvania the reason we moved to non-concur in this first paragraph is, that this list was sent from the Treasury Department since the bill was reported and has not yet been printed, and we have had no opportunity to examine the items in detail. We presume they will be found correct; but by the time we get the bill into conference the list will have been printed, and we will then be enabled to examine into the facts and give a satisfactory report to the House. satisfactory report to the House.

Mr. HOLMAN. I wish to add that the House called upon the ac-

counting officers for the statement which was compiled up to the 18th of June, and the accounts furnished up to that time were incorporated in the bill. The Senate subsequently called for this account up to the 1st of July or later, and they were furnished to the Senate, and they have also been put into the bill. I do not doubt that they are put in properly and that the conferees will agree upon them.

The CHAIRMAN. Without objection, the amendment will be non-

concurred in.

concurred in.

There was no objection, and it was so ordered.

Mr. BURROWS. Mr. Chairman, since the submission of the proposition I made a little while ago, providing payment for additional services to the Journal Clerk, against which the point of order was made by the gentleman from Texas, I have taken occasion to inquire into the facts whether as a matter of fact that proposition was submitted to the House; and I find that it was, by the gentleman from New York [Mr. HISCOCK], and a vote was taken on the resolution, or proposition, which was carried by quite a majority, but the point of no quorum was raised,

whereupon the resolution was withdrawn. It was never, therefore, passed upon by the House finally, and I submit under the circumstances that the Chair will doubtless reverse its ruling and submit the

amendment to a vote of the committee.

The CHAIRMAN. The Chair will state, upon reflection and examination of the RECORD, that the present occupant of the chair, presiding at that time, now recollects distinctly that the amendment was offered and the point of order was made against it. That was submitted to the committee, and the point of order was decided in favor of the amendment by a vote of the committee. When the vote was taken upon the adoption of the amendment a quorum failed to appear, the point of order was raised, and after some time spent in attempting to obtain a quorum the gentleman from New York withdrew the amendment, and it was not finally acted upon by the committee. The Chair supposes, therefore, that the amendment at this time is in order.

Mr. BURROWS. I trust the House will let it go to the conference

committee.

Mr. HOLMAN. I hope it will be again reported.

The amendment was again read. .

The question was taken on the adoption of the amendment; and

Mr. BURNES. I demand tellers, no quorum having voted.

The CHAIRMAN. The point of order being made that no quorum has voted, the Chair will order tellers.

Mr. Burnes and Mr. Burnews were appointed tellers.

The committee again divided; and the tellers reported—ayes 112,

So the amendment was agreed to.

Mr. BURNES. I move that the committee rise and report the bill and amendments to the House.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. HATCH reported that the Committee of the Whole House on the state of the Union having had under consideration the Senate amendments to the general deficiency bill had directed him to report them back with various recommendations.

Mr. BURNES. I move the adoption of the report, and upon that de-

mand the previous question.

Mr. REAGAN. I demand a separate vote on the last amendment agreed to, allowing \$500 extra to the Journal Clerk of the House.

The SPEAKER. The gentleman from Texas demands a separate

wote on the amendment in relation to pay of the Journal Clerk of the House. Is a separate vote demanded on any other amendment?

Mr. BURROWS. I trust the gentleman from Texas will not insist on a separate vote on that amendment. It is a matter which might

on a separate vote on that amendment. It is a matter which might as well be determined by the conference committee. There is no use in taking up time with the yeas and nays on any of these things.

The SPEAKER. The question is on ordering the previous question on the report of the Committee of the Whole House on the state of the

The previous question was ordered.

The SPEAKER. If no further separate vote be demanded the question will be on concurring in the report of the Committee of the Whole House on the state of the Union, except as to the amendment indicated by the gentleman from Texas.

Mr. BURROWS. I think the gentleman from Texas will not insist

on a separate vote.

Mr. REAGAN. I do.

Mr. REAGAN. 1 do.

The report of the Committee of the Whole House on the state of the Union was agreed to, with the exception indicated.

Mr. BURNES moved to reconsider the vote just taken; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

The SPEAKER. The Clerk will report the amendment on which separate vote is demanded by the gentleman from Texas.

The Clerk read as follows:

Add to Senate amendment 108 the following:
"To pay Henry H. Smith, for additional service rendered as Journal Clerk under the resolutions of the House of February 23, 1882, and December 12, 1885, and for services rendered as clerk to the Committee on Rules during the present session, \$500."

Mr. REAGAN. I call for the yeas and nays.

The SPEAKER. The committee recommend concurrence in the Senate amendment with the amendment which has just been read; and upon that the gentleman from Texas demands the yeas and nays. The question being taken on ordering the yeas and nays, there were

The SPEAKER. No vote having been taken this morning, the Chair is unable to determine whether the affirmative vote is one-fifth or not. The Chair will count the other side.

The negative vote being taken, there were noes 112.

So (the affirmative being more than one-fifth of the whole vote) the

yeas and nays were ordered.

The SPEAKER. The question is on concurring in the Senate amendment with the amendment proposed by the Committee of the Whole House on the state of the Union.

Ely,

The question was taken; and there were-yeas 143, nays 74, not voting 105; as follows:

So the Senate amendment was concurred in with an amendment. Mr. BURNES. I ask unanimous consent that the reading of the names of members voting be dispensed with.

There was no objection.

The following pairs were announced until further notice: Mr. Tucker with Mr. Stewart, of Vermont. Mr. McKinley with Mr. Mills.

Mr. ADAMS, of New York, with Mr. KETCHAM.
Mr. DAVIDSON, of Florida, with Mr. GALLINGER.
Mr. ARNOT with Mr. THOMAS, of Illinois.

Mr. Dawson with Mr. RANNEY.

Mr. Barksdale with Mr. Davenport. Mr. Bragg with Mr. Caswell. Mr. Robertson with Mr. Steele.

Mr. ANDERSON, of Ohio, with Mr. HANBACK.

Mr. ROGERS with Mr. EZRA B. TAYLOR.

Mr. BARBOUR with Mr. LIBBEY. Mr. THROCKMORTON with Mr. WADSWORTH. Mr. HAMMOND with Mr. DINGLEY.

Mr. CANDLER with Mr. LOUTITT.

Mr. WELLBORN with Mr. PHELPS.

Mr. SADLER with Mr. VAN SCHAICK.

Mr. HILL with Mr. HOUK.

Mr. STORM with Mr. DUNHAM.

Mr. REESE with Mr. ADAMS, of Illinois.

Mr. DIBBLE with Mr. MILLIKEN, until July 30.

For this day:

Mr. CALDWELL with Mr. MORROW.

Mr. CAMPBELL, of Ohio, with Mr. HAYNES.

On this vote:

Mr. Green, of New Jersey, with Mr. Struble.

Mr. NEECE with Mr. Payson. Mr. DUNN with Mr. SYMES.

The result of the vote was then announced as above stated.

Mr. BURNES. To expedite business I move that the House request conference with the Senate on the disagreeing votes of the two Houses.

The motion was agreed to.

The SPEAKER. The Chair appoints as managers of the conference on the part of the House the gentleman from Missouri [Mr. BURNES] the gentleman from Ohio [Mr. LE FEVRE] and the gentleman from Maryland [Mr. McComas].

Mr. LIBBEY, by unanimous consent, introduced a bill (H. R. 9990) authorizing the Secretary of War to grant the right of way for a streetrailway from the Baltimore wharf, at Old Point Comfort, Elizabeth City County, Virginia, to and across the Mill Creek bridge, in the same county; which was read a first and second time, referred to the Committee on Military Affairs, and ordered to be printed.

ORDER OF BUSINESS.

Mr. REAGAN. I call up the special order, the interstate-commerce

Mr. THOMAS, of Wisconsin. I call up as a question of privilege the bill H. R. 7406, with message of the President of the United States returning the same with his objections.

The SPEAKER. The Clerk will report the title of the bill called

up by the gentleman from Wisconsin.

Mr. REAGAN. Has that priority over the measure which I call

The SPEAKER. It has. It is a question of the highest privilege, but the question of consideration can be made against it.

FORTIFICATIONS APPROPRIATION BILL.

Mr. FORNEY. I ask the gentleman from Wisconsin to yield for a moment that I may call up the fortifications bill and have it referred

moment that I may can up the forthcations on and have to telested to the Committee on Appropriations.

Mr. THOMAS, of Wisconsin. I will do so if I lose no privilege.

The bill (H. R. 9798) making appropriations for fortifications and other works of defense, and for the armament thereof, for the fiscal year ending June 30, 1887, and for other purposes, with amendments of the Senate, was referred to the Committee on Appropriations and ordered to be printed with the amendments.

MARY ANDERSON.

The SPEAKER. The Clerk will report the title of the bill called up by the gentleman from Wisconsin.

The Clerk read as follows:

Brady, Browne, T. M. Brown, C. E. Brown, W. W.

Butterworth, Campbell, J. M. Cannon, Carleton, Collins, Conger, Cooper,

Buchanan,

Buck, Bunnell, Burleigh,

Burrows,

A bill (H. R. 7436) granting a pension to Mary Anderson.

The SPEAKER. The gentleman from Texas [Mr. REAGAN] raises the question of consideration against this bill, and the question is, Will the House now proceed to consider the bill?

The House divided; and there were—ayes 77, noes 72.

Mr. REAGAN. I call for the yeas and nays.

The yeas and nays were ordered

The question was taken; and there were—yeas 112, nays 117, not voting 92; as follows: VEAS-112

ORDER OF BUSINESS.

I move to proceed to the consideration of the inter-Mr. REAGAN.

Mr. KEAGAN. I move to proceed to the consideration of the interstate-commerce bill.

Mr. SAWYER. I rise to a privileged motion.

The SPEAKER. The gentleman will state it.

Mr. REAGAN. I hope, Mr. Speaker, that I shall not be supplanted again after having addressed the Chair first.

The SPEAKER. The Chair has simply to enforce the rules of the House. The gentleman from New York [Mr. SAWYER] states that he rises to a privileged motion, and the Chair does not yet know what his motion is. motion is

Mr. TOWNSHEND. But before the gentleman made the announcement the gentleman from Texas [Mr. REAGAN] rose and moved to take

up the interstate-commerce bill.

The SPEAKER. The gentleman from Texas moves to proceed to the The SPEAKER. The gentleman from Texas moves to proceed to the consideration of the bill to regulate interstate commerce, and pending that the gentleman from New York [Mr. SAWYER] states that he rises to make a privileged motion. The Chair must entertain the motion, at least to the extent of ascertaining what it is, and if it be a privileged motion, of course the Chair must entertain it.

Mr. SAWYER. My motion is that the House proceed to consider the bill (H. R. 7108) granting a pension to Andrew J. Wilson, with the veto message of the President thereon.

Mr. REAGAN. If the gentleman will allow a veto to be taken on

Mr. REAGAN. If the gentleman will allow a vote to be taken on the interstate-commerce bill it will take only a short time, and then we can proceed to other business

Mr. TOWNSHEND. But they will not allow a vote upon it.

Mr. SPRINGER. There is only one man interested in this pension case, and there are fifty-six millions of people interested in the interstate-commerce bill.

Mr. REED, of Maine. That is the way you state it.
Mr. O'NEILL, of Pennsylvania. There is a great big principle involved in this pension case which Congress ought to vindicate.

Mr. WEAVER, of Iowa. And there is a great big principle involved in the interstate-commerce bill, too.

Mr. Speaker, I understood the gentleman from Maine to propose, for gentlemen on the other side, that if we would take a vote upon one vetoed pension bill we could then go on to consider the interstate-commerce bill. Is that their proposition?

Mr. REED, of Maine. Regular order.
Mr. REAGAN. I raise the question of consideration against the bill.
The SPEAKER. The gentleman from Texas raises the question of consideration against the bill called up by the gentleman from New York. The question is, Will the House now proceed to consider the bill?

Mr. MORRILL. On that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 100, nays 120, not voting 102; as follows:

ı	Dawson,	LLIUE,	Scott,	

So the House refused to proceed to the consideration of the bill. Mr. WEAVER, of Iowa. I ask unanimous consent that the reading of the names be dispensed with.

Mr. REED, of Maine, and others objected.

The following additional pairs were announced:

Mr. WILLIS with Mr. HENDERSON, of Illinois, for the rest of this day. The following-named members were announced as paired on this vote:

Mr. Green, of New Jersey, with Mr. Kelley.
Mr. Campbell, of Ohio, with Mr. Grosvenor.
Mr. Warner, of Ohio, with Mr. Thompson.
Mr. Gibson, of West Virginia, with Mr. Goff.
Mr. O'Neill, of Missouri, with Mr. Symes.

The result of the vote was announced as above stated.

MESSAGE FROM THE PRESIDENT

A message, in writing, from the President of the United States was communicated to the House by Mr. Pruden, one of his secretaries, who also announced that the President had approved and signed joint resolution and bills of the following titles:

Joint resolution (H. Res. 129) directing the Public Printer to for-

ward the CONGRESSIONAL RECORD to our legations abroad;

An act (H. R. 5866) to construct a road to the national cemetery at

Knoxville, Tenn.; and An act (H. R. 7627) providing for the construction of a light-house supply steamer for the Atlantic and Gulf coasts, and for other pur-

ENROLLED BILLS SIGNED.

Mr. FISHER, from the Committee on Enrolled Bills, reported that they had examined and found duly enrolled a bill (H. R. 3014) to provide for terms of court in Colorado; when the Speaker signed the same.

ORDER OF BUSINESS.

Mr. REAGAN. I now ask that the House proceed to the consideration of the interstate-commerce bill.

Mr. MORRILL. I rise to a question of privilege.

The SPEAKER. The bill indicated by the gentleman from Texas

[Mr. Reagan] has been called up by him; but pending that other
gentlemen rise to privileged questions, which the Chair is bound to en-

Mr. MORRILL. I call up for consideration the bill (H. R. 6136)-granting a pension to John W. Farriss, which has been vetoed by the President and reported back from the Committee on Invalid Pensions.

Mr. REAGAN. I raise the question of consideration upon that bill. The SPEAKER. The Clerk will report the title of the bill called up by the gentleman from Kansas [Mr. MORRILL].
The Clerk read as follows:

A bill (H. R. 6136) granting a pension to John W. Farriss.

Mr. REAGAN. I raise the question of consideration on that bill. Mr. BAYNE. I ask the gentleman from Kansas [Mr. MORRILL] to yield that the gentleman fram Alabama [Mr. WHEELER] may make a

conference report.

Mr. MORRILL. I yield for a moment to the gentleman from Ala-

bama that he may make a privileged report.

The SPEAKER. Is it a conference report?

Mr. BAYNE. Yes, sir.

WILLIAM P. CHAMBLISS.

. Mr. WHEELER. On the 23d of July this House adopted a conference report in reference to the bill (H. R. 68) for the relief of William P. Chambliss, and the Senate adopted the same report. Afterward it was found that in printing the bill there had been a mistake in the was found that in printing the bill there had been a mistake in the middle name. The conferees, being again called together, decided to submit a new report, making the necessary correction. The Senate has adopted the new conference report; and I now offer that report for adoption by the House. First I will move to reconsider the vote by which the conference report was adopted on the 23d of July.

The SPEAKER. The gentleman from Alabama asks unanimous consent to reconsider the vote by which the report of the committee of conference on this bill was agreed to by the House on the 23d of July, it having been discovered that there was a mistake in the name of the party as mentioned in the encrossed bill. Is there objection?

party as mentioned in the engrossed bill. Is there objection? [A pause.] In the absence of objection that vote is reconsidered, and the matter is again referred to the same conferees. The Clerk will now read the report.

The Clerk read as follows:

The Clerk read as 1010ws:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H. R. 68, an act for the relief of William P. Chambliss, having met, after full and free conference have agreed to recommend and do recommend to their respective House as follows:

That the Senate recede from its amendment numbered 1, and agree to the following amendment: Strike out the name of "William B. Chambliss" wherever it appears in the bill and insert the name of "William P. Chambliss."

FRANK L. WOLFORD,

JOSEPH WHEELER,

Managers on the part of the House of Representatives.

CHAPLES F. MANDERSON

CHARLES F. MANDERSON, JOHN A. LOGAN, Managers on the part of the Senate.

Mr. REED, of Maine. How much does this involve? Mr. WHEELER. It involves the restoration of Major Chambliss to the retired-list of the Army, he having resigned nineteen years ago. It gives him no back pay.

Mr. REED, of Maine. It puts him on the retired-list?

Mr. WHEELER. It does.

Mr. REED, of Maine. On what ground? Mr. WHEELER. The report of the Committee on Military Affairs of this House states very lengthily the grounds. It appears that in two Congresses, the Forty-sixth and the Forty-seventh, a bill of this kind was passed by the House unanimously without division. At another time, I believe, a bill for the same purpose passed the Senate.

Major Chambliss was an officer of the Army and was very severely

wounded—so severely that he was unable to do duty. In 1867, before it was customary to place officers on the retired-list to the extent to which it was afterward done, he resigned, in the hope that he might recover his health, but in this he has been disappointed. The medical certificates and the certificates of various commanders state a case which, in the opinion of the Committee on Military Affairs, merited action of

this character. I think it is the only proposition favorably reported by the Committee on Military Affairs of the House to place on the retired-list an officer who had resigned.

The Committee on Military Affairs of this House has taken great care in considering bills of this character. A very large number of such bills have been referred to the committee, and I think I was quite correct in stating that this is the only one which has been reported favorably to restore a resigned officer.

The gentleman from Maine [Mr. REED] is well aware that the Committee on Military Affairs in former Congresses has encumbered the Calendar with a large number of bills restoring officers to the Army. did not anticipate any opposition to this report, and I shall not insist upon it if the time of the House is to be consumed.

Mr. REED, of Maine. But officers of the Army and Navy are placed

upon the retired-list on account of length of service.

The object of the retired-list is to free the service of men who are not

in fit condition, either by reason of age or some other reason, to perform the duties. It is not intended to take the place of a pension.

the duties. It is not intended to take the piace of a pension.

While this might be a case deserving of pension, it seems to me we are in great danger of misunderstanding the nature of the retired-list. We make a retired-list for the Army and Navy on precisely the same principle that we pension our judges. We pension them because of their length of service and to enable us to supply their places by men who are in the prime of life. That is the sole object and purpose of the retired-list. It is given always on account of length of service.

And it seems to me this is a case where an officer resigned and has

not been in the service for nineteen years. We are making the retired-list for a purpose which might be justifiable in our pension-list. There are a great many cases like that coming up, and wherever I have noticed them I have called the attention of the House to the matter. I think it is a great mistake.

Mr. BAYNE. This case is exceptional in every respect. It has been so regarded by the Committee on Military Affairs of the House and it has been so regarded by the Committee on Military Affairs of the Senate. This officer in the regular Army had served for a great many years with marked distinction. He received, I believe, seven wounds while he was in the Union service. He resigned from the Army in 1867 because he believed he would recover from his wounds and be able to earn a livelihood for himself outside of the Army.

Mr. LONG. Is he now in receipt of a pension?

Mr. BAYNE. I do not know. I believe he never has applied for a pension, but I do not know that. The Committee on Military Affairs in both branches of Congress after careful examination have found this case to be exceptional in its character, and have reported that this officer, having rendered long and faithful service to the Government in the Army, should be placed upon the retired-list. The bill was unan-imously recommended by the Committee on Military Affairs in the House of Representatives, and that committee has some members who look out in reference to those going upon the retired-list quite as closely

as the gentleman from Maine or any other member of the House.

Mr. REED, of Maine. I should not judge so by their reports.

Mr. BAYNE. The amendment reported by the conference commit-

tee is merely verbal in its character.

Mr. LONG. If this man is not in receipt of a pension he is entitled

to a pension.
Mr. BAYNE. I suppose he would be. I do not know whether he I have no doubt he would be if he applied for a pension. I know this is a strong case. I am sure this officer deserved the recommendation of the committee, or this bill would not have passed. The conference report has been adopted before. The object of the present conference is simply to substitute for the letter "B" the letter "P" in order to get the name right.

Mr. REAGAN. Does the gentleman from Alabama know whether

this man is drawing a pension?

Mr. WHEELER. Ido not, but I presume he must be, because there is not an officer under like circumstances who is not drawing a pension.

But this is in lieu of all pensions.

In respect to what gentlemen say about opposing these matters, I wish to say that this case was before the Forty-sixth Congress, when no one opposed it. It was before the Forty-seventh Congress, and no one opposed it. It was not only not opposed, but it passed the House without a division.

It has been brought here on a conference report, and that report was adopted without objection. The gentleman was here, and we heard no objection from him. He is generally here and attentive, and he says he always objects to questions of this character.

Mr. REED, of Maine. That is not an accurate statement-at least

is not quite an accurate statement of what I intended to say.

Mr. WHEELER. That may be.

Mr. REED, of Maine. Very often this question was raised and opposed. Once it was raised in the other House. I think in the last Congress it was raised.

Mr. WHEELER. In the last Congress this case was not before this

House.

Mr. REED, of Maine. I do not mean the case of this particular in-Mr. REED, of Maine. I do not mean the case of this particular individual. But in regard to General Pleasonton the question was raised, and my attention was attracted to it, and I have felt it to be my duty since when the matter is brought up before the Frouse to call attention to all these cases, because I think we are gradually, on account of our personal regard for individuals, turning all the laws with reference to the government of our military affairs, with reference to the retired-list, and with reference to restoration to rank—we are twisting them all aways from the purpose originally intended, and the only purpose upon awry from the purpose originally intended, and the only purpose upon which they can be justified or defended.

Upon what ground can we possibly justify the retirement of an officer upon two-thirds pay? It is solely upon the ground that we are rewarding a man who has passed his whole life in the public service, and finding old age coming on him, with consequent incapacity, we provide for that old age by retirement on reduced pay, for otherwise we might have to continue his full pay, although he may not be able to perform

full service.

Now we are having the effect of that other system in the Revenue-Marine Service. There we have no retired-list at all. The consequence is that there is a large number of officers who are incapable of performing the duties of their positions, but who nevertheless draw full pay, and no Secretary from motives of compassion will relieve them from duty

There are seven of them over eighty years of age.

Mr. LONG. There are seven of them over eighty years of age.

Mr. REED, of Maine. My friend from Massachusetts tells me there are seven persons in that service over eighty years of age. The result is that no Secretary will be guilty of the inhumanity of turning men of that age adrift, and no new ones can be appointed, because nominally they are fit for duty since they are receiving full pay. Now, it was that consideration, multiplied by the proportion that the Army bears to the Marine Corps, that caused the original formation of the retired-list. It is proposed here to use it not to retire officers on account of length of service, but to reward an officer for unexampled gallantry. I submit that is not the purpose nor the object, nor is it the ground upon which the retired-list was established.

Mr. WHEELER. I call for the previous question on the adoption of the report.

of the report.

The previous question was ordered.

The question being taken on agreeing to the report of the committee of conference, the House divided; and there were—ayes 33, noes 55.

Mr. WHEELER. I do not think it proper to take the time of the House, and I shall therefore ask unanimous consent to withdraw the

report for the present.

Mr. BAYNE. Oh, no, I would not do that; let us have a vote di-

rectly upon it.

The SPEAKER. The previous question having been ordered, it can only be withdrawn by unanimous consent.

Mr. WHEELER. Let us have tellers.

Mr. BAYNE. No quorum has voted.
Mr. MILLS. It is too late to make that point.
The SPEAKER. The Chair thinks not. The Chair only announced

the numbers voting, not the result of the vote.

Mr. Wheeler and Mr. Reed, of Maine, were appointed tellers.

Mr. BAYNE. I will withdraw the point of no quorum if the gentlemen from Alabama can be permitted to withdraw the report.

Mr. WHEELER. I ask unanimous consent to withdraw the report

for the present.

The SPEAKER. The gentleman from Pennsylvania withdraws the objection of no quorum, provided the gentleman from Alabama is granted permission to withdraw the report. Is there objection?

Mr. COX. I object.

The SPEAKER. The Chair hears no objection.

EVENING SESSION FOR PRIVATE BILLS.

Mr. SPRINGER. I ask unanimous consent to have an order made for the consideration of private bills to-night. Many gentlemen have insisted upon this, and I do it in the interest of many worthy claimants. The SPEAKER. The resolution will be read subject to objection.

The Clerk read as follows:

Resolved, That the House will on Thursday, July 29, take a recess from 5 o'clock p. m. until 8 o'clock p. m., the evening session to be devoted to the consideration of bills on the Private Calendar to which there may be no objection, and the session not to continue beyond 11 o'clock p. m.

The SPEAKER. Is there objection to the present consideration of the resolution?

Mr. JOHNSTON, of Indiana. Is it in order to offer an amendment? The SPEAKER. It is in order, there being no objection to its con-

Mr. SPRINGER. I decline to yield for amendments. I can not yield if this is going to lead to discussion. I will state to the gentleman that it embraces all private bills which are not objected to.

man that it embraces all private bills which are not objected to.

Mr. JOHNSTON, of Indiana. I want to offer an amendment.

Mr. SPRINGER. I demand the previous question.

Mr. JOHNSTON, of Indiana. I want to move to strike out private
bills and insert Senate bill 1886, amending the pension law.

Mr. SPRINGER. I must decline to yield for the amendment.

The previous question was ordered.

The question being taken on the adoption of the resolution, there

were—aves 65 noss 23

vere—ayes 65, noes 23.

Mr. BENNETT. No quorum.
Mr. SPRINGER. I will withdraw the resolution rather than consume the time of the House. It is nothing to me—

The SPEAKER. The previous question having been ordered it can

only be withdrawn by unanimous consent.

Mr. BUCHANAN and Mr. ZACH. TAYLOR objected.
The SPEAKER. The Chair will appoint as tellers the gentleman from North Carolina, Mr. BENNETT, and the gentleman from Illinois, Mr. SPRINGER

Mr. BENNETT. I withdraw the point of no quorum. So (no further count being demanded) the resolution was agreed to.

ORDER OF BUSINESS.

The SPEAKER. The gentleman from Texas raises the question of consideration against the bill and message called up by the gentleman

Mr. REED, of Maine. But the other question has not been with-The SPEAKER. It was withdrawn. The conference report is still before the House.

The SPEAKER. It was withdrawn.

Mr. REED, of Maine. It was objected to by the gentleman from North Carolina [Mr. Cox].

The SPEAKER. The Chair thinks it was not objected to at the time; certainly not as far as the Chair heard. The Chair stated that the gentleman from Pennsylvania [Mr. BAYNE] would withdraw the point of no quorum upon condition that the gentleman from Alabama should be allowed to withdraw the report he made.

Mr. REED, of Maine. But the gentleman from North Carolina ob-

iected.

The SPEAKER. The Chair did not hear the gentleman make any

objection.

Mr. COX. I did object, and thought I was recognized as having ob-

jected.

The SPEAKER. The Chair did not hear it, but of course accepts

the statement of the gentleman.

Mr. BAYNE. I do not for a moment question that the gentleman from North Carolina [Mr. Cox] objected. But business has intervened since. A motion has been considered and adopted since that time, and I submit it is rather too late to entertain the objection now.

The SPEAKER. But gentlemen have stated that they supposed the objection had been heard, and that the report was not withdrawn. The Chair is obliged to accept the statement of a gentleman on the floor as

to his own action.

Mr. BLAND. Suppose business had been allowed to run for an hour, would it not have been then too late to insist on the objection?

The SPEAKER. The Chair thinks it would be in the power of the gentleman to state even then that he had supposed his objection was heard. It is a matter which involves the privilege of the House. It was an error committed by the Chair when, not hearing the gentleman,

he stated that the report was withdrawn.

Mr. REAGAN. But if the gentleman did not call the attention of the Chair to the fact that he had made an objection can it now be en-

tertained?

The SPEAKER. Gentlemen were still under the impression that the objection had been heard.

Mr. COX. I withdraw the objection.

The SPEAKER. Is there any further objection? The Chair hears none, and the report is withdrawn.

JOHN W. FARRIS.

The SPEAKER. The question now is, Will the House proceed to consider the bill called up by the gentleman from Kansas [Mr. Morbill] with the message of the President.

Mr. BLAND. Is the bill called up by the gentleman from Kansas

the subject now under consideration?

The SPEAKER. It is not under consideration. The gentleman calls it up for consideration, and the gentleman from Texas [Mr. REA-GAN] raises the question of consideration against it.

Mr. BLAND. I ask if the question is debatable?

The SPEAKER. The question of consideration is not debatable.

Mr. BLAND. I desire to say I asked the gentleman from Kansas not to bring this bill up, and I regret very much that so meritorious a bill should be introdued here when it can not be considered and in

antagonism to the interstate-commerce bill. It is a meritorious bill, and ought to have a fair consideration, and I regret it is forced in here

when it can not have that privilege.

The SPEAKER. The order of business is not debatable. The guestion being taken, there were—ayes 65, noes 67.
Mr. MORRILL. No quorum
Mr. REAGAN. I call for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were-yeas 102, nays 116, not voting 104; as follows:

	YEA	IS-102.

So the House refused to consider the bill H. R. 6136.

The following additional pairs were announced: Mr. CAMPBELL, of Ohie, with Mr. GROSVENOR, for the rest of this

Mr. John M. Taylor with Mr. Bingham, for the rest of this day.
Mr. Randall with Mr. Harmer, for the rest of this day.
Mr. Ballentine with Mr. Boutelle, for the rest of this day.
Mr. King with Mr. Baker, for the rest of this day.

Mr. Green, of New Jersey, with Mr. Kelley, on this vote. Mr. Ermentrout with Mr. Ryan, on this vote.

Mr. MILLS. My pair with the gentleman from Ohio [Mr. McKin- | names of members voting be dispensed with.

LEY] has been announced. Mr. McKinley stated that if present he w, ould vote for the Reagan interstate-commerce bill and for all the bills forfeiting unearned railroad land grants. In consideration of that fact, and as the gentleman calling up this bill stated he antagonized the interstate-commerce bill with it, I have voted in the negative.

The result of the vote was then announced as above stated.

MRS. MARIA HUNTER.

Mr. BURROWS. I call up for consideration the bill (H. R. 7167) for the relief of Mrs. Maria Hunter, with the veto message of the President.

Mr. REAGAN. I raise the question of consideration.

The SPEAKER. The question is, Will the House now proceed to consider the bill called up by the gentleman from Michigan

Mr. REAGAN. On that question I demand the yeas and nays

The yeas and nays were ordered.

The question was taken; and there were-yeas 93, nays 107, not voting 122; as follows:

Fleeger, Fuller, Funston, Geddes, Goff,	Lindsley, Little, Long, Lyman, Markham,	Rowell, Ryan, Seranton, Sessions, Spooner, Stephenson,

So the House refused to consider the bill. Mr. REAGAN. I ask unanimous consent that the reading of the Mr. HISCOCK and others objected.

The result of the vote was then announced as above recorded.

JUDGE FOR SOUTHERN DISTRICT OF ALABAMA.

The SPEAKER laid before the House the following message from the Senate:

IN THE SENATE OF THE UNITED STATES, July 28, 1886.

Ordered, That the Secretary be directed to request the House of Representatives to return to the Senate the bill of the House (28) to provide for the appointment and compensation of a district judge for the southern district of Alabama.

The SPEAKER. If there be no objection, the Committee of the Whole on the state of the Union will be discharged from the further consideration of this bill, and it will be returned to the Senate.

There was no objection, and it was so ordered.

ENROLLED BILLS SIGNED.

Mr. FISHER, from the Committee on Enrolled Bills, reported that they had examined and found duly enrolled bills of the following titles; when the Speaker signed the same:

A bill (S. 2794) to amend an act entitled "An act for the erection and construction of a public building at Oxford, Miss.," approved July

A bill (S. 71) for the benefit of the States of Texas, Colorado, Oregon, Nebraska, California, Kansas, and Nevada, and the Territories of Washington and Idaho, and Nevada when a Territory; and A bill (S. 2796) to establish a land office at Lamar, Colo.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. SYMPSON, one of its clerks, announced that the Senate insisted on its amendments disagreed to by the House to the bill (H. R. 9478) making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes; disagreed to the amendments of the House to the amendments of the Senate numbered 74 and 78; agreed to the conference asked by the House on the disagreeing votes of the two Houses, and had appointed as conferees on the part of the Senate Mr. ALLISON, Mr. HALE, and Mr. BECK.

The message also announced that the Senate insisted on its amendments disagreed to by the House to the bill (H. R. 9726) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1886, and for prior years, and for other purposes; disagreed to the amendment of the House to the amendment numbered 108; agreed to the conference asked by the House on the disagreeing votes of the two Houses, and had appointed as conferees on the part of

the Senate Mr. HALE, Mr. ALLISON, and Mr. COCKRELL.

ORDER OF BUSINESS.

Mr. REAGAN. Mr. Speaker, I now call up the interstate-commerce bill.

The SPEAKER. The gentleman from Texas calls up for consider-

ation the bill known as the interstate-commerce bill.

Mr. BURROWS. I rise to a privileged motion, but the gentleman from Georgia [Mr. Norwood] desires me to yield to him for a moment, which I gladly do.

PUBLIC BUILDING AT SAVANNAH, GA.

Mr. NORWOOD. Mr. Speaker, I move to take up the joint resolution (H. Res. 206) and to put it upon its passage. It is merely for the purpose of correcting a bill which has been passed at this session for the erection of a public building in Savannah.

The SPEAKER. The joint resolution will be read, after which the Chair will ask for objections.

The joint resolution was read, as follows:

Resolved by the Senate and House of Representatives, &c., That the public building authorized to be erected at Savannah, Ga., by act of Congress approved July 1, 1886, may be located not less than 40 feet from any other building, instead of 50 feet, as provided in said act.

The SPEAKER. Is there objection to the present consideration of this joint resolution?

Mr. REED, of Maine. Will the gentleman from Georgia [Mr. Non-

Mr. REED, of Maine. Will the gentleman from Georgia [Mr. NOR-WOOD] please explain the reason for passing this joint resolution?

Mr. NORWOOD. The reason is this; Gentlemen who have visited Savannah know that the plan of the city is somewhat singular, and it has been found difficult to get a lot upon which this proposed building could be located at a distance of 50 feet from any other building unless by paying a higher price than the Government would be justified in paying. Therefore it was proposed to amend the requirement of the original bill so as to permit the building to be located at a distance of 40 feet from any other building, and this joint resolution is for that purpose. I have asked the opinion of the architect upon the subject, and I have his letter upon my desk stating that 40 feet will be sufficely. and I have his letter upon my desk stating that 40 feet will be suffi-

Mr. SPRINGER. This joint resolution provides that this may be built within 40 feet of some other building now erected?

Mr. NORWOOD. Yes. The act as it now stands requires tha distance shall not be less than 50 feet.

Mr. REED, of Maine. Is not 50 feet the customary distance? The act as it now stands requires that the

city and other gentlemen has shown that it would be very difficult, or very inconvenient, to find a lot upon which this building could be located at a distance of 50 feet from any other building. I ask that this

joint resolution be passed.

The joint resolution was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and

Mr. NORWOOD moved to reconsider the vote by which the joint resolution was passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

ORDER OF BUSINESS.

The SPEAKER. The Clerk will report the title of the bill called up by the gentleman from Michigan [Mr. BURROWS].

Mr. BURROWS. The gentleman from Pennsylvania on my right

[Mr. O'NEILL] asks me to yield to him for a moment.

Mr. O'NEILL, of Pennsylvania. Mr. Speaker, I ask unanimous con-

sent to take up Senate bill 1909.

Mr. WISE. I object.

Mr. O'NEILL, of Pennsylvania. I think that as one unanimous consent has been given on the other side one ought now to be given on

The SPEAKER. The gentleman from Michigan will indicate the title of the bill he calls up.

Mr. LAIRD. Mr. Speaker, I take it that gentlemen on the other side will not object to this resolution to prevent the payment of \$160,000 for the Fort Brown reservation without any adequate consideration. I ask to have it read for the information of the House.

Mr. REAGAN. I shall object to everything, if this filibustering is

to go on.

Mr. REED, of Maine. The gentleman has no right to make that remark. It is entirely unwarranted.

The SPEAKER. The gentleman from Michigan will indicate the

bill he desires to call up.

JOEL D. MONROE.

Mr. BURROWS. I move that the Committee on Invalid Pensions be discharged from the further consideration of the bill (H. R. 4058) for the relief of Joel D. Monroe, with the President's veto thereon, and that the same be now considered.

Mr. REAGAN. I move to postpone the consideration of that bill until after action on the interstate-commerce bill.

The SPEAKER. The motion of the gentleman from Michigan is to

discharge the Committee on Invalid Pensions from the further consideration of the bill. The bill is not before the House for consideration until the committee is discharged.

Mr. SPRINGER. I rise to a question of order.

The SPEAKER. The bill is still in the Committee on Invalid Pen-

Mr. TOWNSHEND. But the gentleman from Texas may ask unanimous consent to postpone the consideration of that bill until after the interstate-commerce bill is disposed of.

The SPEAKER. Of course the gentleman can ask unanimous con-

Mr. SPRINGER. I rise to a point of order.

The SPEAKER. The gentleman will state it.

Mr. SPRINGER. My point is that it is not in order to move, as a privileged matter, to discharge a committee from the consideration of a bill. Although the bill is privileged, yet it is in the hands of the committee, and it is the duty of that committee to report it.

The SPEAKER. The Constitution of the United States provides that the third states is the duty of the committee to report it.

that when the President returns a bill to the House in which it originated with his objections, that House shall proceed to reconsider it and determine whether the bill shall be again passed, the objection of the President to the contrary notwithstanding. The Constitution of the United States provides also that each House shall judge of the election, returns, and qualification of its own members, and may make its own rules for the government of its proceedings; and yet it has been always held that under that provision of the Constitution, which does not in terms make it imperative upon the House to proceed to consider election cases, a motion to discharge the Committee on Elections from the further consideration of a contested case and bring the same before the House was privileged. The Chair so decided only a few days ago when the gentleman from Georgia [Mr. Turner] moved to discharge the Committee on Elections from the further consideration of a con-tested case from the State of Rhode Island. The Chair thinks that the privilege in the present case is certainly equal to that in the case of a contested election.

Mr. SPRINGER. But if our rules have sent this bill to a committee for its consideration the same Constitution gives us the right to make our own rules.

The SPEAKER. But the rules did not send it to the committee.

Mr. SPRINGER. The House did.

The House did in this case. The rules expressly The SPEAKER. Mr. REED, of Maine. Is not 50 feet the customary distance?

Mr. NORWOOD. It may be, but investigation by the mayor of the Committee on Elections, and yet the Chair holds that a motion to discharge that committee from the further consideration of such a case and bring it before the House is a privileged motion.

Mr. TOWNSHEND. Mr. Speaker, was there objection to my request for unanimous consent that the consideration of this bill be postponed until after we shall have considered the interstate-commerce bill?

The SPEAKER. The Chair has not yet stated that request. The gentleman from Illinois [Mr. Townshend] asks unanimous consent to discharge the committee from the further consideration of this bill and message, and postpone the consideration of it until after the bill known as the interstate-commerce bill has been disposed of. Is there objection?

objection?
Mr. BURROWS and others objected.
Mr. TOWNSHEND. Who objects?
The SPEAKER. Several gentlemen object.
Mr. REAGAN. I desire to inquire whether the committee in reporting a bill is not thereby discharged?
The SPEAKER. It is; but this bill has not been reported. The House has the power to discharge this committee from the consideration of a bill and bring it into the House for consideration.
Mr. SPRINGER. Is this a new means of filibustering against the interstate commerce bill?

interstate-commerce bill?

Mr. BURROWS. It is a means of considering the messages vetoing pension bills.

Mr. SPRINGER. There is only one person interested in this pension bill, while sixty millions of people are interested in the other measure.

Mr. REAGAN. I raise the question of consideration.

Mr. BURROWS. Regular order.

The SPEAKER. Debate is not in order under the rules. The gen-

tleman from Texas raises the question of consideration; and the question is, Will the House now proceed to consider the bill?

Mr. REED, of Maine. Mr. Speaker, can the question of consideration be raised on the motion to discharge a committee?

The SPEAKER. The Chair begs pardon. This is not a proposition to call up the bill for consideration but to discharge the committee.

The only way to defeat it is to refuse to agree to the motion. The bill is not now before the House for consideration.

Mr. MATSON. Is the motion divisible?

The SPEAKER. It is not; because if the committee is discharged the bill is then before the House as a privileged measure. The questions of the property of the second transfer of the seco tion now is upon discharging the Committee on Invalid Pensions from the further consideration of the bill.

The SPEAKER (having put the question). The ayes seem to have it. Mr. REAGAN. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. TOWNSHEND. I rise to a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. TOWNSHEND. If the consideration of these messages vetoing pension bills be now postponed—if the House determines not to act on those questions at this time-would that bring up for consideration the interstate-commerce bill?

The SPEAKER. That would depend altogether upon the subsequent action of the House.

Mr. TOWNSHEND. It is generally admitted that would be the re-

Al Ba Ba Ba Ba Ba Ba Ba Ba Ba

The SPEAKER. The question of consideration can be raised against the interstate-commerce bill as well as against others. The Clerk will call the roll.

The question was taken; and it was decided in the negative-yeas 90, nays 117, not voting 115; as follows:

So the House refused to discharge the committee from the further consideration of the bill.

During the roll-call,
Mr. BAYNE said: I move by unanimous consent that the reading of the names be dispensed with.

There was no objection, and it was so ordered.

Mr. LITTLE. Mr. Speaker, I am authorized to say that my colleague, Mr. McKinley, were he present and not paired, would vote "ay" on this question and similar ones.

Mr. O'NEILL, of Missouri, with Mr. PAYSON, for the remainder of the day.

The vote was then announced as above recorded.

INTERSTATE-COMMERCE BILL.

Mr. REAGAN. I move to proceed to the consideration of the special

order, which is the interstate-commerce bill.

Mr. PERKINS. I desire to call up a matter of privilege. I move that the Committee on Invalid Pensions be discharged from the further consideration of the bill H. R. 7257 granting a pension to James H. Dar-

The SPEAKER. Does the gentleman ask unanimous consent or

does he make a motion?

Mr. PERKINS. I make the motion that the committee be discharged from the further consideration of that bill.

The SPEAKER. Is it a vetoed bill? Mr. PERKINS. It is.

Mr. PERKINS. It is.
Mr. MATSON. Mr. Speaker, I ask that by unanimous consent we may come to some agreement to take up pension bills and the accompanying veto messages of the President which have been reported and

panying veto messages of the President which have been reported and are now upon the Calendar. And after those bills have been disposed of we can then take up the interstate-commerce bill.

Mr. REED, of Maine. That is all right.

Mr. TOWNSHEND. That is accepted.

Mr. MATSON. So far as the bills on the Calendar are concerned, it is the purpose of the committee and everybody else to consider them. Those which have not been reported have not been reported because

they have not yet been considered by the committee.

The SPEAKER. The gentleman from Indiana [Mr. MATSON] asks that by unanimous consent the House shall proceed to the consideration of pension bills with the veto messages now on the Calendar in the order in which they stand, and after they have been disposed of that then the House shall proceed to the consideration of the interstate-commerce bill. [Cries of "All right!"]

Mr. REAGAN. Are they to be debated?

The SPEAKER. The Chair can not answer that.

Mr. BURROWS. They are to be debated, of course.

Mr. REAGAN. Mr. Speaker, my experience here to-day shows me this agreement would be of no avail if these bills are every one of them to be open to debate.

Mr. MATSON. For the purpose of testing the sense of the House I ask that these bills be considered without debate. [Cries of "Regu-

lar order!"

Mr. REED, of Maine. That is not right. I wish an opportunity to say a word. Now, it is not fair to strip us of that opportunity by calling the regular order after two gentlemen have spoken on the other side. I wish to say we want these pension vetoes considered. We want them considered fairly in proportion to their merits. There is no disposition on this side to consume time except so far as necessary to elucidate these pension cases and bring them fairly and justly before the House. I make that statement as to my intention, and I believe it is the intention of every man on this side of the House. We have been bringing them up for that purpose and for no other.

Mr. REAGAN. Let us dispose of this interstate-commerce bill,

which will not take longer than fifteen minutes, and then we can go on

with the other bills to which the gentleman has referred.

Mr. REED, of Maine. These are privileged under the Constitution. We have a right to consider them, and they ought to be considered. As soon as they are considered there will be unanimous consent granted to take up the other bill.

Mr. REAGAN. Yesterday was spent in a proceeding which might have been completed in an hour or two. Every opportunity was taken

have been completed in an hour or two. Every opportunity was taken advantage of to prevent calling up the interstate-commerce bill. To-day every time I called that bill up a pension bill was up to antagonize it.

Mr. REED, of Maine. That is not correct.

Mr. REAGAN. This is a bill which the country has been demanding the passage of for fourteen years.

Mr. PERKINS. The Senate or Cullom bill is far better than the one the gentleman is advocating.

Mr. REAGAN. The interstate-commerce bill is one which affects the interest of sixty millions of people, yet gentlemen stand up here and antagonize it by privileged motions of small importance in themselves simply for the purpose of defeating it.

Mr. REED, of Maine. I deny that statement in toto. It has no foundation in the actual facts which have occurred before this House. If the gentleman does not get up his interstate-commerce bill and have

If the gentleman does not get up his interstate-commerce bill and have it considered it is because he objects to-day and will not consent to the fair proposition of the gentleman from Indiana.

Mr. REAGAN. I am ready to vote on it now and have been ready all the time, and the gentleman from Maine will not succeed in deceiv-

ing the country.

Mr. REED, of Maine. I do not intend to deceive anybody.

The SPEAKER. The Chair understands the gentleman from Indiana desires to submit a further modification of the proposition.

Mr. MATSON. I will further modify it by limiting the debate upon each bill to ten minutes on each side. [Cries of "Very well!" on the Republican side.]
Mr. REED, of Maine. I agree to that.
Mr. REAGAN. That will be acceptable to me.

Mr. BROWN, of Pennsylvania. That is fair. [Cries of "All right!" on the Republican side.]

Mr. BURROWS. Ten minutes on each side I think will be entirely satisfactory to this side of the House.

satisfactory to this side of the House.

Mr. REAGAN. Does that include the reading of the reports?

Mr. REED, of Maine. Not to include the reading of the reports.

Mr. WEAVER, of Iowa. That is a new modification not embraced in the request of the gentleman from Indiana.

The SPEAKER. The reports are not lengthy.

Mr. SPRINGER. I rise to a parliamentary inquiry. Is it not necessary, under the Constitution, to have a yea-and-nay vote upon the passage of each of these bills?

The SPEAKER. It is

The SPEAKER. It is.

Mr. SPRINGER. There are six bills on the Calendar; it will take

all day to-day and all day to-morrow to complete this order.

The SPEAKER. The Chair will submit the request of the gentleman from Indiana to the House. The gentleman asks unanimous consent to proceed to the consideration of the pension bills with the veto messages of the President now on the Calendar in the order in which they stand, debate upon each bill to be limited to ten minutes on each side, not to include the time of the reading of the reports.

Mr. WEAVER, of Iowa. That was not the proposition. Mr. REED, of Maine. But that will be necessary; the reports must

be read and will not consume much time.

Mr. REAGAN. That is a new modification.

Mr. REED, of Maine. There will be no objection on this side with the modification. The reports ought to be read.

Mr. MATSON. Any gentleman can have the report read in his own

Mr. REED, of Maine. You will obviate all objection on the part of everybody on this side if that arrangement will satisfy gentlemen over there.

Mr. MATSON. The trouble is there will be objections on this side.
Mr. REED, of Maine. That, of course, is a different matter.
Mr. HISCOCK. We will agree with the other side to stay here a

month if necessary to consider the interstate-commerce bill. [Derisive laughter and cries of "Oh!" on the Democratic side.]

Mr. SPRINGER. I ask unanimous consent to take a vote upon the

interstate-commerce bill now.

Several members objected.

Mr. BURROWS. Will the Chair state the proposition of the gentleman from Indiana?

The SPEAKER. The Chair understands that the gentleman from Indiana declines to modify his first suggestion.

Mr. MATSON. I do decline.

The SPEAKER. The Chair will again state, then, that the gentleman asks unanimous consent to proceed now to consider the pension bills with the President's veto messages on the Calendar in the order in which they stand, the debate upon each bill to be limited to ten minutes on each side, and when these bills are completed that the House proceed to consider the interstate-commerce bill.

Mr. O'NEILL, of Pennsylvania. I wish to ask a question for information whether that gives the interstate-commerce bill any headway more than it is entitled to now?

The SPEAKER. That is not a question for the Chair to determine. Mr. O'NEILL, of Pennsylvania. If it does I shall object, for I do not want to give it any precedence other than it will have under the care and management of the gentlemen from Texas, and if this arrangement will bring it up positively I certainly would not accede to it.

Mr. RYAN. The gentleman in that statement does not represent

Mr. RYAN. The g

Mr. REED, of Maine. I do not object, I want it understood. I am perfectly willing to agree to the suggestion made with the modification

that the reports be read.

Mr. O'NEILL, of Pennsylvania. I object to the arrangement.

Mr. O'NEILL, of Pennsylvania. I object to the arrangement.
Mr. HENDERSON, of Iowa. I rise to a parliamentary inquiry.
The SPEAKER. The gentleman will state it.
Mr. HENDERSON, of Iowa. Has the previous question been ordered on the interstate-commerce bill?

The SPEAKER. It has not.

Mr. REAGAN. I demand the regular order.

ONE II. of Pennsylvania. Let me ask for information again. Mr. O'NEILL, of Pennsylvania. Let me ask for information again. Perhaps I will withdraw the objection. I understand that ten minutes on each side is to be allowed for debate, not including the reading of the reports.

The SPEAKER. The gentleman from Indiana declines to modify

The SPEAKER. The gentleman from Indiana declines to modify it in that way.

Mr. O'NEILL, of Pennsylvania. At the suggestion of gentlemen around me I withdraw the objection.

Mr. CUTCHEON. I wish to make a parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. CUTCHEON. Would the reading of the reports come entirely out of the time occupied in favor of the bills?

The SPEAKER. The reading of the report in each case would come out of the time of any gentleman who chose to ask for its reading. They will not be read at all unless some gentleman asks for their reading in his own time. ing in his own time.

Mr. DUNN. I desire to ask another question. I would like to ask the gentleman from Pennsylvania, and generally other gentlemen on that side of the House, if it is understood that nobody on that side is in any manner to oppose the consideration of the interstate-commerce bill? [Cries of "No!"]

Mr. MILLIKEN. Why, you do not expect us to take that bill with-

out some modification or amendment?

Mr. DUNN. I object.
Mr. BROWNE, of Indiana. Let us have the regular order.
Mr. REAGAN. I understand agreement is asked to the proposition that the bills on the Calendar—
The SPEAKER. The regular order is demanded. The Chair can

not hear a word the gentleman from Texas says in consequence of the confusion on the floor. [Cries of "Regular order!"]

Mr. REAGAN. Objection is made to the arrangement, I believe?

The SPEAKER. Objection has been made.

The question is, Will the House discharge the Committee on Invalid Pensions from the further consideration of the bill the title of which the Clerk will report?

The Clerk read as follows:

Abill (H. R. 7257) granting a pension to James W. Darling.

Mr. REAGAN. On that I raise the question of consideration. The SPEAKER. There is no question of consideration. This is a motion to discharge the committee.

Mr. REAGAN. On that I demand the yeas and nays.

The yeas and nays were ordered.

ENROLLED BILL SIGNED.

Mr. PERKINS, from the Committee on Enrolled Bills, reported that the committee had examined and found duly enrolled a bill of the fol-

lowing title; when the Speaker signed the same:

A bill (H. R. 8974) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes.

JAMES H. DARLING.

The question was taken; and there were-yeas 87, nays 112, not voting 123; as follows:

Mr. BAYNE. I ask unanimous consent that the reading of the names be dispensed with.

Smalls.

There was no objection.

Dargan,

The following additional pairs were announced for the rest of the

Mr. LAWLER with Mr. BRADY.

Mr. SNYDER with Mr. LAIRD.

Mr. MATSON with Mr. SAWYER.

Mr. WALLACE with Mr. ZACH. TAYLOR.

The result of the vote was then announced as above stated.

ORDER OF BUSINESS.

Mr. REAGAN. I call up the special order. The SPEAKER. That has been already called up.

Mr. DUNN. I am satisfied the statement I made a few moments ago was not understood. I wish to repeat it-Mr. REED, of Maine. Regular order.

Mr. DUNN. I wish to repeat it, and then I shall withdraw my ob-ction. [Cries of "Regular order!"] I withdraw my objection. Mr. REED, of Maine. That is enough.

The SPEAKER. Objection is withdrawn to the request of the gentleman from Indiana [Mr. MATSON]. Is there any further objection?
Mr. BURROWS. Will the Chair please repeat what is the request?
Mr. REAGAN. I want to know if it is understood that when these pension bills have been voted on the interstate-commerce bill is to be taken un?

The SPEAKER. That is the request. The Chair was about to state it. The gentleman from Indiana [Mr. Matson] asks unanimous consent that the House proceed to the consideration in the order in which they stand on the Calendar of the pension bills with vetoes by the President; that ten minutes be allowed for debate on each bill on each side, and when the consideration of these bills is completed the House will proceed to the consideration of the interstate-commerce

Mr. O'NEILL, of Pennsylvania. I object to the latter part of the arrangement

Mr. BAYNE. I make the suggestion, Mr. Speaker, that it appears

to be in vain now to make efforts to bring up these bills—
Mr. O'NEILL, of Pennsylvania. I withdraw my objection for the

The SPEAKER. It is not enough to withdraw the objection for the present.

Mr. O'NEILL, of Pennsylvania. I want to know whether this arrangement, if it be agreed to, gives headway to the interstate-commerce

The SPEAKER. It is part of the arrangement that when the consideration of these pension bills is completed the House will proceed to the consideration of the interstate-commerce bill.

Mr. O'NEILL, of Pennsylvania. I am very much embarrassed. I want to see these pension bills passed over the President's veto, and I reluctantly withdraw my objection.

Mr. TAULBEE. I desire to ask a question with regard to this agreement. If the agreement is had, and the friends of any of these pension bills do not want them considered can they be passed over?

sion bills do not want them considered, can they be passed over?

The SPEAKER. When a bill comes up for consideration it can be postponed. There is consideration in some form or other to be completed. And so the interstaté-commerce bill, when it comes up, may be postponed by a vote of the House; but under the arrangement, after the consideration of the other bills is completed it will come up for consideration. The Chair hears no further objection to the arrangement. The Clerk will report the first pension bill on the Calendar returned by the President without his approval.

ANDREW J. WILSON.

The Clerk read as follows:

A bill (H. R. 7108) granting a pension to Andrew J. Wilson.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby, directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Andrew J. Wilson, late a private in Company F, Ninety-sixth Regiment New York Volunteers.

The SPEAKER. By order of the House twenty minutes are allowed for debate

Mr. REAGAN. Ten minutes.

The SPEAKER. Twenty minutes are allowed for debate, ten minutes on each side.

Mr. REAGAN. I did not so understand it.

The SPEAKER. The Chair stated it every time very distinctly. Mr. SAWYER. I desire to call the attention of the House to the facts in this case. I wish to state first that I am personally acquainted with the claimant in this case and with every witness who has given testimony before the Pension Office with the exception of three persons. The claimant, according to the undisputed evidence, was drafted in the month of March, 1862 or 1863, I have forgotten which year.

At the time he was drafted he claimed that he was exempt from the draft on account of his deafness and a spasmodic twitching of the eye which rendered it impossible for him ever to learn to read. He was notified that he must appear at the office of the provost-marshal in the city of Rochester. In accordance with that notice he appeared before the examining surgeon. Two gentlemen from the village of Albion, where the claimant lived, and where I have lived for forty years, were present. At the time he appeared before the provost-marshal two acquaintances of his were present; one of them, Mr. George W. Bedell, then a deputy in the provost-marshal's office, and the other a gentle-man named Spencer. They had known Wilson from his boyhood. They prepared certain papers for him, setting forth the disabilities which unfitted him for military service. Those papers were presented to the provost-marshal. He examined the papers, and then the surgeon proceeded to examine Wilson. After the examination the surgeon pronounced him "sound as a nut" (to use the language of Mr. Bedell), and said that he would make a good soldier, and he was ordered to report

Now I wish to call the attention of the House to the fact that in the

case of this man Andrew Wilson it can not be claimed that he was trying to procure the large bounty which was then being paid to volunreasons had never volunteered; but the Government, with its strong arm, took hold of him and said that he must enter the service, the examining surgeon, the agent of the Government, selected by it to examine every drafted man, reporting that he had examined him and prononneed him sound.

Wilson was ordered to report to the Ninety-sixth Regiment of New York Volunteers, in which regiment he did not know a solitary man. He went into the service and served in Virginia from March until September. Marching in the midst of storms, unprotected by blanket or tent, he contracted rheumatism, and he was also confined in the hos-

pital at one time for diarrhea.

At another time, going to the building in which the soldiers then had their barracks, in passing up an outer flight of stairs, the stairs broke and he fell and was injured. Still, the claim for pension is mostly on account of the rheumatism which he contracted in the service. He makes no claim whatever for deafness. In the month of September of the same year he was discharged on account of chronic nephritis, which, as I understand it, is some kind of a kidney difficulty, and also on account of deafness, and in the certificate of discharge the physician, who never had known him until he joined the regiment, made the statement that those disabilities had existed at the time of his enlist-ment. That is all the evidence there is in this case in any shape or form which refers to the disabilities having existed at the time of enlistment. I make this statement after a thorough examination of every paper in the case on file in the Pension Office.

The first point I make is this, that the Government having forced this man into its service, and the agent appointed by the Government to examine him having examined him and declared him sound at the time he entered the service, by all the rules of fairness and justice the Government ought now to be estopped from claiming that he was unsound at that time. I wish to appeal to every gentleman on this floor on both sides of the House to say whether it is right for the Government. ment when it lays its strong hand upon a man and drags him into its service, notwithstanding his protest that he is not liable to military duty on account of specific difficulties—whether it is right, after the Government forces him into the service and subsequently discharges him for certain disabilities, to turn around and say when he applies for a pension that those disabilities existed at the time when it forced him into the service.

Will the gentleman permit me a question?

Mr. SOWDEN. Mr. SAWYER.

Mr. SAWYER. Yes, sir.
Mr. SOWDEN. If this man was so disabled in the service I would like to know why he delayed making his application for a pension from

1865 to 1882, more than seventeen years?

Mr. SAWYER. I will answer the gentleman to the best of my ability. If the man was disabled when he left the service of the Government, and from that time until the present has been disabled, it is not fair for the Government to say to him, "You have deferred your application for a pension too long." During these seventeen years the man has not received one farthing of pension at the hands of the Government.

One further statement: It appears by the papers in the Pension Office that two examining boards have declared this man to be disabled, and the chairman of the board of review states in a certificate over his own

signature that the disability which the claimant proves by affidavit is the same disability for which he was discharged. The next point I desire to make is this: that the man when he entered the service was entirely sound, so far as regards any disease for which he claims a pension. He does not make claim for pension on ac-count of deafness, but he does on account of rheumatism. The claimant was a mason; and it appears by the testimony of men with whom he had worked for years that before entering the service of the Government he was a strong, able-bodied man, engaged daily in plastering walls and ceilings, handling heavy material and carrying large hods of mortar; that down to the time when he was drafted he was a sound and healthy man. It appears by the testimony of three men who have known him over twenty years that when he was drafted they had never heard of his having had anything like rheumatism. Yet at the Pension Office this claim was rejected on the ground that the disability existed at the time he was drafted.

Here the hammer fell.]

Mr. SAWYER. I will only add that the report of the Committee on Invalid Pensions is unanimous in favor of the passage of this bill not-

withstanding the veto.

The SPEAKER. The question is, Shall the bill pass, the objections of the President to the contrary notwithstanding? On this question the Constitution requires that the yeas and nays be taken. The Clerk will call the roll.

The question was taken; and there were-yeas 106, nays 85, not voting 131; as follows:

So (two-thirds not voting in the affirmative) the bill was not repassed.

Mr. SAWYER. Mr. Speaker, I had paired with the gentleman from Indiana [Mr. MATSON], not supposing that this bill would be reached; and that is the reason I have not voted. If not paired, I would vote

ay."
The following pairs were announced:
Mr. RANDALL with Mr. HARMER.

Mr. KING with Mr. GUENTHER, for the rest of the day.

Mr. DOCKERY with Mr. WARNER, of Missouri, for the rest of the day. Mr. RANDALL. I desire to withdraw my vote. I find I am paired with my colleague [Mr. HARMER], who, if present, would vote "ay." If at liberty to vote, I should vote "no."

The SPEAKER. On this question the yeas are 106, the nays 85.

I wo-thirds not having voted in the affirmative, the bill is not passed. The hour of 5 o'clock having arrived, the House now takes a recess until 8 o'clock, the evening session to be for the consideration of private bills in accordance with the special order.

EVENING SESSION.

The recess having expired, the House (at 8 o'clock p. m.) was called

to order by Hon. BENTON MCMILLIN, who directed the reading of the following communication:

SPEAKEE'S ROOM, HOUSE OF REPRESENTATIVES, July 29, 1886. Mr. McMillin, of Tennessee, is designated to preside as Speaker pro tempore for the session of the House of Representatives this evening.

JOHN G. CARLISLE, Speaker.

To Hon John B. Clark, Jr., Clerk House Representatives.

ORDER OF BUSINESS.

The SPEAKER pro tempore. The Clerk will read the resolution under which the House assembles to-night.

The order for the evening session was read.

Mr. SPRINGER. I move that the House resolve itself into Committee of the Whole for the consideration of bills on the Private Cal-

endar under the special order.

Mr. DUNN. Will the gentleman allow me, before that is done, to make a request for unanimous consent in order to reach a bill which probably can not be reached to-night under the order? I will take it as a great favor.

Mr. SPRINGER. I think we can facilitate matters by proceeding

under some sort of a rule.

Mr. DUNN. It is not likely that the committee will reach this bill on the Calendar-

Mr. SPRINGER. I want to make a suggestion when the Kouse re-solves itself into Committee of the Whole that I think will facilitate

I will state to the gentleman that this bill is simp to grant the right of way through the Indian Territory from Fort Smith to Albuquerque, and it is a measure which we have attempted to get through a number of Congresses. It is of great importance to the whole

Southwest for railroad purposes.

Mr. HOLMAN. Let it rest until toward the last, and we can then take it up later in the evening.

Mr. DUNN. I fear it can not be reached.

Mr. SPRINGER. I desire to ask unanimous consent of the House that we first consider Senate bills on the Calendar against the considthat we first consider Senate bills on the Calendar against the consideration of which objection may not be made, and then proceed to take up such House bills on the Calendar, either by unanimous consent or in their regular order, as we may reach.

Mr. PAYNE. How many Senate bills are there?

Mr. SPRINGER. The difficulty is, I will state, that the House bills

which pass now must go to the Senate and be referred to the respective

The Committee on Claims of that body will not hold any more sessions during the present session of Congress, and it will simply be a waste of time to send House bills to them, for they can not be considered there. It will also entail a great deal of labor upon the engrossing clerks of the House, especially at a time when they are already overwhelmed with the important and responsible work of engrossing the appropria-tion bills. All Senate bills that we pass can become laws this session, and it is with a view to facilitating that business that we have asked

and it is with a view to lacintating that business that we have asked
the session to-night.

Mr. HERMANN. Is it intended that these bills are to be taken up
in their order as they appear upon the Calendar?

Mr. SPRINGER. Certainly.

Mr. HERMANN. Then I would suggest also, unless the consideration
of such bills be asked for as their titles are read, that they be considered as passed over, retaining their places on the Calendar.

Mr. SPRINGER. I make that request.

Mr. PAYNE How many of these Senate bills are there?

Mr. PAYNE. How many of these Senate bills are there? Mr. SPRINGER. I do not know the number, not having counted them.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. PAYNE. I object to taking up the Senate bills exclusively.
Mr. SPRINGER. All I ask is that one hour be devoted to the Senate bills in their order on the Calendar, no bill to be considered unless some gentleman present asks its consideration when the title is read, and then if there is objection after the title is read, that it shall be laid aside to retain its place on the Calendar.

The SPEAKER pro tempore. Is there objection to the request of the

gentleman from Illinois?

Mr. CAMPBELL, of Pennsylvania. I object.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Illinois.

Mr. PRICE. I think there was no objection. The SPEAKER. Objection was made.

The motion of Mr. SPRINGER was agreed to.

The House accordingly resolved itself into Committee of the Whole,

Mr. HATCH in the chair.

Mr. SPRINGER. Mr. Chairman, before the first bill is reported I now renew my request that the first hour of this session to-night be devoted to the consideration of Senate bills on the Calendar in their regular order, and that no bill shall be considered to which there is objection, nor shall any bill be considered unless when its title is read some gentleman rises and asks its consideration.

To be taken up in their regular order? .

Mr. SPRINGER. Certainly.
The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection, and it was so ordered.

BILLS PASSED OVER.

The first Senate business on the Private Calendar was the bill (S. 574) for the relief of Robert Strachan.

Mr. NEAL. Mr. Chairman, this was reported by my colleague on the committee [Mr. GALLINGER]. I know he regards it as a meritori-ous case, and I would like to ask its consideration.

Mr. HEMPHILL. I will have to object to the consideration of that bill.

The CHAIRMAN. Objection being made, the bill retains its place on the Calendar.

The next Senate business on the Private Calendar was the bill (S. 390) for the relief of H. A. Meyers.

The bill was informally passed over.

KINSEY B. CECIL.

The next Senate business on the Private Calendar was the bill (S. 218) to confirm the title to certain lands in Platte County, Missouri, and authorize patents to be issued therefor to Kinsey B. Cecil.

Mr. BURNES. I ask consideration of that bill.

The bill was read, as follows:

The bill was read, as follows:

Whereas George Smith did, on the 9th day of April, A. D. 1862, make entry at the United States land-office at Booneville, in the State of Missouri, of the following described land situated in the county of Platte, in said State of Missouri, to wit: The northeast fractional quarter and the southeast fractional quarter (west of Bee Creek, section 31, township 53, range 35, containing 19.52 acres, per cash certificate numbered 38378, dated April 9, 1862; and
Whereas Joseph Meyer did, on the said 9th day of April, 1862, make entry at the said United States land-office at Boonville, Mo., of the following described land, to wit: The northwest fractional quarter of the northeast fractional quarter (west of Bee Creek), section 31, township 53, range 35, containing 1.73 acres, per cash certificate numbered 38377, dated April 9, A. D. 1862; and
Whereas the purchase-money for said fractions of land is still retained by the Government of the United States, and said lands have long since passed into the hands of innocent purchasers, who have occupied the same, paid taxes, and made valuable improvements thereon, having had no notice that said entries had been canceled until recently: Therefore,

Be ti enacted, &c., That the above-described entries be, and the same are, confirmed; and that patents are hereby authorized to be issued for said described lands to Kinsey B. Cecil, the assignee of said George Smith and Joseph Meyer.

Mr. HOLMAN. That is all right.

Mr. HOLMAN. That is all right. Mr. SPRINGER. Let it be laid aside.

The Senate bill was laid aside to be reported to the House with the recommendation that it do pass.

S. B. CRANSTON.

The next Senate business on the Private Calendar was the bill (S. 68) for the relief of S. B. Cranston, of Oregon.

Mr. HERMANN. I ask consideration of that bill. It involves a very small amount—only \$40.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay S. B. Cranston, of Oregon, the sum of \$40, on account of traveling and contingent expenses by him incurred in taking depositions in Oregon in the land case of William Bauermeister, as instructed by the Commissioner of the General Land Office, in 1877.

The Senate bill was laid aside to be reported to the House with the recommendation that it do pass.

FRANCIS GILBEAU.

The next Senate bill on the Private Calendar was the bill (S. 718) for the relief of Francis Gilbeau.

Mr. SAYERS. I ask consideration of that bill.

The bill was read, as follows:

Be it enacted, &c., That the sum of \$2,600 is appropriated, out of any moneys in the Treasury not otherwise appropriated, to be paid to the legal representatives of Francis Gilbeau, deceased, in full of claims against the United States for the rent of houses and other buildings belonging to said Gilbeau, and all damages to the same, in Galveston and San Antonio, Tex., during the years 1865 and 1866.

Mr. EDEN. Let the report be read.

Mr. SAYERS. I can state briefly the facts in this case. This bill has already passed both Houses in the Forty-sixth Congress, but was lost in transmission to the Executive. It was reported favorably by the House committees of the Forty-seventh and Forty-eighth Congresses and passed the Senate in the Forty-seventh, Forty-eighth, and now again in the Forty-ninth Congress

Mr. HOLMAN. What is the amount claimed? Mr. SAYERS. Two thousand six hundred dollars. Mr. HOLMAN. This occurred in 1865 and 1866 This occurred in 1865 and 1866, and I infer was prior to August 20, 1866.

I must insist on striking out the words "and damages," even if we

pay the rent.

Mr. SAYERS. There is really nothing provided for in the bill but

Mr. HOLMAN. As I listened to the reading of the bill I understood it provided for both damages and rent. We can not afford to recognize the principle of providing for damages, it seems to me. I shall only insist on striking out the word "damages." Mr. McMILLIN. I had occasion to examine this claim in the last

ongress. I considered it then, and do yet, a just claim.
Mr. HOLMAN. I think where the word "damages" occurs it

should be stricken out. Let the bill be read again,

The bill was again read.

Mr. HOLMAN. I take it for granted whoever examined this claim, the gentleman from Tennessee [Mr. McMillin] or any other gentleman from Tennessee [Mr. McMillin] or any other gentleman from Tennessee [Mr. McMillin] man in past years, would not have allowed anything for damages. is against the uniform policy of the Government. I ask that the word "damages" be stricken out.

"damages" be stricken out.

Mr. McMILLIN. My recollection is that all that was included in the bill in the last Congress was for rent.

The CHAIRMAN. The gentleman from Indiana offers an amendment which the Clerk will report.

Mr. HOLMAN. Rather I ask unanimous consent that the words "and all damages to the same" be stricken out.

There being no objection, the amendment was agreed to; and the bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

ORDER OF BUSINESS.

The CHAIRMAN. The Clerk will report the next bill. The Clerk read as follows:

A bill (S. 30) for the relief of Harry I. Todd, late keeper of the Kentucky penitentiary.

Mr. WARNER, of Ohio. Let me understand what is the order for this evening's proceedings. As I understand it, we consider only those bills that have friends. I will be riend this man and call for the consideration of the bill.

Mr. SPRINGER. I object to this bill.

The Clerk reported the title of the next Senate bill on the Calendar, as follows:

A bill (S. 699) to authorize the Secretary of the Interior to issue to George K. Otis duplicates of certain land-warrants lost while in the possession of the officers of the Government.

Mr. HERMANN. I ask for the consideration of this bill.

The CHAIRMAN. The Chair is informed by the Clerk that the bill can not be found at this moment.

Mr. PETTIBONE. I ask that until that bill is found we go on to the consideration of the next bill.

The Clerk read the title of the next Senate bill on the Calendar, as

A bill (S. 391) for the relief of A. A. Thomas.

The consideration of this bill was not called for.

J. A. HENRY AND OTHERS.

The Clerk read the title of the next Senate bill on the Calendar, as follows:

A bill (S. 289) for the relief of J. A. Henry and others.

Mr. RICHARDSON. I ask for the consideration of that bill. The bill was read, as follows:

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Treasury be, and he is hereby, authorized and directed, out of any money in the Treasury not otherwise appropriated, to pay to the following-named persons, or to their legal representatives, the following amounts due on their contracts with the United States, as appears by certified accounts on file in the Treasury Department:

To J. A. Henry, \$52.

To Robert Stevenson, \$54.

To L. T. Green, \$51.

To Masonic Hall Company, Atlanta, Ga., \$475.

To E. Rouff, \$45.

To E. C. Clements, \$200.

To R. W. Corbin, \$22.50.

To Mrs. M. J. Donahoe, \$345.50.

To Mrs. J. P. Williams, \$900.

To Miles S. Draughn, \$90.

And the said sums shall be in full of all claims or demands arising under the said contracts against the United States.

Mr. WARNER of Ohio. Let us have some explanation of this bill.

Mr. WARNER, of Ohio. Let us have some explanation of this bill.

Mr. WARNER, of Ohio. Let us have some explanation of this bill.

Mr. SPRINGER. Are these 4th of July claims?

Mr. RICHARDSON. No, sir; they are claims based upon contracts for the use and occupation of property. There is one of the cases, the facts of which I personally know, being in my own town—the claim of N. C. Blonton for \$430. The United States officers occupied the claimant's blacksmith shop after the close of the war during 1866 under a contract made with him by the quartermaster.

Mr. SPRINGER. Are they all contract claims?

Mr. SPRINGER. Are they all contract claims?
Mr. RICHARDSON. They are all contract claims. They have passed the Senate and have been reported favorably by the House committee a number of times.

Mr. WARNER, of Ohio. Have they been reported by the commit-

tee of this House favorably during this session?

Mr. RICHARDSON. I have the report here, made by Mr. KLEINEB, of Indiana, from the Committee on War Claims, during the present session, after the bill passed the Senate.

The bill was laid aside to be reported to the House with the recom-

mendation that it do pass.

ORDER OF BUSINESS.

The Clerk reported the title of the next Senate bill on the Calendar, as follows:

A bill (S. 498) for the relief of George T. Dudley.

Mr. BUCHANAN. This is a bill which has already been passed once during this session and signed by the President, and I believe it was

Mr. LYMAN. That bill has passed.

The CHAIRMAN. The Clerk will report the next bill.

The Clerk read the title of the next Senate bill on the Calendar, as

A bill (S. 605) for the relief the estate of J. J. Pulliam, deceased.

Mr. ZACH. TAYLOR. I ask for the consideration of that bill.

The bill was read.

Mr. SPRINGER. I object to the bill.

Mr. ZACH. TAYLOR. Will the gentleman state the ground of his objection?

Mr. SPRINGER. It is an unadjusted account.

Mr. ZACH. TAYLOR. It provides for a settlement by the officers of the Treasury

The CHAIRMAN. The bill being objected to, the Clerk will report the next bill.

JOHN M. M'CLINTOCK.

The Clerk read the title of the next Senate bill on the Calendar, as follows:

A bill (S. 936) for the relief of John M. McClintock.

Mr. SHAW. I ask for the consideration of this bill.

The bill was read, as follows:

The bill was read, as follows: $Be\ it\ enacted,\ de.$, That the Commissioner of Internal Revenue be, and he is hereby, authorized and directed to reopen and reconsider the claim of John M. McClintock for the refunding of certain taxes alleged to have been improperly and illegally assessed and collected, namely, for the amount of \$3,600, as claimed by him in the papers now on file in the Treasury Department; and if, upon reopening and reconsidering said claim, said Commissioner shall find said taxes, or any part of the same, to have been illegally or improperly assessed and collected from said claimant, it is hereby made his duty to audit and ascertain the amount of taxes so illegally and improperly collected from said claimant, deducting, however, any legal unpaid taxes which claimant should have paid and did not, if any there shall be, under section 103 of the act of June 30, 1864, entitled "An act to provide internal revenue to support the Government, to pay interest on the public debt, and for other purposes." And the Secretary of the Treasury is hereby authorized and required to pay, out of any money in the Treasury is hereby authorized and required to pay, out of any money in the Treasury is hereby authorized as foresaid to have been illegally and improperly assessed and collected, to the said John M. McClintock.

The bill was laid aside to be reported to the House with the recom-

The bill was laid aside to be reported to the House with the recommendation that it do pass.

GEORGE K. OTIS.

The CHAIRMAN. The Clerk will now report the bill which was passed over a short time ago.

The Clerk read as follows:

A bill (S. 699) to authorize the Secretary of the Interior to issue to George K. Otis duplicates of certain land-warrants lost while in the possession of the officers of the Government.

of the Government.

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby, authorized to issue to George K, Otis duplicates of three Porterfield land-warrants, issued in pursuance of the act of Congress approved April 11, 1860, numbered 16, 17, and 120, respectively, upon satisfactory proof of ownership and loss of the same, and the execution of a bond, with good and sufficient sureties, in double the market value of the warrants so to be issued, to be approved by the Secretary of the Interior, conditioned to indemnify the United States against the presentation by an innocent holder of the alleged lost warrants; and that said duplicates shall have all the legal force and effect as had the originals: Provided, That the Secretary of the Interior may require further proof of the loss of said land-warrants than that on file in his Department before issuing said duplicates.

Mr. McMILLIN. Let us hear some statement in explanation of the bill or have the report read. I want to know something concerning this claim

Mr. HERMANN. I will state briefly that this involves three land-warrants, amounting to 40 acres each, which were lost while in charge of the local land office. The object of the bill is to confer on the Sec-retary of the Interior authority to issue duplicate land-warrants on proper proof being produced of the loss of the original warrants and the execution of a proper refunding bond double the value of the landwarrants.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

ESTATES OF DECEASED KICKAPOO INDIANS.

The next Senate bill on the Private Calendar was the bill (S. 632) to provide for the settlement of the estates of deceased Kickapoo Indians in the State of Kansas, and for other purposes.

Mr. PERKINS. I ask for the consideration of that bill.

The bill was read, as follows:

Be it enacted, &c., That the beneficial provisions of the amended third article of the treaty between the United States and the Kickapoo tribe of Indians of Kansas, made June 28, 1862, and proclaimed May 28, 1863, be, and the same hereby are, extended to all adult allottees under said treaty, without regard to their being "males and heads of families," and without right on as to sex. SEC. 2. That where allottees under the aforesaid treaty shall have died, or shall hereafter decease, leaving heirs surviving them, and without having obtained patents for lands allotted to them in accordance with the provisions of said treaty, the Secretary of the Interior shall cause patents in fee-simple to issue for

the lands so allotted, in the names of the original allottees, and such allottees shall be regarded, for the purpose of a careful and just settlement of their estates, as citizens of the United States and of the State of Kansas; and it shall be competent for the proper courts to take charge of the settlement of their estates, under all the forms and in accordance with the laws of the State of Kansas, as in the case of other citizens deceased; and where there are children of allottees left orphans, guardians for such orphans may be appointed by the probate court of the county in which such orphans may reside; and such guardians shall give bonds, to be approved by the said court, for the proper care of the person and property of such orphans as provided by law.

SEC. 3. That where allottees under said treaty shall have died, or shall hereafter decease, leaving no heirs surviving them, and without having become citizens and received patents for their allotments, as provided in the third article of said treaty, the Secretary of the Interior shall cause to be appraised and sold for each, in such manner as he may direct, the lands of such allottees; and after paying the expense incident to such appraisement and sale, the net proceeds thereof shall be deposited in the Treasury of the United States to the credit of the said Kickapoo tribe of Indians, to be expended in such manner as the Secretary of the Interior shall cause patents in fee-simple to be issued for the lands sold under the provisions of the preceding section, in the same manner as patents are issued for public lands.

Mr. WARNER, of Ohio. I should like to hear the report, or else

Mr. WARNER, of Ohio. I should like to hear the report, or else an explanation of the bill.

Mr. PERKINS. I think a brief explanation will satisfy the gentleman. In the Forty-eighth Congress a bill passed both Houses and was approved by the President, providing for the sale of the Kickapoo reservation, in the State of Kansas and for allotments to male adults. Objection is now made to that bill because it does not provide for allotments to female adults, and also because it fails to make the other provisions contained in this bill. This amendment is prepared by the Commissioner of Indian Affairs and is recommended by the Secretary of the Interior, and is sent to Congress as an executive document. is designed for the purpose of carrying out and executing the act passed by the Forty-eighth Congress, and is what the Indians desire. There being no objection, the bill was laid aside to be reported to the

House with the recommendation that it do pass.

CHARLES F. BOWERS.

The next Senate bill on the Private Calendar was the bill (S. 224) for the relief of Charles F. Bowers.

Mr. LYMAN. I ask the consideration of that bill.

The bill was read, as follows:

The bill was read, as follows:

Whereas, on or about the 9th day of August, in the year A. D. 1862, Charles F. Bowers, then first lieutenant and regimental quartermaster of the Eighth Regiment of New Jersey Volunteers, did receive from George H. Weeks, then captain and assistant quartermaster of United States volunteers, the sum of \$230, being funds of the United States belonging to the Quartermaster Department of the Army, and was unable technically to "account" for the same as required by the rules of the Treasury Department, because of the loss and destruction of his official books and papers during the campaign of 1862 under Gen. John Pope; and Whereas it appears by the evidence on file in the Third Auditor's Office of the Treasury Department that the said money was nevertheless actually and lawfully disbursed by the said Charles F. Bowers in the execution of the duties of his said office, though unable to furnish formal vouchers therefor because of said loss and destruction of his said books and papers: Therefore,

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a credit for the said sum of \$230 be allowed to the said Charles F. Bowers by the proper accounting officers of the Treasury Department.

There being no objection, the bill was laid aside to be reported to the House with the recommendation that it do pass.

WILLIAM ERVIN.

The next Senate bill on the Private Calendar was the bill (S. 542) for the relief of William Ervin.

Mr. RICHARDSON. I ask for the consideration of that bill.

The bill was read, as follows:

Be il enacted, dc., That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to William Ervin, his heirs or assigns, out of any money in the Treasury not otherwise appropriated, \$7,650, being the value of one hundred and eighty head of beef-cattle seized unlawfully and taken out of his possession, in the State of Kansas, in the year 1862, by order of Col. Charles R. Jennison, commanding the Seventh Regiment Kansas Cavalry, United States Volunteers, said beef-cattle having been used as subsistence for the officers and soldiers of said regiment.

Mr. EDEN. I would like to hear some explanation of that bill. Mr. SPRINGER. I object to its consideration at this time. The CHAIRMAN. Objection is made. The Clerk will report the

next bill.

ORDER OF BUSINESS.

The following Senate bills were read by title and passed over, no one calling for their consideration:

A bill (S. 269) for the relief of W. H. Powell; A bill (S. 267) for the relief of Edway A. Grant; and A bill (165) for the relief of William H. Gray, of Kentucky.

MARTIN MURPHY AND P. B. MURPHY.

The next Senate bill on the Private Calendar was the bill (S. 22) for the relief of Martin Murphy and P. B. Murphy.

Mr. FELTON. I ask the consideration of that bill.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Treasury be, and hereby is, authorized and directed to pay to Martin Murphy and P. B. Murphy the sum of \$10,000, with interest at 4 per cent. per annum from the 18th of April, 1881, in full payment and satisfaction for the site of the light-house on Point Conception, on the Pacific coast, conveyed to the United States by the said Martin Murphy and P. B. Murphy by deed dated April 18, 1881; said sum to be paid out of un-

xpended balances of appropriations made for the support of the Light-House loard and light-houses for the fiscal years ending June 30, 1881 and 1882. Mr. McMILLIN. Mr. Chairman, reserving the right to object, I ask

to have the report in that case read.

Mr. FELTON. I will make a brief statement, which I think will obviate the reading of the report.

Mr. McKENNA. The Committee on Claims recommend that the allowance of interest be stricken out of the bill.

Mr. FELTON. I was about to state that.

The CHAIRMAN. The Clerk will report the amendment recommended by the Committee on Claims.

The Clerk read as follows:

Amend by striking out in lines 5, 6, and 7 the words "with interest at 4 per cent. per annum from the 18th of April, 1881."

Mr. FELTON. A bill has already passed the House and gone to the Senate appropriating this money, in connection with some eight thousand more, making altogether \$18,000. This bill has passed the Senate and has come here. The facts of the case are these: The clerk of the ate and has come here. The facts of the case are these: The clerk of the engineer of the twelfth light-house district embezzled some \$90,000 of the appropriation made for the payment of this and other claims. The amount of the embezzlement was about \$90,000, and the amount of the indebtedness was some \$86,000. No less than three commissions appointed by the Treasury Department have examined this claim, and in each instance they came to the conclusion, unanimously, that the amount claimed was properly due and payable for goods furnished and services rendered. Aside from this, the balance of the claim is for services rendered by employees mechanics and laborates. ices rendered by employés, mechanics, and laborers.

Mr. WARNER, of Ohio. I thought the bill stated that this pay-

ment was for property conveyed for light-house purposes; but from the gentleman's statement it seems that it is for services.

Mr. FELTON. I was referring to the bill that passed the House making an appropriation which included this item. That bill passed here and went to the Senate. All the items of the claim have been reported upon favorably.

Mr. PAYNE. What is this item for?

Mr. FELTON. This is for materials it

This is for materials furnished.

Mr. WARNER, of Ohio. That is not what the bill says. Mr. McMILLIN. I think the bill had better go over

The CHAIRMAN. Objection is made. The Clerk will read the next

Mr. WARNER, of Ohio. This a very different bill from the one to which the remarks of the gentleman from California [Mr. Felton] appear to relate.

Mr. FELTON. I was speaking about the other bill, in order to show gentlemen of the House that they had already passed this claim in another bill. I undertake to say—and I can not afford to say anything which is not true—that a juster claim than this never came before Congress. It has received the favorable consideration of both the House committee and the Senate committee; it has been reported upon by three commissions, and it has passed the Senate.

Mr. PETTIBONE. Is this bill designed alone to cover a deed made

by this party to the United States for a certain light-house site?

Mr. FELTON. Yes, sir.

Yes, sir. NE. Then, if that is the whole case, we are all in Mr. PETTIBONE. favor of it.

Mr. HOLMAN. I understood the gentleman to say— Mr. FELTON. Allow me one moment. The bill which was passed by the House comprised other items; it included \$8,000 more for materials furnished.

Mr. HOLMAN. But it covered this also?

The CHAIRMAN. The gentleman from California [Mr. Felton] and the gentleman from Indiana [Mr. Holman] are not in order. Objection having been made, the bill is not before the committee.

The Clerk read the title of the next Senate bill, as follows:

A bill (8.570) for the relief of Jabez Burchard.

Mr. FELTON. I object.

The Clerk read the title of the next Senate bill, as follows:

A bill (S. 187) for the relief of Frederick W. Ruggles, of Westport, Nova

Mr. FELTON. I object.
Mr. SPRINGER. It is unnecessary for us to stay here and go through the Calendar if gentlemen are going to object to each bill as reached. I give notice that if we can not go on in good faith in the consideration of bills I shall move that the committee rise and the House adjourn. There is no use for us to remain here for the purpose of indulging in child's play. If the gentleman from California is going to object to every other bill simply because some gentleman here in the exercise of his rights as a member thinks that the bill just under consideration ought not to pass, then it is useless for us to continue this proceeding.

Mr. FELTON. If the gentleman objecting will give some reason why he objects, I will not press the matter further—

Mr. SPRINGER. It is unnecessary for him to give any reason. Mr. FELTON. But to have a bill objected to without a particle of reason, or to have the House stultify itself by refusing to pass this bill after having already passed the same claim in connection with other matters, is a style of legislation I do not understand.

Mr. McMILLIN. The gentleman, I think, loses his temper, if I may be permitted to say so, in an uncalled-for way. It will be shown by the RECORD when printed that the statement he has made does not apply to the claim which was read; and this being the case, any member ought to have the right to object, and I shall certainly not fail to exercise that right. I say this without any unkind feeling toward the Mr. PETTIBONE. But in answer to my question the gentleman cleared the matter all up. Why not now withdraw the objection?

Mr. McMILLIN. Let us have the report read.

Mr. BINGHAM. That is right.

Mr. McMILLIN. It may show what the

this on the Calendar, and meanwhile the gentleman from Tennessee [Mr. McMillin] can examine this bill. I am willing that the bill of the gentleman from California be brought up later in the evening by unanimous consent after gentlemen have had an opportunity to exam-

The CHAIRMAN. The Clerk will read the report.

Mr. SPRINGER. I ask unanimous consent that this bill be passed over for the present.

Several members objected.

The report (by Mr. McKenna) was read, as follows:

The report (by Mr. MCKENNA) was read, as follows:

The Committee on Claims, to which was referred the bill (S. 22) for the relief of Martin and P. B. Murphy, has considered the same, and report as follows:

That the claim in said bill is contained in House bill 190, and was reported favorably after due consideration. The committee therefore recommends the passage of the bill with the following amendment: Strike out the words "with interest at the rate of four per cent. per annum from the eighteenth day of April, eighteen hundred and eighty-one," in lines 3, 4, and 5.

Mr. McMILLIN. It will be observed that the report fails to shed any light on this matter. Is there a copy of the Senate report which speaks more explicitly in regard to the circumstances connected with

The CHAIRMAN. Objection being made, the Clerk will report the next bill on the Calendar.

Mr. WARNER, of Ohio. This goes over.

The CHAIRMAN. The bill is not before the committee.

Mr. SPRINGER. I am willing that by unanimous consent the bill be brought up later in the evening if gentlemen who now object should think, after examining it, that it ought to pass.

JABEZ BURCHARD.

The CHAIRMAN. The Clerk will again report the two bills which were read by title a few moments ago.

The next business on the Private Calendar was the bill (S. 570) for the relief of Jabez Burchard.

Mr. BINGHAM. I call for the consideration of this bill.

The bill was read, as follows:

Be it enacted, &c., That the proper accounting officers of the Treasury be, and they are hereby, authorized and directed to allow to Jabez Burchard, assistant engineer on the retired-list of the United States Navy, an amount which, with payments heretofore made to him, will be equal to 75 per cent. of the sea-pay of the grade or rank held by him at the date of his retirement by a naval board of the United States Navy; said amount to be paid out of any money in the United States Treasury not otherwise appropriated, and to take effect from and after the date of his retirement by said naval board.

The CHAIRMAN. If there be no objection, this bill will be laid aside to be reported to the House with a recommendation that it do

Mr. WARNER, of Ohio. Let us have the report read or let some

explanation be given.

The CHAIRMAN. The report will be read.

Mr. WARNER, of Ohio. The right to object is, of course, reserved.

The report (by Mr. SOWDEN) was read, as follows:

The Committee on Claims, to which was referred the bill (5.570) for the relief of Jabez Burchard, reports the same back to the House with the recommendation that the same do pass without amendment, and refers for its action to Report No. 875, accompanying House bill 2026, which has for its object the same pur-

Mr. WARNER, of Ohio. Is that all there is of it?
Mr. BINGHAM. That is the full report.
Mr. WARNER, of Ohio. That merely explains some other report.
Mr. SPRINGER. This bill has been recommended twice by the
Committee on Claims. First the House bill was reported. The Senate having passed the same bill, the committee next reported back the Senate bill and adopted the former report which accompanied the House

Mr. WARNER, of Ohio. That is the Senate report which was read. You have explained what the committee did. Now let us have an explanation of the case.

The CHAIRMAN. Is there objection?

Mr. WARNER, of Ohio. Let the gentleman tell us what this case is. Mr. BINGHAM. The report was submitted by my colleague [Mr. SOWDEN]. I have no details with me now. It has been recommended by the Senate and House. The report is unanimous. I hope it will be passed.

Mr. SPRINGER. Let the Clerk read the report, 975, accompanying the House bill.

The Clerk proceeded to read the report.

Mr. WARNER, of Ohio (interrupting). This is evidently rerating man on the retired-list. I object without further reading

The CHAIRMAN. Objection being made, the Clerk will read the next bill on the Calendar.

FREDERICK W. RUGGLES.

The next Senate bill on the Private Calendar was the bill (S. 187) for the relief of Frederick W. Ruggles, of Westport, Nova Scotia; reported adversely from the Committee on War Claims by Mr. LYMAN.

Mr. DOCKERY. That is an adverse report, and there is no use

spending any further time on it.

Mr. BAYNE. I object.

WILLIAM J. SMITH.

The next Senate bill on the Private Calendar was the bill (S. 13) for the relief of William J. Smith, late surveyor of customs for the port of Memphis, State of Tennessee.

Mr. ZACH. TAYLOR. I ask for the consideration of that bill.

The bill was read, as follows:

The bill was read, as follows:

Be it enacted, &c., That in the settlement of the accounts of William J. Smith, formerly surveyor of customs at the port of Memphis, State of Tennessee, the proper accounting officers of the Treasury be, and are hereby, authorized and directed to credit the said William J. Smith with the sum of \$2,004.99 in the settlement of his accounts as late surveyor of customs, on account of the embezzlement and defalcation of N. D. Smith, deputy to the said surveyor, he being no relative, and it clearly appearing that the embezzlement and defalcation were no fault of the surveyor.

There was no objection, and the bill was laid aside to be reported to the House with the recommendation that it do pass.

SEWELL COULSON, AND PORTER, HARRISON & FISHBACK.

The next Senate bill on the Private Calendar was the bill (S. 249) for the payment of Sewell Coulson, and Porter, Harrison & Fishback for legal services

Mr. BROWNE, of Indiana. I ask for the consideration of that

Mr. BYNUM. I object.

PHŒNIX NATIONAL BANK.

The next Senate bill on the Private Calendar was the bill (S. 1599) for the relief of the Phœnix National Bank of the city of New York.

Mr. JAMES. I ask for the consideration of that bill.

The bill was read, as follows:

Be it enacted, &c., That the sum of \$29,624.35 be, and the same hereby is, appropriated, out of any moneys in the Treasury of the United States not otherwise appropriated, to enable the Secretary of the Treasury to reimburse to the Phenix National Bank, of the city of New York, the amount paid by said bank in satisfaction of two certain judgments obtained against said bank in the supreme court of the State of New York, on the 14th day of February, 1878, and on the 20th day of November, 1879, in an action brought against said bank by David Risley to recover a certain deposit which had been illegally seized and confiscated by the United States of America.

Mr. HOLMAN. There should be some explanation of that bill. I also would like to have the report read.

Mr. JAMES. I will briefly explain the bill.
Mr. HOLMAN. Of course the right to object is retained.
Mr. JAMES. Prior to the civil war the Bank of Georgetown, of Georgetown, S. C., in its regular order of business, had on deposit with the Phoenix Bank, of the city of New York, a sum of money, which was confiscated and covered into the Treasury of the United States by action of the United States district court. Subsequently a demand was made on the bank for the money. Suit was instituted and decided in the supreme court of the State of New York. It was decided the bank should pay the money again. It went to the court of appeals in the State of New York, and on writ of error went to the Supreme Court of the United States. It appears from the report accompanying the bill that the conduct of the case on the part of the Phœnix Bank in the Supreme Court of the United States was submitted to the Department ustice, both in the brief in advance of the oral argument and at the oral argument, and the defense was approved by the Department as

wholly satisfactory. Mr. SPRINGER. To the Government of the United States?

Mr. JAMES. Yes; was covered into the Treasury. Mr. SPRINGER. How much? Mr. JAMES. The amount was \$12,117.78.

Mr. SPRINGER. No interest was allowed?

Mr. JAMES. No interest. Mr. HOLMAN. But I see

But I see the amount of the allowance is \$29,000. Mr. JAMES. That includes the expense of litigation and necessary incidentals.

Mr. SPRINGER. The only amount the Government should pay is the amount which the Government received.

Mr. HOLMAN. The bill provides for \$29,000.

Mr. SPRINGER. How much did the Government get? Whatever that amount is that is the amount we ought to pay back.

Mr. JAMES. It is only fair we should reimburse the bank the expenses of litigating and defending the suit.

Mr. SPRINGER. I think that involves a great many questions, whether the expense is legitimate or reasonable, and I object to passing anything but the amount received by the Government. If the gentleman will accept that amendment I will have no objection to the bill.

Mr. JAMES. I could not accept that amendment.

The CHAIRMAN. Does the gentleman object?

Mr. SPRINGER. I do, unless the amendment is made.

The CHAIRMAN. The Clerk will report the next bill on the Cal-

Mr. JAMES. Under the advice of some of my friends I am content to let the gentleman submit the amendment, and then permit the bill to go to the committee of conference in that shape with the hope that

they will remedy the injustice.

Mr. SPRINGER. The Senate will have to call for a conference.

Mr. JAMES. If the amendment is offered I shall not object to it.

Mr. SPRINGER. Then I move to strike out the amount fixed in the bill, \$29,635, and insert \$12,117.38; and add the words "this to be in full for all demands against the United States."

The amendment was agreed to.

The bill as amended was laid aside to be reported to the House with

the recommendation that it do pass.

Mr. BUCHANAN. I only wish to add that I reported this bill, and think it due to myself to say that it met the unanimous approval of the Committee on Claims.

ALBERT H. EMERY.

The next Senate bill on the Private Calendar was the bill (S. 929)

for the relief of Albert H. Emery.

Mr. BUTTERWORTH. Let that be considered. I understand it has been reported unanimously from the committee.

The bill was read at length.

Mr. BUTTERWORTH. I understand that bill is to be amended.

Mr. TRIGG. I do not like to object to the consideration of that bill, but there is a minority report recommending an amended bill; and if it is to be considered I shall ask consent to substitute that bill.

Mr. BUTTERWORTH. I understand the committee have reported it back with an amendment reducing the amount.

Mr. TRIGG. Yes; reducing the amount to \$60,000.
Mr. SPRINGER. I must object. If we are going to amend this bill we will never get through with it to-night.

The CHAIRMAN. Objection being made, the Clerk will report the

next Senate bill.

Senate bill No. 94, for the relief of Mrs. Sarah Elizabeth Holroyd, was read by its title, and passed over informally, retaining its place on the Calendar.

THOMAS P. MORGAN, JR.

The next Senate bill on the Private Calendar was the bill (S. 972) for the relief of Thomas P. Morgan, jr. Mr. McCOMAS. I ask consideration of that bill.

The bill was read, as follows:

Be it enacted, &c., That the sum of \$4,898.04 be, and the same is hereby, appropriated to Thomas P. Morgan, jr., this sum being the amount of work done by him on the Norfolk Harbor in the years 1881 and 1882, and declared forfeited to the United States by reason of the failure of said Morgan to perform his said contract within the time specified in his contract.

Mr. McCOMAS. The claimant in this case did the work and earned the money, and the only question is that it was not completed within the time fixed by the contract. Stormy weather prevented him from doing it within the time, but it was finally completed and accepted.

Mr. SPRINGER. I think that is a correct statement of the case. I have examined this case myself and know the facts in reference to it.

Mr. WARNER, of Ohio. Is there a report accompanying the bill? Mr. SPRINGER. There is a report accompanying it, but the facts

are very brief and can be stated in a few words.

Mr. WARNER, of Ohio. If I recollect aright this bill was under discussion in the Forty-sixth Congress, and was defeated. Am I correct in

Mr. BUTTERWORTH. Very likely, if we owed it. [Laughter.] Mr. McCOMAS. I was not a member of that Congress, but I know the work was done and the money was not paid. I understand this is unanimously reported by the Senate and also by the House committee.

It is a very plain case.

Mr. WARNER, of Ohio. They are all plain cases so far as that goes.

Mr. SPRINGER. I think I can satisfy the gentleman in a word.

This contract required this dredging to be done within a certain time; but owing to inclement and stormy weather it was not finished within the time, but he did subsequently finish it and to the full satisfaction of the Government only as to the time. The work was done and the penalty was reserved under the law.

Mr. WARNER, of Ohio. This is not the case I thought it was.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

ORDER OF BUSINESS.

Bills of the Senate numbered 472, reported adversely from the Committee on Claims, and 2132, granting a pension to Fridoline Glasstetter, were informally passed over.

PAY OF CERTAIN PHYSICIANS.

The next Senate bill on the Private Calendar was the bill (S. 304) to compensate physicians for services rendered under an order of the United States court of the northern district of Alabama. Mr. WHEELER. I ask consideration of that bill.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Treasury be, and is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of \$400, jointly, to the following physicians: A. R. Erskine, J. J. Dement, H. W. Bassett, and A. R. Burnett; said sum of money to be received by said physicians jointly, as full compensation for all services rendered by them, pursuant to an order of the judge of the circuit court of the northern district of Alabama, in the conspiracy case in which F. M. Noogin and Berry O. Wood are defendants.

The bill was laid aside to be reported to the House with the recommendation that it do pass

Mr. PRICE (at five minutes after 9 o'clock). I desire to call attention to the fact that the hour has expired.

The CHAIRMAN. The hour commenced at ten minutes after 8. BOARD OF FOREIGN MISSIONS METHODIST PROTESTANT CHURCH.

The next Senate bill on the Private Calendar was the bill (S. 1008) to empower the Board of Foreign Missions of the Methodist Protestant

Church to hold property in the District of Columbia.

Mr. HEMPHILL. I ask consideration of that bill.

The bill was read, as follows:

The bill was read, as follows:

Whereas the Board of Foreign Missions of the Methodist Protestant Church was incorporated in the year of our Lord 1852 in accordance with the laws of the State of Pennsylvania; and

Whereas it is questioned whether said corporation can lawfully take and hold property in the District of Columbia without the leave and assent of Congress:
Therefore,

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Board of Foreign Missions of the Methodist Protestant Church, which is incorporated by the laws of Pennsylvania, is hereby empowered to hold real and personal property in the District of Columbia, acquired, or that shall be acquired, by gift, purchase, devise, or bequest, and the same enjoy or convey at pleasure as freely as any person or body corporate can do.

The committee recommend the following amendment:

Add to the bill the following proviso:
"Provided, That only so much real estate may be held by the said board of foreign missions as may be necessary for the proper transaction of its legitimate business, not to exceed an assessed value of \$50,000."

Mr. HEMPHILL. I think that amendment is unnecessary. Mr. HOLMAN. It seems to be a very proper amendment. The amendment was agreed to.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

MARTIN AND P. B. MURPHY.

Mr. FELTON. Before the time for the consideration of Senate bills expires I ask that the bill (S. 22) for the relief of Martin and P. B. Murphy, which I called up some time ago, be again brought before the committee.

The CHAIRMAN. The gentleman from California again calls up the bill to which the gentleman from Tennessee [Mr. McMillin] objected. Does the gentleman from Tennessee [Mr. McMillin] still object?

Mr. McMILLIN. I said at the time the bill was called up I was

willing the report should be read.

The following report (by Mr. McKenna) was read:

The Committee on Claims, to whom was referred the bill (H. R. 190) for the relief of certain employés and others of the twelfth United States light-house district, having had the same under consideration, report as follows:

That some of said claimants were employés of, and others furnished materials for the use of, said light-house district. The claims were ordered to be paid, but were not, because the money was embezzled by John T. Best, the clerk of the engineer. Best was convicted of the embezzlement. The letter from the Secretary of the Treasury hereto attached explains and shows that the bill should pass. We therefore recommend its passage.

TREASURY DEPARTMENT, February 21, 1883.

TREASURY DEPARTMENT, February 21, 1883.

SIR: I have the honor to transmit herewith a copy of a letter of the 24th ultimo from the Light-House Board, with inclosure, in regard to claims against the United States arising from the defalcations and forgeries of John T. Best, late clerk of the engineer of the twelfth light-house district, from which it appears that the total amount of said claims, so far as known. is \$76,152.07, of which \$18,465.65, after careful examination, is believed to be indisputably due, and \$57,686.42 to require further evidence and investigation before payment. The board recommends that the latter class of claims be referred, under section 1063, Revised Statutes, to the Court of Claims for ascertaining of the legal liability of the United States and final judgment, and that application be made to Congress for necessary legislation to enable the board to discharge the claims included in the first class, in regard to which it is believed no question can arise from any available balances belonging to general appropriations for the light-house establishment for the fiscal years 1831-32. The claims thus recommended to be paid are as follows, namely:

Employés Point Conception light

Employés Point Conception light	\$3,784	70
Miguel Ortego	480	14
Charles Ashton	270	00
Pigeon Point light station	980	99
Sundry small bills*	1,200	95
Martin and P. B. Murphy	10,000	00
O. B. Shaw	1,748	
		_

I have accordingly respectfully to transmit this communication so that action may be taken by Congress in the matter if it appears wise to do so agreeably to the desire of the Light-House Board.

Very respectfully,

H. E. EDENCH, Asting Secretary

H. F. FRENCH, Acting Secretary.

Hon. J. Warren Keifer, Speaker of House of Representatives.

The CHAIRMAN. Is there objection to the present consideration of the bill?

Mr. HOLMAN. This bill I believe covers \$10,000 of the amount. Mr. FELTON. Yes, sir; the amount is \$10,000. The bill that passed the House was for \$18,000. This bill for \$10,000 has passed the Senate.

Mr. HOLMAN. If I can have the ear of the committee for a moment I will explain the position of this claim. It is quite apparent from the statement of the Light-House Board that this \$10,000 should be paid. We owe that amount for this property. But that \$10,000 is included in a bill which passed some time ago and is now before the Senate appropriating \$18,000, the \$10,000 being part of that. The thing to be apprehended is that the bill for \$18,000 will pass the Senate, and by passing this bill another \$10,000 is appropriated.

Mr. FELTON. The bill in the Senate in all human probability will If it does pass we will see that it is amended by striking out the \$10,000. I do not think any of us can afford to take \$10,000 improperly out of the Treasury.

Mr. EDEN. My recollection is that this is to pay for some land. Is that the indebtedness referred to in the report that has been read?

Mr. FELTON. It is included in the \$18,000.

The CHAIRMAN. The question is on the amendment submitted by the committee to strike out the words "with interest at the rate of 4 per cent. per annum from 18th of April, 1881," in lines 3, 4, and 5.

The amendment was adopted.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

ORDER OF BUSINESS.

The CHAIRMAN. The hour allotted for the consideration of Senate bills has expired.

Mr. SPRINGER. I ask unanimous consent that we extend the time for half an hour longer. I think in that time we may perhaps get through all the Senate bills on the Calendar.

Mr. TRIGG. I object.

ORDNANCE STORES FURNISHED TO COLORADO.

Mr. SYMES. I ask unanimous consent to consider Senate bill No. A duplicate bill of that which has passed the Senate, the bill H.

885. A duplicate bill of that which has passed the Senate, the bill H.
R. 5215, has been recommended by the House committee.
The CHAIRMAN. The Chair is informed that the Senate bill called up by the gentleman from Colorado is not on the Calendar.
Mr. SYMES. The House bill (H. R. 5215) is on the Calendar.
The CHAIRMAN. The Clerk will report the special order under which the House meets this evening.
The special order for the evening session was read.
Mr. SYMES. I ask unanimous consent that the Committee on Claims had isobarred from the further consideration of the bill S. 885, and that

be discharged from the further consideration of the bill S. 885, and that it be brought before the committee for consideration and substituted for the House bill. It takes no money out of the Treasury.

Mr. BAYNE. I call for the regular order.

The CHAIRMAN. This is the regular order if no objection is made to the consideration of the bill. The gentleman from Colorado asks unanimous consent to call up for consideration the House bill which is upon the Calendar, and to substitute therefor the Senate bill indicated by him, discharging the Committee on Claims from its further consideration.

Mr. McMILLIN. Let us hear the bill read. The CHAIRMAN. The Clerk will report the House bill. The Clerk read as follows:

A bill (H. R. 5215) to relieve the State of Colorado from charges on account of ordnance stores furnished to the State and Territory.

Be it enacted, &c., That the Chief of the Ordnance Bureau of the War Department be, and he is hereby, directed to cause the State of Colorado to be credited on its ordnance account with the amounts now charged against it for arms and ordnance stores issued to the Territory of Colorado and State of Colorado.

The Committee on Military Affairs recommended the following

In line 5 strike out the word "amounts."
In lines 6 and 7 insert "amount of \$33,891,"
In line 8 strike out the words "Territory of Colorado;" so that it will read:
"Directed to cause the State of Colorado to be credited on its ordnance account with the amount, \$33,891, now charged against it for arms and ordnance stores issued to the State of Colorado."

The CHAIRMAN. For this bill the gentleman from Colorado asks that the Senate bill be substituted. The Senate bill will be read. The Senate bill was read, as follows:

A bill (S. 885) to relieve the State of Colorado from charges on account of ordnance stores furnished to the State and Territory.

Be it enacted, &c., That the Chief of the Ordnance Bureau of the War Department be, and he is hereby, directed to cause the State of Colorado to be credited on its ordnance account with the amounts now charged against it for arms and ordnance stores issued to the Territory of Colorado, amounting to \$33,891.

Mr. McMILLIN. I think we should have the report read or that

some statement should be made.

Mr. SYMES. The Military Committee of the House and also the Military Committee of the Secretary of War and the Chief of Ordnance for information on the subject. They have reported the information, and stated that this amount should be credited to the

State of Colorado, because these arms and munitions of war issued to the governor under the direction of the military officers of the United States were used in Indian wars, and there is no reason why the State should not be credited with the amount. It takes no money out of the Treasury, and the Government would be laughed at if it attempted to refuse this credit. A dozen such bills have passed here.

The bill was laid aside to be reported to the House with the recom-

mendation that it do pass.

The House bill was ordered to be reported with the recommendation that it do lie on the table.

Mr. MORRISON. I ask to call up the bill which I send to the desk. Mr. BAYNE. I demand the regular order.

Mr. SPRINGER. I hope the gentleman from Pennsylvania will not call for the regular order now. Let us go on for a while considering Senate bills which members desire to call up.

Mr. BAYNE. Mr. Chairman, as I understand, the Calendar is to be called, and when a gentleman rises and asks for the consideration of a

bill, that bill is to be considered unless objected to.

The CHAIRMAN. That was the order made by unanimous consent with reference to Senate bills for one hour; but that hour has expired.

Mr. SPRINGER. I now ask, Mr. Chairman, that half an hour more be devoted to proceeding in the same way.

Mr. REED, of Maine. Mr. Chairman, there is a class of bills which have gone through both the House and the Senate and have been amended in the Senate; and it would seem proper that those bills should be first considered, because they are nearest passing. I therefore ask that bills of that class be considered first.

Mr. SPRINGER. That is what I propose, that we first consider bills that have passed the Senate and are favorably reported to the

Mr. MORRISON. That is the kind of bill I sought to call up.
The CHAIRMAN. The regular order is demanded. The Clerk will report the first House bill.

Mr. SPRINGER. Mr. Chairman, it is useless to begin that order of business, for we shall simply lose the remainder of the evening without

any good result. I therefore move that the committee do now rise.

Mr. TAULBEE. I call for the regular order.

Mr. SPRINGER. I want to call the attention of the committee to the fact that House bills which are now passed can not get through this session, while Senate bills that have come here from the Senate can?

Therefore I think we had better devote our time to the consideration of bills which have passed the Senate and have been reported to the House. [Cries of "Regular order!"] The Senate committees will not assemble any more this session to consider bills that are sent over from the House. In the interest of facilitating business I think we had better devote ourselves to such bills only as can become law this session. [Cries of "Regular order!"] I move that the committee do now rise.

Mr. PRICE. Mr. Chairman, I desire to make a suggestion. Would it not be good policy to take up the class of bills that do not involve the appropriation of any money, but simply authorize the parties to go to the Court of Claims? Having devoted an hour to the other class of bills, it seems to me that it would be well to give this class some atten-

tion, and that the most good would be accomplished in that way.

Mr. SPRINGER. If they are Senate bills they can pass; if they are

House bills they can not pass this session.

Mr. PRICE. The gentleman has no right to say that they can not pass the Senate this session. I have assurances that some of them at

pass the Senate this session. I have assurances that some of them at least can be got through in this way.

Mr. DOCKERY. Mr. Chairman, it is evident that the House has passed as many Senate bills as the President can examine.

Mr. BINGHAM. What do you know about that?

Mr. DOCKERY. We have passed as many as the President can examine, and if we press these Senate bills through now the chances are that they will meet a pocket veto.

Mr. GIBSON, of Maryland. Let us take the chances.
Mr. DOCKERY. We want to consider some of the House bills on
the Calendar, and I suggest that we have unanimous consent that gentlemen present who desire to call up bills may be permitted to do so, with this additional understanding, that gentlemen who have called up Senate bills this evening and got them passed shall modestly refrain from pressing other bills upon the attention of the House, and let us who have not occupied any time call up bills that we desire to have passed.

Mr. BUCHANAN. Mr. Chairman, there is this objection to that suggestion. The members of the committee have worked very laboriously during this session at the solicitation of members of the House example. ining and reporting their bills. Now, whenever we proceed here in the manner suggested by the gentleman from Missouri [Mr. DOCKERY], gentlemen generally are so clamorous for recognition that the members of the committee are crowded out. I noticed a few minutes ago that of all the gentlemen who were clamoring to be recognized by the Chair not one was a member of our committee. We also have our bills for which we would like to have recognition in some way. The very next bill on the Calendar, and one that would have been reached but for the delay that has occurred, is a bill that I desire to have action on

to-night. It is a Senate bill. Notwithstanding the number of bills that I have reported to the House, I have not asked for unanimous consent except in one instance, and then it was objected to.

Several MEMBERS. Ask it now.

Mr. BUCHANAN. I do ask it now.

Mr. BAYNE. Mr. Chairman, I wish to make a suggestion. I desire to say that bills on the House Calendar that are taken up now and passed will occupy a better position than the Senate bills that are passed. because if Congress adjourns on the 2d of August the Senate bills will not be in the President's hands long enough—— [Cries of "Regular not be in the President's hands long enough-

Mr. BAYNE. I ask unanimous consent that the Calendar be called, and that when a gentleman rises and asks for the consideration of a bill it shall be considered unless objected to, and that otherwise it shall be passed over retaining its place on the Calendar.

The CHAIRMAN. The gentleman from Illinois [Mr. SPRINGER] asks unanimous consent that the time for the consideration of Senate bills may be extended thirty minutes. Is there objection?

Mr. TRIGG. I object.

The CHAIRMAN. The gentleman from Illinois now moves that the committee rise

Mr. SPRINGER. And report to the House the bills which have already been acted upon.

Mr. TRIGG. I hope the gentleman will not insist on that motion.
The motion was not agreed to.
Several Members. Regular order.
The CHAIRMAN. The Clerk will now report the first bill on the

Private Calendar.

The following bills were read by title and objected to:

A bill (H. R. 4840) to confirm a certain private land claim in the Territory of New Mexico;

A bill (H. R. 218) to confirm a certain private land claim in the Territory of New Mexico;

A bill (H. R. 3216) to confirm the title to that certain land grant

Tres Alamos, in Arizona Territory;
A bill (H. R. 3235) to confirm title to certain private land grants in Arizona Territory; and

A bill (H. R. 2140) for the relief of the Columbia Bank in Pennsyl-

LUTHER F. WARDER.

The next business on the Private Calendar was the joint resolution (H. Res. 82) for the relief of Luther F. Worder.

Mr. HOWARD. I ask that this resolution be taken up for consideration.

The joint resolution was read, as follows:

Resolved by the Senate and House of Representatives, &c., That there be paid to Luther F. Worder, assistant doorkeeper of the House of Representatives, out of any money in the Treasury not otherwise appropriated, the sum of \$394.06, the said sum being the difference between the pay of Doorkeeper and assistant doorkeeper of the House of Representatives for the period of time between the 15th day of July, 1885, and the 7th day of December, 1885, he having acted as Doorkeer of the House during that time.

The CHAIRMAN. If there be no objection this joint resolution will be laid aside to be reported to the House with the recommendation that it do pass.

Mr. WARNER, of Ohio. Is there a report in this case?
Mr. HOWARD. There is a unanimous report.
The CHAIRMAN. The Clerk will read the report.

The report (by Mr. Adams, of Illinois) was read, as follows:

The Committee on Accounts, to whom was referred the accompanying joint resolution for the relief of Luther F. Worder, have duly considered the same,

resolution for the relief of Luther F. Worder, have duly considered the same, and respectfully report:

That a precedent for the payment provided for in this joint resolution is to be found in the deficiency appropriation bill, first session Forty-eighth Congress, in an appropriation to pay to George McNair the difference between the pay of Postmaster and that of assistant postmaster of the House of Representatives for the period of time between August 1, 1883, and December 5, 1883, he having acted as Postmaster of the House during that time.

The committee therefore report said joint resolution with a favorable recompanyation.

Mr. HOWARD. I ask unanimous consent that the joint resolution be corrected by inserting "Warder" instead of "Worder," wherever it occurs.

The CHAIRMAN. In the absence of objection, that correction will be made.

There being no objection, the joint resolution was laid aside to be reported to the House with the recommendation that it do pass.

The bill (H. R. 1773) for the relief of James J. Johnston was read, and, no member calling for its consideration, it was passed over.

HENRIETTA H. COLE.

The next business on the Private Calendar was the bill (H. R. 200) for the relief of Henrietta H. Cole.

Mr. LEHLBACH. I ask that this bill be considered.

The bill was read. Mr. DUNN. I object.

The CHAIRMAN. Objection being made, the bill will be passed

ORDER OF BUSINESS.

Mr. SPRINGER. In the next two cases upon the Calendar the reports are adverse, and I object to their consideration.

Objection being made, joint resolution and bill of the following titles

were passed over:

Joint resolution (H. Res. 60) granting a medal to Lieut, Louis F. Ellis for heroic conduct in joining the "forlorn-hope storming party" at Port Hudson, June 15, 1863; and
A bill (H. R. 4235) directing the Secretary of the Treasury to pre-

pare medals of honor to be bestowed upon certain Pennsylvania volunteer soldiers of the late war.

WILLIAM PIKE.

The next business on the Private Calendar was the bill (H. R. 527) for the relief of William Pike.

Mr. WARD, of Indiana. I ask the consideration of this bill.

The bill was read.

Mr. McMILLIN objected, and the bill was passed over.

GEORGE W. BALDWIN AND OTHERS.

The next business on the Private Calendar was the bill (H. R. 529) for the relief of George W. Baldwin, Charles L. Baldwin, and Dora

Mr. WARD, of Indiana. I ask consideration of this bill, and I trust

may be allowed to make an explanation of it. The bill was read.

Mr. McMILLIN. I desire to reserve the right to object, but will

hear the statement of the gentleman from Indiana [Mr. WARD].

Mr. WARD, of Indiana. The claimants in this case are the heirs of a person who in the fall of 1862 was drafted into the Army of the United States. After he had been so drafted he procured a substitute, to whom he paid \$850. After the furnishing of that substitute the drafted man, by some mistake or fault of United States officers, was compelled to go into the Army, where he served until he died. His substitute also entered the Army, so that both men rendered service. It seems to me this claim for the restitution of the money which was paid for the substitute is unimpeachable in equity.

Mr. BAYNE. How does it happen that there are so many of those

Mr. WARD, of Indiana. Well, sir, these men were all included in one draft, from the same county, and under the same circumstances. There were just four of them. They all went from Tipton County. The facts in all the cases are the same, so that the bills are similar.

Mr. McMILLIN. Will the gentleman state how it happens that

four such cases occurred in the same neighborhood?

Mr. WARD, of Indiana. Because there were four rascally officers of the Army who compelled these men to go into the service after they had furnished substitutes.

The CHAIRMAN. Is there objection to the consideration of the

Mr. McMILLIN. I think it had better go over.

The CHAIRMAN. Objection being made, the bill is not before the committee.

JOHN M. HIGGINS.

The next business on the Private Calendar was the bill (H. R. 940) for the relief of John M. Higgins, which was reported from the Committee on War Claims adversely by Mr. GEDDES

Mr. SPRINGER. It is an adverse report, and I object.

JOHN R. HARRINGTON.

The next business on the Private Calendar was the bill (H. R. 4594)

for the relief of John R. Harrington.
Mr. LEHLBACH and Mr. SPOONER asked for the consideration of the bill.

Mr. DUNN. I object.

Mr. ELY. Before objection is made I hope the gentleman will allow the report to be read.

The CHAIRMAN. Objection is made, and the bill will be passed

STEPHEN N. SMITH.

The next business on the Private Calendar was the bill (H. R. 3126) for the relief of Stephen N. Smith.

Mr. SPOONER. I ask for the consideration of the bill. The bill was read, as follows:

Be it enacted, &c., That the patent granted to Stephen N. Smith on the 13th day of June, in the year 1882, for "improvements in machines for making lacing-hooks," and which patent, on the face thereof, was granted for the term of seventeen years from the date of said patent, shall be, and the same is hereby, made a valid grant for the full term of seventeen years from the date of said patent, notwithstanding the fact that a patent had been previously granted to said Stephen N. Smith in Canada for the same invention.

Mr. SPOONER. Mr. Chairman, let me say in regard to that bill that it is not an extension of a patent, but merely for the purpose of validating a patent for the full term of seventeen years for which it was granted, as appears on its face. The difficulty was this: An application was filed in the United States for a patent, and at the same time an application was filed for a Canadian patent. The United States ap-

plication was put into interference, and without the knowledge or desire of the inventor the Canadian patent was issued. Under the inter-pretation of some of the United States courts it was held the United States patent was limited to the first term for which the Canadian patent might be granted, namely, five years. In consequence of his application for a patent in the United States having been put into interference the United States patent which was granted him has only two and a half years to run. All that is asked by this bill is that the time allowed by the general law for his valuable invention shall be allowed. It has reduced the price of lacing-hooks one-half of what they were.

Mr. WARNER, of Ohio. This is an extension of a patent.

Mr. REED, of Maine. Oh, no.

The CHAIRMAN. Does the gentleman object?

Mr. WARNER, of Ohio. I do not understand whether it is to validate a patent, or whether it has the effect to extend a patent.

Mr. SPOONER. It is not an extension of a patent, but simply to

validate this patent for the term of seventeen years for which it was originally granted. [Cries of "Vote!"]

There was no objection, and the bill was laid aside to be reported to the House with the recommendation that it do pass.

ILLEGAL EXACTION OF TONNAGE DUES.

The next business on the Private Calendar was the bill (H. R. 4583) authorizing the Secretary of the Treasury to make final adjustment of claims of certain foreign steamship companies arising from the illegal exaction of tonnage dues.

Mr. BUCHANAN. I ask for the consideration of that bill. Mr. WALLACE. What is the amount involved in the passage of this bill?

Mr. DUNN. It is an indefinite amount. Mr. WALLACE. I object.

DR. W. S. HOSACK.

The next business on the Private Calendar was the bill (H. R. 2175) for the relief of Dr. W. S. Hosack, reported adversely from the Committee on War Claims by Mr. SMALLS.

Mr. SPRINGER. That is an adverse report, and I object.

CONVEYANCE OF AN ALLEY IN THE DISTRICT.

The next business on the Private Calendar was the bill (H. R. 4162) authorizing the District of Columbia to convey the alley, 15 feet wide, running east and west between lots 6 and 7 in square 635, comprising an area of 3,480 square feet of land, to the owner of said lots.

Mr. HEARD. The counterpart of that bill was passed two months

ago.

The CHAIRMAN. It should be taken off the Calendar.

Mr. HEARD. I move, then, that the bill be reported to the House with the recommendation that the bill be laid on the table.

The motion was agreed to.

ELON A. MARSH.

The next business on the Private Calendar was the bill (H. R. 5894) for the relief of Elon A. Marsh and Minard Lafever.

Mr. BUTTERWORTH. I ask for the consideration of that bill.

The bill was read.

Mr. MOFFATT. I object.

Mr. BUTTERWORTH. The Secretary of the Interior in signing patents slipped two along and omitted to sign this patent, and so these

men have been kept out of their patent for two years.

Mr. DUNN. What does the bill propose to do?

Mr. BUTTERWORTH. It simply provides for the correction of a clerical error. It rectifies that error on the part of the Secretary of the Interior and authorizes the patent to be signed.

Mr. SPRINGER. Does the gentleman from Ohio have knowledge

of these facts?

Mr. BUTTERWORTH. I do.

Mr. SPRINGER. I hope there will be no objection then. Mr. BUTTERWORTH. Who objects?

The CHAIRMAN. The gentleman from Michigan [Mr. MOFFATT]

SAMUEL H. MOER.

The next business on the Private Calendar was the bill (H. R. 3365) for the relief of the heirs and legal representatives of Samuel H. Moer. The CHAIRMAN. Nobody asks for the consideration of this bill, and it will be passed over.

WASHINGTON I. PARVIN AND HENRY A. GREENE.

The next business on the Private Calendar was the bill (H. R. 5535) for the relief of Washington I. Parvin and Henry A. Greene.

Mr. LYMAN. I ask for its consideration.

The bill was read.

Mr. HOLMAN. I hope there will be an explanation, or at least that the report will be read.

The CHAIRMAN. The gentleman from Iowa [Mr. LYMAN] is rec-

ognized to make a statement.

Mr. LYMAN. This is a claim that arose on account of the service performed by these officers at the beginning of the civil war in California in recruiting troops. Under the first call for troops by the Pres-

ident of the United States the State of California took no action whatever. Nothing was done by the Federal authorities there. General Sumner was subsequently sent to San Francisco and authorized to raise troops, and all of the expenditures for the service in that State, so far as I know, have been settled except the accounts of these two captains, Greene and Parvin. This is a claim for raising troops that went into the First California, for which these accounts are presented, and it is simply asked that the accounting officers of the Treasury make settlement with these gentlemen and pay them what is due ment with these gentlemen and pay them what is due.

Mr. SPRINGER. Why was it not paid before?

Mr. LYMAN. Because the accounting officers did not choose to do so for some reason; I do not know why. The accounts were in the Department, but they were not paid.

Mr. SPRINGER. Has the Secretary of War recommended the pay-

Mr. LYMAN. Not that I am aware of.

Mr. SPRINGER. Or the accounting officer? Mr. LYMAN. This authorizes the Secretary of War to settle with them. It does not appropriate anything whatever; it simply author-

izes the accounts to be investigated and settled.

Mr. SPRINGER. The Department ought to have audited the accounts and sent them here with some recommendation, so that if necessary an appropriation could be made for them. I have no objection essary an appropriation could be made for them. I have no objectionto paying what ought to be paid, but it is unaccountable that these
matters should have gone over so long. I object.

Mr. LYMAN. That may be said of any account, for only those which
are barred by the statute of limitation, or which can not be paid for
some other reason, come here at all.

Mr. SPRINGER. I object.

The CHAIRMAN. Objection being made, the bill is not before the

House.

The Clerk will report the next bill.

The next business on the Private Calendar was the bill (H. R. 331) for the relief of Patrick Flynn, reported adversely from the Committee on War Claims.

The bill was passed over informally.

ALEXANDER WORRALL.

The next business on the Private Calendar was the bill (H. R. 4476) for the relief of Alexander Worrall.

Mr. GEDDES. I ask for the consideration of that bill.

The bill was read, as follows:

Be it enacted, &c.. That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Alexander Worrall the sum of \$598.18, for the purpose of refunding and repaying to him the amount of judgment recovered from him for damages for the occupation of a property in the State of Virginia, the said damages having been recovered for occupation by the owner of said property during a period when said Worrall rented said property from the Government of the United States and paid rent therefor.

The committee recommend the adoption of the following amendment:

Strike out in lines 6 and 7 of the sum proposed in the bill the words "ninety eight" and "eighteen" and insert "seventy-six" and "thirty-three;" so that the amount will read "\$676.33."

Mr. GEDDES. I ask for the reading of the report, as that will show the merits of the claim. I examined the case carefully and drew the report myself, and should be glad to have it read.

Mr. HOLMAN. Let it be read.

The report (by Mr. GEDDES) was read, as follows:

Mr. HOLMAN. Let it be read.

The report (by Mr. GEDDES) was read, as follows:

Your committee find from the testimony in this case that Alexander Worrall, the claimant in this case, is now and has been since the year 1866 a citizen of the State of Pennsylvania, a civil engineer by profession, and as such was in the year 1864 placed on duty at the United States anavy-yard at Norfolk, Va., under orders of the Navy Department, and so continued for about three years.

In August, 1864, claimant rented a house in the city of Portsmouth, immediately opposite Norfolk, and occupied the same for eleven months. The house so rented was in the possession of the duly authorized agents of the United States as "abandoned property," under the laws of the United States. The claimant rented the property from said agents of the Government, and paid the rent therefor to them monthly in advance for all the time he occupied it. After the claimant surrendered the property to the quartermaster, it was thereafter used for about two years as a school-house for colored children. The property thus used and occupied by claimant belonged to one Ann McRae, who was then a widow, but who afterward intermarried with one George M. Bain.

If further appears that claimant had no knowledge of any claim on the part of any one for the rent of said property until in 1872, when he learned that a suit had been brought and a judgment recovered against him in the hustings court in said city of Portsmouth. It appears from the exhibits in this case that claimant was the owner of some stock in a railroad company at Norfolk, and in said suit against claimant the said railroad company was garnisheed. As soon as claimant was notified of said judgment against him he employed counsel and endeavored to have said judgment set aside in order that he might make a defense, as he had not been personally served with any process.

The court refused the application of claimant, and thereupon, by the advice of his attorney, he filed a bill in equity in the circuit court of

cost; thereupon, the said garnishee was compelled to pay, and did pay, in behalf of plaintiff, the said judgment and cost, amounting to the sum of \$673.33.

The claimant further claims that in consequence of said proceeding the railroad stock owned by him was sold at a sacrifice of \$500, in addition to which he was compelled to pay personal expenses in attending said suit, amounting to \$105.

The proof establishes the fact that claimant acted throughout in good faith, and relied upon the officers of the Government to protect him in said proceedings.

By the notice served on the officers of the Government they were called upon and endeavored to maintain the rights of the Government to the use and occupancy of the property rented to claimant by the authorized agents of the Government. Although the amount of the judgment and costs paid by claimant exceeded the amount of rent paid by him, your committee consider it just and right that the amount of the judgment and costs be refunded to him. The damages sustained by the sale of the stock of said claimant and the expenses in curred by him, your committee find should not be allowed.

Your committee therefore amend said bill by striking out in line 6 the words "ninety-eight" and "eighteen" and inserting in place thereof the words "seventy-sight" and "thirty-three;" and as so amended recommend the passage thereof.

The amendments were agreed to.

The bill as amended was laid aside to be reported to the House with the recommendation that it do pass.

ORDNANCE STORES FURNISHED COLORADO.

Mr. SYMES. Mr. Chairman, I find upon examination that the bill which was passed here to-night on my motion (H. R. 5215), a bill to relieve the State of Colorado from charges on account of ordnance stores furnished to the State and Territory, is not on the Private Calendar, as I was informed and believed, but on the Calendar of the Committee of the Whole on the state of the Union. I was paying particular attention to the Senate bill and thought it was on the Private Calendar. As I understand the order of business to night only those bills which are on the Private Calendar can be considered; and I shall therefore ask to have the order vacated passing this bill, as I would not mislead intentionally the House, and am satisfied that it was passed in

The CHAIRMAN. The committee will understand that it was simply an error on the part of the gentleman from Colorado and the officers of the House, who instructed the Chair that it was on the Private Calendar of the House. The order passing the bill will be vacated, and it will retain its place on the Calendar as if there was no order with reference to it to-night.

The Clerk will report the next bill. The Clerk read as follows:

A bill (H. R. 1604) for the relief of Mrs. Lizzie Myanadier Phelps.

WILLIAM J. OWINGS.

Mr. HALE. Mr. Chairman, there is a bill immediately preceding that on the Calendar which I wish to call up.

The CHAIRMAN. That appears to be a pension bill.

Mr. HALE. It is not a pension bill, properly speaking, although reported from the Pensions Committee.

The CHAIRMAN. The Clerk will report the bill.

The Clerk read as follows:

A bill (H. R. 4097) for the relief of William J. Owings.

Whereas, in conformity with an act of Congress approved March 9, 1878, certificate numbered 25639, for original-service pension, dated March 6, 1883, was issued to Henry Owings, a private in Capt. James Dudley's company of Kentucky militia in the war of 1812; and

Whereas said Henry Owings died December 28, 1881, before said certificate was issued, leaving no estate whatever, and no widow or child under sixteen years of age; and

was issued, leaving no estate whatever, and no water or can direct spears of age; and
Whereas William J. Owings, of Randolph County, Missouri, a son of said
Henry Owings, had the entire care and support of his father, the said Henry
Owings, for ten years immediately preceding his death, he being then very old
and enfeebled by age, having died on the date aforesaid in his eighty-fourth

and enteebled by age, having died on the date aforesaid in his eighty-fourth year; and

Whereas under existing laws no money can be drawn on said pension certificate except an amount sufficient to pay the expenses of the last sickness and burial of said deceased pensioner, a sum wholly inadequate to reimburse said William J. Owings for his support of the deceased pensioner in his old age:

William J. Owings for his support of the deceased pensioner in his old age: Therefore,

Be it enacted, &c., That the Commissioner of Pensions is directed to pay to William J. Owings, of Randolph County, Missouri, the amount of pension which had accrued to Henry Owings, deceased, at the time of his death, December 28, 1831, by virtue of certificate numbered 25639, for original-service pension, dated March 6, 1883.

Mr. HOLMAN. It is not stated how much pension this grants. Mr. HALE. I will state that the amount is less than \$500 from the

year 1878, when it begins, until March, 1883, at \$8 a month.

Mr. SPRINGER. Is not this a pension bill?

The CHAIRMAN. The Chair will state that under the action of the House similar bills to this were declared not to be pension bills, and were improperly referred to the Committees on Pensions and Invalid Pensions, but should have been referred to the Committee on Claims. The Chair thinks under the special order made for this evening this bill is in order.

There being no objection to its present consideration, the bill was laid aside to be reported to the House with the recommendation that it do pass.

HENRIETTA H. COLE.

Mr. DUNN. I desire to withdraw the objection I made to each of the two bills called up by the gentleman from New Jersey.

Mr. LEHLBACH. I ask unanimous consent that the bill (H. R. 200) be again reported.

The bill was read, as follows:

Be it enacted, &c.. That the patent granted to Henrietta H. Cole, of New York, for improvement in fluting machines, reissue numbered 4349, on the 25th day of April, 1871, be, and the same is hereby, referred to the Commissioner of Patents, who shall determine the same upon testimony; and if, in his judgment, the petitioner has not been compensated for her time and ingenuity in perfecting her patent he shall have authority to extend it for seven years from the 12th day of June, 1883: Provided, however, That the use of said patent or improvement since the date of the expiration of said patent shall not be deemed an infringement thereof.

Mr. HOLMAN. What is the nature of the patent?
Mr. LEHLBACH. For an improvement in fluting irons. The patentee has received scarcely any compensation for the invention, and the Committee on Patents have-recommended this bill unanimously.

Mr. HOLMAN. All right.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

MRS. LIZZIE MAYNADIER PHELPS.

Mr. BUCHANAN. Mr. Chairman, House bill 1604, the title of which was read just preceding the last bill called up, is identical with Senate bill No. 1899, on page 58 of the Calendar. I therefore ask that the Senate bill be considered in place of the House bill. Mr. HOLMAN. Let the Senate bill be read.

The bill was read, as follows:

Be it enacted, &c., That there be appropriated, out of any money in the Treasury not otherwise appropriated, to be paid to Mrs. Lizzie Maynadier Phelps, widow of Capt. Seth Ledyard Phelps, late envoy extraordinary and minister plenipotentiary of the United States to Peru, one year's salary as said minister, from June 25, 1885.

Mr. HOLMAN. I hope the gentleman from New Jersey [Mr. Buch-ANAN] will explain on what principle this bill rests. Is this a year's salary after the death of the minister?

Mr. BUCHANAN. It is a year's salary after the death of the min-ter. There are a large number of precedents for it.

Mr. HOLMAN. Has there been any uniformity in the precedents?
Mr. BUCHANAN. I am so informed by the State Department.
Attached to the report is a statement by the State Department giving a list begining with the widow of Bayard Taylor, and going down to the widow of Mr. Hunt, minister to Russia.

the widow of Mr. Hunt, minister to Russia.

Mr. HOLMAN. How many such cases are there?

Mr. BUCHANAN. I suppose a dozen.

Mr. WARNER, of Ohio. They all seem to be of recent date.

Mr. BUCHANAN. They may be the better for that.

Mr. WARNER, of Ohio. Perhaps not.

Mr. BUCHANAN. It has become the uniform practice to grant this; and in this case I happen to know it is very urgently needed.

The CHAIRMAN. Is there objection to substituting the Senate bill for the House bill? If there be no objection the House bill will be reported with the recommendation that it lie on the table, and the Senate bill that it do mass. ate bill that it do pass.

There was no objection, and it was so ordered.

CHRISTIAN BROTHERS' COLLEGE, SAINT LOUIS.

Mr. MORRISON. I ask unanimous consent to consider the bill (S. 2415) for the relief of the trustees of the Christian Brothers' College, of Saint Louis, Mo.

The bill was read, as follows:

The bill was read, as follows:

Be it enacted, &c., That the Secretary of War be, and he is hereby, authorized and directed to cause to be investigated by the Quartermaster's Department of the United States Army the circumstances, character, and extent of the alleged occupation by the United States authorities, for Government purposes, during the late war, of the college building and grounds of the Christian Brothers, in Saint Louis, Mo.; the actual value of the use and occupation of that portion of the property occupied, for the time it was occupied by the United States troops; the amount of damage to the real estate arising from and incident to such occupation; and to find and award and certify to the Secretary of the Treasury what amount, if any, is equitably due the said trustees from the United States as the reasonable value of such use and occupation of the portion of said premises so occupied and for damages to such buildings and grounds the natural result of such occupation; and that the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to said trustees or their successors, out of any money in the Treasury not otherwise appropriated, the amount, if any, so found to be due from the United States; and the acceptance by said trustees of any sum paid under the provisions hereof shall be in full satisfaction of all claim of every name and nature for said occupation, and all damages resulting therefrom.

Mr. REED, of Maine. I should like to hear some explanation of

Mr. REED, of Maine. I should like to hear some explanation of

this bill before giving consent to its consideration.

Mr. MORRISON. I have marked a portion of the report, which the

Clerk will please read. The Clerk read as follows, from the report (by Mr. TIMOTHY J. CAMP-

BELL) from the Committee on War Claims:

RELL) from the Committee on War Claims:

The facts stated in the memorial quoted in the foregoing report are not complete. It is further true that Saint Louis was during the entire time embraced in the period of the occupancy of the building and grounds in question in the exclusive, undisturbed, and secure possession of Federal forces, and that it was never a subject of attack, or even threatened by the confederates. There is not one thing in the general conditions or in the circumstances of the particular case to invoke the application of any rule different from such as would justly apply to New York, Chicago, or Boston. The building and grounds in question were appropriated to the public use, not as an exigency of war nor as an act of wantonness, but regularly in the line of military expediency and in the ordinary course

which involved their convenient and—not to the exclusion of others—their necessary use. Doubtiess a hundred equally as available buildings could have been had within the city limits as either the Christian Brothers' College or in the McDowell College adjoining it. The act of the Federal authorities in taking possession of the property for whose use compensation is asked and awarded by the House bill can not be regarded as like action in hostile territory, nor was there a contingency in the whole war at the seat of its occupancy which could bring it within the rule which has excluded compensation for property surrendered to the exigencies of military situation. The use is proved. The amount allowed by the House bill seems reasonable and just. If there was not a written or express contract for compensation there ought to have been. The sole question involved is whether, in a State loyal to the Government, in a city therein which remained in the uninterrupted occupancy and the unmenaced control of the loyal forces during the whole war, where every facility for the accommodation of all reasonable demands for supplies, quarters, prisons, &c., for the United States forces existed which could have been had in any city in the Union, and with the same security and safety, the property of private parties, and more especially that of a religious order devoted exclusively to educational purposes, could be taken and used continuously for four entire years without at least an implied contract that an honest Government, under the Constitution, would make honest compensation therefor.

We can not concur in the report, which would exclude such compensation, and we recommend the passage of the House bill.

JNO. E. KENNA.

J. Z. GEORGE.

JNO, E. KENNA, J. Z. GEORGE, GEO, F. HOAR, AUSTIN F. PIKE, JAMES G. FAIR,

Mr. REED, of Maine. I withdraw the request for any further read-g. Only hearing the latter part of the bill, I had thought the claim arose in the theater of war.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

ORDER OF BUSINESS.

Mr. PRICE was recognized. Mr. McMILLIN. My colleague [Mr. RICHARDSON] who was on the committee that examined the claim I objected to a few moments ago informs me he examined it carefully and that it is a just claim. I therefore ask the committee to allow me to withdraw my objection.

The CHAIRMAN. The Chair will recognize the gentleman from Tennessee in a moment. The gentleman from Wisconsin [Mr. PRICE]

has been recognized.

Mr. PRICE. I desire to have a claim sent to the Court of Claims. It is a claim upon which I spent three months in the Forty-eighth Con-

Mr. SPRIGGS. What claim is that?

Mr. PRICE. The Murphy claim. I examined it last Congress. The gentleman from Virginia [Mr. TRIGG] has examined it in this Congress. Here is a report, full and complete. I think no gentleman familiar with the case will prevent its going to the Court of Claims. The first two pages of the report contain the main facts.

Mr. CAMPRELL, of Pennsylvania. I object to any bill being taken

Mr. CAMPBELL, of Pennsylvania. I object to any bill being taken up out of its regular order. Let us have the regular order.

The CHAIRMAN. The Clerk will report the next bill on the Cal-

A bill (H. R. 2110) for the relief of the sufferers by the wreck of the United States steamship Ashuelot.

Mr. BUCHANAN. I call for the consideration of that bill; and I ask unanimous consent to substitute for it the bill S. 250.

The CHAIRMAN. The Clerk will report the House bill.

The bill (H. R. 2110) was read.

Mr. BUCHANAN. The Senate bill conforms to the House bill as recommended to be amended.

Mr. HOLMAN. I hope the report will be read.

Mr. WARNER, of Ohio. I think this is likely to lead to discussion.

It had better go over. Mr. BUCHANAN. I can state in a few moments what the bill is. The CHAIRMAN. Does the gentleman from Ohio [Mr. WARNER] object?

Mr. WARNER, of Ohio. I have no objection to the reading of the report.

Mr. BUCHANAN. I can state in one moment what the bill is.

Mr. TRIGG. I suggest to the gentleman from New Jersey that I hear several gentlemen around me state that they will object.

Mr. BUCHANAN. This is in a long line of precedents beginning in 1848. We have passed a similar bill this session.

The CHAIRMAN. The Chair understands the gentleman from Ohio

[Mr. WARNER] to object.
Mr. WARNER, of Ohio. Let it go over.
Mr. BAKER. I ask unanimous consent to call up a bill. [Cries of "Regular order!"]

The CHAIRMAN. The regular order is insisted on.

Mr. McKENNA. Is it in order to ask unanimous consent?

The CHAIRMAN. The gentleman from Pennsylvania on the left

[Mr. CAMPBELL] insists on the regular order.

Mr. SPRINGER. I move that the committee rise. It is impossi-

ble to get the bills passed which have been acted upon by the commit-tee unless we do so. I will state if any time is left after the bills are passed I am willing the Speaker shall then recognize gentlemen for requests for unanimous consent.

The question being taken, there were—ayes 44, noes 14. So the motion was agreed to.

The committee accordingly rose; and Mr. McMillin having resumed the chair as Speaker pro tempore, Mr. HATCH reported that the Committee of the Whole House having had under consideration the Private Calendar, under the special order of the House, had instructed him to report sundry bills with various recommendations.

BILLS PASSED.

Senate bills of the following titles, reported from the Committee of the Whole without amendment, were severally read the third time, and passed:
A bill (S. 218) to confirm the title to certain lands in Platte County,

Missouri, and authorize patents to be issued therefor to Kinsey B.

A bill (S. 68) for the relief of S. B. Cranston, of Oregon;
A bill (S. 289) for the relief of J. A. Henry and others;
A bill (S. 936) for the relief of John M. McClintock;
A bill (S. 699) to authorize the Secretary of the Interior to issue to

George K. Otis duplicates of certain land-warrants;

A bill (S. 632) to provide for the settlement of estates of deceased Kickapoo Indians in the State of Kansas, and for other purposes;
A bill (S. 224) for the relief of Charles F. Bowers;
A bill (S. 13) for the relief of William J. Smith, late surveyor of cus-

toms for the port of Memphis, State of Tennessee;
A bill (S. 972) for the relief of Thomas P. Morgan, jr.;
A bill (S. 304) to compensate physicians for services rendered under an order of the United States court of the northern district of Alabama;

A bill (S. 1899) for the relief of Mrs. Lizzie Maynadier Phelps; and A bill (S. 2415) for the relief of the trustees of the Christian Brothers'

College, Saint Louis, Mo.

Amendments reported from the Committee of the Whole to Senate Amendments reported from the Committee of the Whole to Senate bills of the following titles were severally agreed to; and the bills as amended were severally read the third time, and passed:

A bill (S. 718) for the relief of Francis Gilbeau;

A bill (S. 1599) for the relief of the Phœnix National Bank, of the city of New York;

A bill (S. 1008) to empower the Board of Foreign Missions of the Methodist Protestant Church to hold property in the District of Columbia: and

bill (S. 22) for the relief Martin Murphy and P. B. Murphy. The SPEAKER. The Clerk will now report House bills reported from the Committee of the Whole without amendment.

STEPHEN N. SMITH.

The first House bill reported without amendment from the Committee of the Whole was the bill (H. R. 2136) for the relief of Stephen N. Smith.

Mr. SPOONER. Mr. Speaker, I ask leave to substitute for this Senate bill No. 708, which is in the same words.

The SPEAKER pro tempore. Is there objection to the request of

the gentleman from Rhode Island?

Mr. HOLMAN. Is the Senate bill exactly the same as the House

The SPEAKER pro tempore. The Chair is informed that the Senate bill is identical in terms with the House bill.

There was no objection.

The Senate bill was ordered to a third reading; and it was accordingly read the third time, and passed.

The House bill (H. R. 2136) was laid on the table.

WILLIAM J. OWINGS.

The next bill reported from the Committee of the Whole without amendment was the bill (H. R. 4097) for the relief of William J. Owings; which was ordered to be engrossed and read a third time, and being engrossed, it was accordingly read the third time, and passed.

HENRIETTA H. COLE.

The next bill reported from the Committee of the Whole without amendment was the bill (H. R. 200) for the relief of Henrietta H. Cole. Mr. LEHLBACH. Mr. Speaker, I ask unanimous consent to substitute for this bill Senate bill No. 380, which is in the same terms as

the House bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Senate bill was ordered to a third reading; and it was accordingly read the third time, and passed.

The House bill (H. R. 200) was laid on the table.

ALEXANDER WORRALL.

A bill (H. R. 447) for the relief of Alexander Worrall was reported from the Committee of the Whole with an amendment.

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time, and passed.

LUTHER F. WARDER.

The joint resolution (H. Res. 82) for the relief of Luther F. Warder was reported from the Committee of the Whole with an amendment. The amendment was agreed to.

The joint resolution was then ordered to be engrossed and read a

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and there were-ayes 29, noes 14.

So the joint resolution was passed.

By unanimous consent the title was amended so as to read: "Joint resolution for the relief of Luther F. Warder,"

BILLS LAID ON THE TABLE.

Bills of the following titles were laid on the table, in accordance with the recommendation of the Committee of the Whole House:

A bill (H. R. 1604) for the relief of Mrs. Lizzie Maynadier Phelps; and

A bill (H. R. 4162) authorizing the District of Columbia to convey the alley, 15 feet wide, running east and west between lots 6 and 7 in square 635, comprising an area of 3,480 square feet of land, to the owner of said lots.

ORDER OFBUSINESS.

Mr. SPRINGER. There is on the Calendar a Senate bill for the benefit of one of my constituents, a bill favorably reported by myself. It is Senate bill No. 2166, for the relief of John F. Cadwalader. It involves about \$400 for the payment of the clerk of a United States court for preparation of records by order of the court. The bill has been recommended in every annual report of the Attorney-General since the service was performed. I ask unanimous consent that the Committee of the Whole House be discharged from the further consideration of the bill, and that it be now put on its passage.

Mr. CAMPBELL, of Pennsylvania. I object.
Mr. DOCKERY moved to reconsider the various vote by which bills reported from the Committee of the Whole House were passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

Mr. SOWDEN. I move that the House do now adjourn.

The motion was not agreed to, there being—ayes 11, noes 43.
Mr. DUNN. I ask unanimous consent for the consideration of a bill which simply gives the right of way for a railroad from Fort Smith to Albuquerque. There is a unanimous report from the Committee on Pacific Railroads. As the bill is of some length I ask that the reading may be dispensed with, and that the bill be printed in the RECORD.

The Clerk read the title of the bill, as follows:

A bill (H. R. 9107) to incorporate the Arkansas and New Mexico and Pacific Railroad Company, and for other purposes.

The SPEAKER pro tempore. The gentleman from Arkansas asks unanimous consent for the consideration of this bill.

Mr. CAMPBELL, of Pennsylvania. I object. Several members demanded the regular order.

Mr. TAULBEE. I move that the House resolve itself into Committee of the Whole.

The SPEAKER pro tempore. The regular order is demanded; and no bill on the Calendar can be considered under the rules except in Com-

no bill on the Calendar can be considered under the rules except in Committee of the Whole.

Mr. TAULBEE. That is the object of my motion.

The motion of Mr. TAULBEE was agreed to.

The House again resolved itself into Committee of the Whole House (Mr. Hatch in the chair) for the purpose of considering bills on the Private Calendar under the special order.

Mr. McKENNA. I ask unanimous consent to take up out of its order House bill No. 8761.

Mr. SOWDEN. Regular order.

Mr. CAMPBELL, of Pennsylvania. I object to the consideration of any bill unless it is taken up in its order on the Calendar.

The CHAIRMAN. The gentleman from Pennsylvania on the right [Mr. Sowden] and the gentleman from Pennsylvania on the left [Mr. CAMPBELL] both insist upon the regular order. Nothing is left for the Chair except to have the first bill on the Calendar reported.

Mr. McKENNA. Is it not in order for me to make a statement? The CHAIRMAN. The demand for the regular order cuts off all debate.

SUFFERERS BY WRECK OF STEAMER TALLAPOOSA.

The first business in order was the bill (H. R. 2258) for the relief of the sufferers by the wreck of the United States steamer Tallapoosa.

Mr. NEAL. I ask that this bill be considered.

The Clerk proceeded to read the bill. Mr. WARNER, of Ohio (before the reading was concluded). bill is of the same character as the bill which was last read, and it certainly ought to have some discussion before being passed. If there are any bills which can go through without objection I think this had bet-

ter be passed over.

The CHAIRMAN. Objection being made, the Clerk will report the next bill.

ORDER OF BUSINESS.

The Clerk read as follows:

A bill (H. R. 633) for the relief of Maj. G. W. Candee.

Mr. HEARD. The Clerk has skipped the bill (S. 574) for the relief of Robert Strachan.

The CHAIRMAN. The Chair will state to the gentleman from Missouri [Mr. Heard] that the bill to which he refers has already been before the Committee of the Whole this evening and objected to.

Mr. HEARD. I did not understand that it was objected to, but merely that no member called for its consideration. That is my information. It is simply a proposition to refer a matter to the Court of

The CHAIRMAN. The bill has already had its consideration, and has been objected to.

MAJ. G. W. CANDEE.

The next business on the Private Calendar was the bill (H. R. 633) for the relief of Maj. G. W. Candee.

The bill was read, as follows:

The bill was read, as follows:

Be it enacted, &c., That there be paid to Maj. G. W. Candee, paymaster United States Army, out of any money in the Treasury not otherwise appropriated, the sum of \$2,650, being the amount stolen from him at Fort Arbuckle, Indian Territory, in the fall of 1869, and was restored by him out of private funds: Provided, That the Court of Claims shall find the loss of said funds to have been without fault or negligence on the part of said officer; and jurisdiction is hereby conferred upon the Court of Claims to hear and determine such matter, without regard to the limitation imposed by section 1069, Revised Statutes, and render judgment accordingly.

Mr. HOLMAN. I hope the report in this case will be read. The CHAIRMAN. Does any gentleman ask for the consideration of

Mr. McKENNA. I promised a gentleman that I would ask for its consideration.

The CHAIRMAN. The report will be read. The Clerk commenced the reading of the report.

Mr. McKENNA (interrupting). I can make a statement. It is to reimburse him for the money he lost. He was paymaster in the Army, and he lost it. He promptly paid it to the Government. The strong presumption was that the officer in the room with him stole the money.

Mr. SPRINGER. How much was it?

Mr. McKENNA. It is \$2,650.

Mr. HOLMAN. Inasmuch as this bill provides the question of negligence on the part of the paymaster shall be inquired into by the Court of Claims, I am not inclined to insist on the further reading of the report; otherwise I would do so. But that being a subject of inquiry prior to the payment of the money, it seems to be safe enough.

Mr. SOWDEN. I would ask the gentleman from California what

evidence there is the money was stolen?

Mr. McKENNA. I think the gentleman from Pennsylvania was on the Committee on Claims, or ought to have been, when this case was considered. The evidence is it was in the safe in his office. The safe was opened and the money was stolen when his back was turned. theft was traced to the officer who was in the room with him. [Cries of "Vote!"]

There was no objection, and the bill was laid aside to be reported to the House with the recommendation that it do pass.

FRANCIS M. BELL.

The next business on the Private Calendar was the bill (H. R. 2086) for the relief of Francis M. Bell.

Mr. HIRES. I ask for the consideration of that bill.

The bill was read, as follows:

Be it enacted, &c., That the Postmaster-General be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, whatever claim may be found due and audited by the Auditor of the Treasury for the Post-Office Department in favor of Francis M. Bell, postmaster at Tyrone, in the State of Pennsylvania, for clerk-hire from April 30, 1877, to June 30, 1878: Provided, That said claim and payment shall not exceed the sum of

The report (by Mr. Fleeger) was read, as follows:

The report (by Mr. Fleeger) was read, as follows:

The Committee on Claims, to whom was referred the bill (H.R. 2086) for the relief of Francis M. Bell, having had the same under consideration, submit the following report:

In May, 1877, Francis M. Bell was appointed postmaster at Tyrone, Pa. He was not advised that he was entitled to an allowance for clerical hire until September 11, 1880, at which time he received a letter from the acting First Assistant Postmaster-General stating that—

"Owing to the limited appropriation for clerical service in post-offices the Department is obliged to make an immediate and general reduction of the per cent, of the present allowances for clerical assistance in separating offices. Your annual allowance for clerical service in separating mails at your office is therefore hereby fixed at \$405 from October 1, 1889."

Upon receipt of said notice the postmaster sent in to the Department vouchers for the payments made by him, and he was allowed and paid for such service from June 30, 1878, but the amount from May 1, 1877, to June 30, 1878, was not paid, for the reason, as stated by the then Auditor of the Treasury for the Post-Office Department, that the money appropriated for that purpose had been covered back into the United States Treasury.

The bill provides for the payment of—

"Whatever claim may be found due and audited by the Auditor of the Treasury for the Post-Office Department in favor of Francis M. Bell, postmaster at Tyrone, Pa., for clerk-hire from April 30, 1877, to June 30, 1878, provided that the same shall not exceed \$525."

Your committee, believing said bill to be just, recommend its passage.

Mr. WARNER, of Ohio. Why can not this be paid as other clerical service by the Post-Office Department?

Mr. SPRINGER. It can not be allowed under the general law.

There was no objection; and the bill was laid aside to be reported to

the House with the recommendation that it do pass.

Mr. BUCHANAN. I move the committee rise, as we will hardly have time to pass the bills in the House.

The motion was agreed to.

The committee accordingly rose; and Mr. McMillin having resumed the chair as Speaker pro tempore, Mr. HATCH reported that the Committee of the Whole House had had under consideration the Private Calendar, and had directed him to report sundry bills with the recommendation that they do pass.

BILLS PASSED.

Bills of the following titles, reported from the Committee of the Whole House, were severally ordered to be engrossed and read a third time; and being engrossed, they were accordingly read the third time, and passed:

A bill (H. R. 633) for the relief of Maj. G. W. Candee; and A bill (H. R. 2086) for the relief of Francis M. Bell.

Mr. SPRINGER moved to reconsider the vote by which the bills were passed; and also moved that the motion to reconsider be laid on

The latter motion was agreed to.

HYLAND C. KIRK.

Mr. SPRINGER. I yield to the gentleman from New York [Mr. BAKER], as there was one recognition on this side.

Mr. BAKER. I move that the Committee of the Whole House on the Private Calendar be discharged from the further consideration of the bill (H. R. 7649) for the relief of Hyland C. Kirk.

The bill and report were read.

The hour of 11 o'clock p. m. having arrived, the House (in accordance with the previous order) adjourned.

PETITIONS, ETC.

The following petitions and papers were laid on the Clerk's desk, under the rule, and referred as follows:

By Mr. CALDWELL: Petition of David A. Cobb and of J. M. Cobb, of McMinn County; of Charles Carmon, of Monroe County; of W. S. Bewley and of James S. Gentle, of Hamblin County; of John Thompson, of Hickman County; of Mary C. Dulany and of William Campbell, of Sullivan County; of W. R. Bailiff and of William G. Bratton, of De Kalb County; of J. S. Dellahanty (administrator of J. L. Green), of William P. Cloyd, of William A. Matthews, of William R. Whitfield, and of John B. Hope, of Davidson County; of James W. Harris (administrator of David A. Massey), of Humphreys County; of Jesse Hooper, of Cheatham County; of Elisha Kelley, of Stewart County; of John M. Winstead, of Williams County; of James M. Weatherly, of Rutherford County; of Uriah Jennings (administrator of William Jennings, deceased) and of Robert Bell, of Wilson County; of John Chetwood (excentor of W. W. Sharp, deceased) and of William M. Gossage, of Franklin County; and of the estate of Benjamin Adams, of Dickson County, Tennessee, severally asking compensation for stores, &c., taken By Mr. CALDWELL: Petition of David A. Cobb and of J. M. Cobb, County, Tennessee, severally asking compensation for stores, &c., taken and used by the United States Army—to the Committee on War

By Mr. CLEMENTS: Papers relating to the claim of Melvin J. Smith,

of Whitfield County, Georgia—to the same committee.

By Mr. DUNN: Papers relating to the claim of William J. Hendrick and of William A. Brown (administrator of Dedrick Pike), of Monroe

and of William A. Brown (administrator of Dedrick Pike), of Monroe County, Arkansas—to the same committee.

By Mr. HAIMER: Paper relating to the bill for the relief of H. Clay Fisher, United States Marine Corps—to the Committee on Claims.

By Mr. JAMES: Petition of Raphael C. Stearns and 104 others, of Harry Lee Post, Grand Army of the Republic, No. 21, asking for enactment of Senate bill 1886—to the Committee on Invalid Pensions.

By Mr. McMILLIN: Petition of Thomas O. Tighlman, for pay for property taken and used by the United States Army—to the Committee on War Claims.

Also petition and papers relating to the claim of John O. Care—to.

Also, petition and papers relating to the claim of John O. Cage-to

By Mr. McRAE: Papers relating to the claim of Henry H. Carter and of C.L. Thomas (administrator of Lewis Thomas), of Clark County, Arkansas—to the same committee.

By Mr. PETERS: Resolution of Benton Post, No. 61, Grand Army of the Republic, of Anthony, Kans., favoring the passage of Senate bill No. 1886—to the Committee on Invalid Pensions.

By Mr. SAYERS: Petition of citizens of Runnells County, Texas, for relief—to the Committee on Appropriations.

The following petitions, asking for the passage of House bill 7887, pealing timber-culture, pre-emption, and desert-land acts; of House bill 7021, for adjustment of railroad and other land grants; of bill for-feiting all railroad land grants the conditions of which have not been strictly complied with; of House bill organizing the Territory of Oklahoma; of Senate bill opening a portion of the great Sioux reservation

to settlement; of bill prohibiting aliens from holding land in the United States; of bill making Presidential and Congressional election days holidays, and punishing bribery; and of bill directing disbursement of at least \$200,000,000 Treasury surplus, and substituting Treasury notes for bank notes retired, were severally referred to the Committee on the Public Lands:

By Mr. PIRCE: Petition of Charles M. Smith and others, citizens of

Rhode Island.

By Mr. RANNEY: Petition of D. F. Coleman and 60 others, of P. J. Haynes and 122 others, and of L. Colundo and 201 others, citizens of the Third district of Pennsylvania.

SENATE.

FRIDAY, July 30, 1886.

The Senate met at 11 o'clock a. m. Prayer by the Chaplain, Rev. J. G. BUTLER, D. D. The Journal of yesterday's proceedings was read and approved.

EXECUTIVE SESSION.

Mr. EDMUNDS. Mr. President, I think it is as good a time as any now for a minute of executive session. I move that the Senate proceed to the consideration of executive business.

Mr. JONES, of Arkansas. Will the Senator withhold the motion for a moment that I may submit an amendment to a bill?

Mr. EDMUNDS. The morning business will go right on in two minutes, if the Senator will wait. It will not disturb the morning business at all.

ness at all.

Mr. JONES, of Arkansas. Very well.
The PRESIDENT pro tempore. The Senator from Vermont moves The PRESIDENT pro tempore. The Senator from Vermont me that the Senate proceed to the consideration of executive business

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After three minutes spent in executive session the doors were reopened.

OHIO RIVER BRIDGE AT CAIRO.

Mr. CONGER. I ask leave to withdraw the report which I made yesterday from the Committee on Commerce on the bill (H. R. 9728) to authorize the Chicago, Saint Louis and New Orleans Railroad Company and the Illinois Central Railroad Company, or either of them, to construct a bridge over the Ohio River at or near Cairo, Ill., and to

have the bill recommitted to the committee.

The PRESIDENT pro tempore. If there be no objection the report will be withdrawn, and the bill will be recommitted to the Committee on Commerce. The Chair hears no objection. The Chair is advised that there is another bill. Does the Senator from Michigan include

that bill in his request?

Mr. CONGER. One was reported adversely and indefinitely post-

poned. Let them both be recommitted.

The PRESIDENT pro tempore. If there be no objection the vote by which the bill (H. R. 1718) authorizing the Chicago, Saint Louis and New Orleans Railroad Company and the Illinois Central Railroad Company and the Private of the Chicago, Saint Louis and New Orleans Railroad Company and the Illinois Central Railroad Company and the Orleans Railroad Company and the pany, or either of them, to construct a bridge over the Ohio River at or near Cairo, Ill., was indefinitely postponed will be reconsidered, and the bill will be recommitted to the Committee on Commerce.

DEPARTMENTAL CLERKS-CIVIL SERVICE.

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States; which was read, and, with the accompanying papers, referred to the Committee on Civil Service and Retrenchment, and ordered to be printed:

To the Senate of the United States:

To the Senate of the United States:

I transmit herewith reports from the heads of the several Executive Departments of the Government in answer to a resolution of the Senate of June 18, 1886, which requested certain information regarding appointments in such Departments, and having relation to the civil-service law.

GROVER CLEVELAND.

EXECUTIVE MANSION, July 29, 1886.

PETITIONS AND MEMORIALS.

Mr. MILLER presented the memorial of Luther M. Wheeler Post, Grand Army of the Republic, of Saratoga Springs, N. Y., remonstrating against the proposition to attach to pension bills measures of taxation; which was referred to the Committee on Pensions.

REPORTS OF COMMITTEES.

Mr. SAWYER, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 2883) granting a pension to James E. Abbs; and A bill (S. 2884) granting a pension to Mrs. Anna Etheridge Hooks. He also, from the same committee, to whom was referred the bill (S. 2774) to provide a pension for Mrs. Anna Etheridge Hooks, reported adversely thereon, and the bill was postponed indefinitely.

JOINT RESOLUTION INTRODUCED.

Mr. BUTLER introduced a joint resolution (S. R. 80) providing for

one month's extra pay for certain employés of the Senate and House of Representatives; which was read twice by its title.

The PRESIDENT pro tempore. Does the Senator from South Carolina ask to have the joint resolution placed on the Calendar?

Mr. BUTLER. I ask for its immediate consideration. I do not

want it to go on the Calendar.

The PRESIDENT pro tempore. The Senator from South Carolina asks unanimous consent that the Senate proceed to the consideration of the joint resolution.

Mr. EDMUNDS. I object.

Mr. EDMUNDS. I object.

The PRESIDENT protempore. Objection is made.

Mr. BUTLER. I ask that the joint resolution lie on the table.

Mr. EDMUNDS. It will have to go somewhere.

The PRESIDENT protempore. Does the Senator from South Carolina wish to have the joint resolution referred to a committee?

Mr. BUTLER. Let it be referred to the Committee on Contingent

Expenses

The PRESIDENT pro tempore. The joint resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the

AMENDMENT TO A BILL.

Mr. JONES, of Arkansas, submitted an amendment intended to be proposed by him to the bill (H. R. 9736) to grant the Maricopa and Phenix Railway Company of Arizona the right of way through the Gila River Indian reservation; which was referred to the Committee on Indian Affairs, and ordered to be printed.

NORTHERN PACIFIC BAILROAD LANDS.

The PRESIDENT pro tempore appointed Mr. Dolph, Mr. Telles, and Mr. Cockrell the conferees on the part of the Senate on the disagreeing votes of the two Houses upon the amendment of the House of Representatives to the bill (S. 2172) restoring to the United States cer-tain of the lands granted to the Northern Pacific Railroad Company to aid in the construction of a railroad from Lake Superior to Puget Sound and to restore the same to settlement, and for other purposes.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Clark, its Clerk, announced that the House had passed the following bills and joint resolution; in which it requested the concurrence of the Senate:

A bill (H. R. 4476) for the relief of Alexander Worrall;

A bill (H. R. 633) for the relief of Maj. G. W. Candee;

A bill (H. R. 2086) for the relief of Francis M. Bell;

A bill (H. R. 4097) for the relief of William J. Owings; and

Joint resolution (H. Res. 82) for the relief of Luther F. Warder.

The message also announced that the House requested the Senate to return to the House the joint resolution (H. Res. 295) permitting the public building authorized by act of Congress approved June 30, 1886, at Savannah, Ga., to be located not less than 40 feet from any other building instead of 50 feet, as provided in said act.

The message further announced that the House had passed the following bills, with amendments, in which it requested the concurrence

of the Senate:

A bill (S. 22) for the relief of Martin Murphy and P. B. Murphy; A bill (S. 718) for the relief of Francis Gilbeau; A bill (S. 1008) to empower the Board of Foreign Missions of the Methodist Protestant Church to hold property in the District of Co-A bill (S. 1599) for the relief of the Phœnix National Bank of the city of New York.

The message also announced that the House had passed the following A bill (S. 13) for the relief of William J. Smith, late surveyor of cus-

toms for the port of Memphis, State of Tennessee;

A bill (S. 68) for the relief of S. B. Cranston, of Oregon;

A bill (S. 218) to confirm the title to certain lands in Platte County,

Missouri, and authorize patents to be issued therefor to Kinsey B. Cecil;

A bill (S. 224) for the relief of Charles F. Bowers; A bill (S. 289) for the relief of J. A. Henry and others; A bill (S. 304) to compensate physicians for services rendered under an order of the United States court of the northern district of Alabama;

A bill (S. 380) for the relief of Henrietta H. Cole; A bill (S. 632) to provide for the settlement of estates of deceased Kickapoo Indians in the State of Kansas, and for other purposes;

A bill (S. 699) to authorize the Secretary of the Interior to issue to George K. Otis duplicates of certain land-warrants lost while in the possession of the officers of the Government;

A bill (S. 708) for the relief of Stephen N. Smith;
A bill (S. 936) for the relief of John M. McClintock;
A bill (S. 972) for the relief of Thomas P. Morgan, jr.;
A bill (S. 1899) for the relief of Mrs. Lizzie Maynadier Phelps, widow of Capt. Seth Ledyard Phelps, late minister of the United States to Peru; and
A bill (S. 2415) for the relief of the trustees of the Christian Brothers'

College, of Saint Louis, Mo.

COMMITTEE ON ADDITIONAL LIBRARY ACCOMMODATIONS.

Mr. VOORHEES. I submit the following resolution and ask for its present consideration:

Resolved, That the Select Committee on Additional Accommodations for the Library of Congress be, and it is hereby, authorized to sit during the recess of Congress, and that any necessary expenses shall be paid out of the contingent fund of the Senate, upon vouchers to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. VOORHEES. I simply desire to say that this step is taken not only in concurrence with but by the approval of the building commission which has the work in charge, and who think this is a proper and necessary step.

The resolution was considered by unanimous consent, and agreed to.

JUDGE FOR SOUTHERN ALABAMA-JUDICIAL SALARIES.

Mr. ALLISON. I move that the Senate proceed to the consideration of the joint resolution (H. Res. 126) directing payment of the surplus in the Treasury on the public debt.

The PRESIDENT pro tempore. Before the question is put on that motion the Chair will lay before the Senate the bill (H. R. 28) to provide for the appointment and compensation of a district judge for the southern district of Alabama, returned by the House of Representatives in accordance with the request of the Senate. There is a motion to reconsider pending, made by the Senator from Alabama [Mr. Pugh].

Mr. Pugh. I ask the consideration of the motion I entered to re-

consider.

The PRESIDENT pro tempore. The Senator from Alabama moves that the Senate reconsider the vote by which the bill was ordered to a third reading and passed. If there be no objection, the motion to reconsider will be considered as agreed to. The amendments made to the bill by the Senate will be stated.

The CHIEF CLERK. In section 1, line 6, after the word "receives," the Senate struck out "the same" and inserted "a;" in line 7, after the word "salary," the Senate struck out the words "and to be paid in the same manner that the judge of the other district court of said. State is allowed and paid" and inserted "of \$3,500, payable quarterly;" so as to read:

That there shall be appointed by the President of the United States, by and with the advice and consent of the Senate, a district judge for the southern judicial district of the State of Alabama; and that said judge shall be entitled to receive (1) a yearly salary (2) of \$3,500, payable quarterly.

The Senate also struck out sections 2 and 3 in the following words:

SEC. 2. That terms of the district court for the southern district of Alabama shall, in addition to the regular terms as now provided by law, be held on the fourth Mondays in October, February, and April in each year, for the purpose of deciding causes of admiralty and maritime jurisdiction.

SEC. 3. That the district judge for the southern district of Alabama shall reside

And in lieu thereof inserted:

SEC. 2. That the jurisdiction of the present district judge for the several districts of Alabama, and his successors, shall hereafter be confined to the northern and middle districts of said State.

SEC. 3. That the salaries of the several judges of the district courts of the United States shall hereafter be at the rate of \$5,000 per annum.

SEC. 4. That no person related to any justice or judge of any court of the United States, by affinity or consanguinity, within the degree of first cousin, shall be appointed by such court or judge to, or employed by such court or judge in, any office or duty in any court of which such justice or judge may be a member.

The Senate also amended the title so as to read: "An act to provide for the appointment and compensation of a district judge for the southern district of Alabama, and to establish the salaries of the judges of the district courts of the United States."

Mr. PUGH. It is only section 3, in relation to the salaries of district judges, the amendment offered by the Senator from Illinois [Mr. Logan], that I make the motion to reconsider, with his knowledge and consent. The other amendments as recommended by the Judiciary Committee I do not wish to disturb.

The PRESIDENT pro tempore. The question is on agreeing to the amendment providing for uniform salaries for district judges.

Mr. EDMUNDS. The old amendment is now before the Senate, which has been reconsidered. Then the Senator from Alabama wants

which has been reconsidered. Then the Senator from Alabama wants to move to amend by striking out section 3 as it stands.

The PRESIDENT pro tempore. The question is on the amendment striking out that section. [Putting the question.] The ayes have it and the motion is agreed to, and the clause is stricken out. The remaining amendments will be regarded as agreed to, and the bill read the third time and passed.

Mr. EDMUNDS. I want to have it read by its title, so that everybed will know what we are doing. In this way we can not under-

body will know what we are doing. In this way we can not under-

stand.

The PRESIDENT pro tempore. The bill will be read by its title.

The CHIEF CLERK. A bill (H. R. 28) to provide for the appointment and compensation of a district judge for the southern district of Alabama

Mr. GEORGE. I should like to have the section which was stricken out read, so that we may know what it is.

Mr. PUGH. It is in relation to the increase of the salaries of judges.

The PRESIDENT pro tempore. The section will be read.

The Chief Clerk read section 3, as follows:

SEC, 3. That the salaries of the several judges of the district courts of the United States shall hereafter be at the rate of \$5,000 per annum.

The PRESIDENT pro tempore. The Chair will again put the question on striking out the third section of the bill. [Putting the question.] The ayes have it, and the motion to strike out is agreed to.

Mr. EDMUNDS. There is another section which relates to all the judges whose salaries were increased that ought to go out also, if the salary section goes out, so as to leave only a local bill for that place. That is section 4, about kinship, &c.

The PRESIDENT pro tempore. The section referred to will be read.

The Chief Clerk read as follows:

SEC. 4. That no person related to any justice or judge of any court of the United States, by affinity or consanguinity, within the degree of first cousin, shall be appointed by such court or judge to, or employed by such court or judge in, any office or duty in any court of which such justice or judge may be a member.

I ask to have the amendment which was declared stricken out by the Chair read again for the information of the Senate. The vote on this side of the Chamber was very largely in the negative. Mr. HALE. What has become of the clause just read? Has that

been stricken out?

been stricken out?

The PRESIDENT pro tempore. No; the vote has not been taken upon it. The Senator from New Jersey [Mr. Sewell] asks that the vote be taken on the preceding clause. The title of the bill will be again read if Senators will preserve some degree of order.

The CHIEF CLERK. A bill (H. R. 28) to provide for the appointment and compensation of a district judge for the southern district of

The PRESIDENT pro tempore. To this bill the Senate made amendments when it was before the Senate. The Senator from Vermont now moves to strike out the fourth section.

I ask for the reading of the amendment acted upon. The PRESIDENT pro tempore. The amendment will be read.

The Chief Clerk proceeded to read section 4.

Mr. EDMUNDS. That was just read. What the Senator from New Jersey asks is to have a vote on striking out section 3 of the amendment, the general salary provision. That is what he wants.

Mr. CHACE. I want to hear the amendment read.

The PRESIDENT pro tempore. That is the amendment which the

Chair directed to be read.

The Chief Clerk read section 3.

Mr. DAWES. The motion is, I understand, to strike that out.
Mr. SEWELL. I ask that the vote be taken again on striking out
section 3, for practically to my mind that is all there is in the bill.

Mr. PUGH. It is a local bill allowing an additional judge for the southern district of Alabama on the recommendation of the whole bar and of the circuit and district judges of the United States. They say it is indispensable to the administration of justice there in maritime cases. The Judiciary Committee reported it unanimously, and the bill as it stands now is for that local purpose, to answer that local demand.

The amendment of the Senator from Illinois [Mr. LOGAN] increasing the salary of all the district judges to \$5,000 was general legislation on this local bill, and if I may be permitted to say so, the bill increasing the salaries of these judges, which went from here to the other House, is on the House Calendar with a favorable report from the Judiciary Committee and that question is open there now and pending in the House. It does not belong to this bill at all, and it can not hasten the action of the House upon it. This bill was away behind the general bill to increase the salary, and there is no purpose at all that can be promoted by keeping this amendment in the bill. The Senator from Illinois who offered it agreed that it should be reconsidered, with a knowledge of the facts.

Mr. SEWELL. It is all very well for the Senator from Alabama to endeavor to get his local bill through, but the third section is an expression of the views of the Senate on this question. It has been passed upon on more than one occasion by the Senate and rejected by the House. I think the Senate should stick to its amendment, as it is evidently a very proper one.

idently a very proper one.

Mr. SAULSBURY. It is very certain that if this general provision is attached to this local bill the effect will be to defeat the local bill. It is an important matter to the people of Alabama; and the very question involved in the third section, as the Senator from Alabama says, has been before the Senate in an independent bill and is now pending in the House. What is the use, therefore, of defeating this local bill for the purpose of asserting again what the Senate has already asserted in reference to the question of salaries?

Mr. ALDRICH. I rise to make a parliamentary inquiry. I should like to know how this bill came before the Senate.

The PRESIDENT pro tempore. It came before the Senate by a request from the Senate to the House of Representatives to return the bill. Mr. ALDRICH. How does it come before the Senate for considera-

tion now? The PRESIDENT pro tempore. It comes before the Senate in the form of a message from the House of Representatives, which it was the duty of the Chair to lay before the Senate.

Mr. ALDRICH. On a question of reference, I suppose.

The PRESIDENT pro tempore. On a motion to reconsider, and that motion has been agreed to. The question is on striking out the third section of the bill.

Mr. SEWELL. I ask for the yeas and nays on that question.

The yeas and nays were ordered.

Mr. PUGH. It defeats the local bill if that amendment is kept in it, and without any possible advancement of the purpose to increase the salary. This proposed increase of salary is already in a general bill passed by the Senate, which has been reported favorably by the House Judiciary Committee; it is on the House Calendar and would be ahead of this bill on the Calendar if the amendment remains in this local bill.

It is putting general legislation on a local bill and defeats the local bill reported unanimously from the Judiciary Committee on a recommendation of the whole bar and the circuit and district judges of the United States court. It defeats this bill if that amendment is kept in there without any possible chance of promoting the passage of the general salary bill. I ask the Senate not to concur in this amendment because it accomplishes nothing except to defeat this local bill granted by the Judiciary Committee as of paramount necessity.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Secretary proceeded to call the roll and Mr. ALDRICH responded

to his name.

Mr. BERRY. Is the question on striking out the third section? The PRESIDENT pro tempore. The question is on striking out the

Mr. PUGH. The motion now is to disagree to the amendment. The PRESIDENT pro tempore. The motion is to strike out.

Mr. CHACE. I have been listening but I confess I do not understand the question as it is before the Senate.

The PRESIDENT pro tempore. The question is upon striking out of the bill the section which has been read. If the Senator is in favor of striking out, he will vote "yea."

Mr. CHACE. That is the motion of the Senator from New Jersey

[Mr. SEWELL]?
The PRESIDENT pro tempore. It is the motion of the Senator from

Alabama [Mr. Pugh].

Mr. Pugh. The Senator from Illinois [Mr. Logan], who offered this amendment to this local bill, was advised of all the facts and agreed that I might make this motion without his opposition, and I am doing this with his sanction, he having offered the amendment before he left here and he concurs in the vote now to strike it out-

Mr. ALDRICH. Is discussion in order.

Mr. PUGH. Because if it be kept in it will accomplish nothing in

securing this increase of salary but will defeat this local bill.

The PRESIDENT pro tempore. The Chair must insist upon the roll-call being completed when it is started. Debate is utterly out of

The Secretary resumed the calling of the roll.

Mr. MANDERSON (when his name was called). I am paired with the Senator from Kentucky [Mr. BLACKBURN].

The roll-call was concluded.

Mr. HAWLEY. I wish to announce that my colleague [Mr. PLATT] sends word to me that he is paired with the Senator from Kentucky [Mr. Blackburn]

Mr. MANDERSON. That releases me from my pair with the Senator from Kentucky, and I vote "yea."

The result was announced-yeas 35, nays 9; as follows:

YEAS-35.

Beck, Berry, Blair, Call, Coke, Conger, Cullom, Eustis, Frye,	George, Gibson, Gorman, Hale, Hampton, Hawley, Jones of Arkansas, McPherson, Manderson,	Maxey, Mitchell of Oreg., Palmer, Payne, Pugh, Ransom, Saulsbury, Sherman, Teller,	Vanee. Van Wyck, Vest, Voorhees, Walthall, Whitthorne, Wilson of Iowa, Wilson of Md.
	NA.	YS-9.	
Aldrich, Allison, Chace,	Dolph, Miller,	Riddleberger, Sawyer,	Sewell, Stanford.
	ABSE	NT-32.	
Blackburn, Bowen, Brown, Butler, Camden, Cameron, Cockrell, Colquitt,	Dawes, Edmunds, Evarts, Fair, Gray, Harris, Harrison,	Hoar, Ingalls, Jones of Florida, Jones of Nevada, Kenna, Logan, McMillan, Mahone,	Mitchell of Pa., Morgan, Morrill, Pike, Platt, Plumb, Sabin, Spooner.
The PRESI	DENT pro tempore.	So the clause is	stricken out. Th

Senator from Vermont moves to strike out section 4.

Mr. HOAR. I rise to a question of order. I understand that the Committee of the Whole recommended several amendments to the Senate, some of them coming from the Judiciary Committee, and the vote adopting those amendments was reconsidered. Therefore there was nothing in the bill of those amendments at all. There could be therefore no striking out of what was not in the bill. This vote should be treated by unanimous consent as a vote rejecting the amendment. Otherwise our Journal will be irregular and the whole thing will be irreg-

The PRESIDENT pro tempore. The Chair is of opinion that the motion of the Senator from Vermont to strike out this particular amendment is in order, but the most usual form would have been upon agree-

ing to the amendment. Either, however, is in order.

Mr. EDMUNDS. Why I made the motion was this: I had supposed, although perhaps I was in error in fact about it, that this amendment had been agreed to as in Committee of the Whole and was a part or a whole amendment reported from the Committee of the Whole, and my friend knows it would have been a motion to amend the amendment reported from the Committee of the Whole by striking out so much of it as embraced this clause. If I was correct about that, then the motion would have been in proper form, I think. If I was not correct about that, and this was a separate and independent and distinct amendment, then the form of the question should have been as the Senator from Massachusetts states.

The PRESIDENT pro tempore. The amendments were all made in Committee of the Whole and were all reported to the Senate. is now in the Senate, with this amendment pending. Prebably the more formal way would be to put the question on agreeing to the

amendment.

Mr. EDMUNDS. Let there be unanimous consent for the Chair and the Secretary to make up the Journal in the right way.

Mr. HOAR. That is all I desire.

The PRESIDENT pro tempore. If there be no objection the motion will be considered as one on agreeing to the amendment.

Mr. HOAR. As non-concurring in the amendment.

Mr. EDMUNDS. Now, let us non-concur in the next one, which is a part of the same general legislation, section 4, about the kinship business, which has been read twice already.

The PRESIDENT pro tempore. The Senator from Vermont moves to non-concur in the amendment, inserting section 4, which will be read.

The Chief Clerk read as follows:

SEC. 4. That no person related to any justice or judge of any court of the United States, by affinity or consanguinity, within the degree of first cousin, shall be appointed by such court or judge to, or employed by such court or judge in, any office or duty in any court of which such justice or judge may be

The amendment was non-concurred in.

Mr. EDMUNDS. That leaves it just the local bill that it was at first.

The amendments made were ordered to be engrossed and the bill to be read a third time. The bill was read the third time, and passed.

AMERICAN ANNIVERSARY CELEBRATION

Mr. HOAR. I ask that there be laid before the Senate the resolu-

tion reported yesterday by me from the Committee on the Library.

The PRESIDENT pro tempore. The Chair is of opinion that the resolution having been reported and objected to goes to the Calendar. It is not like an ordinary resolution objected to.

Mr. EDMUNDS. It goes to the Calendar like any other report.

The PRESIDENT pro tempore. It can only be taken up on motion.

Mr. HOAR. Does a resolution reported by a committee have less privilege than a resolution offered by a single Senator?

The PRESIDENT pro tempore. It goes to the Calendar under the

rule. Mr. HOAR. Then I ask leave to withdraw it and to introduce it in my own name at this time, so that it will be in order to-morrow.

Mr. HALE. I must object to that, because it will give rise to a long

Mr. HOAR. I have a right to introduce a resolution.
Mr. HALE. You can not withdraw a report without consent. This matter will give rise to extended debate whenever it comes up, and I must object to its being taken from the Calendar, where it properly belongs, and where it must take its course.

Without withdrawing it, I will introduce it, as I have Mr. HOAR.

a right to do.

The PRESIDENT pro tempore. The Senator from Massachusetts introduces a resolution, which will be read.

The Chief Clerk read the resolution, as follows:

Whereas the approaching centennial anniversary, in 1889, of the adoption of the Constitution of the United States, and that of the four hundredth anniversary, in 1892, of the discovery of America by Christopher Columbus, are two important historical events, fraught with great patriotic interest, not only to the citizens of this Republic and of the governments of the western hemisphere, but also mark occasions of transcendent importance in the history of the civilized world: Therefore,

Be it resolved. That a committee of five members of the Senate, of whom the President of the Senate shall be one, be appointed to consider, formulate, and report at the next session of Congress a plan for properly celebrating, at the capital of the Republic, these two illustrious anniversaries. Said committee are authorized to act in concert with any similar committee of the House of Representatives, and to sit during the recess.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

at this time, but I wish to express with great respect my dissent from the opinion of the Chair that a resolution, a Senate resolution only, reported by a committee has any less right than the same resolution offered by a single Senator. I believe, with much deference to the great experience of the Chair, that I should have a right to lay it before the Senate at this time; but I raise no question and let it go over.

The PRESIDENT pro tempore. The Chair must say in respect to that point that the universal custom of the Senate has been the other way.

point that the universal custom of the Senate has been the other way. A resolution reported from a committee is like any other report.

Mr. HOAR. It is not a joint resolution but a Senate resolution. The PRESIDENT pro tempore. A concurrent or any other resolution. They are all placed on the Calendar.

Mr. EDMUNDS. That has been the practice for years. Anything

reported from a committee goes on the Calendar.

The PRESIDENT pro tempore. Is there objection to the present consideration of the resolution submitted by the Senator from Massachu-

Mr. HALE. Let it go over.

The PRESIDENT pro tempore. Objection being made, the resolution goes over.

STATISTICS OF WHEAT CROP.

Mr. WILSON, of Iowa. Yesterday I submitted a resolution and asked for its immediate consideration. The Senator from Kansas [Mr. PLUMB] objected, but he did so under a misapprehension of the character of the resolution.

The PRESIDENT protempore. The Chair lays before the Senate the resolution submitted yesterday by the Senator from Iowa.

The resolution was read and agreed to, as follows:

Resolved, That the Commissioner of Agriculture be directed to report to the Senate, at the commencement of the next session of Congress, the amount, in bushels, of wheat harvested in each wheat-producing country during the present year and the amount harvested in each during the preceding five years; the average increase or decrease in the world's consumption of wheat during said years; the probable requirements of each wheat-importing country prior to September 1, 1887, and the probable surplus in each wheat-exporting country to meet such requirements; with the number of acres of wheat in the ground in each to make the crop of 1887 at the date of said report, as compared with like date in 1885, said report to be as brief and concise as a clear statement of the information called for will admit.

PACKING AND SELLING CUT TOBACCO.

Mr. ALLISON. I move that the Senate proceed to the consideration of the joint resolution (H. Res. 126) directing payment of the surplus in the Treasury on the public debt.

Mr. EUSTIS. I rise to a parliamentary inquiry.
The PRESIDENT pro tempore. The Senator from Louisiana rises to a parliamentary inquiry.

Mr. EUSTIS. Yesterday the Senator from Rhode Island [Mr. AL-DRICH] made a motion to recommit the bill (H. R. 8738) to so further amend section 3362 of the Revised Statutes, as amended, and section 3363 as makes a distinction in the mode of packing and selling cut to-bacco. I understood the Chair to say that the motion would be considered this morning. What I desire to state is that it places me in a very peculiar position if the motion is not considered, for so long as the motion is pending I shall not feel at liberty to call up the bill itself for consideration. It seems to me it places me in a very unfair position by reason of that fact.

Mr. ALLISON. If the bill can be recommitted without debate I, of course, will not object; but if that question is to be taken up and to be debated the Senator from Louisiana will see that it is likely to occupy an hour or two.

Mr. EUSTIS. I simply wish to explain the bill and to make a state-

The PRESIDENT pro tempore. The Chair is clearly of opinion that the motion to recommit attaches itself to the bill, and that it can only be done when the bill is taken up by a vote of the Senate or by being reached on the Calendar.

Mr. EUSTIS. Do I understand the Chair to rule that a motion to recommit can not be considered?

The PRESIDENT pro tempore. A motion to recommit a bill which is on the Calendar can only be considered on a motion to proceed to the consideration of that bill on the Calendar or on reaching it on the Calendar or on the Ca The PRESIDENT pro tempore. endar. A motion to proceed to consider it would be in order at any time.

Mr. EUSTIS. I understood the Chair to decide yesterday that the

motion would come up this morning.

The PRESIDENT pro tempore. Not necessarily, unless the Senator should move it. The Senator can move it at any time when there is not another motion pending.

Mr. EUSTIS. I was prevented from making some remarks yester-day on the statements of the Chair. I yield to the Senator from Rhode

Mr. ALDRICH. I should be glad to have it disposed of now. The PRESIDENT pro tempore. It is not now in order except by

unanimous consent.

The PRESIDENT pro tempore. Is there objection to the present conderation of the resolution?

Mr. EUSTIS. I ask unanimous consent.

The PRESIDENT pro tempore. Pending the motion of the Senator from Iowa, the Senator from Louisiana asks the unanimous consent of

the Senate to proceed to the consideration of the motion to recommit House bill 8738 to the Committee on Finance.
Mr. CONGER. I object.

Mr. CONGER. I object.

The PRESIDENT pro tempore. Objection is made. It can only be done by unanimous consent.

TREASURY SURPLUS.

Mr. ALLISON. I renew my motion.

The PRESIDENT pro tempore. The Senator from Iowa moves that the Senate proceed to the consideration of the joint resolution (H. Res. 126) directing payment of the surplus in the Treasury on the public debt

The motion was agreed to.
The PRESIDENT pro tempore. The Senator from Colorado [Mr. TELLER] has the floor.

Mr. MAXEY. I ask the Senator from Colorado to be kind enough to yield a moment to me to call up a bill from the other House with

an amendment, with a view to concurring in the amendment.

The PRESIDENT pro tempore. Does the Senator from Colorado

yield?

Mr. TELLER. I yield if it will take no time.

FRANCIS GILBEAU.

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 718) for the relief of Francis Gilbean.

The amendment of the House of Representatives was, in lines 6 and 7, to strike out the words "and all damages to the same."

The amendment was concurred in.

WISCONSIN WESTERN JUDICIAL DISTRICT.

Mr. SPOONER. The Senator from Colorado yields to me to call up Mr. SPOONER. The Senator from Colorado yields to me to call up House bill 9857, and I ask unanimous consent that it may be taken.up. Mr. ALLISON. If it leads to debate I must object.

Mr. SPOONER. It is purely a local matter and will not lead to debate. If it does I will not ask to have it considered.

It will only take a moment, I understand. Mr. TELLER.

The PRESIDENT pro tempore. The Senator from Wisconsin asks unanimous consent that the Senate proceed to the consideration of the bill (H. R. 9857) in relation to the western judicial district of Wisconsin. Is there objection? The Chair hears none, and the bill is before the Senate as in Committee of the Whole.

The bill was reported from the Committee on the Judiciary with an amendment, to strike out section 2 of the bill and section 3 down to the word "that" in line 9, in the following words:

the word "that" in line 9, in the following words:

Sec. 2. And be it further enacted. That after the commencement of either of said terms of said courts to be held at Eau Claire and La Crosse respectively, as hereinbefore provided, and until the first day of the next succeeding regular term of said circuit and district courts herein appointed to be held in said western district, it shall be lawful for either or both of said circuit and district courts at any time to be open at Madison, and to there do and transact any business whatsoever therein not requiring the aid or intervention of a jury.

Sec. 3. And be it further enacted. That all provisions of law inconsistent with this act are hereby repealed; but nothing in this act shall interfere with the power now possessed by the judges of said courts to order special terms of the same, as now provided by law: Provided, however, That nothing herein shall be so construed as abolishing the provisions of law for a clerk and circk's office of said court at La Crosse and Madison, Wis.; but the same shall remain as now constituted, except that—

and to insert the word "and."

The amendment was agreed to.

The PRESIDENT protempore. If there be no further amendment as in Committee of the Whole the bill will be reported to the Senate

Mr. EDMUNDS. I wish to have the bill read when reported to the Senate, and every other bill. I know how anxious the Chair is to get on, but otherwise if a Senator's attention is withdrawn for a single moment a bill goes by. I ask the Chair to have every bill take its regular report, third reading, and passage in a regular and formal way. Then nobody can say that anything has slipped through without our I ask the Chair to have every bill take its regknowing it

The PRESIDENT pro tempore. The bill will be reported as it stands.

The Chief Clerk read the bill as amended, as follows:

That the regular terms of the circuit and district courts in the western district of Wisconsin shall be held at the times and places following: At Eau Claire on the first-Tuesday in June, at La Crosse on the third Tuesday in September, and at Madison on the first Tuesday in December in each year. And the clerk residing at Madison shall attend all terms of said courts at Eau Claire as clerk thereof.

The PRESIDENT pro tempore. The bill having been reported to the Senate, the question is on concurring in the amendment made as in Committee of the Whole.

The amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. SPOONER. I move that the Senate insist on its amendment and request a conference with the House of Representatives.

The motion was agreed to.

By unanimous consent the President pro tempore was authorized to appoint the conferees on the part of the Senate.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had non-concurred in the amendments of the Senate to the concurrent resolution of the House for the printing of the report of the Director of the Mint on the production of the precious metals in the United States, agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. Reid, of North Carolina, Mr. Farquiar, and Mr. Bland the managers at the conference on the part of the House.

The message also announced that the House had non-concurred in

the message also amounted that the Frouse had not content in the amendments of the Senate to the joint resolution (H. Res. 201) for printing report of Commissioner of Agriculture, agreed to the confer-ence asked by the Senate on the disagreeing votes of the two Houses thereon, and had appointed Mr. Reid, of North Carolina, Mr. Far-QUHAR, and Mr. HATCH the conferees on the part of the House

The message also announced that the House had passed the bill (S. 2530) for the relief of the legal representatives of John Wightman, de-

will be no objection.

Mr. ALLISON. Will the Senator from Vermont agree to 4 o'clock?

Mr. EDMUNDS. I do not know. I have the intention of saying something about this business myself, and as I am somewhat modest, after all the leading financiers have spoken and the real representatives.

of the people wish to be heard the time may be gone. I think we had better go on a little while.

Mr. TELLER. Mr. President, yesterday I yielded the floor to a question the Senator from Mississippi [Mr. George] had asked me, a very pertinent inquiry. When I complained that there were hoarded in all the moneyed centers of this country and the world vast quantities of money not discharging the proper functions of money, he inquired if I knew of any method by which the owners of this money could be compelled to put it in circulation. I replied that I did not, and I do not now know of any method by which the private banker, or even the public banker, whether it be a corporation or an individual that holds the money, can be compelled to pay it out and put it in circulation; but I was about to add that this resolution was looking to the end of compelling the Government of the United States to put its money out, the money that it had locked up in its Treasury beyond the reach of

the money that it had locked up in its Treasury beyond the reach of the business enterprises of the country.

Then the question arose, largely brought about by an interrogatory put by the Senator from Rhode Island [Mr. Aldrich] whether this was not after all a measure of contraction, whether we were not by this proceeding to contract the money of the country. I think the Senator from Rhode Island proceeded upon the hypothesis that all of the currency in the country was discharging the functions of money, that it was in circulation, that it was out. There is where the honorable Senator from Rhode Island is in error. The money that is locked up in the Treasury of the United States is not performing the functions of money: it is not intended to perform the functions of money. The money; it is not intended to perform the functions of money. The honorable Senator from Ohio [Mr. Sherman] declared that its principal function was to strengthen the credit of the Government of the United States. It is not in active use and is not intended to be in active use at all.

If the \$106,000,000 of bonds held by the national banks to secure their circulation, upon which they have issued something over \$90,-000,000 of currency, shall be called in there will not be a reduction in the proper sense of the circulating medium of the country, there will not be contraction to the extent of the national-bank notes that are retired, and it can be readily seen why that will not be so. For every \$100,000 that they bring into the Treasury they have \$90,000 in currency out; they will receive from the Government \$10,000 of good money now locked up in the Treasury, not now performing the func-tions of money. When the holders of their bills—not the banks themselves, but the holders of their bills-shall come to the Treasury with the bills they will receive in exchange for those bills an equal number of greenbacks or gold or silver, as the case may be, which will go out to fill the void made by the return to the Treasury of the national-bank notes. Then one fills the place of the other and increases circulation to the extent of ten or more million dollars on this transaction. It is plain, there can be no question about it, and as I said the error proceeds on the theory that the \$100,000,000 that the Government has locked up in its Treasury is doing the duty of money when that is not the fact.

Mr. President, in the course of this debate it has been asserted over and over again that the Treasury Department is a bank of issue. It has been asserted over and over again that the Government of the United States was bound by the same rules that bind banks and corporations doing business. The fallacy of the whole argument proceeds on the theory that the Government is bound by the same rules and is subject to the same casualties that individuals are, which is not true.

The Senator from Ohio said yesterday that the \$100,000,000 in the national Treasury for the redemption of greenbacks was the basis of the credit of the United States; that but for that the silver dollar would not be at par. Mr. President, the silver dollar is at par with gold because it has the purchasing-power of a gold dollar; because the Government of the United States receives it for its revenues, its internal and its gustoms duties; because it is a local tonder between year and and its customs duties; because it is a legal tender between you and me, between every debtor and every creditor in the United States. That is what keeps it at par, and not because there is \$100,000,000 in the Treasury. Shear it of the legal-tender quality and it would not be at par if there were a thousand million of dollars in the Treasury and it bore the imprint of the Government of the United States as it now does

In my judgment it is necessary that the people should be satisfied that they can exchange the greenback for the gold dollar when they want it in order that the greenback may be kept at par.

Mr. DAWES. I should like to ask the Senator why a bank bill is

at par that is not a legal tender?

Mr. TELLER. The national-bank bill is at par because without trouble to the holder he may exchange it for a legal-tender note.

Mr. DAWES. Would not that be true of all the rest?

Mr. TELLER. That is not true of all the rest. They may have the same quality in law that the gold dollar has, but a man may say with as much propriety and with as much truth that the gold dollar is kept at its place by the silver dollar as that the silver dollar is by the gold dollar.

Mr. DAWES. It was not because it was exchangeable for a coin dollar that it was kept at par, but it was solely in the legal-tender quality. Now I ask the Senator why, without the legal-tender quality, a national-bank note is at par, and he says because that can be exchanged for something else.

Mr. TELLER. Exactly, because it can be exchanged. Mr. DAWES. So the other could.

Mr. TELLER. It can be exchanged for a legal-tender note of the United States without expense and without trouble.

Mr. DAWES. That is the true reason, and that would be the same

of the greenback.

Mr. TELLER. Admit it. I have never taken the position that there was money in a paper dollar. I have never believed that the Government by its fiat could create money. I do not belong to that school. I know that there are but two kinds of money in the world. The one is gold and the other is silver. I know that the consent of mankind has made these money from the time that history gives us an account of commercial transactions. But when it is stated here that the credit of the Government of the United States is dependent upon the amount of coin in the Treasury, I say that is not borne out and supported by facts. Back of all this, back of the \$100,000,000, is the certain knowledge to every man who holds a greenback that if that money should be taken for any purpose the promise of the Government is to get another gold dollar for him, or a silver dollar if he wants it, and every holder of a greenback knows that there is a provision in the statute which will authorize the Secretary of the Treasury day by day to put out the bonds of the United States for the purpose of securing gold or silver to make good its promise to pay the greenback. The credit of the United States is back of it. The credit of the United States will not always sustain its paper money. The credit of the United States was back of the paper dollar in 1863 and it failed to sustain it. Why? Because in the first place the Government distrusted its own money; it denied it full legaltender equality; it did not make preparation for exchanging it for the metallic dollar; and therefore the people were given notice by the Government that they could not exchange the paper dollar for the metallic dollar, and hence it was at a discount. But when there is a law on the statute-book providing that every holder of a greenback shall have a gold dollar or a silver dollar for his greenback, and there is in the minds of the people of the United States the knowledge not only of the willingness but of the ability of the Government of the United States to make

good its promise, there can be no question but what the greenback will be maintained in its full value.

Mr. President, I said yesterday, and I said it with some warmth, that Mr. President, I said yesterday, and I said it with some warmth, that there was a conspiracy entered into years ago to appreciate money and to depreciate everything else. It is not the idle assertion of men who feel that the affairs of Government have not been administered wisely financially. In every portion of the world to-day there is the same complaint of stagnation in business, depression in all sorts of enterprises, a stand-still, no new movement, falling prices everywhere, as much in Europe as in this country, and I attribute it, as I said yesterday, to the fact that a few years ago there was an effort made, and it has been studiously maintained ever since, in all the governments of the world to destroy one-half the money of the world so as to enhance the value of the other half the value of the other half.

We are in the habit of going abroad for our information on questions of finance, and I have noticed since I have been in the Senate that if you could read from the London Economist or if you could read from the London Bankers' Magazine an article against the use of silver as money, it was regarded as an argument unanswerable; it was regarded as a perfect answer to any suggestion that might be made of the neces-

sity or propriety of its use as money.
I have the last published Bankers' Magazine for June, which I think is the last that has reached this country, and I find this, which I want to read in support of the assertion I made yesterday that the depression in business was not in this country alone, and in support of the assertion which I made yesterday that a silver dollar, whether it be the 74-cent dollar or the 100-cent dollar, will to-day in all the markets of the world as bullion buy more than it would ten years ago, 50 per cent. more than it would twenty years ago upon nearly all the items that enter into the consumption of man, food, clothing, and all the comforts and luxuries at his. and luxuries of life.

Among the features which have characterized the present depression of

I now read from The Bankers' Magazine-

perhaps the most remarkable is the long-continued and persistent drop which has taken place in the prices of almost all classes of commodities. There have been periods of dull trade before, and there have been periods before in which the prices of many commodities have been low; but so universal a drop has not been recorded within the lifetime of the present general body of business men

Coffee has dropped more than 40 per cent, in that time, sugar fully 30 per cent, tea nearly 20 per cent, wheat about 40 per cent, butchers' meat 10 per cent. Of the metals, copper has fallen about 50 per cent, and iron about 25 per cent. Wool-has fallen 30 per cent.

I could, if there was time, call attention to the same statement made in nearly all the financial works of the world, the same general cry of stagnation, and we are answered as the Senator from Nevada [Mr. Jones] said yesterday when we complain, by "overproduction," "lack of confidence," "why do not the people put their money in enterprises that are promising?" The Senator from Vermont [Mr. EDMUNDS] yesterday seemed to think that the very fact that interest was low was an answer to the claim that there was needed more money in the country. I said then that while you could be row money money money. country. I said then that while you could borrow money upon money you could not borrow money now as cheaply as you could fifteen years ago upon the productive interests of the country, upon mills, upon mines, upon farms, upon railroads, and things of that character. that the securities of municipalities and States, representing as they do money, were in high demand. I desire to call attention now for a mo-

money, were in high demand. I desire to call attention now for a moment to some proofs of that statement. I read from the Banker's Magazine, of April, 1886.

Canada put out in 1870 a 5 per cent, loan due in 1903, and sold that loan for 95 cents on the dollar. In January, 1880, the same loan was worth in the market 108; in July, 1885, 112½; and in March, 1886, 115. She put out a 4 per cent, loan, due in 1904, which was worth 90½ in 1875; 95 in January, 1880; 103 in July, 1885; and 106½ in March, 1886.

New South Wales put out a loan of 5 per cent. due in 1900, which was sold in 1870, sixteen years ago, at 98 cents on the dollar, and today it is worth 113. New South Wales also put out a 4 per cent. loan due in 1908 that sold in 1870 for 913 and it is now worth 105. New Zealand 5 per cent. consols were sold in 1870 for 95, and are to-day worth 110. Queensland 4 percents due in 1915 were sold at 90 in 1870, and are to-day worth 102½. Victoria 4 percents, due in 1899, were sold for $91\frac{1}{2}$ in 1875, and are now worth $104\frac{1}{2}$.

The Bombay, Baroda and Central India Railway bonds, guaranteed by the British Government, were sold in 1870 for 108 standing in the relation of Government loans. To-day they are worth 155. The Great Indian Peninsula Railroad Company bonds, guaranteed also by the Government, worth 109½ in 1870, are worth 147 in 1886.

The Government of Russia, owing more than \$2,000,000,000, with more than seven hundred and eighty millions of paper money unsupported by a dollar of either gold or silver, went into the market and borrowed money at 101½; and yet every year for fifty straight years Russia has been running in debt.

Why do the people turn to these securities? Because they represent money; because, as the Senator from Nevada said, they are futures in money. It is dealing in futures. They know that money is appreciating, and while they know that they never will put their money in

enterprises of ordinary business. No man will buy a mill where it is a dead certainty that the mill is to depreciate on his hands. will build a manufacturing establishment when he is certain its products will bring less ten years from to-day than they bring to-day. Nosody will open up a new farm when he knows the wheat that he puts upon the market will bring no more than it will five years from now.

It is because of this feeling that business stands still. The Government of the United States has lent its full aid for ten years to this conspiracy, as I called it yesterday, unwittingly perhaps; but the great moneyed centers have got control of the Treasury Department, and have had it for years, and why I complain to-day more than I did heretofore is that they have a stronger grip on it to day than they ever had before. They have tightened their grasp upon the Treasury officials, and we are now in the condition that at their nod and at their beck the Treasury Department manages its affairs not in the interest of the people, not in the interest of business, not in the interest of improvement and progress, but in the interest of the men who own the capital of the country locked up in their vaults; and why? Because they are afraid that these men will create a disturbance and will destroy the credit of the Government of the United States. How will they destroy it? We only owe \$136,000,000 of money that anybody has a right to call for, except the silver and gold certificates. There the money is to pay them held in trust; that \$136,000,000 can be paid out within an hour; and yet we are told by the Senator from Ohio that we must keep this money to maintain the credit of the Government. What has the Government to lose? Is its credit to be attacked by these men who of all others are interested in the maintenance of the public credit? What difference does it make to the farmer, what difference does it make to the artisan, what difference does it make to the man who works in a mill or in a mine whether the Government credit is good or whether it is bad? It makes all the world of difference to the man who deals in money, who runs a bank and holds large amounts of wealth in any shape, no matter what, but to the other class none; and yet we are told that that is the class who are coming up here some day to ruin the credit of the United States unless we keep overflowing and full coffers that we may meet their demands.

Mr. President, the Senator from Missouri [Mr. VEST] yesterday said that we had \$228,000,000 more than we needed. That is the fact. There is not a banker in the world who is fit to preside over a two-penny bank that would not know if he were at the head of interests like ours, with unlimited credit, with the whole energy of the people back of him, with the nineteen millions of men who labor and every dollar of wealth in the country back of him, that he could pay out in the way of discounts at least \$225,000,000; and yet with only \$136,000,000 payable we are told that we can not afford to pay that for fear that the moneyed men of the country will make a raid upon the Treasury. What with? How are they to go there? Will they gather up

the currency and bring that in?

where we have paid the \$136,000,000, they have no bonds that they can bring in until 1891. What are they going to come to the Treasury with? Will they gather up the greenbacks? Will they come there and demand gold and silver for the greenbacks? Why should they? What benefit will it be to them? What reason is there to suppose that they want to precipitate a panic in this country by demanding coin for the United States notes? But if they do there is \$96,000,000 of silver there; offer them that. If you do not want to do that, there is a provision in the act of 1875 that would enable the Government of the United States to pay in a single week every dollar of the greenback indebtedness. If they were at the Treasury Department on Monday morning with the whole \$346,000,000—and they could not get up \$300,000,000 if they should try—but if they had the whole three hundred millions that are probably in circulation, including what is locked up in the Treasury, and if they should appear there on Monday morning, the Government could put in its vaults gold enough to pay them all before Saturday night. And yet we are told that we must strengthen the reserves and pile up the money in the Treasury and keep it from performing money functions that the credit of the Government may be preserved! be preserved!

Mr. President, when I commenced my remarks I did not intend to take more than a few moments. I am not going into a general financial discussion. I am not going to discuss the silver question upon this resolution, because it is not necessary to do so. I have never insisted that the Government of the United States should pay silver for bonds. I have insisted that it had a right so to do, and that the bondholder had no right to complain; but if the Government sees fit and is able to had no right to complain; but if the Government sees it and is able to pay gold I have no objection. I have demanded nothing for silver that I have not demanded for gold. I want to keep the two metals on an equality, and it would be as disastrous in my judgment to destroy the gold as it would be to destroy the silver. But I say the Government can pay the \$136,000,000 of bonds now within reach, and can pay it at \$10,000,000 a month and not pay a dollar in silver unless it so chooses to do. I demonstrated yesterday that if the revenues continue as they have been in the past, with what we have on hand, it will be only necessary to draw upon the present surplus \$200,000 a month to meet the demands required by this resolution—\$10,000,000 a month; and because I believe that there is no danger at all, that there is no possibility

of a demand upon the Treasury to the extent that has been suggested, shall vote for the resolution pure and simple as it came from the House, without any of these entangling amendments, for, whether they were put there or not for the purpose of weighing it down, I know that that is the effect, and I believe I may say without impropriety that is the intent.

The honorable Senator from Iowa [Mr. Allison] and the honorable Senator from Ohio [Mr. Sherman] talked about the demands that might be made. They said that interest had to be paid. There is now might be made. They said that interest had to be paid. There is now already in this statement that is before us \$11,000,000 for interest not yet due, and every month there will be added into the liability account the interest as it is computed day by day. There is no possibility that there will be a call made upon the Treasury for pensions beyond its ability to meet, because this resolution deals with the surplus, which means what is left over and above all the money which is necessary to

meet the appropriations for the year.

If you will take the pains to look at the Treasurer's report, which is before me but which I have not the time now to read, you will see that the system of putting money into the hands of public officers, what they call officers' disbursing accounts, enables them to provide, months in advance it may be, for the payment of interest. The money is not paid over to the officers. It is transferred simply on the books. It is provided for by putting it to the officers' credit on the books of the United States, and then the money remains at all times in the Treasury. There States, and then the money remains at all times in the Treasury. There is not anything in it. There is not any danger that there will be a necessity for \$20,000,000 or \$1,000,000 as a working balance. That is simply that you may get more money that you may pile up; more money that you may keep from the business of the country.

I know that is a great thing, to have it said that the Government of the United States has a surplus to-day more than all the nations of the world; and I say here to-day the United States has in its vaults a suplus greater than that of all the great powers of the earth put together; and yet we are told that it is necessary to put aside \$20,000,000

more and to tie it up beyond the use of man.

I do not vote for this resolution because this is a Democratic administration. I voted for the principle of this resolution in 1881. I remember then, when there was a bill before the Senate, that the same outcry was made that is made now. I remember it was prophesied that there would be general destruction of all the material interests of this country if the silver bill passed, and when we did what we are doing now, directed the Treasury Department by a bill, saying that you shall retire no more greenbacks, there was the same general outcry that is being made to-day.

More than once has it been necessary for the people to put their hand upon the Treasury Department. I would to God they would put it on frequently and that the Treasury Department could be brought in relations to the great body of the people who pay the taxes and who are the people who ought to be recognized, not simply in the monetary affairs of legislation, but in all legislation. The nineteen million men and women put down in the census returns as the laboring people are the people who are interested in this legislation, not the banks and the They are the people that make the United States. They are the people that make it strong, and make it great, and make it rich. They build and they create, and they alone add to the wealth of the world, not the banker, not the note-shaver, not the bill-discounter, who is heard always when a question of this kind comes up.

It is the poor man who works by the day, whose capital is his labor, that should be heard. He is as much above the capital of the banker as the heavens are above the earth. The labor of the country represents capital one hundred fold greater than banks. Let us legislate a little in their interest and for them; let us put out the money, stir the business of the country, move the idle wheels of commerce, and give the laborer something wherewith he may earn his bread, and you will not hear of riots in the country; you will not hear of strikes; you will not hear of communism or of anarchists over the land. What the peonot hear of communism or of anarchists over the land. What the people demand and what they only demand is a fair participation in legislation and that legislation shall be directed for their interest as well

as for the interest of the money-king.

Mr. VANCE. Mr. President, on the resolution which is before us I have some very definite views, and I am sure that plain people in the country who are not learned in the technicalities of finance will regard it as a plain distinct proposition. It is simply, shall we pay our debt when we have the money in hand? That course, it seems to me, is the plainest dictate of common sense and old-fashioned honesty. I can well understand that raising taxes from the people, when the money is worth to them 6 or 8 per cent., to pay a public debt which is bearing only 3 per cent. is one question; but when we have the money already raised by taxation and lying idle in the Treasury, the proposition as to whether we shall then pay the 3 per cent. bond is entirely a different

The struggle of the masses of the people of this world, as individuals and as nations, is generally to raise money to pay their debts. Our struggle, with a superabundance of means in our vaults, is to avoid paying our debts. The statesmen of civilization generally have exhausted their ingenuity in devising methods to meet the public necessities and keep taxation down. The genius of our statesmen exhausts itself in the effort to pay no debts and keep taxation up. The most civilized nations spend their money for the public necessities when it is raised. We think it wisdom to pile up our money in the Treasury, where it can neither subserve the purposes of circulation nor pay our indebtednesss

To continue oppressive taxation far beyond the current needs of the Government I have always considered to be unadulterated tyranny; to raise that taxation for the purpose not of defraying the public expenses, but for the purpose of a protective tariff, I have always considered little short of villainy. Look at it in any light, such a course is the utmost folly and unwisdom.

There can be no honest and reasonable pretext assigned for it. this talk about the necessity of keeping up a reserve of a hundred millions to redeem greenback notes in the Treasury of the Government is

Since the resumption of specie payment on the 1st of January, 1879, to the present time but little over fifteen millions in all have ever been presented for redemption out of three hundred and forty-six millions-

but little over two and a quarter millions per annum. How can any extraordinary claims arise against the Treasury of the United States to constitute what is termed an emergency? If the Treasurer of the United States looks at his books he is aware of every possible claim that can arise against the Government, its date, its amount, and its maturity, and it is his business to provide against it, and he and its matchey, and it is his business to provide against it, and he does. They are all stated in the monthly accounts of the Government. If any should by any possibility arise, it is the duty of Congress to meet it, and Congress will meet again after our adjournment, which I hope and trust is not far removed, within five months from this time.

Again, in reference to the allegation that extraordinary contingencies might arise, I ask how is it possible for the Treasury to get far behind its means when the income exceeds the expenditure at the rate of about \$9,000,000 per month and is increasing every day slightly.

The working balance of which we hear so much can not be required to be a great sum, for the surplus is constantly increasing, and the income every day is a little more than the ordinary outgo, and there is now in the Treasury to begin with in the neighborhood of \$80,000,000 of gold and silver and other money over and above all possible demand

The real reason everybody is aware of. It was disclosed by the New York Banking Association in their meeting on the 20th of July of last year, in which they kindly offered to sustain the gold reserve in the Treasury by a loan of ten millions in gold for ten millions in subsidiary coin. That reason was silver.

I call the attention of the Senate to the language of these resolu-

New York Clearing House, New York, July 20, 1885.

New York, July 20, 1885.

At a meeting of the associated banks of this city, held on the 13th instant, the following resolutions were unanimously passed:

Whereas, after careful inquiry into the current operations of the United States Treasury, it is ascertained that with the continued purchase of two million silver bullion per month the probable receipts of gold currency will be insufficient to meet the demands upon it until the meeting of Congress in December next, but that the Secretary will be compelled to make his payments in silver dollars, which will become a most disturbing element in the daily business of the country: Therefore,

Resolved, That to avert this threatened danger, &c.—

They make this offer of \$10,000,000 in gold to the Treasury. is the real secret of this whole transaction.

If that is not the reason, then it is that we must perpetuate the existence of national banks and our national debt for the purpose of affording the national banks the means of banking upon our debt. If the fear of silver being paid to the creditors of the Government is not the real reason, then this must be the reason, for I know of no other that real reason, then this must be the reason, for I know of no other that could justify so extraordinary a measure as declining to pay the public debt when the money is lying idle in the Treasury. This administration, like all the others that have preceded it for several years, has determined not to pay a silver dollar to any public creditor who holds a written obligation in which he agreed to take the silver dollar. This House resolution would compel it to pay silver if any portion of the surplus exceeding the hundred millions reserve should happen to be silver. Hence these tears: hence the natriotic resolution to offer

to be silver. Hence these tears; hence the patriotic resolution to offer to loan to the Government money; nence the great distribution in business centers of which we hear so much; hence the patriotism sion in business centers of which we hear so much; hence the patriotism sion in business centers of which we hear so much; hence the patriotism sion in business centers of which we have all these directly predictions of calamity. They say to loan to the Government money; hence the great distrust and confuof the banks; hence all these direful predictions of calamity. They say that our bonds held abroad will return upon us if we proceed to pay any portion of the public debt in silver. I say let them return; the sooner the better, for there are a little less than twelve million held abroad, about a tenth of 1 per cent. They say that it will contract the currency. I say that it will not contract the currency more or so much as keeping money which is collected from the people locked up in the Treasury of the United States where it can not circulate. They say it will drive gold out of the country. So they said of the coinage of the silver dollar under the Bland law, and yet there is more gold in the country now than there was when that law went into operation—three times as much.

They say it will deplete the gold reserve in the Treasury. So they said also would be the effect of the Bland law; and yet there is more | complimentary to him or to the Senator.

gold, almost twice as much, in the Treasury now than there was when that law was passed.

They said, too, that silver certificates would be no more available for circulation than silver itself, yet we have seen that gold was freely given in exchange for silver certificates so long as the Treasury would permit the exchange.

They say that paying the surplus out for bonds will not put it in circulation, for the bondholders and bankers will lay it up, having already more than they can profitably invest. I do not belive it, sir.

But, if so, why? Why have they more than they can possibly invest? The reason is, it strikes me, that they can make more by dealing and speculating in the difference between the two metals, gold and silver, and the destruction of the country brought about by locking up their money, than they can by putting it out in any other way. If they will not put the money out when it is paid to them for their bonds, why should we shape our legislation to suit the selfish interests of those who increase their gains by withholding their capital; the men who refuse to engage in the production which employs labor, but make depression still worse by speculating on the scarcity they themselves have contributed to produce?

It has been said that this money would not go to enliven trade or to employ labor, but to bank vaults and to stock-gamblers' coffers; yet the wishes of these men are to decide our legislation, and their dis-content, their distrust alone is to be feared, and their confidence alone

we must cherish, without which we can not escape bankruptcy.

I beg to remind the Senate there is not a prophecy of Wall street and its congeners made in this financial question against the uses of silver which has not so far proven a false prophecy; not one. So it will prove in this case. The theorists of Wall street who we have been told are entitled to dictate the financial policy of America by the "divinest right"—the right of superior knowledge—have been proven in every case to be false prophets on whose heads the sacred ointment of prophecy was never poured and whose souls were never warmed by the divine afflatus. They are utterly discredited before the American peo-The only evidence they can truly show tending to prove that they have any claim to this supernatural office is, that they are without

honor in their own country.

The deformity of their selfishness stands naked. The "disturbance" of business, which they prophesied, is their own losses on a surrendered circulation, of interest on their bonds called in, and of the profits they derive in speculation in the difference between the prices

of the two metals-gold and silver. Those transactions, together with their gambling in stocks and bonds, their bets on futures in cotton and wheat, their preying upon the necessities of the people in times of depression and distress-these alone

cessities of the people in times of constitute what they call business.

The struggles of the great mass of the people for the means of existence are not business. The millions and millions of toilers of the land ence are not business. The millions and millions of toilers of the land and of the sea who rise up early and lie down late, their operations in the pursuit of bread are not business—and disturbances and distrust among them must not be heeded a moment by Congress. They have no right, divine or otherwise, to control in whole or in part the financial policy of their country which gives or withholds their bread; and yet the capitalist who rules by divine right because he lives in New York and bets on futures would do well to remember that after all the welfare of his millions depends very much on the comfort and content of the poor. The Sartor Resartus taught us how close of kin were the greatlady and the sewing girl. They are not closer than are the striking laborer and the banker.

We are one, our destinies are one; and so sure as God has ordained justice and compensation in the world those who control our financial policy in their own selfish interest sooner or later will find they have overreached themselves.

It is the combination of these very men that produces this unnatural state of things. The protected class, under the high tariff which is in existence, insist on taxes being kept up in order to enrich themselves. The bankers, on the contrary, do not want the debt paid when the taxes are collected, for thereby they lose the interest on their bonds and they lose the interest on their circulation, which is withdrawn. is done the people lose, first, the interest on and use of their money taken from them for taxes; and, second, the interest on the public debt, which could have been paid with the money lying idle in the Treasury, and the capitalist gains both.

I do not trouble myself, as other Senators have done, to inquire as to whether this is or is not a vote of want of confidence in the administration. I do not ask myself either whether to vote against the resolution would be a vote of want of confidence in the American people. It is an argument unworthy to be addressed to a Senator of the United States, and it is unworthy the dignity of his position for him to listen

To suppose that a Senator would abandon his honest convictions, or suffer them to be unduly influenced by any other considerations than those relating to the public good, is insulting.

To suppose that the President of the United States would desire a

Senator to be guided by any other aim in his legislative conduct is not

I have only inquired as to whether this resolution will promote the general welfare of the people whom I represent, and I shall inquire no

They constantly tell me that it is my administration—that I helped to place it in power, and that this is the only Democratic administration the country has had for a quarter of a century. It is entitled to have and ought to have my cordial support. This is all very true. It is entitled to and shall have my best support in all things, but not at the expense of my honest convictions of duty. In other words, I de-sire to be an honest man as well as a Democrat. Because the administration politically is mine I am all the more anxious to have it be right and successful, and especially to meet the wishes of its true friends. I believe the voice of the great body of the American people was expressed in this resolution passed by the House of Representatives by the great majority of 207 to 65, and I, for one, propose not to be disobedient to the popular vision.

I am, therefore, in favor of the resolution as it came from the House, pure and simple, believing that as we have failed in the performance of our solemn promise to reduce the taxation of the people to the actual needs of the Government, it is our bounden duty to make what amends we can by paying the public debt with the idle money in the Treasury. I am opposed to the committee's amendment for the reason that it will increase and not diminish the reserve in the Treasury, and that it will leave the whole matter to the discretion of the Secretary just as it is now, and that Secretary has declared, again and again, that the public debt must be paid in gold. Why he should object to being relieved of this responsibility, if he be, as is asserted, as anxious as Congress is to pay out the surplus money in the Treasury on the public debt, I can not comprehend. It is one of the mysteries connected with finance that is

Mr. GORMAN. Mr. President, it is with a very great deal of hesitation that I rise to say a word on this resolution, but as I am opposed to the proposition as it comes from the House I think it proper that I

should give in my own plain way the reasons why I can not support it.

Mr. President, I think I can safely assert, without fear of successful contradiction, that the people of this country are well satisfied that the President of the United States has, so far as he has had the power and the opportunity, redeemed every pledge made by his party and himself to correct the abuses which had naturally grown up in the executive branch of the Government, and he is pursuing a straightforward and honest course toward instituting such other reforms as time and experience will demonstate to be for the public good. The country, I am convinced, is well satisfied with the management of the Treasury Department under Mr. Manning's able direction. He has taken no step in matters of such importance as the one we are now discussing except with a full knowledge and thorough support of the chief executive officer of the nation.

In common with many other Democrats, I do not hesitate to express my regret that the legislative branch of the Government has not been able to enact such laws that would enable the President and the Secretary of the Treasury to comply fully with the demand of the people for a reduction of taxation, which may be said to be the first and the greatest reform demanded by the people of this country, without distinction of party, and to which both parties are pledged in their platforms of 1884. But upon bills affecting taxation, or determining the amount of reserve to be held in the Treasury, I would not have them framed or passed purely as party measures. I am glad to say that so far as the discussion on this resolution has proceeded here with, very few exceptions it has been treated purely as a business matter, to be settled upon correct and proper principles without reference to party divisions, and yet one or two expressions fell from my friend from Iowa [Mr. ALLISON], yesterday, that it seems to me require some notice.

If the statement of the Senator from Iowa be correct, then I confess that there is but little excuse for the Treasury Department in the posi-tion they have taken. If it be as stated by the Senator from Iowa that the Republican party—that Mr. McCullough, the predecessor of the present Secretary of the Treasury, left that Department in a condition to go on and meet all its obligations, maintaining the reserve required by law of \$100,000,000 of gold for the redemption of greenbacks, and with sufficient surplus to meet all demands as they were presented and continue payments on the debt; and that the present Secretary failed to continue the policy of paying the debt, and instead for purposes not necessary for the public good continued to hoard large sums of money in the Treasury, then I admit that he has done wrong. But, Mr. President, let us see what the facts are. So that I may do the Senator from Iowa no injustice, I will read an extract or two from his speech of yesterday. He said (I read from the RECORD, page 8173, first col-

Mr. Allison. Let me proceed. The Secretary of the Treasury at that time was not as familiar with the affairs of the Treasury and of our Government as he doubtless is now.

That was referring to March, 1885, when Mr. Manning assumed the duties of Secretary of the Treasury of the United States.

They accumulated money in the Treasury, already plethoric, because when the Republican administration went out of power, under the guidance of Mr. Hugh McCulloch, who was Secretary of the Treasury for three or four months preceding the 4th of March, 1885, there was an accumulation in the Treasury, and the

Democratic party hammered it home on the Republicans during the contest of 1884 that we were holding in the Treasury more money than was needed there for its ordinary operations, and that that money should be devoted to the payment of the public debt, and upon that pretense and pretext they carried enough votes certainly in the State of Indiana to make the change.

Then at the bottom of the second column on the same page, in answer to a question by the Senator from New Jersey [Mr. McPherson], the last clause of the answer of the Senator from Iowa is:

So when the Democratic party came into power they came there with a Treasury fuller than it had been for three or four years, if I am not mistaken in my recollection, and instead of carrying out the promises and pledges they had made to the people, and which they put in their platforms, they straightway reversed the policy of the Republican party by hoarding money for nine months until the speech of the Senator from Kentucky [Mr. Beck] brought them forth and they made the first call for \$10,000,000 of bonds.

Mr. President, I repeat, if the Senator's statement is absolutely accurate, nay, if it is in any respect correct, then there is no defense for this administration. But what are the facts? I have a right to refer to a speech made by Mr. Hewitt, who made this statement:

When he

·Referring to Cleveland-

became President he was confronted with the very difficulties which he had outlined in that letter to General Warner. The gold in the Treasury had been for many months gradually drifting away. Its place was being filled up with coined silver dollars. The last administration—and I speak now from the personal communication of the then Secretary of the Treasury, a man whose very able services to this country can not be too highly appreciated—the then Secretary of the Treasury told me that the most he hoped to be able to do was to carry the Government over the 4th of March upon the basis of gold payments.

Mr. HEWITT states that he had that information from ex-Secretary McCulloch. But that is not all. The fact is that on the 7th day of February, 1885, nearly one month before the expiration of his term and when the new administration was about to come into power, he (Mr. McCulloch) was so alarmed at the condition of affairs he saw, that payments out of the Treasury of silver certificates were running rapidly back into the subtreasury in New York from customs and internal revenue, receipts in gold on those accounts diminishing, the gold coin and bullion balance was being rapidly reduced, he was compelled on that date, February 7, 1885, to instruct the subtreasurer at New York to withhold payment of gold and greenbacks in the ordinary transaction with the clearing-house in New York. In other words, he issued an order which suspended the whole operations of the Treasury with the New York clearing-house as they had been carried on since 1879.

In that condition of affairs, with a new administration coming into power, it is true, as has been said on this floor and elsewhere, that leading financiers throughout the country saw that when that order went fully into operation we should be upon the silver basis and that gold would leave the country or be hoarded by all who could hold it. Hence, there were large purchases of sterling exchange. Mr. Tilden, whose name has been used by other gentlemen, is said to have become alarmed at Mr. McCulloch's diagnosis of our financial condition, and with many others purchased sterling exchange. I assume the statement is correct. He could but know that with suspension of gold payments disaster would come to the country and the new administration would be discredited at the very outset.

Mr. Manning—and I speak from personal knowledge—at that time had agreed to accept the high trust of Secretary of the Treasury without personal experience in governmental affairs, but a man of more than ordinary knowledge of our financial affairs, a man of courage, of than ordinary knowledge of our financial affairs, a man of courage, of strong conviction, prompt to act, and with an unalterable determination to carry out the pledges of his party for honest money. He fully realized the danger. He knew if the McCullough order was not rescinded disaster must come. I have the best reason for saying that he had the full co-operation of his friend Mr. Tilden, in inducing Mr. McCullough to suspend the order and permit payments at the New York clearing house to go on as he had done before it was arranged as Mr. Manning wished it. Gold steadily went out of the Treasury until there was on June 3, 1885, only \$114,650,000 gold in the Treasury available. I hold in my hand a statement showing this point, but before I give it let me read the dispatch of Mr. McCulloch, of the 7th of February, 1885, to the subtreasurer in New York authorizing suspension; which was regarded as an order to so do:

was regarded as an order to so do:

You are authorized to withhold payment of certificates to the clearing-house

Will the Senator state what that dispatch is? "You are authorized to withhold payment of cer-Mr. ALLISON. Mr. GORMAN. tificates to the clearing-house for the present."

Mr. ALLISON. What certificates? Silver certificates?

The Senator from Iowa understands perfectly that Mr. GORMAN. from 1879 down to now the Treasury Department goes into the clear-ing-house and has been delivering and receiving checks and Treasury drafts and paying or receiving legal-tender notes or gold certificates in settlement of balances. It was by this method that the parity of gold and silver had been maintained. On the last day of February, 1885, just before this administration came in, the balance, excluding the fractional silver coin, was \$120,969,674, of which, \$42,093,056 were silver dollars, leaving a deficit, if all the obligations due in gold were paid, of \$21,123,382. So it ran until July, 1885, when the Treasury found itself in the condition of having \$144,052,929, of which \$66,627,842 were standard silver dollars, leaving them short \$22,574,913 of gold if all

obligations were paid.

It was at this time that Mr. Manning, for the purpose of protecting all the great interests of the country, went to New York and stated to the bankers the condition of the Treasury. This conference led to a tender on the part of the banks of ten millions in gold for ten millions of fractional silver, with an offer of ten millions additional if necessary. But of the sums so tendered the Secretary accepted only six millions. This transaction restored confidence, and there was no longer, But of the sums so tendered the Secretary accepted only six with the assured prudent management, any question as to the desire and the ability of the Democratic party to maintain the public credit unimpaired.

This is a grand record, and one at which every Democrat should rejoice, for be it not forgotten that for twenty years past our political opponents have asserted with energy and persistency that our party has not the ability or the desire to maintain the public credit. They appealed to the North not to trust our friends of the South. They constantly charged that if the Democratic party came in control of the Government you would control the party council, that you would repudiate the public debt by paying currency not worth 100 cents to the dollar in the markets of the world. I know, and you know, that charge was not true, and yet it was believed by hosts of people sufficient to defeat

I do not complain of the Republicans because they so charged us, but it does not require much astuteness to see that now we are in power and have so far maintained the credit of the Government. We will hold the confidence of the people if we continue the course inaugurated by the President

and the Secretary of the Treasury in this regard.

I was very sorry to hear my friend from Missouri [Mr. VEST] who sits next me say that this was to become a sectional question, that probably it would be the East against the West. God forbid that we shall ever have another sectional issue in this country. I think he will be a false prophet, for I do not believe that the people of this country, East or West, North or South, will ever agree to a policy which will destroy the financial structure that we have raised, and which is recognized, as I have said, by all civilized nations.

If I am correct in the statement I have made as to the condition of

the Treasury on the 4th day of March, 1885, when the present administration assumed power, if it be true that the Treasury was in such condition that unless extraordinary efforts were made we were likely to be upon a silver basis and the party and the country brought to disgrace, then I ask my associates why condemn even by implication one of our officers who had the courage to do that which was right, and that which he had a right under the law to do?

Mr. COKE. Will the Senator permit me to ask him a question?

Mr. GORMAN. Certainly.
Mr. COKE. Does he think it would have been an improper thing to

do to have paid out some of the silver dollars on the bonds?

Mr. GORMAN. I answer no. I am for silver and for gold. I stand precisely where my party stood when it declared at Chicago in the platform which I believe meant precisely what it said—declarations but for which we should not have come into power in your day or mine

We believe in honest money, the gold and silver coinage of the Constitution, and a circulating medium convertible into such money without loss.

Mr. COKE. Then I ask the Senator if he believes that the silver dollars in the Treasury are honest money?

Mr. GORMAN. Legally, yes. You have made them by law a legal tender for all debts, and every man is bound to respect the law; but does not my friend from Texas know that the mere declaration by law that they are legal tender will not, until their intrinsic value enhances, make the people believe they are as good as gold?

Mr. SAULSBURY. I ask the Senator from Maryland what he

means by the intrinsic value of the standard silver dollar that is a legal tender for the payment of debts. Does he mean the intrinsic value of the silver dollar is not 100 cents? I understand now he ap-

plies his remarks to silver bullion.

I stated in reply to my friend from Texas that the Mr. GORMAN. standard silver dollar was a legal tender for all debts, and when they are tendered to you you are compelled to take them. The Senator from Delaware, for instance, owes me \$100 and tenders to me one hundred silver dollars. I shall be compelled to accept them as a discharge of the debt; but I say that the country and the world know that the actual value measured by gold, by the amount of silver in one of these dollars, is to-day about 73 cents. Now, I say to the Senator from Delaware that this condition of affairs existed when our party came into

There was no confidence in the silver dollar retaining its place and equal value to gold. It was found that when payments of them were made out of the Treasury for all the ordinary purposes of the Government, when silver certificates, more convenient than the dollars themselves, were paid out throughout the entire country, within thirty days eight-tenths of all those silver certificates came back to the Treasury, because the people had not the same confidence in the silver certificates and because they were not legal tender. They kept the greenbacks which were secured by \$100,000,000 of gold in your Treasury, and they kept

the gold coin itself, so that your revenues were coming in largely in silver, the intrinsic value of which was 73 or 74 cents on the dollar.

Mr. COKE. Does the Senator consider the silver dollars in the Treas-

ury "honest money" in the sense in which that term was used in the

Democratic platform?

Mr. GORMAN. So long as the law stands, so long as it remains on your statute-book declaring the silver dollar lawful money, containing the number of grains that it does, of course it is lawful money.

Mr. COKE. Is it honest money?
Mr. GORMAN. We are bound to assume that the Congress of the United States has made it honest money. But notwithstanding that edict you can not make the people of the country take it in preference to gold; and you would not have had to-day, in my judgment, enough gold in the Treasury to provide for the redemption of the greenbacks if it had not been for the effort of the Secretary of the Treasury, who induced the banks to give him gold in exchange for silver. He accomplished that; and I have shown you that when he took possession of the office you were about to suspend gold payments, but by his action, and by keeping a strong reserve he has maintained the parity between the two metals, he has served the country; and hence I say it is extra-ordinary at least that we should be considering a resolution which is after all regarded as practical condemnation of his policy. I do not believe its authors intended it to be so considered.

My belief is that it was framed and introduced without full consideration, and possibly without full knowledge of all the facts that existed when the Secretary determined to increase his reserves. The natural desire of all Democrats to pay off the public debt is great, and looking at the large balances in the Treasury it is not strange that some effort should be made to have it disbursed. In other words, Mr. President, the Democratic party has been out of power for so long a time that it has not the perfect organization that your party has. And hence these minor differences will appear until we have been in power long

enough to insure harmonious action.

Now, Mr. President, I desire to emphasize what I have just said, in answer to my friend from Texas. I ask him if we had come to a silver basis, not having sufficient gold and greenbacks in the Treasury, would he be in favor of continuing simply with silver to pay the public debt and the working people and the employés of this Government in a coin that would not be received by any other civilized nation in the world for more than its intrinsic value at 73 or 74 cents on the dollar?

Mr. COKE. Does the Senator desire an answer?

Mr. GORMAN.

Mr. COKE. In the first place, I will say to the Senator that his proposition that the gold shall all be withdrawn and nothing but silver left is an impossible one. That has been demonstrated and was demonstrated yesterday.

In the next place, I say to him that in my judgment it is the duty of the Secretary of the Treasury to pay silver dollars in common with gold dollars and just such dollars as he has in the Treasury, whether they be silver or gold, upon all the demands upon the Government that are presented there for payment. I do not believe that the Secretary of the Treasury has a right to discriminate against either one of the legaltender moneys of this country.

Mr. McPHERSON. In the view the Senator takes that it is neces-

sary to pay out silver as well as gold, would it not be necessary for the Treasury, in order to maintain the parity or equality of the two metals, to make them all honest money in the meaning of the platform?

Mr. COKE. I think it was honest money without any making of it

by the Secretary of the Treasury. I think it was already honest money, made so by facts which the Secretary of the Treasury has nothing in

the world to do with.

Mr. McPHERSON. Very well. The Senator to-day may take an obligation of the Government and go to the Treasury and get \$10,000 of gold on demand. Why? Because they mean to pay in any money the creditor wants. That maintains the equality of all the money. If the Treasury were unable to do that and must pay the Senator in a silver dollar worth but 73 or 74 cents, as the case may be, if the business community were aware of the fact that there was no payment except in a money worth intrinsically in all the markets of the world but 74 cents on the dollar, then I wish to know if that would be honest money in the meaning of the platform of the Democratic party?

Mr. COKE. I do not accept the Senator's proposition that there is a dollar in the Treasury worth intrinsically less than any other dollar. That is where he and I differ. I think the silver dollar is worth intrinsically just as much as the gold dollar. That is the difference beween us. I regard the silver dollar as an honest dollar, and the Senator from New Jersey and the Senator from Maryland regard it other-

Mr. GORMAN. Now, Mr. President, the Senator from Texas and myself are agreed in one thing. He would not legislate to exclude from the Treasury of the United States a sufficient amount of gold to keep the two metals side by side.

Mr. COKE. Nobody has ever proposed that.
Mr. GORMAN. The Senator says nobody has ever proposed to do that; but the fact is that from the date we issued the silver certificates,

which are receivable at the subtreasuries for duties upon imports, and at every internal-revenue office, and at every other source by which the money comes back into the Treasury, so that whenever you issue and put out \$100,000,000 of certificates 80 per cent. of them come

back to you within thirty days.

In the month of January, 1886, notwithstanding the confidence that had been broughtabout by the action of the Secretary of the Treasury in keeping this large reserve on hand in his attempt to keep the silver dollar in parity with gold, the total amount of silver certificates issued during the month was returned and an excess of 100 per cent. in addition of issues previously made was returned, to the subtreasury at New York. I ask the Senator to read the statement made by the Secretary of the Treasury and the Treasurer of the United States to the Finance Committee. It is there shown that when the silver certificates are issued through the subtreasuries at Baltimore, New York, Cincinnati, and all the subtreasuries of the country, 66 per cent. of them find their way back for customs and other dues within thirty days.

Mr. COKE. Allow me to ask the Senator why was it, when the peo-

ple were paying gold over the subtreasury counters dollar for dollar for silver certificates, that the Secretary of the Treasury issued an or-

der forbidding the exchange?

Mr. GORMAN. There was one occurrence referred to by the Senator from Texas, and it was an error. It was a mistake on the part of a new official at the time, and without the knowledge, as I understand, of the chief officer.

The Department did properly decline to make exchanges where it

was a charge upon the Treasury.

Mr. COKE. The Senator is mistaken. There was an order issued

by the Secretary of the Treasury.

Mr. GORMAN. No; by the Treasurer.

Mr. COKE. Which forbade any further exchanges of silver certificates for gold, and after \$100,000,000 of gold had been paid for silver

Mr. GORMAN. There is no difficulty between the Senator from Texas and myself as to that. But, as I understand, exchanges are now made whenever it can be done without cost to the Government. Who could conduct the affairs of a great Department like the Treasury without making a mistake? That mistake has been corrected, but that does not relieve us from the terrible responsibility as Democrats of denouncing an administration that has maintained the parity of these two metals, and an administration which has made greater attempts to circulate silver and put it in circulation among the people than any of its predecessors. There is more silver to-day in circulation in this country than has ever been before in its history. The amount is fifty-two millions of standard, which is about all that it will absorb of that coin. They have attempted to force it into circulation by withdrawing the one and two dollar greenbacks and sending silver free of cost to the counting-room of any man who wants it, but it finds its way back almost immediately into the Treasury and certificates are demanded for it in sums of \$10 and upward.

Mr. SAULSBURY. What about the gold certificates?

Mr. GORMAN. I am speaking of silver certificates. As I have said,

Mr. GORMAN. I am speaking of silver certificates. As I have said, it has not been possible to force in circulation more than fifty-two million of the standard silver dollars. And yet we are told that there is a general demand that more of this coin shall be forced into circulation. The Secretary of the Treasury resorted to the plan of forcing the metal and putting it in actual circulation, and that was a failure. Let me show the Senator how much it cost to try to send into circulation this

metal that you speak of.

The total amount of silver dollars which have been coined to June 30, 1886, since the resumption of their coinage was \$233,723,286. total moved, that is, shipped, from one subtreasury to another, and from the mints to the Treasury at Washington was \$380,335,734, and it has cost the Government for freight and for express charges to get this money out and in circulation \$756,399.02, or \$1.99 per \$1,000. For every thousand silver dollars it has cost the Government \$1.99 to try to force them into circulation.

Mr. SAULSBURY. I do not want to interrupt the Senator; but he knows that a large part of the expense of that transportation has been from the mints at New Orleans and other points where the silver has been coined to other portions of the country, to the Treasury of the United States and to the subtreasury in New York. It has not been a cost in the effort to get the money out, but the silver bullion goes to the mints and to the assay offices, and is then transferred at the ex-

pense of the Government from those points to other points.

I do not agree with the Senator. In the first place I do not regard the resolution as an attack on the administration at all. The Senator is treating those of us who differ with his views of the resolution as being opponents and critics of the action of the administration. That is not true. We differ with the views of the administration, but I trust I am at liberty to express my own opinions, although the Secretary of the Treasury or the President of the United States may hold different

opinions from what I do.

Mr. GORMAN. Now, Mr. President, I do not represent anybody
on this floor except my constituents. I express no views for any man.
I do not for a moment suppose that the Senator from Delaware—in-

deed I know he does not-would feel bound by any rule laid down by the President of the United States or any other man. I do not for a moment allow it to enter into my mind because I differ with the Senator from Delaware and my friend from Texas (for both of whom I have the highest regard) upon this question that I reflect on their course. The views I now hold I entertained when the Republican party was in power, and so far as my vote has gone it has been for the good of the whole people of this country as I understand it; and never during that time, when the Democrats had possession of both branches of Congress, did the Senator or any of our friends on this side offer such a resolution of condemnation of any Republican Secretary of the Treasury.

Now, for the first time in the history of the Government has such an attempt been made. It is true you have fixed the amount of reserve, and it is true you have limited the coinage of silver; but Congress has never before attempted to lay down an inflexible rule as to the amount

of the reserve.

Mr. President, I have shown the condition of affairs when we came in. Now, there is one other view of this case that I desire to suggest. The Secretary of the Treasury has by this step promoted, as I believe, the interests of this country. But if by contracting the circulation and by hoarding money he has affected the value of property and increased the interest paid on the ordinary loans of the people, then his policy was a mistaken one.

What are the facts? It is known by all men that in February, March, April, May, June, and July, 1885, there was distrust and hesitation by capitalists throughout this land. Railroad construction was practically suspended; cotton and other factories were on half time; the great furnaces that turned out in 1883 a million and more tons of steel rails were on half time or closed up. There was distruct throughout the land. Now everybody knows and it goes without saying that from July, 1885, up to this very hour business has taken a start from one end of the land to the other; your railroad building is going on. We are the second nation in the world in making steel for railroads.

We are next to England. Workmen are no longer seeking employ-

ment, but you find increased prosperity. Would this be the case if the Secretary of the Treasury had adopted a mistaken policy? But let me test the correctness of his judgment in another way. If he had withdrawn from circulation a large amount of money that was required by the people, the interest account would show it. Scarcity of money means a high rate of interest. Let us see how that stands. If the interest rate was higher, then the Secretary was wrong. If it was lower, then unquestionably the Secretary has not damaged the business interests of the country.

Let me read from the last report of the Comptroller of the Currency. He says the rates of interest in New York city were as follows:

Eighteen hundred and eighty-four, call loans, 2.4 per cent.; commercial paper, 5.6 per cent.

In November, 1885, after the Secretary had increased the reserve and the national banks had increased theirs, as shown by the Senator from Missouri, the rates of interest on call loans had fallen in New York to 2 per cent. and on commercial paper to 4.3 per cent., 1 per cent. less than in 1884. I ask my friend what complaints will be made of a great

Department that has so managed your affairs?

But, says my friend from Missouri, the Treasury Department and all these financial institutions have determined to hoard up the money, keep it in their banks in financial centers and away from the people. Let us see what that statement was as he made it himself. The inference might be drawn from what he said that it was in New York, it was an Eastern combination that had attempted to control the finances of this country. The Senator states that during this time when the Secretary of the Treasury was hoarding up all this money to the detriment of the country the national banks were required all through the United States to have a total reserve of \$262,758,283, whereas they held \$394,-

192,310; and while they were required to have a cash reserve of \$163,-911,218 they actually held \$261,165,183.

The reason why the banks held this increased reserve was because there was no demand in the country. The interest under the operations of this Democratic Secretary of the Treasury had run so low, money was so plentiful, business was so stagnant, that the supply of money in the country in circulation outside of the Treasury of the United States was more than sufficient for all the demands of the country. But where were these reserves held? Not in New York. Outside of New York the excessive reserves were greater than they were in New York. In the reserve cities, excluding New York, the total reserve required to be held was \$96,000,000—I give only the round numbers—and they actually held \$122,000,000. Their cash reserve should have been \$47,000,000, and they actually held \$83,000,000. This is outside of New York.

Now, when you come to New York the reserve required by law was \$74,000,000, and they actually held only \$89,000,000, showing that this great reserve held by the banks to protect themselves and because they can not loan the money, or else for fear of the condition of affairs which they knew Mr. McCulloch had described in February, 1885, they wanted to be on the safe side.
I assert, and I regret that I failed to bring with me the Financial Chron-

icle which shows it, that in all sections of the country the interest rate has run down since March, 1885, on all classes of good loans. Mortgages on real estate and every class of investments have decreased in

gages on real estate and every class of investments have decreased in the rate of interest since this policy was inaugurated.

My friend from Kentucky [Mr. Beck] yesterday, looking over a table which was furnished to a member of another body, made the statement that there was \$180,000,000 of gold and bullion in the Treasury of the United States on the 12th day of March last. I glanced over the table and supposed he was mistaken. I called the attention of the Treasury of the treasury of the treasury of the table and supposed he was mistaken. urer to that statement, and I have this letter in response to it:

TREASURY OF THE UNITED STATES. Winshington, July 30, 1886.

Washington, July 30, 1886.

Sin: In accordance with your request I hand you herewith a statement explaining the table, published in the Congressional Record of July 15 (pages 7294-5), showing the cash in the Treasury.

It will be observed that the table referred to was furnished in reply to a specific question, and did not purport to give the cash actually belonging to the Treasury after providing for the outstanding demand liabilities.

Very respectfully,

C. N. JORDAN. Treasurer United States.

Hon. A. P. GORMAN, United States Senate.

An

He furnishes a statement showing that the gold coin in the Treasury was \$189,877,000, the gold bullion \$42,137,000, making a total of \$232. 014,000; and that there are in the Treasury \$52,414,000 of gold certificates, \$127,284,000 being the total amount of issue of gold certificates, and that there are outstanding of the gold certificates \$74,870,000, leav ing an actual balance in the Treasury of \$157,144,000 of gold and bull-The entire statement is as follows:

Statement explanatory of the table showing cash in the Treasury July 10, 1886, published on pages 7294 and 7295, Congressional Record, July 15, 1886.

The table referred to states the cash in the Treasury without deducting the demand obligations outstanding:

From the gold coin.....and gold bullion..... \$232,014,000 52, 414, 000 74,870,000 \$157, 144, 000 184, 450, 000 There must be deducted the amount held for silver certificates out..... Less amount on hand ... 88, 143, 000 Leaving the silver belonging to the cash....
The United States notes....
Must be reduced by the currency certificates out...
Less amount on hand.... 96, 307, 000 36, 128, 000 20, 660, 000 18,770,000 17, 358, 000 296, 000 11, 994, 000

Accrued interest.....

Matured debt and interest unpaid	6, 653, 000	
Interest on Pacific Railroad bonds due and unpaid	168,000	
Funds held for redemption of na- tional-bank notes	68, 163, 000	
Post-Office Department account	14,062,000 5,930,000	
Outstanding drafts and checks	2,749,000	104, 080, 000
Leaving	tates notes	179, 019, 000 100, 000, 000

The net balance is..... It only shows how easy the best informed of us (for there is nobody better informed than my friend from Kentucky) can make mistakes. It shows the necessity of Congress at least in these purely administra-

tive matters moving with great caution.

I trust, sir, that now we have passed the crisis, when it is known that a Democratic Secretary of the Treasury is carrying out his party pledges and administering his great trust in the interest of the people, we shall sustain him. From the beginning the President and the Secretary have urged that there was but one way to answer the universal demand for relief, and that was by a reduction of taxation from \$30,000,000 to \$50,000,000 per annum to be taken from the taxes and saved to the

people.

With that reduction and with the amount that he has on hand, with prudence he can pay and redeem the 3 per cent. bonds within two years.

Unless that policy is pursued we shall be compelled to pay a premium of 25 or more, whatever the holders of the fours and four-and-a-halfs may demand, and then the cry will go out that the Department is being run in the interest of the bondholders. He wanted to avoid that and to save the money of the people now by a reduction of taxation.

It is no answer to him, and if I am not much mistaken the people of the country will not consider it a proper answer to an administration which wants to relieve the burdens of the people from this excessive taxation to turn around and, by imputation at least, condemn him for saving the credit of the Government while you have failed to carry out the pledges made by both parties. I am sorry to see that it was, for political purposes possibly, thought best to almost unite one of these great parties, and by joining with a minority of Democrats prevent a reduction of taxation. You can not pass a financial measure of this kind, or a tax bill, by the votes of any one political party.

We are divided; local interests, individual views, State interests ren-

der it impossible to make it absolutely a party question. I say to my friend from Iowa, the great leader of his party on this floor, that if in the interest of the people of this country he had used that power to make his party join the great majority of Democrats in carrying out the pledge that both parties have made, that party would indeed have served its country well. You failed to do that. But I hail with pleasure the fact that in the consideration of this question partisanship is laid aside and that Democrats and Republicans are against a measure which comes here fraught as I think with so much evil to the entire

Mr. ALLISON. I desire to say just one word in response to the criticism made by the Senator from Maryland upon my remark of yesterday. My statement yesterday was that the policy of the Republican administration was to pay the debt from the surplus in the Treasury, but that that policy had been partially suspended by the late Secretary of the Treasury, Mr. Hugh McCulloch, for two or three months prior to the expiration of President Arthur's administration; and when on the 4th of March, 1885, the Democrats came into power they found a plethoric Treasury. I was only criticising a portion of the conduct of the administration which refers to the payment of the public debt.

The Senator from Maryland says by way of apologizing for the accu-The Senator from Maryland says by way of apologizing for the accumulation of money from March to December that it was necessary in order to maintain the parity of gold and silver. My only answer to that is (and I do not desire to take up time) that on the 29th day of December the Secretary of the Treasury commenced paying the public debt, and between January and July he paid over \$50,000,000 of the public debt; and during all that period there was a continual accumulation of gold in the Treasury, showing that the question of the gold balance is not affected by the payment of the public debt.

I have here the successive statements of the Secretary of the Treasury under the new form of statement which will show a constant account of the secretary of the secretary

ury under the new form of statement which will show a constant accumulation of gold between December and this moment, showing that although there has been a payment of \$50,000,000 of the public debt in six months there has been during all that time a continual accumulation of gold. That is all I desire to say respecting that. Senators who will examine the debt statement will see that it is so.

I desire to insert in the RECORD for the convenience of every Senator for future reference an exact statement of the balances in the Treasury from the beginning of the resumption of specie payments until the 30th day of June last, showing the balances in the Treasury according to Mr. Jordan's statement.

Statement showing the net cash balance, the fractional silver coin in the Treasury, and the available cash balance, by months, from July 1, 1879.

Month.	Net cash bal- ance.	Fractional silver coin in the Treasury.	Available bala ance.

Note.—Subsequent to March 31 \$100,000,000 reserve held for the redemption of United States notes is deducted, and the fractional silver coin has been separately stated, and must not therefore be deducted from the net cash balance to obtain the available. In other words, the statement since March 31 states the

That is all I desire. I only criticised the conduct of the Treasury with reference to the non-payment of the public debt between March,

1885, and December, 1885.
Mr. TELLER. I wish to ask the Senator how in the statement sent up the hundred million dollars of reserve is stated, whether it is in the shape of liabilities or an asset, in order that we may understand it when we come to look at it. Under the old system I understand it always appeared as an asset, thus increasing the apparent amount of money in the Treasury, the surplus, and now it appears as a liability, thus decreasing the amount to the extent of \$100,000,000. How does it appear in this statement?

Mr. ALLISON. It appears just as the statements were made. Of course under the new form of statement it appears in the general balance of the Treasury. Under the new form of statement the balance is stated, deducting the \$100,000,000.

Mr. TELLER. That is very liable to mislead a casual observer and to make it appear that there is a hundred million dollars more at one time than there is at another.

time than there is at another.

Mr. ALLISON. I will state that this form of statement was made by the Treasurer at my request, carrying back his form of statement into all the statements which had been made between the 1st of July, 1879, and the present time. The statement includes and excludes the fractional silver; so that there are two tables, one showing the total balance, including the amount of fractional silver, and then the total amount, deducting fractional silver. The new form of statement began March 31, I believe, and of course from that time forward the fractional silver is excluded from the statement, and also the \$100,000,000 reserve.

Mr. TELLER. I call the attention of the Senator to the trouble Mr. TELLER. I call the attention of the Senator to the trouble with this statement. For instance, on the 31st day of January, 1885, the apparent surplus is \$145,000,000 in round numbers; February 28, it is \$151,000,000; March 31, it is \$152,000,000, and it immediately drops down, April 30, to \$23,000,000. Unless there is some explanation made, I think it will appear to any ordinary observer, to the common people who read accounts, that that disappeared by payments out of the Treasury, when in fact it has only by the system of bookkeeping been transferred to another column. The money is there all the same.

Mr. ALLISON. I think the people will understand it after the ex-

planation of the Senator and my own.

Mr. TELLER. I think the Senator should have added something to have shown it in the statement.

Mr. ALLISON. Is it not fully shown now? Mr. TELLER. We make the statement now, but it does not go with the table.

Mr. ALLISON. If there is anything I ought to explain that the Senator has in mind I should be glad to do it.

Mr. TELLER. Possibly the note at the foot may explain it sufficiently.

Mr. ALLISON. I think it does.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Clark, its Clerk, announced that the House had passed the bill (S. 263) providing for the erection of a public building at Springfield, Mass., with amendments in which it requested the concurrence of the Senate.

WISCONSIN WESTERN JUDICIAL DISTRICT.

The PRESIDING OFFICER (Mr. PALMER in the chair) appointed Mr. EDMUNDS, Mr. EVARTS, and Mr. Pugh the conferees on the part of the Senate on the amendments of the Senate to the bill (H. R. 9857) in relation to the western judicial district of Wisconsin.

METHODIST PROTESTANT FOREIGN MISSIONS BOARD.

Mr. BROWN. I desire to call up Senate bill No. 1008 for action on the amendments of the House of Representatives.

The PRESIDING OFFICER laid before the Senate the action of the House of Representatives on the bill (S. 1008) to empower the board of foreign missions of the Methodist Protestant Church to hold property in the District of Columbia.

The PRESIDING OFFICER. The House amendments will be read.
Mr. EDMUNDS. Subject to objection. I only want to look at that.
I have no objection to its being considered subject to objection.
The PRESIDING OFFICER. It will be so considered.

Mr. BROWN. When the Senator hears the amendments I think he will have no objection.

The PRESIDING OFFICER. The amendments of the House of Representatives will be stated.

The CHIEF CLERK. In line 8 of the bill strike out the word "rent." Strike out all after the word "Provided," in line 10, down to and including line 14, and insert the following:

That only so much real estate may be held by the said board of foreign missions as may be necessary for the proper transaction of its legitimate business, not to exceed an assessed value of \$50,000.

The PRESIDING OFFICER. The question is on concurring in the

amendments of the House of Representatives.

Mr. EDMUNDS. Just wait a moment.

Mr. BROWN. This is a religious corporation, and provision is made for holding real estate in the District. The House has simply reduced the amount of property. If there is no objection to the bill on that account I move to concur in the amendment.

Mr. EDMUNDS. I am satisfied that it improves the bill.

The PRESIDING OFFICER. The question is on concurring in the amendments of the House of Representatives.

amendments of the House of Representatives.

The amendments were concurred in.

PHŒNIX NATIONAL BANK OF NEW YORK.

Mr. EDMUNDS. I ask the Chair to lay before the Senate the bill (S. 1599) for the relief of the Phœnix National Bank of the city of New

York, which has come from the House with an amendment.

The PRESIDENG OFFICER (Mr. Teller in the chair) laid before the Senate the amendment of the House of Representatives to the bill (S. 1599) for the relief of the Phœnix National Bank of the city of New York, which was, in lines 1 and 2, to strike out the words "twenty-nine thousand six hundred and twenty-four dollars and thirty-five cents" and to insert "twelve thousand one hundred and seventeen dollars and thirty-eight cents."

Mr. EDMUNDS. I move that the Senate disagree to the amend-

ment of the House and ask for a conference thereon.

The motion was agreed to. By unanimous consent the presiding officer was authorized to appoint the conferees on the part of the Senate, and Mr. EVARTS, Mr. INGALLS, and Mr. VEST were appointed.

TREASURY SURPLUS.

The Senate, as in Committee of the Whole, resumed the considera-

tion of the joint resolution (H. Res. 126) directing payment of the sur-

plus in the Treasury on the public debt.

Mr. GIBSON. Mr. President, inasmuch as the discussion has passed quite beyond the boundaries of the pending subject and entered far into the attractive and limitless fields of financial speculation, in order that I may take my own reckoning and recall the attention of the Senate to the exact question for our determination, I ask that the resolutions may be again reported.

The PRESIDING OFFICER (Mr. PALMER in the chair). The Sec-

retary will read the joint resolution.
The Chief Clerk read the joint resolution, as follows:

The Chief Ciefk read the Joint resolution, as follows:

Resolved, &c., That whenever the surplus or balance in the Treasury, including amount held for redemption of United States notes, shall exceed the sum of \$100,000,000, the shall be, and is hereby made, the duty of the Secretary of the Treasury to apply such excess, in sums not less than ten millions per month, during the existence of any such surplus or excess, to the payment of the Interest-bearing indebtedness of the United States payable at the option of the Government. The surplus or balance herein referred to shall be the available surplus, ascertained according to the form of statement of the United States Treasurer, of the assets and liabilities of the Treasury of the United States employed on June 30, 1886.

The PRESIDING OFFICER. The amendment reported by the Com-

mittee on Finance will be read.

The CHIEF CLERK. It is proposed to add to the joint resolution the following proviso:

Provided, That no call shall be made under the provisions of this resolution until a sum equal to the call is in the Treasury over and above the reserve herein mentioned: And provided further, That the Secretary of the Treasury, in his discretion, may have in the Treasury, over and above the foregoing sums, a working balance not exceeding \$20,000,000: and in the case of any extraordinary emergency, and when, because thereof in the opinion of the Secretary of the Treasury, the public interests shall require it, he may, by written order, suspend the further call for the payment of such indebtedness for such period of time as shall be necessary to maintain the public credit unimpaired.

It has been developed that there is an entire concurrence of opinion among Senators respecting the state of facts upon which these resolutions proceed and are designed to deal with. We may assume therefore that it is agreed that the only outstanding United States bonds which may be paid at the option of the Government are one hundred and thirtysix million 3 percents; none others may be paid until the year 1891; that the surplus or balance in the Treasury to-day available for the purpose of paying these bonds is about \$75,000,000, and that the current revenue of the Government over and above the necessary expenditures amounts to about \$9,000,000 per month.

Hence it is apparent that with the reserve or surplus on hand, together with the revenue in excess of expenditures, the Government will be able, unless some extraordinary contingency should arise not now foreseen, to pay off every one of these 3 per cent. bonds under the operation of either one of these resolutions in about thirteen or fourteen months, and that at the end of that time the Treasury will hold a sur-

plus or balance nearly as large as it has to-day.

Now, sir, let us consider the resolutions. If our judgments were formed by the speeches which we have listened to during the progress of this debate we should reach the conclusion that there was some wide divergence, some inherent antagonism, either in principle or policy, between the resolution of the House of Representatives and the resolution as amended and adopted by the Senate Finance Committee.

I undertake to say that they are founded on the same doctrine of finance; that their practical force and effect will be the same; that they differ only in respect to the amount of the working balance and the

discretion which should be allowed the Executive.

The resolution of the House provides in effect that the one hundred million in the Treasury derived from the sale of bonds in order to secure and maintain specie resumption shall remain intact, and that it is only when the surplus or balance in the Treasury shall be in excess of the \$100,000,000 is it made the duty of the Secretary of the Treasury to apply such excess in sums not less than \$10,000,000 per month during the existence of any such surplus or excess to the payment of the interest-bearing indebtedness of the Government payable at the option of the Government.

The Senate resolution provides also that the \$100,000,000 coin in the Treasury shall not be encroached upon, and that payments shall be made in sums of not less than \$10,000,000 per month on the interest-

bearing debt outstanding and payable at our option.

It is evident, therefore, that there is no difference between the resolutions of the House and Senate respecting the reserve fund or the amount to be paid on the debt monthly, and these are the essential elements in the whole transaction. They both demand and require that \$100,000,000,000 of coin shall be held-as the foundation upon which the structure of our financial system shall stand.

Wherein, then, do they differ? They differ in but two points as I have already indicated. The House resolution provides that these payments of \$10,000,000 per month shall be made only when there is an

excess of \$10,000,000 in the Treasury of the United States over and above the \$100,000,000 of reserve fund.

The question was asked in the House of Representatives of Mr. Mornison why under the operation of the resolution the reserve fund might not be encroached upon and destroyed, and he replied as follows:

Mr. Morrison. Under this resolution, if the condition of the Treasury remains

the same, it would pay out \$10,000,000 for seven successive months, and then if the Treasury balance was not increased there would not be another ten millions paid next month, nor until the surplus reached ten millions above the one hundred millions fixed by the joint resolution as the amount to be kept in the

Mr. EDMUNDS. Let me suggest to the Senator from Louisiana, if

I may interrupt him.

The PRESIDING OFFICER. Does the Senator from Louisiana yield?

Mr. GIBSON. I do.
Mr. EDMUNDS. Let me suggest that we are passing the joint resolution of the House and not Mr. Morrison's speech, if it may be referred to, and that the construction of the act must depend not upon the debates in the other House or here, but upon what it means to the people who are to execute it, and in the courts of law. I may put one gloss and opinion upon it; my friend from Louisiana may put another, but it does not help it; the meaning has got to be derived from the

Mr. GIBSON. I am very greatly indebted to the suggestion of the Senator from Vermont, but I will say to the honorable Senator from that State that he is a little premature in giving me that information. I knew in advance (for I presume it may be held that almost every Senator on this floor has some knowledge of the canons of constitutional construction), that Mr. Morrison's opinion was not to control the meaning of the act, if it should be passed by Congress, but I thought that inasmuch as I was going to consider what the true meaning of this resolution of the House might be, from its context it would have persuasive effect, not authority, upon the minds of some Senators upon this floor who happen to know that distinguished Representative from the State of Illinois in the House of Representatives and how val-

uable have been his services in respect of the currency of the country.

An examination of the text will show, in my judgment, that Mr. Morrison's interpretation of the House resolution must be sustained MORRISON's interpretation of the House resolution must be sustained by a fair and just construction of it both by the people who are to execute it and by the courts. It is very plain that as the resolution provides that monthly payments shall be made during the existence of a surplus or excess above the sum of \$100,000,000 in the Treasury in payments of not less than \$10,000,000 per month, it is utterly impossible that any such payments could be made at all unless there had been an accumulation of fully \$10,000,000 in the Treasury as an available surplus for this purpose; so that it is very clear to my mind that able surplus for this purpose; so that it is very clear to my mind that under the very terms of the House resolution not a dollar could be paid out of the Treasury on these bonds unless there was a surplus or balance in excess of the \$100,000,000 in coin reserved there for the maintenance of specie payments.

Now let us consider the resolution as amended by the Finance Committee and we shall ascertain that that resolution also, like the House mittee and we shall ascertain that that resolution also, like the House resolution, provides for the redemption fund, and further that the Secretary of the Treasury may, at his discretion, maintain also a working balance not exceeding \$20,000,000 while paying ten millions monthly on the public debt. Here, then, we perceive that the difference between the two resolutions is narrowed down to this, that the Senate resolution allows the Secretary of the Treasury a working balance of \$20,000,000 to be maintained in the Treasury at his discretion. It does not compel him to retain that, but if the necessities of the Government, and the property of the Treasury to over \$30,000,000. amounting in some months, as has been shown, to over \$30,000,000, under heavy appropriations for pensions and other extraordinary expenses of the Government, it is within his discretion to retain such working balance.

Here, then, are the two resolutions resting upon the same principle of finance, moving in the same direction toward the payment and extinguishment of the public debt, one authorizing and directing the Secretary of the Treasury to pay it in monthly installments of \$10,000,000 when there is that sum in the Treasury over and above \$100,000,000 reserve fund, and the other directing him to make these payments when there is \$10,000,000 over and above the \$100,000,000, the reserve fund in the Treasury of the United States and a working balance of \$20,000. the Treasury of the United States, and a working balance of \$20,000,-000, if in his discretion it should be wise and necessary to reserve that

If we adopt the House resolution on the state of facts which I have laid down and which is undisputable, the whole amount of the outstanding indebtedness would be paid even if we assumed that the balance or surplus should be brought to the minimum limits, just two months sooner than it will be paid if we adopt the Senate resolution and the Secretary of the Treasury should find it necessary to keep a working balance of \$20,000,000. Or, in other words, if we adopt the Senate resolution and the Secretary of the Treasury should maintain under the discretion allowed him by that resolution a working balance of \$20,000,000, he would be just two months longer and two months only, in paying every dollar of the outstanding bonds than we would be under the House resolution. Under either, humanly speaking, the ex-tinguishment of the payable debt of the United States is certain within

the next fourteen months.

I am surprised, Mr. President, when these practical resolutions are before us and when the basis of difference is so narrow, that arguments should be urged here with such heat and vehemence, involving not the resolutions themselves but considerations which I submit are

foreign to this discussion, if not wholly out of place. The simple proposition is whether we will authorize and direct the Secretary of the Treasury to continue the monthly payment of these bonds when there is over a hundred million in the Treasury or when there is over \$120,-000,000 in the Treasury. For my part I am disposed, when we are dealing with transactions of such magnitude to be conducted by officers in whose fidelity and intelligence I repose confidence, transactions that relate to the most sensitive and delicate of all things, the public that relate to the most sensitive and deficate of all things, the public credit and national honor—I am willing to vote to allow the small working balance of \$20,000,000 to the present chancellor of our exchequer, Hon. Daniel Manning. Great Britain, France, and Germany each, as is shown by the London Economist of July 14, has a larger working balance than this, and their ministers of finance are also authorized to raise money by exchequer bills in the event of an emergency. The reserve in Great Britain was 39 per cent. for all outstanding liabilities; in France 60 per cent.; in Germany a reserve larger than we now provide.
Mr. MAXEY.

Mr. MAXEY. Mr. President-The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Texas?

Mr. GIBSON. Certainly.

Mr. MAXEY. The difference, I submit to the Senator from Louisiana, between the House resolution and the Senate amendment is not ana, between the House resolution and the Senate amendment is not so much a difference in dollars as in this: The House resolution is a peremptory command to pay off the public debt whenever there is a surplus over and above \$100,000,000 subject to be paid out. The amendment of the Senate Finance Committee does increase that to \$120,000,000, and in addition thereto gives to the President of the United States a discretionary power to suspend the entire law, and it is in that discretion that the great difference exists between the Senate is in that discretion that the great difference exists between the Senate committee amendment and the resolution as passed by the House.

Mr. GIBSON. I intended when I had concluded the discussion of

this aspect of the Senate amendment to speak of the concluding clause of that amendment, to which the honorable Senator from Texas has just called my attention. I do not intend to overlook it. I think that also a wise and statesmanlike provision, but I would like to see incorporated in the resolution from the Finance Committee the words "and in case of any extraordinary emergency not now foreseen or not now existing." Do I understand the Senator from Iowa accepts as an amendment the words "not now existing?"

Mr. ALLISON. I am perfectly willing to have that inserted. It may strengthen the amendment, but it is manifest to me that that is

the true meaning.

Mr. GIBSON. Mr. President, it seems hardly necessary for me to do more than suggest to the Senators whom I see around me how important it is that the Government, having such extensive and ramified connections the world over, should commit to its Secretary of the Treasury or rather to the President, for it is by him that this power must be exercised, the discretion to suspend the provisions of this resolution in the event of any extraordinary emergency. An occurrence that shall relate merely to an individual in some distant region might involve this Government in a long and bloody war. Wars always come unexpectedly. If we could anticipate that there might be a war between the United States and Great Britain at the end of this year, the wise and good men of either nation would in advance put forth all their efforts to prevent it and maintain the peace between these kindred people.

Up even to the last hour it will be remembered that when the dark cloud of civil war was rising just above the horizon the public men of America declared that it would disappear in the course of a few weeks or months. Nations do not go to war except when they are wrought into a passion by some insult, some injury, so that in the heat and distemper diplomatists find it impossible to make any peaceable arrange-

ment.

Look at the wars of Europe! While philosophical statesmen attempt to trace the origin of wars to some general principle involving the existence of old institutions or their reformation, yet we know that many of the most terrible struggles that have deformed and retarded the civil principle of cociel and ilization of mankind originated in the trivial incidents of social and

personal life.

It may be well said that the ambition of nationalities has superseded the ambitions of dynasties, and while wars no longer find their origin in court circles, nevertheless it has been seen that questions involving the rights of individual citizens on of nations have been prolific sources We are confronted to-day with European nations armed to the teeth, exhausting the resources of the people in maintaining great standing armies, vast naval establishments, and inspired by the desire to extend their commercial relations and colonial systems over the entire world, while the republics in the Western world are constantly agitated by revolutions and disorders liable to disturb our friendly relations with them. Even while I speak every resource of our diplomacy, of our patience and forbearance, is taxed to keep the peace on the Rio Grande and on the Northeastern coast. A trifling circumstance, a single spark, may produce a conflagration.

Our people are as keenly alive to the national honor and to the pro-

American citizens wherever they may go as any other nation in the world. Who can tell what a day may bring forth?

We are therefore, sir, upon general principles justified in giving the executive department this discretion. But when we come to look into the financial policy of the administration as directed by the President of the United States we find it in perfect accord with the resolutions themselves

The Senator from Maryland [Mr. GORMAN] has relieved me from setting forth the difficulties which confronted the administration at the outset, for he has already exhibited to the Senate all the facts and influences that controlled the action of the administration for the first few months after it was installed. Coming into power after an exile of twenty-five years the Democratic party brought to the exalted position in the Cabinet men who were without experience in the responsibilities and duties which those official positions imposed upon them, and it was perfectly natural and proper that they should pause to take an account of things before they began to deal practically with the most perplexing question that can possibly arise in the administration of the Government, namely, the management of the public finances, for "the fise is the State."

But we find as soon as they are able to take in hands the reins of distate we find as soon as they are able to take in hands the reliable direction the administration has been paying out for the last five months \$10,000,000 of the public debt monthly, precisely the amount that the House resolution and the Senate resolution require to be paid. Are not Senators then who are in favor of these resolutions, who believe sincerely that the best disposition of the surplus public money is to pay the people's debts, justified in extending some discretion to a Democratic President when they find that the President himself has already adopted a policy in perfect accord with the resolutions, that he is moving in the very direction that those who favor the payment of the public debt desire?

I understand that the acting Secretary of the Treasury made such a declaration before the Committee of Finance of this body. The policy therefore of the administration is the policy embodied in these resolu-

Mr. MAXEY. I should like to ask the Senator from Louisiana a question, if he will permit me.
Mr. GIBSON. Certainly.

The object of this margin of \$20,000,000, as I under-Mr. MAXEY. stand it, is to provide for some unforeseen contingency, some extraordinary demand for greenbacks not looked for or expected in the ordinary course of business transactions. I ask the Senator from Louisiana if there should be an extraordinary demand for greenbacks, which no one can anticipate or foresee, and if \$100,000,000 were called for, has not the Secretary of the Treasury to-day the absolute right under the act of the 14th of July, 1870, to place in the Treasury as much money as he cares for, by the sale of bonds, in order to meet an unforeseen and extraor-

dinary contingency?

Mr. GIBSON. It is true as the Senator from Texas has observed that under the terms of the resumption act the Secretary of the Treasury is authorized to sell bonds for the purpose of maintaining the resumption of specie payments, but this remedy, if remedy it can be called, is to prolong the very difficulty from which we are now endeavoring to extricate ourselves, because the purpose of these resolutions is to get out of debt, to pay the debts of the people, whereas if the Secretary should resort to the right under the act to which the honorable Senator from Texas has referred, instead of paying debts he would be making new ones. I think it preferable, therefore, to retain a working balance in the Treasury and to clothe the executive department of the Government with power to cease to pay our debts if the emergency should arise, rather than to place it in the possible alternative of creating new indebtedness by the sale of bonds.

If an emergency should arise, if the "rainy day" should come for our Government, it would be better to hold on to the money in hand, to suspend payment of debts due at our option drawing only 3 per cent. interest, than to use our credit at such a crisis on a higher rate of interest. But I do not anticipate any emergency. I believe that the surplus in the Treasury with the revenues will pay off the existing debt even at an earlier period than is now contemplated, and that the emergency most likely to arise will be that presented by an overflowing Treasury in the face of debts beyond our reach. It is wisest, in my judgment, to make the provision we have, because it is the unexpected that brings trouble and disaster in human affairs.

I have now, Mr. President, endeavored to state what the facts were by which we were confronted, the indebtedness of the Government which may be paid at its option, the surplus on hand, the revenue of the Government in excess of expenditures, the scope and meaning of these resolutions, the amount and limit of discretion allowed under them to the executive department of the Government, which department is enforcing month by month the very policy which these resolutions seek to execute. I have shown, I think, too, that under these circumstances a certain discretion should be allowed the Executive, not only a working balance of \$20,000,000 if deemed necessary, but the power to suspend the payments of the public debt in the event of any emergency not now foreseen.

For these reasons I am disposed to vote for the resolution with the Senate amendments.

VALUE THE INDISPENSABLE BASIS OF A SOUND CURRENCY.

I alluded at the outset of my remarks to the academic discussions which had taken place as not properly connected with the resolutions themselves, for their simple and specific purpose relates to the payment of the public debt.

But I hope I may be pardoned if I detain the Senate a few moments to make some observations upon remarks which have fallen touching

our financial system.

It will be remarked, Mr. President, that both the Senate and House resolutions retain the \$100,000,000 of coin in our Treasury as security for our currency; I may say also as the base upon which the pyramid of our national credit stands.

This is an important triumph for those who have always insisted that the indispensable element in our financial system should be value, and the honors of it belong properly to the mover of the resolution [Mr. MORRISON], who has always been an advocate of a sound currency. A public man may gain temporary popularity who shall propose a system of irredeemable paper issues the temporary effect of which is often to create a transient prosperity and to induce the belief that men may enrich themselves without enterprise, without intelligence, without self-denial, without frugality or sober industry, by the mere benevolence of their government; but in the long run the only way to win genuine public confidence is to assert the truth and to insist that the function of the government is not to enrich the citizen but to uphold

justice and to protect life and property.

The line that separates those who believe that the currency of the people should possess value in itself, or represent value, from those who believe that the value may be created by the government is a broad

and impassable one.

Those who insist that there should be no coin in the Treasury to redeem the notes issued by the Government, that such notes when stamped by the legends and denominations fixed upon them by the Government constitute a safe and sound currency, do in effect dispense entirely with redeemability in coin or with the value which coin expresses.

I have heard a great deal said about the barbarism of silver and gold and the all-sufficiency of a paper currency issued by the Government in such sums as the representatives of the people may adjudge necessary to meet the wants of trade; that the credit-"the coined credit," as the phrase goes-of the Government was the best safeguard and basis for the currency of the people. If one man can not by issuing his notes of indebtedness make himself rich, then how can an aggregation of men composing a nation do it? Who can name an instance in all human history in which the attempt has not turned out to be a delusion, a snare, a cheat, a coined fraud? The Government never had a single dollar, and can not get a dollar without taking it out of the pockets of the people by taxation, nor can the people get a dollar except by earning it by the sweat of the brow. This is not a modern discovery, for history teaches us many sad lessons illustrative of the readiness with which such expedients have been resorted to in times of revolution, and how instead of bringing relief, comfort, and happiness they have ever been the fruitful source of ruin, distress, and disaster.

I have never seen any statement of the theory of irredeemable paper

money, or fiat money, so graphically and truly expressed as by the Russian author, Possoschkow, who lived in the time of Peter the Great.

It is in the nature of things that a doctrine that ascribes divine attri-

butes to government should find its most illustrious exponent in a firm "The foreigners, " says Possoschbeliever in the divinity of monarchs. "estimate their money according to the quantity of the metal it contains, and not according to the power of the monarch who issues it. They have a rate of relative value for copper and silver. But we honor our monarch as God and hold his dignity in honor and most zealously obey his will. On whatever thing we see the name of his Imperial Majesty, that thing we estimate highest. In coining money men must not do as the foreigners do, and consider the amount of copper, but consider only the will of his Imperial Majesty. We are no foreigners; it is not the copper that is valuable to us; it is the name of our czar. We do not look at that is valuable to us; it is the name of our czar. We do not look at the weight of the money, but upon the inscription.''

I am rejoiced to see that this notion on which the French assignats

and mandats and other irredeemable notes were issued no longer finds any advocates in either House of Congress, but that there is concurrence in the opinion that the paper issued by the Government of the United States should be redeemable in coin. This was the policy adopted by Alexander Hamilton when the first mint was established, and set forth in his report of 1792, and approved by Washington and Jefferson. From that time to this no Secretary of the Treasury, no President of the United States, no public man who has ever enjoyed the confidence of the people of this country, has ever attempted to place their finan-cial structure and credit upon any other thing than value, than gold and silver coin, something that represents capital and labor. If I could have my way now I would divorce the United States Government from all banks and banking functions.

I would follow the example of our fathers when they established a

within the constitutional functions "to coin money and regulate the value thereof," giving free coinage and full legal tender to both silver and gold. That was the plan adopted at the beginning, for we find that by the first coinage act of April 2, 1792, the Government rated gold and silver differently according to their relative values and the same questions that addressed themselves to the authors of that system then address themselves to us to-day: First, what ought to be the nature of the monetary unit of the United States? Secondly, what proportion between gold and silver if coins of both metals be used?

These questions were propounded by Mr. Hamilton while Secretary

of the Treasury, and he answered them by adopting both gold and silver as our currency and established between them a relation that conformed as nearly as possible to their commercial value, for their value, like that of all other commodities, is determined temporarily by demand and supply, permanently and on the average by the cost of pro-

One grain of gold was held to be the equivalent of 15 grains of silver. Why not 1 to 11, or 12 or 13 or 14, as the ratio had been in times past, or 1 to 18 or 20 or 25? These ratios were rejected and 1 to 15 was adopted, because the Constitution imposed upon the Government the duty to coin money and regulate the value thereof, not attempt to create value, and that a just and fair regulation required that it should be

made on their value in the open markets of the world.

Every ounce of gold and silver represents labor and capital in certain distinct and unequal proportions. Why should a given weight of gold possess a higher value than the same weight of silver? Because it is both more in demand and is found in different proportions and the cost of production is greater. For the same reasons, from the earliest times, it has required more of silver than of gold to purchase the same object. If the two metals were equally abundant and equally desired and produced in equal quantities by like proportions of capital and labor, it would require an equal measure and quantity of one as of the other to effect an exchange. It is value that determines the difference; and there would be no reasons for differing denominations of money, as one, five, or fifty, or five hundred dollars, unless to express and represent different degrees of value and of purchasing power and of capital and labor. "Abraham weighed to Ephron the silver." The impress upon the silver might have been false, and so the scales were used to ascertain its exact weight and bullion value. "A false balance is abomination to the Lord, but a just weight is His delight."

This plan adopted at that time by our Government was never departed from until the unfortunate demonetization of silver in 1873.

The variations in the two metals were corrected from time to time and compensations made so that the equilibrium when disturbed might be restored as nearly as possible. Free coinage and full legal tender were the attributes of both metals. This safe rule was departed from in the coinage act of 1878. It was believed that the value of silver in the markets of the world had been affected by transient causes and that if the ratio were adopted that had existed before its demonetization by this country it would take its place when coined side by side with gold; but in order to prevent any disturbance in their relative values as coined money, and to preclude the disparity that existed between them in the bullion markets of the world under that act, the Government was made a forced purchaser of so much silver bullion every month, enough to coin not less than two nor more than four million silver dollars, and the freedom of coinage was taken away from silver, while the Government was instructed to put forth every effort in order to unite the leading commercial nations of Europe with us in the attempt to restore silver to free coinage and its full functions as one of the moneys of the world on an accepted international ratio with gold.

The small amount of silver coined under this act, of only two millions a month, has not as yet produced any disturbance in our financial system, for gold has been constantly and steadily accumulated. apprehensions of disturbance do exist, because it is believed that the discord between silver and gold bullion will sooner or later discover itself between silver and gold coin, and that the steady increase by this forced purchase of silver, notwithstanding its limited coinage, will eventually cause gold to go to a premium and to disappear.

No doubt in time, but in how many years nobody can say, this dis-parity may declare itself, just as it did in France when they were compelled finally, and in all the states of the Latin Union, to discontinue the free coinage of silver-in fact to discontinue its coinage entirely as

a legal-tender money

In order to ascertain the oscillations between the two coins, gold and silver, during the perturbations in their bullion prices, the minister of finance of France ordered a count made on the 28th of May, 1885, and more than twenty thousand public officers were engaged in this count on that day, and with this count as a basis a very close approximation was reached of the entire amount of gold and silver coin in circulation in France. In comparing it with a similar count made in 1868 and 1878, a very great increase of silver appeared. In 1868 the proportion of gold to silver in circulation was as 97.72 to 2.28; in 1878 it was 73.55 to 26.45, and in 1885 it appears to be 69.33 to 30.67. Commenting upon this state of facts our minister, Mr. McLane, observes:

I would follow the example of our fathers when they established a The use of silver 5-franc pieces was well-nigh abandoned in 1865, but after the mint and issued a currency. I would bring the Government back treaty between the Latin powers, which took effect fully in 1868, the silver cir-

culation commenced to increase especially in all the eastern and southeastern and southern provinces adjoining Belgium, Switzerland, and Italy, while in the west and center there was no change in the old proportion. It was from this court that I was enabled in my separate-and confidential dispatch, under date of September 11, to inform you that a legal-tender silver coinage of about \$600,-000,000 in value was maintained in France, but it is conceded that this result is mainly due to the fact that the coinage of silver was suspended not only in France but in the other countries whose coin is allowed to circulate in France, this suspension being complete soon after the German coinage act of 1873.

These facts show how rapidly under free coinage silver rated at 151 to 1 of gold—that is, at a ratio lower than the market ratio increased in the currency of France, while the bullion price was steadily falling—and how soon in advance it became necessary, in order to prevent the expulsion of gold and the disparity between the two coins, to resort to the absolute stoppage of the coinage of silver of full legal-tender quality and function. Our coinage of silver is restricted, though it is a full legal tender. How much the country can maintain at a par with gold is a problem that will only be solved by experience itself. We have already coined 235,644,286 silver dollars; while, as will be seen from Mr. McLane's statement, France, having on hand about \$600,000,000 of her legal-tender silver coinage, found it necessary to stop the further coinage at that sum, in order to maintain its equivalency with gold and to preserve add as part of its expression. and to preserve gold as part of its currency. Who can forecast the point when the equilibrium between silver and gold coin, the danger point, shall be reached and gold begin to disappear? The aim of everybody should be to utilize both metals and to retain as large a proportion, the largest possible amount, of the coins of both metals in our currency; for both possess value. There is to-day no free coinage of silver in this country, nor in any of the leading nations of Europe, with full legal-tender quality. I do not mean, of course, to apply this remark to subsidiary coins that possess a debt-paying function for small amounts. If a ratio between silver and gold were adopted by the United States and two or three of the great powers of Europe the difficulty would be solved and the system would last for several generations, which, humanly speaking, is an endowment of substantial permanence.

For one I believe it were best that the true, logical results of our present financial system should be disclosed as early as possible. If gold is to go to a premium, as some imagine and insist, right away; if the inevitable hour is to come, I would attempt by no legerdemain or finesse to post-The sooner we know where we stand, whether we have a safe, sound, stable currency or not, the sooner the remedy will be applied and the better for the people of this country. Let us immediately dispell all apprehensions by applying the fairest tests, or demonstrate that they are justified and apply the remedy demanded. The longer the period of disparity is postponed by mere makeshifts the more severe will be the shock, the greater the losses to laboring men, and the more violent and widespread the distruction of confidence and the reign of extreme fluctuation. Our financial system should derive its stability and strength from wise legislation, and not from the exploits of sagacious secretaries.

The greatest curse that can afflict a people is an unstable, disordered currency, changing from day to day, which becomes in the hands of capitalists and speculators the instrument by which they are enabled to cause a depression or rise in prices as they may see fit, and finally to throw the entire burden of all the losses on the shoulders of the labor-

So long as silver is coined and stamped by the Government, even if its market value does not correspond with the legal value, the best policy is to treat it precisely as you treat gold. Neither Congress nor the Executive nor any department of the Government should make any difference between one money and another money. All forms of money should be treated alike, received under the law and paid out by the law alike to the bondholder and the workingman, and their interchange ability should be maintained not by the Treasury but by wise laws.

While I would have preferred, as I said a moment ago, that the Government should have no connection with banks, do no banking business, yet we must deal with things as they are to-day as we find them, not as we would have them; and as the issue of paper money has entered into the body of this financial system and become a component part of it, the principles of justice require us to treat silver and the silver certificates precisely as we do gold or United States notes.

The main object to be accomplished now is to preserve the equivalency between all our moneys by legislative enactment affording prompt relief whenever the equivalency is disturbed and to bring into concurrent circulation, or as the basis of circulation, coin of both silver and gold. The larger the proportion of the actual currency in the hands of the people of silver and gold or of their paper equivalents, the less liable the medium of exchange will be to sudden fluctuations of expansion or contraction, and the larger will become the volume of money.

What is the essential difference between the silver certificates and the United States notes? If the \$100,000,000 held in the Treasury which was acquired by the sale of bonds for gold be maintained in gold, in order to redeem the \$345,000,000 of United States notes and to preserve their equivalency with gold, then there remains one gold dollar in the Treasury against 3.45 of paper dollars outstanding, whereas every silver certificate is to-day guaranteed by a silver dollar which passes current and possesses the purchasing power of a gold dollar, so that the silver certificate, as matters stand, is better secured than United States notes. But if you estimate the silver dollar as being worth no

more than its bullion value, you have then 75 cents in silver by the gold standard guaranteeing the payment of every dollar in every silver certificate outstanding.

Upon this estimate of values, therefore, the silver certificate is backed by 75 per cent. of value, while the United States notes are guaranteed by less than 30 per cent. of value, and if it be understood that come what may the equivalency and interchange ability of the silver and gold coin is to be preserved, there is no reason in the world why the silver certificate should not be favored by bankers and capitalists as well as by the people in their homes and workshops. I leave out of view of as by the people in their nomes and workshops. I leave out of view of course the ability of the Government by the further sale of bonds, by increasing its debts, to maintain its paper circulation. I speak of the actual basis. The issue of small silver notes will be of great convenience and advantage

ence and advantage.

I do not feel that the bondholder is entitled to any particular favor or solicitude, nor have I any personal sympathy for bankers or speculators, yet I would do them no wrong, no injustice. The son of a planter, and a planter myself, reared in the country, with all my kindred and associations connected with country life, the first test I apply to every financial question is, how will it affect the agricultural interests, the producing and laboring classes? A sound currency is as indispensable for their transactions, as necessary for their welfare, and the public credit is as dear to them as to the bondholder or the banker.

The amounts paid to the bondholder on the interest and principal of the public debt are insignificant in comparison with the payments made to conduct the operations of the Government itself and for other expenditures authorized by law, and absolutely a mere bagatelle in compenditures authorized by law, and absolutely a mere bagatelle in comparison with the sums involved in all the transactions, small and large, that make up the business of the people of this country (sums in the aggregate almost beyond computation), every one of them and all of them to be measured by a steady and sound currency, or to be unsettled and confused and harassed by daily fluctuations. In my judgment the entire Federal debt does not exceed in amount the sum that would represent the transactions of the people of the United States for one day.

I would therefore legislate for the whole people and not a particular class, for the prosperity of all embraces the welfare of each and every class and interest

Sir, I can never forget the glorious traditions of public faith and public honor which Southern statesmen ever cherished from the moment they assumed control of our country in her infamcy until, when owing to circumstances I will not allude to, the scepter was transferred to other hands, and along with it the national escutcheon without a blot upon it, as stainless as their own characters.

And I believe to-day the people of the South are as willing as those of any other section to maintain these proud traditions and to support with whatever sacrifice may be necessary the credit and honor of our common country. They know that a sound currency is essential not only to the preservation of national honor but for the well-being and prosperity and happiness of the whole country.

They realize how intimately blended with every transaction how-

ever unimportant, with every enterprise however great and beneficent, and with every interest and aspiration of theirs, is the credit and honor of their federal Government.

The people of the South believe that interest and honor are one and inseparable. They concur in the beautiful and profound observe of Junius, "Private credit is wealth; public honor is security." They concur in the beautiful and profound observation feather that adorns the royal bird supports his flight. Strip him of his

plumage and you fix him to the earth."

Mr. WHITTHORNE. Mr. President, it is my purpose to submit some remarks upon a subject-matter not exactly akin to the pending proposition, but being advised by the President of the Senate that the remarks which I intend to submit are not out of order, I trust under the circumstances I shall receive the indulgence and pardon of my brother

I am in favor of a rapid and faithful payment of every debt and obligation of the Government. A proposition which I had the honor to submit to the Senate a few days since in my opinion constitutes one of the obligations or debts of the Government, and that proposition was in a bill which I had the honor to introduce on the 19th instant, and which I will not now read, being a bill to return the tax on cotton collected by the United States in the years 1865, 1866, and 1867 to the people of the States in which it was produced. The bill is in the following words:

A bill to return the tax on cotton collected by the United States in 1865, 1866, 1867, and 1868 from the people of certain States of the Union, to be held and used by said States for educational purposes.

used by said States for educational purposes.

Whereas by virtue of the acts of Congress passed in 1862, 1866, and 1867, a tax was imposed and collected, to the amount of 868,672,883.99, upon raw cotton produced in the United States, of which amount \$64,679,681.47 was collected after the final close of the war between the States; and

Whereas this cotton was the special product of the labor and soil of but a small number of the States composing this Union; and
Whereas the said States had then but recently emerged from the devastation and desolation of the said war, and at its close the great body of the people inhabiting the said States, white and black alike, were oppressed by the burden of extreme poverty, which made the said tax excessively onerous, and deprived them not alone of actual and necessary comforts, but also of the means of educating the ignorant and unfortunate of their numbers, and from the effects of which burden they are not yet relieved, as is manifested by the large propor-

tion of the population in said States who are not now able to read or write; and Whereas the principal result of the said war was the emancipation of the black population, and their investiture with all the rights attached to citizenship in the United States; and Whereas the right of the Government to levy and collect such a tax is believed to be in violation of the Constitution; and Whereas it is believed that the return of this tax to the individuals who produced the cotton upon which it was assessed and collected is impossible; and Whereas it is believed that the return of the amount of this tax to the States from whose people the same was collected would enable the said States to build and perpetuate a system of popular education, under the management and control of the authorities of said States, whereby the ignorance alleged to exist therein may be removed, and that the return of said tax would, so used, repair in a large degree the injustice done to the laboring men of the said States by whom said cotton was produced, in the fact that the education of their sons and daughters now and in the future would be secured: Therefore,

Bettenacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, as hereinafter directed, out of any moneys in the Treasury not otherwise appropriated, the sum of \$88,072,388.99, to be applied as hereinafter provided to the purposes set forth in the foregoing preamble.

Sec. 2. That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause, without unnecessary delay, a statement to be made from the books of the Treasury Department which will show the amount of the said tax paid by the people of each State; upon the ascertainment of which, and report thereof to the President of the United States, the President shall notify the governor of each of said States of the amount so found to have been collected upon raw cotton produ

This is not an appropriate time in which to discuss in full the merits of the legislation proposed by this bill or of the great and useful results that would, in my opinion, follow its enactment; but I deem it proper that I should submit to Senators the reasons that have induced

The people who will be directly benefited by its provisions are the people of the States of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Virginia. It is in these States that the colored population of the United States reside in the largest numbers. They are the States which resided the laws and Government of the Union from the years 1861 to sisted the laws and Government of the Union from the years 1861 to

It is not either meet or proper now and here to speak of the causes which led to or of the heroism displayed in the conduct of that civil war, yet it may be said without offense and in sincere truth that when the pen of impartial history shall write of it without malice to any one that pen will attest and record that the devotion of the masses of the people of each section was enlisted by the earnest, honest conviction that the sacrifices they were making was to secure and perpetuate a common inheritance—constitutional liberty—the bequest of our common fathers

The end of the unhappy contest came in 1865, and with it the emancipation and freedom of nearly or quite six millions of the inhabitants

of these States who had theretofore been held as slaves.

It is well, Mr. President, to pause here and reflect for a moment upon the material and physical condition of the inhabitants of these States at that time. Let it be remembered that the great majority of the white population were not landholders, nor were the blacks. be known that the land of the landholders was covered and burdened with mortgages and judgments ready to be foreclosed to pay debts, and that the ravages of war had destroyed almost every vestige of personal and chattel property, so that it may be truthfully represented that their deep impoverishment was the sole estate of the great body of the inhabitants of these States. The two dark pictures of that hour were: First, the return of the confederate soldier to his desolate home, facing poverty and bereavement everywhere. Second, the black race, houseless, homeless, and without bread or clothing. Each race, cut off from any accumulated store of the past, was dependent alone upon the labor of the present.

It was in this extreme hour of their need that they each alike found their labor confronted with the demand and payment of a tax, especially discriminating in character, and applicable alone to the section of the Union inhabited by them, to wit, the cotton tax, assessed and collected by virtue of the acts of Congress referred to in the bill. To these laborers this tax was onerous and oppressive. Its payment involved the denial of bread and clothing to those dependent upon them

as well as education to their young.

It was then and is now believed by "the entire people of the cottongrowing States" that the law imposing a tax on raw cotton was partial and unequal in its operations and violative of the Constitution of the United States. The question of its constitutionality was taken to the Supreme Court of the United States in the case of W. M. Farrington vs. Rolfe S. Saunders. Upon this sole issue before the Supreme Court of the United States there was a divided court, and so disposed of in February, 1871. I will not argue this question, but will submit as an

appendix to my remarks the memorial presented by the Legislature of Georgia to the Congress of the United States at the Forty-second session, in which it is well and ably discussed and presented.

Reflecting for a moment that this deep conviction prevails, and the fact that this tax was paid under the circumstances, and at the time I have described, it would seem to be, that inasmuch as under existing laws of the United States the question of the constitutionality of this tax can not now be brought before the courts of the country, that it is peculiarly proper that the Congress of the United States shall consider

the wisdom, propriety, and justice of its return in some mode or manner to the people who paid it.

But inasmuch, Mr. President, as it is now impossible to ascertain through all the difficulties and costs and expenses that may be supposed to intervene, who is justly entitled, in his individual capacity and right to its return. The principal difficulty arrising from the fact, that it was the "middleman" who received the receipt for the tax, and not the laborer who in truth paid it. And the justice of its return being conceded, it should be put into some trust relation wherein either he who was so entitled or those "who were dependent upon his bounty" may receive the benefit thereof; and hence it is that I have in the bill referred to proposed that it should be paid over to the States in which it was collected, to be by said States held as a perpetual educational fund, to the end and with the trust that the descendants of these laborers now and in all time to come shall derive a benefit therefrom.

For the purpose of showing the amount of this tax received by the Government I quote from Executive Document No. 181, Forty-second

Congress, third session, as follows:

According to the returns made to the Commissioner of Internal Revenue, there were collected on cotton the following amounts, to wit:

For the fiscal year ended June 30, 1863.	\$351,311 1,268,412	56
For the fiscal year ended June 30, 1865	1,772,983 18,409,654 23,769,078	90
For the fiscal year ended June 30, 1868	22, 500, 947	77
Making a total sum of	68, 072, 388	99

Mr. President, the difficulties which environed the reorganization of the political, social, and economic relations of the people of these States at the close of the war will never be fully comprehended. There existed much to encourage and promote discord and disorder. Want is alike the parent of good and evil. It existed everywhere, and dwelt with all classes in these States. The colored population, in the condition that I have described, were elevated into new relations by their emancipation. What wonder that in the struggles for the necessities of life there should be in the fields of labor conflicts between the races? What wonder should there be that the white race, more or less proscribed, should be jealous of those whom so recently they knew as slaves, and that in the midst of such a state of things that there existed bad influences to give encouragement to the worst passions of both

Mr. President, the world will never realize the statesmanship and wisdom of the conservative leaders of the white race of the South during this period of social and economic reconstruction. The forces that were put to work were silent and unobserved forces. They grappled with a state of affairs and a condition of political surroundings which never before in the history of mankind confronted the intellect, the passions, and prejudices of man. That order, respect for the law, progress, and wealth should be brought, and so rapidly brought out of this, is a result which challenges the admiration of the good and just of every land.

It is frank and just, Mr. President, to say that these leaders were enabled to accomplish this result by the fact that the masses of both races, black and white alike, were conservative, peaceful, and indus-It was only the limited few of each race that were vicious and wickedly inclined. May I, as a son of this section, without being accused of sectional pride, point to the practical evidences of what I claim to be the result of the statesmanship of the leaders of thought in the Southern States? Compare for a moment the evidences of increased wealth in farm products, in manufactures, in mining, in the building of railroads, and in the increase of educational institutions and funds for educational purposes now existing as contrasted with the distress and poverty of 1865. I exhibit herewith an estimate based upon statistical information derived from the American Almanac, of what are the value of the annual product of these States at the present time. It

Estimate of the value of the annual products of the States of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Virginia.

Wheat and corn	\$126, 300, 000 250, 000, 000 219, 700, 000 25, 000, 000 20, 000, 000
Total	640, 000, 000 160, 000, 000
Grand total	800, 000, 000

And I also exhibit the following:

Laucation expenditures of Southern States, taken from American.	
Alabama	\$522,727
Arkansas	561,745
Florida	172, 178
Georgia	613, 647
Louisiana	466, 930
Mississippi	803, 896
North Carolina	535, 205
South Carolina	423, 473
Tennessee	955, 470
Virginia	1, 321, 537
	a n=a ana

Now, Mr. President, I submit for the consideration of Senators from all sections of the Union that it is a fact that out of the \$800,000,000, the value of the annual products of these States, over one-half of that sum goes out annually to purchase from the world supplies that are not produced in their midst. I submit for your reflection that the people who inhabit this great empire of wealth are the customers of the Northern and Western States of this Union, and they obtain principally that which they require in exchange for their own products in the way of supplies from the States lying north of them, and these are first the great States of Ohio, Illinois, and Indiana.

I submit again for your reflection that it is to the interest of these States to do all that which may be constitutionally and rightfully done

to contribute to the increasing wealth and prosperity of these States, the people of which, it is seen, are their best customers.

And finally, Mr. President, I submit that with due regard to the Constitution and lawfully in a spirit of justice, they may aid in returning to the people of the States that paid it the tax which was taken from them at a time when it was exceedingly oppressive. And in connection with this idea of the justice of its return I submit the further thought that inasmuch as it is alleged that in these States a large amount of ignorance prevails, and inasmuch as by act of the General Government the colored race have been invested with all the rights and privileges of citizenship, that it is alike an act of justice and duty to them that this tax should be returned and held for the purpose indicated in the bill.

With this sum of money so returned to these States, their educational institutions will become established and permanent in their usefulness and self-reliant, their sons and daughters will move forward with rapid and progressive step in the development of the great natural riches of the soil and of the mines which Providence hath given unto them, especially if the finances of this country are upon a sound basis.

APPENDIX.

LEGISLATURE OF THE STATE OF GEORGIA. [Memorial to the Congress of the United States.]

ILEGISLATURE OF THE STATE OF GEORGIA.

[Memorial to the Congress of the United States.]

By the foregoing preamble and resolutions the undersigned are appointed a joint committee, in behalf of the State of Georgia, to memorialize the Congress of the United States to provide by law for refunding the tax on raw cotton, paid by the people of the eotton-producing States on raw cotton under the revenue laws and Treasury regulations of the United States. As the tax paid prior to the 18th and 24th of June, 1855, may be held to be justified by the exigencies of the then pending war between the States, your memorialists ask only the refunding of the moneys collected as a tax on raw cotton subsequent to that time, that being the time when, by the proclamations of the President, all restrictions on trade, throughout the several States of the Union, were removed.

It has never been the practice, as it is not the policy of this or any other government in time of peace, to impose excises upon the raw products of the soil. Agriculture is the source and foundation of all national prosperity and power. It is the support of commerce, manufactures, and the arts, in all their diversified and multiform departments. When it languishes national wealth wanes, and all industries and enterprises are paralyzed. Hence, wise statesmanship fosters and encourages, rather than loads it with burdens. These are elementary maxims of political economy, and always applicable to the condition of nations, especially in time of peace. How important their recognition in reference to a people who, like those of the cotton-growing States, at the close of the late war, were overwhelmed and impoverished. Their lands and homes desolated, their productive capital sunk, their labor system subverted and destroyed, by the victorious march of conquering armies. But, in the face of misfortunes and calamities like these, even after the proclamations of the President of the United States of the 13th and 24th of June, 1855, restoring trade to its wonted channels—th

How is it possible to escape the conviction of the partiality and inequality of such a law? Its onerousness was crushing. The revenue from this source was enormous in amount, while it is conceded by all intelligent merchants and cotton-planters that it fell exclusively upon the producer, instead of the consumer. Another illustration of its partiality and inequality is found in the fact that cotton is produced only in eleven States of the Union. In all the others it is absolutely prohibited by climatic laws. Hence it was emphatically a local tax. It is true the language of the act imposes the tax upon "all cotton produced within the United States;" thus attempting to give it general application to all the States; but words can not change facts. Although this phraseology would seem to make the law universal in its operation all over the Union, yet the facts remain unquestionable, that from the laws of soil and climate it was impossible for it to affect any but the cotton-growing States.

Second. Was it unconstitutional? It is respectfully submitted that a tax which is partial and unequal is necessarily unconstitutional. For impartiality and equality, in all measures of Congressional legislation, constitute the very soul and spirit of the Constitution. It is manifested in all those clauses which recognize the equality of the citizens of the United States. For example: the Constitution declares that "no title of nobility shall be granted by the United States," and that "no State * * * shall grant any title of nobility." (Article I, section 9.) Thus both the Generaland State governments are prohibited from destroying the equality of citizens. And it may be added that this equality is fully recognized in the fourteenth and fifteenth amendments, which, though adopted since the passage of the law under consideration, furnishes strong evidence of the deep conviction that such was the spirit of the Constitution, even without them.

Nor is the Constitution less explicit as to the equality of the States. It declares

is fully recognized in the fourteenth and fifteenth amendments, which, though adopted since the passage of the law under consideration, furnishes strong evidence of the deep conviction that such was the spirit of the Constitution, even without them.

Nor is the Constitution less explicit as to the equality of the States. It declares that "The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof." (Article I, section 3); that "All duties, imposts, and excises shall be uniform throughout the United States" (Article I, section 8); that "No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another." (Article I, section 9, clause 6); that "Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State" (Article IV, section 1); that "The United States shall guarantee to every State in the Union a republican form of government" (Article IV, section 4); that "No State, without its consent, shall be deprived of its equal suffrage in the Senate" (Article V). Hence, the citizens and States of the Union being equal, they are entitled by the Constitution to be treated as equals in all measures of Federal legislation. Acts that are partial in their operation; that impose burdens on a portion of the citizens or States to the exemption of others, are contrary to the very soul and spirit of the Constitution. It enjoins upon the legislative department, indeed upon every department of the government, strict justice, impartiality, and equality, in every act or measure that affects the citizens or States of the Union. Then, how stands this enormous tax on raw cotton tested by this high standard of constitutional rectitude; a tax that bears upon the cotton-grower to the exclusion of the producer of every other raw product of agriculture; a tax that loads with crushing excises the staple article of eleven States, and excuses from tribute the unmanufactured

follow as a logical sequence that it was not "uniform throughout the United States."

But your memorialists are not content to leave the question here. Its importance demands further consideration. The words "uniform throughout the United States" by their very statement define what is meant by "uniform." It is too plain to need explanation. It evidently means that all taxes not "direct," whether they be "duties, imposts, or excises," shall fall justly, impartially, and equally upon all the citizens and States of the Union. It is doubtful, to say the least, whether the rule of uniformity can be complied with, except upon the ad valorem principle, that is, by taxation upon property according to its value. How can a tax be said to be uniform which is levied specifically upon a single article of agricultural production, in its raw state, to the exclusion of all others in a similar state? How can a tax be "uniform throughout the United States" which is laid upon an article that is produced in only eleven States of the Union?

Suppose Congress should levy a tax on all ice gathered within the United States, what would our brethren of Massachuseits say? If a tax should be laid on all white-pine lumber sawed in the United States, what would the State of Maine think of its uniformity? The Constitution empowers Congress to establish "uniform laws on the subject of bankruptcies throughout the United States." It is but reasonable to suppose that uniform in this place means the same thing that uniform does in the taxing clause. Now, suppose Congress should pass a bankrupt law which should exempt in favor of the debtor all cotton grown by him for the twelve months next preceding his applications for its benefit, would that be uniform throughout the United States? What would those States say in which no cotton is produced? Would it not be a discrimination against them and in favor of the cotton-growing States?

But the Supreme Court of the United States has settled the signification of the term." Uniform."

The Constitution of

But the Supreme Court of the United States has settled the signification of the term "uniform."

The Constitution of Wisconsin provides that—
"The rule of taxation shall be uniform, and taxes shall be levid upon such property as the Legislature shall prescribe. The constitution of the State requires, as a rule, in levying taxes, that the valuation must be uniform, and in all cases alike or equal, operating alike upon all the taxable property throughout the territorial limits of the State or municipality within which the tax is to be raised; and when the Legislature prescribed a different rule the act is a departure from the constitution, and therefore void. The constitution has fixed one unbending and uniform rule of taxation for the State, and property can not be classed and taxed by different rules. The provision of the constitution that taxes shall be levied upon such property as the Legislature shall prescribe does not sanction a discrimination which provides for taxing a particular kind of property for the support of government from that by which other property is taxed, for when the kind of property is prescribed the rule of taxation must be uniform. All kinds of property must be taxed uniformly, or be absolutely exempt." (Gilman vs. City of Sheboygan, 2 Black, 510.)

This case came from the Supreme Court of the United States upon the following state of facts: The Legislature of Wisconsin passed an act authorizing the city of Sheboygan to levy a tax on all the real estate within the corporate limits, to aid the building of railroads leading to the city. A bill was filed to enjoin

GROVER CLEVELAND.

the city from levying the tax, upon the ground that real estate alone was not a uniform tax within the meaning of the constitution of Wisconsin, already quoted, and that, therefore, the act of the Legislature was unconstitutional.

The constitution of Wisconsin requires the rule of taxation to be uniform, and this means, according to the facts and decision in this case, that all kinds of property must be taxed alike, equally with other taxable property, and coextensive with the territory to which it applies; and that a tax for a special purpose upon the city of Sheboygan, and levied exclusively upon real property, was a discrimination in favor of personal property, in conflict with the constitution of the State.

discrimination in favor of personal property, in conflict with the constitution of the State.

The constitution of Ohio contains a similar provision. In Gilman vs. City of Sheboygan (before referred to), the Supreme Court of the United States adopt, with strong approbation, the decision of the supreme court of Wisconsin in the case of Attorney-General vs. The Winnebago Lake and Fox River Plank Road Company (2 Wisconsin Reports, 42), which quotes and approves (and the Supreme Court of the United States indoress the approval) The Exchange Bank of Columbus vs. Hines (3 Ohio State Reports). In this case the supreme court of Ohio says (as quoted in 2 Black): "Taxing is required to be by a uniform rule. * * Uniformity, in taxing, implies equality in the burden of taxation. * * * But this is not all. The uniformity must be coextensive with the territory to which it applies. * * But the uniformity of the rule required by the constitution does not stop here. It must extend to all property subject to taxation, so that all property may be taxed allke—equally—which is taxing by a uniform rule." The Supreme Court of the United States adds:

"We forbear to examine the soundness of the conclusions of the supreme court of Wisconsin. They need no support at our hands. We could add nothing to what they have so well said, in vindication of their views. Such a decision would incumber this opinion, without throwing any new light upon the subject."

In the light of these authorities your memorialists are unable to perceive how.

iect."

In the light of these authorities your memorialists are unable to perceive how it can be insisted that the cotton tax was "uniform throughout the United States." For it is destitute of every element of uniformity so particularly enumerated by the supreme court of Ohio, and which is so emphatically indorsed by the Supreme Court of the United States in their unqualified approval of the decision of the supreme court of Wisconsin.

Without further argument your memorialists submit the subject to the enlightened judgment of Congress.

E. F. HOGE, W. L. HILLYER, W. P. JOHNSON, For House of Representatives. GEORGE HILLYER, W. L. CLARK, For the Senate.

Mr. CALL addressed the Senate. [See Appendix.]

RETURN OF A HOUSE BILL.

The PRESIDENT pro tempore laid before the Senate the following request from the House of Representatives:

IN THE HOUSE OF REPRESENTATIVES, July 30, 1886.

Resolved, That the Clerk be directed to request the Senate to return to the House the joint resolution (H. Res 295) permitting the public building authorized by act of Congress approved June 30, 1886, at Savannah, Ga., to be located not less than 40 feet from any other building, instead of 50 feet, as provided in said

The PRESIDENT pro tempore. If there be no objection the joint resolution will be returned to the House of Representatives.

Mr. BROWN. I should like to have the joint resolution read. The PRESIDENT pro tempore. The House has requested the return

of the joint resolution. It is usual to grant that request.

Mr. BROWN. Very well.

REPORT OF A COMMITTEE.

Mr. KENNA, from the Committee on Commerce, to whom was referred the bill (H. R. 2646) granting to the Kanawha and Ohio Railroad Company the right to lay its track through United States lock and dam property in the Great Kanawha Valley, State of West Virginia, reported it with an amendment, and submitted a report thereon.

HOUSE BILLS REFERRED.

The following bills received from the House of Representatives were everally read twice by their titles, and referred to the Committee on

Military Affairs:

A bill (H. R. 633) for the relief of Maj. G. W. Candee; and
A bill (H. R. 1143) authorizing the Secretary of War to deliver to
the Somerville Grand Army of the Republic, of Somerville, Mass., four condemned gun-carriages, to be used for monumental purposes.

The following bills were severally read twice by their titles, and re-

ferred to the Committee on Claims:

A bill (H. R. 4476) for the relief of Alexander Worrall; and A joint resolution (H. Res. 82) for the relief of Luther F. Warder. The bill (H. R. 2086) for the relief of Francis M. Bell was read twice by its title, and referred to the Committee on Post-Offices and Post-

The bill (H. R. 4097) for the relief of William J. Owings was read twice by its title, and referred to the Committee on Pensions.

The bill (H. R. 9371) for the completion of a public building at Santa Fé, N. Mex., was read twice by its title, and referred to the Committee on Public Buildings and Grounds.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President had, on the 29th instant, approved and signed the following acts:

An act (S. 453) for the erection of a public building at Jacksonville,

An act (S. 236) to authorize the Bellingham Bay Railway and Navigation Company to build certain bridges in the Territory of Washington:

An act (S. 901) to grant the Astoria and Winnemucca Railroad Company the right to construct bridges over navigable water courses;

An act (S. 1937) authorizing the city of Salem to construct a bridge across the Willamette River, in the State of Oregon;

An act (S. 2115) granting to the Oregonian Railway Bridge Company of Oregon the right to construct a bridge over the Willamette River

in the vicinity of Ray's Landing, Oregon; and
An act (S. 2800) to authorize the construction of bridges across the Tennessee and Cumberland Rivers by the Ohio Valley Railway Com-

pany.

LAKE CHAMPLAIN BRIDGE-VETO MESSAGE.

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States; which was read, ordered to lie on the table, and be printed.

To the Senate:

I return without approval Senate bill No. 63, entitled, "An act to authorize the construction of a highway bridge across that part of the waters of Lake Champlain lying between the towns of North Hero and Alburg, in the State of Verwent!"

plain lying between the towns of North Hero and Alburg, in the State of Vermont."

On the 20th day of June, 1884, a bill was approved and became a law having the same title and containing precisely the same provisions and in the exact words of the bill herewith returned.

The records of the War Department indicate that nothing has been done toward building the bridge permitted by such prior act; it is hardly possible that the bill now before me is intended to authorize an additional bridge between the two towns named, and I have been unable to discover any excuse or necessity for new legislation on the subject.

I conclude, therefore, that Congress in passing this bill acted in ignorance of the fact that a law providing for its objects and purposes was already on the statute-book.

statute-book. My approval of the bill is withheld for this reason and in order to prevent an nnecessary and confusing multiplicity of laws.

EXECUTIVE MANSION, July 30, 1886.

SEIZURE OF AMERICAN VESSELS IN FOREIGN WATERS.

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States; which was read.

To the Senate of the United States:

In further response to the Senate resolutions of the the 10th of May and 10th of July, 1886, touching the seizure and detention of American vessels in Canadian waters, I transmit herewith a letter from the Secretary of State date the 20th instant accompanied by a report from the consul-general at Halifax relative to the explore. GROVER CLEVELAND.

EXECUTIVE MANSION, Washington, July 30, 1886.

Mr. EDMUNDS. I move that the message and accompanying papers be printed and referred to the Committee on Foreign Relations.

The motion was agreed to.

TREASURY SURPLUS.

The Senate, as in Committee of the Whole, resumed the considera-tion of the joint resolution (H. Res. 126) directing payment of the sur-

plus in the Treasury on the public debt.

Mr. EDMUNDS. What is the pending question?

The PRESIDENT pro tempore. The amendment reported from the Committee on Finance.

Mr. EDMUNDS. I move to amend that amendment, in line 21, after the word "and," by inserting "whenever;" in line 23, by striking out the words "Secretary of the Treasury" and inserting the word "President;" and in line 24, after the word "order," by inserting the words "direct the Secretary of the Treasury to;" so that the amendment will read, after providing for this working balance of not exceeding \$20,-000,000, as follows:

And whenever

Which looks to the future-

in the case of any extraordinary emergency, and when, because thereof, in the opinion of the President the public interests shall require it, he may, by written order, direct the Secretary of the Treasury to suspend the further call for the payment of such indebtedness for such period of time as shall be necessary to maintain the public credit unimpaired.

The object of my making that motion is to put that clause in harmony with all the preceding legislation of Congress. When anything that Congress thinks it necessary to provide to be done is to be sus-pended or withheld for the time being under any circumstances, that grave responsibility of really suspending the execution of the law is reposed in the Chief Magistrate, who takes his own responsibility at a time when he thinks the public good requires it, and directs his subordinate to suspend. That I believe has been the universal course of law in this country whenever any public act in the course of business that the law requires to go on is to be suspended for the time being, it is to be done by the authority of the President of the United States alone. The Secretary of the Treasury is only an officer of the law. He may be changed at any time, and at this present moment the Secretary of the Treasury is unhappily disabled from illness; and who will be the next regular Secretary of the Treasury if the present Secretary should

find himself unable to resume his duties nobody knows.

I think it clear therefore in acting upon this business, and in aid of the general object the House resolution has in view, of reducing this surplus just as fast as it can be reduced with safety, that he who is the executor of this law is not to have reposed in him the power of suspending its execution, but that another, a superior, and a different power,

shall be brought into play for the suspension of the execution of this

That is all I wish to say on that particuler amendment.

The PRESIDENT pro tempore. The question is on the amendment The PRESIDENT pro tempore. The question is on the amendment of the Senator from Vermont [Mr. EDMUNDS] to the amendment of the Committee on Finance.

Mr. McPHERSON. Let it be read.

The PRESIDENT pro tempore. The amendment will be read.

The CHIEF CLERK. In line 21, after the word "and," it is proposed to insert the word "whenever;" in line 23 to strike out the words "Secretary of the Treasury" and insert "President;" and in line 24, after the word "order," to insert "direct the Secretary of the Treasury to;" so as to read:

And whenever in the case of any extraordinary emergency, and when, because thereof, in the opinion of the President the public interests shall require it, he may, by written order, direct the Secretary of the Treasury to suspend the further call for the payment of such indebtedness for such period of time as shall be necessary to maintain the public credit unimpaired.

Mr. McPHERSON. I should like to ask the Senator from Vermont, inasmuch as the Secretary of the Treasury is an officer of the Government under a special statute required to report to Congress, if there is any particular reason why this power should not be conferred on the Secretary of the Treasury; and would it not be in one sense unusual to confer this power on the Executive? Is there any especial reason why this should be changed?

I will further say that the matter was discussed by the Congress.

I will further say that the matter was discussed by the Committee on Finance, and I think it was the opinion of the committee that it was proper and necessary to leave the power with the Secretary of the Treasury for the reason that he is obliged to report to Congress. We deal directly with him. This is a power which should be conferred on him. In the discharge of his duties he is required to report to Congress everything as to the condition of the affairs of his Department. Why the necessity of injecting the Executive in the place which prop-

erly belongs to the Secretary of the Treasury?

Mr. EDMUNDS. There is no necessity of injecting the President into a duty that properly belongs to the Secretary of the Treasury. I agree to the proposition absolutely, but this duty of suspending the execution of the laws does not belong to the Secretary of the Treasury. It should very rarely belong to the President of the United States, but on some occasions in many, taking the history of the Government all together, it has been found necessary to vest in the supreme executive authority the power in emergencies of suspending the execution of a law or a policy of Compress, and it has never been vested in any sublaw or a policy of Congress, and it has never been vested in any sub-ordinate officer—and it never ought to be, for the sake of the subordi-nate officer himself, to state no other and wider and better reasons. The man who is to execute the command of the law in his own particular office ought never to be authorized, on his own judgment, to suspend that execution; but some other officer as a check ought to be vested with that authority, if there is to be any authority to suspend at all. That seems to me to be the clear policy of all governments of

law, and it has been in this country.

My friend from New Jersey says that the Secretary of the Treasury is bound to report to Congress. So he is. The law is very positive on that subject, so very positive that it has been thought by some that he has been somewhat neglectful of his duty in not reporting some things to Congress that he ought to have done at some times; but there he is, reporting to Congress; this does not change that; he reports either that the will of Congress has been carried out and that ten millions a month have been paid out on the public debt, or that an extraordinary emergency, in the opinion of the President, having arisen, the President of the United States, on his responsibility as the representative of the peothe United States, on his responsibility as the representative of the people in one great department, embracing the Treasury and all the other executive branches of the Government, has exerted that power and directed him to suspend, and he accordingly has suspended for so many months, and that later on he has begun again, the order of the President not being renewed or continued, to go on as before. The logic of the thing, the propriety of the thing, and the safety of the thing, as it appears to me, are very largely involved in leaving this responsibility of suspending the execution of this provision in the Chief Magistrate and in polody else

The PRESIDENT pro tempore. The question is on the adoption of the amendment proposed by the Senator from Vermont [Mr. EDMUNDS] to the amendment of the Committee on Finance.

The amendment to the amendment was agreed to.

Mr. PLUMB. I move to amend the amendment by striking out, in line 26, the words "maintaining the public credit unimpaired" and insert "accumulate additional funds for the payment of the outstand-ing obligations of the Government."

I do not want to have such a performance as Mr. Jordan's last summer, which was widely advertised as the premonition of coming disaster to the Government of the United States. That may be one of the things in contemplation in using this phase about maintaining the publication. lic credit unimpaired. I want it to relate solely to the accumulation of money to meet the outstanding obligations of the Government. I do not want any more of a tirade about silver, and the fear that somebody who is unfortunate enough to hold a couple of bonds or a Gov-

ernment note of some kind shall have to take that which the Senator from Vermont said the other day he was under the law obliged to take if the Government offered it. My purpose is to limit the discretion of the President to that question of whether there is enough money in the Treasury or not to meet the obligations which the Treasury may be called on to pay, and not some other thing, the character of which I have described. I do not want the Treasury to engage in banking, and to be scanning the horizon on account of the New York clearing-house, or some other clearing-house, and the relations which they assume that they occupy to the business world, and have the Secretary of the Treas they occupy to the business world, and have the Secretary of the Frestury get into the same category. He is simply the financial agent of the Government for the purpose of paying out money which Congress appropriates to be paid. In my judgment, he has no business to be a member of the New York clearing-house, or to be taking account of what their desires or wishes are in regard to the manner in which the Government shall pay its debts. His business is to carry out the law, pay what the law provides, and in the time commanded. Beyond that he should not go.

should not go.

Mr. McPHERSON. Let the amendment be stated.

Mr. PLUMB. I will modify it at the suggestion of the Senator from Iowa by saying "outstanding and accruing."

The PRESIDENT pro tempore. The amendment will be stated. line 26, after the word "to," it is proposed to strike out "maintain the public credit unimpaired," and insert "accumulate additional funds for the payment of the outstanding and accruing obligations of the Government.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Kansas [Mr. Plumb] to the amendment of the

Committee on Finance.

The amendment to the amendment was rejected.

Mr. COKE. I propose the following amendment, to come in at the end of the amendment of the Committee on Finance:

Provided, That such suspension and the reasons therefor shall be reported to Congress within ten days after its next meeting, or immediately if Congress shall be in session.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Texas [Mr. Coke] to the amendment of the Committee on Finance.

Mr. PLUMB. I would suggest to the Senator from Texas that that be amended by saying the reasons shall be set forth in the order and reported to Congress, so that when the order is issued, being a public matter, the public may know as well as Congress at a subsequent period what the reasons are why the public debt of the United States should not be paid out of the money which is raised by taxation from the people. Mr. COKE.

Mr. COKE. I accept the amendment of the Senator from Kansas. Mr. CHACE. I would like to ask the Senator a question.

The PRESIDENT pro tempore. The Senator from Kansas will please reduce to writing his proposition.

Mr. CHACE. I simply want to ask the Senator from Texas if this

is not a most extraordinary spectacle, that a Senator who urged so strenuously a few months ago against asking the Executive for his reasons for a public act now attempts to require of him to give his reasons, not to Congress, but to the public or to a subordinate officer for a certain

Mr. COKE. I could not hear the observation of the Senator from Rhode Island, and therefore am not able to give any response.

The PRESIDENT pro tempore. The amendment to the amendment will be read as modified.

The CHIEF CLERK. The amendment to the amendment as modified reads:

Provided, That such order shall state the reasons therefor, and shall be reported to Congress within ten days after its next meeting or immediately, if Congress shall be in session.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Texas as modified to the amendment of the Committee on Finance.

Mr. PLUMB. It seems to me that there can be no valid objection to the amendment. The President will not want any hugger-muggery about this business. It is public business which concerns the great body of the people of the United States and not a little handful of people to whom he may have listened for reasons. Certainly in a matter of this great moment we should know the reasons for action in this Otherwise, why not turn the Treasury over absolutely to the President, and tell him to run it until his term expires and then turn

it over to his successor, and so on?

Mr. EDMUNDS. I have for one no objection to the amendment of the Senator from Texas as he at first offered it; but to direct the President of the United States, when some sudden emergency comes to his notice that compels him to act with promptness, to stop in giving his order to the Secretary of the Treasury and set out in writing in that order for him to hold up all the grounds and considerations that lead him to conclude it to be best, I think is almost an insult to the President of the United States. To the other part of it I have no objection, and I move to amend the amendment of the Senator from Texas by striking out that clause which requires the reasons for the order to the Secretary to be inserted in the order.

The PRESIDENT pro tempore. The Chair is of opinion that that amendment would be in the third degree.

Mr. COKE. I withdraw the modification.
Mr. PLUMB. Very well, let the vote be taken on the amendment

of the Senator from Texas as originally offered by him.

The PRESIDENT pro tempore. The question recurs on the original amendment as offered by the Senator from Texas to the amendment of the committee.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question now is on the amendment of the Committee on Finance as amended.

Mr. SEWELL. On the 8th of December the Senator from Pennsylvania [Mr. MITCHELL] introduced a bill for the retirement of the tradedollar and its exchange in the standard dollar. That bill was referred to the Committee on Finance and has not yet been reported. this opportunity to offer it as an amendment to the pending measure as an additional section.

Mr. PLUMB. Let the amendment of the committee be acted on

Mr. SEWELL. I withdraw it until the amendment of the committee is acted on.

The PRESIDENT pro tempore. The question is on the amendment of the Committee on Finance as amended.

Mr. SAULSBURY. In my opinion there is no necessity for authorizing the President or the Secretary of the Treasury to suspend any law of Congress in reference to this subject. We have a reserve of \$100,-000,000. There has been a good deal of talk of this resolution being a vote of want of confidence in the Secretary of the Treasury or in the President of the United States. I do not share in any want of confidence in those gentlemen. I am perfectly willing to give to them the discretion in case of an emergency to draw for such period of time as they may deem necessary upon the reserve fund of \$100,000,000.

I propose to offer an amendment to the amendment of the committee, if it is in order, to strike out after the word "nay," in line 24, the words "by written order direct the Secretary of the Treasury to suspend the further call for the payment of such indebtedness" and insert "use so much of the reserve;" so as to read:

He may use so much of the reserve for such period of time as shall be necessary to maintain the public credit unimpaired.

There can be no danger in leaving this power in the hands of the Secretary or of the President. They will not use it unless it becomes absolutely necessary to draw on the reserve for a short period of time in small amounts. Thus we can avoid any suspension of the law what-

ever, and the call for bonds may still go on.

In my opinion there is no necessity for keeping in the Treasury one hundred millions of money to meet any call that may be made for the redemption of the Treasury notes. We all know, we have the information, that for the last several years there has not been more than \$20,000,000 of those notes returned to the Treasury for redemption; yet we are keeping commonly there \$100,000,000, or thereabouts, for the purpose of meeting this possible contingency. There can be no necessity for it.

I am perfectly willing to give to the Secretary of the Treasury or to the President, if this amendment shall be adopted, the full authority if the exigency arises when it becomes necessary to draw from the reserve in order to maintain the public credit. I am willing to invest

him with that discretion.

I do not believe that there is any very great difference between the House resolution and the resolution as amended by the Senate Committee on Finance. The only difference is a difference of about \$20,-000,000. I think the House resolution is ample, and too much. The fact is that we complained of the former administration about keeping so much money in the public Treasury, drawing it by taxation from the people of the country and putting it in the public Treasury and having it lie there. Tirse and again on this side of the Senate Chamber there were denunciations of the course of the administration of Presber there were denunciations of the course of the administration of ident Arthur and others for keeping such a large amount of money in the public Treasury; and if I understood any position of the Democratic party it was that when we came into power, if we should come cratic party it was that when we came into power, if we should come into power, we would correct what we were calling an evil on the part of the Republican administration of the Government.

I acted honestly in that matter. I believed there was too much kept in the public Treasury. I believe now that \$100,000,000 is more than need be kept in the public Treasury, and I would vote myself to reduce the reserve to \$50,000,000; and I have no doubt, sir, that if you were in the office of Secretary of the Treasury, as you once were, with that reserve you could maintain the public credit; and I have no doubt that Mr. Manning or Mr. Fairchild, with a reserve of that amount, would be able to maintain the public credit and meet any exigency that might come upon the Government.

Therefore if I had the power I would reduce the reserve to \$50,000,000, instead of having it \$100,000,000; but if it is to remain at \$100,000,000, then I propose if it is in order to give to the Scortage of the

000,000, then I propose, if it is in order, to give to the Secretary of the Treasury the power, in case of an exigency arising which may require and in a half-hour when the demand was made if every dollar of the

him to do so, to draw upon that reserve temporarily to meet any exigency which may arise. I do not know whether my amendment is now in order.

The PRESIDENT pro tempore. It is in order. The amendment of the Senator from Delaware will be read.

The CHIEF CLERK. In line 24 of the amendment of the Committee on Finance, after the word "may," it is proposed to strike out all down to and including the word "indebtedness," in line 25, as follows:

By written order direct the Secretary of the Treasury to suspend the further call for the payment of such indebtedness.

And insert in lieu thereof the words:

Use so much of the reserve.

So as to read:

And whenever, in the case of any extraordinary emergency, and when, because thereof, in the opinion of the President, the public interests shall require it, he may use so much of the reserve for such period of time as shall be necessary to maintain the public credit unimpaired.

Mr. MAXEY. The difference between the resolution of the House and the amendment of the Senate Committee on Finance may be embraced in a very small compass. It is simply a question, shall the Secretary of the Treasury be required to pay out all the surplus over and above \$100,000,000, whatever may be the character of the money? That is the whole of it.

It is insisted that the \$100,000,000 is too small a reserve. I can not see that. The act of the 14th of January, 1875, which required the resumption of specie payments, authorized the Secretary of the Treasury to use bonds issued under and by virtue of the act of July 14, 1870, in order to raise money to pay the greenbacks when presented. The acts of January, 1875, and of July, 1870, are in full force. Hence if there were a demand to-day for payment in coin of every dollar of greenbacks outstanding up to the \$346,000,000, the Secretary of the Treasury has absolute power under the laws as they now exist to raise Treasury has absolute power under the laws as they now exist to raise the money by the sale of bonds to pay every dollar of that, even if there were no reserve of \$100,000,000.

But it is said some extraordinary and unforeseen event may demand The law makes provision for a reasonable and probable beyond this. use for money, not for that which is improbable and unforeseen. Would it be said that before the beginning of the late war Congress should have raised \$3,000,000,000 and placed it in the Treasury of the United States in order to meet an unforeseen emergency, which in point of fact did happen? Would that have been reasonable? Not at all, and why? Because the Constitution had invested Congress with the machinery to raise every dollar of money, whatever amount might be needed in order to meet this unforeseen emergency. To-day, when we needed in order to meet this unforeseen emergency. needed in order to meet this unforeseen emergency. To-day, when we are at peace with all the world, with only a speck down here in Mexico, would anybody say that we must use the great taxing power and the great power to borrow money on the credit of the United States to fill up the Treasury to meet some unforeseen emergency? That would not be reasonable; that is not statesmanlike; that is not what we are sent to do; but our business is to take things as we find them and make

reasonable provision for reasonable and probable causes of expenditure.

The object and design of the House of Representatives in this resolution unquestionably was—and we had as well face the music, and I say that to gentlemen on this side who heretofore have had the same views in regard to money that I entertain to-day-that whatever may be the character of money in the Treasury, whether it be gold coin or silver dollars or United States notes, that money shall be paid out upon the interest-bearing debt whenever the United States have the right to pay off and discharge the interest-bearing debt. That is the object and design of the resolution.

But what does the amendment of the Senate Committee on Finance do? They absolutely take it and destroy every valuable power that is placed in the resolution of the House, and give to the Secretary of the Treasury unconditional authority to suspend the entire law at his discretion. It may be said, and it is said, that the resolution is a want of confidence in the Secretary of the Treasury and in the President.

Ir can not so regard it. I do not understand how that can be.

In 1875 Congress passed an act of resumption, proposing to resume on the 1st of January, 1879. Congress then did make full and ample provision by the act of 1875, and the act of the 14th of July, 1870, to meet any reasonable and probable demand there might be upon the gold and silver coin in the Treasury for the redemption of greenbacks. We went along for seven years, and during those seven years from 1879 to 1886 there was an average of less than \$3,000,000 called for the

redemption of greenbacks with coin.

Now let us look at that as a business transaction. The interest on \$100,000,000 lying in the Treasury for seven years drawing no interest whatever, at the lowest rate of interest known to this country, 3 per whatever, at the lowest rate of interest known to this country, 3 per cent. per annum, would be \$3,000,000 a year. And thus for the purpose of paying \$3,000,000 of greenbacks when presented we absolutely lose as completely as if it was thrown in the Atlantic Ocean the \$3,000,000 of interest on the \$100,000,000 of surplus which has been lying in the Treasury; and that, too, when the Secretary of the Treasury was already authorized by the law whenever there was a demand for the

\$346,000,000 had been called for the very same day he had the power to have telegraphed to the assistant treasurer at New York and before he could have counted the money he could have had money by the sale of bonds ready to meet every dollar demanded, although there were not \$1,000,000 of the \$100,000,000 in the Treasury. So I think the

\$100,000,000 is too large a surplus.

Whenever you have a currency convertible into coin on demand, and people have confidence that it will be redeemed on demand, the universal experience of mankind is that they prefer the currency to the coin. Look at England. For sixty-five years, ever since 1821, the Bank of England paper has been better in the hands of the English people than gold, and why? Because they prefer it; it is more convenient; they can get the gold on it whenever they want it; and because they have faith in the bank they have not for sixty-five years asked for its collection. Any man who holds a note of the Bank of France does not want the gold upon that note, and why? Because he can get it if he wants it, and the Bank of France's note is more convenient than the coin.

In our country what did we see in 1879 when we resumed specie pay-

ments? If there ever would be a demand for coin it would have been then, because for more than twenty years coin had absolutely passed out of general circulation throughout the country. It was used only in the custom-house and in a few localities like California and my State in payment of loans. If ever it would be called for it was then; and yet, in spite of that, the 1st of January, 1879, came around, as we all remember, and there was not a ripple upon the financial surface and there has not been from that day to the present; but yet we keep this \$100,000,000 lying idle in the Treasury, drawn by taxation from the people, doing no good whatever, nobody demanding coin for his greenback, and still there is an attempt not only to increase the amount of reserve up to \$120,000,000 but to give the Secretary of the Treasury

if some unforeseen emergency occurs the power of suspension.

The true reason why we should as well face the music—and I say that to gentlemen who claim to be silver men—is that those who favor the payment of the bonds of this country in gold or silver in the other House have sent us a measure which does pay the bonds as they mature in gold or silver coin, whichever it may be, and the Senate Finance Committee opposing that policy have determined not to pay out the silver coin; and that is the whole of it. Disguise it as you may, conceal it as you may, that is the true reason; and yet I give the gentlemen of that financial school credit for wonderful skill, for they have captured, according to the best accounts from people on the inside here, a good many men who claim to be silver men and the very relieve of their amounts. men who claim to be silver men, and the very policy of that amendment of the Senate committee is to absolutely prevent silver coin being paid out in the redemption of bonds, carrying out the theory of some wild financier that the United States was bound to pay the bonds in gold and that these men bought them with that expectation, though the bonds of the Government say and the act of July 14, 1870, says that the bonds shall be payable in coin of the standard weight and fineness as fixed on that day, which was a gold dollar of 25.8 grains or a silver dollar of 412½ grains. To-day we have the legal right to pay in that way; and the House of Representatives take it so, and the Senate Finance Committee say it shall not be. That is the whole case.

So believing I propose to vote for the resolution just as it came from the other House, because I want every dollar beyond the \$100,000,000 paid out, and if it was \$50,000,000 instead of \$100,000,000 I should say that was ample for all purposes of safety and the credit and honor of

the Government.

I do not know whether I am in order now, but I desire either now or at some future time to move to strike out of the amendment reported by the Senator from Iowa all after the word "dol-

The PRESIDENT pro tempore. That amendment is not now in or-

Mr. PLUMB. That can be accomplished by dividing the question. The PRESIDENT protempore. The amendment would be in order, but the vote on it would have to be postponed until the clause was perfected.

Mr. CULLOM.

Mr. CULLOM. I desire a vote on it when it is in order.
Mr. McPHERSON. Is not the amendment offered by the Senator

from Delaware [Mr. SAULSBURY] now pending?

The PRESIDENT pro tempore. That is the pending amendment.

Mr. McPHERSON. I wish to call the attention of the Senator from Delaware to the very ambiguous character of the resolution if his amend-

ment shall be agreed to.

Each part of the resolution as it came from the House of Representatives, as will be seen, is consistent with each other part, and so also is the amendment offered by the Senate Committee on Finance. The first part of the resolution provides that with \$100,000,000 in the Treasury the Treasury Department shall call bonds. The Senate amendment proceeds in the same manner, using the same language. Now the Senator from Delaware proposes to strike out, in lines 24 and 25, the exemption which is given in the amendment of the committee by the words, "and whenever, in the case of any extraordinary emergency, and when because thereof in the opinion of the President the public interests shall require it, he may by written order direct the Secretary of the Treasury to suspend the further call for the payment of such indebted-

ness," which refers to exactly the very thing which he may suspend, and which the resolution declares he shall do in the first instance. Therefore the Senator would leave the resolution much more ambiguous than it is now, although I suppose he practically means to arrive

at the same thing.

If he wants his amendment, would it not be better to put it in after the word "indebtedness?" The President may by written order "suspend further call for the payment of such indebtedness and to use so much of the reserve for such period of time as shall be necessary," If the Senator from Delaware desires to put in the amendment at all, although it is entirely unnecessary, it would come in much better after the word "indebtedness," leaving in terms in the resolution the thing which the President may do; that is, he may suspend the call of In the first instance he is ordered to call bonds. The excepception is made in case of an extraordinary emergency he may not call bonds, he may refuse to call, and, therefore, it is exceedingly important that the phraseology adopted by the Senate committee should remain in the resolution, because with the amendment of the Senator from Delaware it would be meaningless, although it might be implied by the retention of those words by inserting them after the word "indebtedness.

Mr. CHACE. I do not propose at this stage of the proceedings to inflict on the Senate a speech on this resolution.

Mr. HALE. Good.

Mr. CHACE. The Senator from Maine says "good;" but I trust that even the Senator from Maine will suppress his impatience for a few moments only, while I call attention to some matters which are not of course new, which are known and ought to be known to every Senator, but which it seems to me can not be in the minds of sundry Sena-

tors whom I have heard speak in regard to this subject.

It has been stated and reiterated on the floor of the Senate during this discussion, and particularly by the distinguished Senator from Kentucky [Mr. Beck], that the Government of the United States in regard to the management of its fiscal affairs was exempt from the nat-ural laws which control all financial operations. The Senator from Delaware [Mr. SAULSBURY], the Senator from Texas [Mr. MAXEY], and sundry other Senators have expressed that opinion. It is the last resort to which they are driven in this argument that the Government of the United States can raise money without the use of its credit. In my opinion no greater or more fatal financial error could be made than

The opinion has been expressed that it is not necessary for the United States Government to retain an ordinary reserve for the maintenance of its credit and the payment of its cash obligations, for that is what the \$346,000,000 of United States notes are, a cash obligation liable to be

called for at any moment.

Senators say that the resources of the country are such and our credit is so great that there can be no possibility of a demand on this Government which can not be met. Now let us look at the past financial history of the country. I should be disposed to pass over that trying period which followed the Revolutionary war, when we all know the country was under circumstances of peculiar strait; but nevertheless in order to emphasize the importance of maintaining the credit of the Government, of preserving the means of paying the paper currency of the Government upon presentation, I shall ask that the Secretary may read the words of Thomas Jefferson in regard to paper money, which I send to

The Chief Clerk read as follows:

The Chief Clerk read as follows:

On the commencement of the late Revolution Congress had no money. The external commerce of the States being suppressed, the farmer could not sell his produce, and, of course, could not pay a tax. Congress had no resource then but in paper money. Not being able to lay a tax for its redemption, they could only promise that taxes should be laid for that purpose, so as to redeem the bills by a certain day. They did not foresee the long continuance of the war, the almost total suppression of their exports, and other events which rendered the performance of their engagements impossible. The paper money continued for a twelvemonth equal to gold and silver; but the quantities which they were obliged to emit, for the purpose of the war, exceeded what had been the usual quantity of the circulating medium.

It began, therefore, to become cheaper, or, as we expressed it, it depreciated, as gold and silver would have done had they been thrown into circulation in equal quantities. But not having, like them, an intrinsic value, its depreciation was more rapid and greater than could ever have happened with them. In two years it had fallen to two dollars of paper money for one of silver; in three years to four for one; in nine months more it fell to ten for one; and in the six months following, that is to say, by September, 1779, it had fallen to twenty for one.

months following, that is to say, by September, 1779, it had fallen to twenty for one.

Congress, alarmed at the consequences which were to be apprehended should they lose this resource altogether, thought it necessary to make a vigorous effort to stop its further depreciation. They therefore determined, in the first place, that their emissions should not exceed \$200,000,000, to which sum they were then nearly arrived, and though they knew that \$20 of what they were then study would buy no more for their army than one silver dollar would buy, yet they thought it would be worth while to submit to the sacrifice of nineteen out of twenty dollars if they could thereby stop further depreciation. They-therefore published an address to their constituents, in which they renewed their original declarations that this paper money should be redeemed at dollar for dollar. They proved the ability of the States to do this, and that their liberty would be cheaply bought at this price. The declaration was ineffectual. No man received the money at a better rate. On the contrary, in six months more, that is, by March, 1780, it had fallen to 40 for 1. Congress then tried an experiment of a different kind.

Considering their former offers to redeem this money at par as relinquished, by the general refusal to take it but in progressive depreciation, they required the whole to be brought in, declared it should be redeemed at its present value

200

of 40 for 1, and that they would give to the holders new bills, reduced in their denomination to the sum of gold or silver which was actually to be paid for them. This would reduce the nominal sum of the mass in circulation to the present worth of that mass, which was five millions, a sum not too great for the circulation of the States; and which they therefore hoped would not depreciate further, as they continued firm in their purpose of emitting no more. This effort was as unavailing as the former. Very little of the money was brought in. It continued to circulate and to depreciate till the end of 1780, when it had fallen to 75 for 1; and the money circulated from the French army being, by that time, sensible in all the States north of the Potomac, the paper ceased its circulation altogether in those States. In Virginia and North Carolina it continued a year longer, within which time it fell to 1,000 for 1, and then expired, as it had done in the other States, without a single groan. Not a murmur was heard on this occasion among the people. On the contrary, universal congratulations took place on their seeing this gigantic mass, whose dissolution had threatened convulsions which should shake their infant confederacy to its center, quietly interred in its grave.—Jefferson's Works, volume 9, page 248.

Mr. CHACE Lam aware that the answer will be that the Govern-

Mr. CHACE. I am aware that the answer will be that the Government had just emerged from a long, hard-fought war, with small resources, with the business of the country crippled in every direction; and the same answer will be made in regard to the straits the country was in in 1816; but in 1821, when we had enjoyed nearly seven years of peace, we find still a similar condition of things. The Secretary of the Treasury in his report in 1821 said:

the Treasury in his report in 1821 said:

It is not a matter of very great consolation to know that, at the end of thirty years of its operation, this Government finds its debt increased \$20,000,000,000, and its revenue inadequate to its expenditure; the national domain impaired, and \$20,000,000 of its proceeds expended; \$35,000,000 drawn from the people by internal taxation, \$341,000,000 by impost, yet the public Treasury dependent on loans; in profound peace, and without national calamity, the country embarrassed with debts, and real estate under rapid depreciation; the markets of agriculture, the pursuits of manufactures diminished and declining; commerce struggling, not to retain the earrying of the produce of other nations, but our own. There is no national interest which is in a healthful, thriving condition; the nation at large is not so; the operations of the Government and individuals alike labor under difficulties which are felt by all. * * * The sea, the forest, the earth yield their abundance; the labor of man is rewarded; pestilence, famine, or war commit no ravages; no calamity has visited the people; peace smiles on us; plenty blesses the land—whence, then, this burst of universal distress?

Then in 1825 there was a condition financially very similar to the present one. It may not be generally known that in 1825 the United States borrowed \$13,000,000 at the rate of 3 per cent. per annum. will read the loans of the Government at that time and the rate of inwill read the loans of the Government at that time and the rate of interest they bore. There were \$7,500,000 at 6 per cent., a little over \$19,000,000 at 6 per cent., \$13,000,000 at 6 per cent., \$18,000,000 at 5 per cent., \$5,000,000 at 4½ per cent., \$654,000 at 4½ per cent., \$1,654,000 at 4½ per cent., and \$13,296,000 at 3 per cent.; and yet in 1842 the Government was put to the greatest straits to maintain its credit.

Mr. COCKRELL. What was that which was issued at 3 per cent.?

Mr. CHACE. Thirteen million two hundred and ninety-six thousand two hundred and thirty one dollars were stock as it was called at that

two hundred and thirty-one dollars upon stock as it was called at that time, payable at the pleasure of the Government, just exactly as our 3 percents are payable now.

Mr. COCKRELL. Just as our greenbacks are practically.

Mr. CHACE. No, just as our 3 per cent. bonds are payable now, at the pleasure of Government. The credit of the Government in 1825 was almost as good as it is to-day, but by the end of 1842 we find the Secretary of the Treasury using the following language:

Secretary of the Treasury using the following language:

The act of July 21, 1841, authorizing a loan of not exceeding \$12,000,000, provided, that no stock be sold below par, and such was the unsettled state of the money market at that period that the Secretary found it possible to realize but a small portion of the amount needed to meet the existing emergency while this restriction remained in force. It was attempted to amend this by the act of April 15, 1842, allowing the Secretary of the Treasury, if the stock could not be sold at par, to dispose of it at lower prices, and also extending the time for redemption to not more than twenty years from January 1, 1843, but it was still found impossible to obtain par for the stock. To prevent its sacrifice a bill was introduced in the House to allow the issue of Treasury notes when the remainder of the stock could not be sold below par. It was stated in debate by the chairman of the Committee of Ways and Means, who introduced the bill, that the immediate liabilities of the Government were \$3,875,000, and to meet these demands not one dollar was available, and that the stock must either "be sacrificed to the Shylocks of the country" or some other means must be given the Secretary of the Treasury to meet these liabilities. The bill does not appear to have met with much opposition. It was approved August 31, 1842 (5 Statutes, 581).

And they afterward sold the bonds of the Government at a discount.

Mr. EDMUNDS. At what rate of interest?
Mr. CHACE. Six per cent. Then in 1857, as the Senator from Ohio [Mr. Sherman] yesterday said, Congress adjourned with a proposition before it to distribute \$10,000,000, and before it reassembled the Government had to borrow money to pay the salaries of the members of Congres

We all remember that in 1836 there was an act passed to distribute among the States the surplus revenue that was on hand. That surplus was as oppressive to the minds of the people as this petty surplus seems to be now. An act was passed for the distribution of that surplus the second of the surplus seems to be now. plus, and it was commenced. A portion of it was distributed, and I will read what the Secretary of the Treasury said in regard to that

Ever since 1830 efforts had been periodically made to distribute the land revenue or surplus revenue, or to induce the Government to assume the stocks of indebted States and to distribute an equal portion of credit to non-indebted States. In 1837 a distribution of the surplus revenues of the United States among the several States, provided for by an act passed in 1836, actually took place. The fund originally proposed to be distributed among the States was \$36,000,000, and \$28,101,644.91 was in fact distributed, in three quarterly installments, the

first amount transferred being under date of February, 1837, and the second amount in April, and the third in July of the same year. The fourth and last installment; however, was not paid. A series of disasters, culminating in the panie of 1837, so disordered the finances of the General Government before the distribution had been completed that it became necessary to have recourse to a new act of Congress, which was passed on the 2d of October, to direct the postponement of the transfer of the remaining fourth until the 1st of January, 1839. A subsequent act was passed postponing the payment indefinitely. This law further provided that the amount deposited should remain with the States until otherwise directed by Congress. Here the matter has rested for forty years.

Here the matter has rested ever since. Following that we find the condition in 1842 to which I have already referred. In 1859 the Government had been buying its loans at a premium, yet in 1860, under the administration of President Buchanan, it was found impossible to raise the paltry sum of \$10,000,000 and an agent of the Government was sent abroad and he endeavored in vain in the European moneymarkets to raise the sum of \$10,000,000, and it was finally borrowed in this country of certain banks at a discount which brought the rate of interest to 1 per cent. per month.

I maintain that in view of this past financial history of this country we can not fail to be convinced that the Government of the United States must obey that great natural law of finance which is above all statute law, which has been proved by the experience of all generations that it is unsafe for an individual, for an institution, or for a Government to assume cash obligations without a reserve in hand to meet

The PRESIDENT pro tempore. The question is on the amendment proposed by the Senator from Delaware [Mr. SAULSBURY] to the amendment of the Committee on Finance.

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question recurs on the amendment of the Committee on Finance as amended.

Mr. PLUMB. I call for a division of the amendment. I think it may properly be divided into three parts, and I ask that the vote be taken separately on each. I ask for a division as to the vote on the first proviso separately, and to divide the second proviso after the word dollars," in line 21.

There are three substantive propositions contained in the amendment, and I think the vote may properly be taken on each. I think we ought to commence with the last one, because if the first is stricken out there nothing left for the last one to depend on. The natural order, I think, would be to commence with the last part of the amendment.

The PRESIDENT pro tempore. The Senator from Kansas demands division of the amendment proposed by the Committee on Finance. Mr. CULLOM. The Senator's proposition is to vote on all after the word "dollars," in line 21, to the end of the amendment separately. Mr. PLUMB. And I shall ask a further division.

The PRESIDENT pro tempore. The Chair will put the question on

the last clause of the amendment.

Mr. EDMUNDS. No; if it is a question of division you must begin at the first.

The PRESIDENT pro tempore. The Senator from Kansas demands a division at the last clause.

Mr. EDMUNDS. But then the first question is on agreeing to the first clause. If a division is demanded you must take the clauses in their order.

Mr. PLUMB. If you strike out the first clause, the last would nat-

urally disappear.
Mr. EDMUNDS. Very well; that may be. The Senator can move to amend the amendment by striking out the words; but if we take a division we must take it in the regular order.

Mr. PLUMB. Well, I move then to amend the amendment by striking out all after the word "dollars," in line 21.

Mr. BECK. I desire to know what amendment has been made to

the amendment reported by the Committee on Finance. I understand there was one.

The PRESIDENT pro tempore. The Chair will have the amendment read as it now stands,

Mr. BECK. I should like to know what amendment was put on by the Committee of the Whole.

The CHIEF CLERK. Beginning in line 21, after the word "dollars," the amendment reads:

And whenever in the case of any extraordinary emergency, and when, because thereof, in the opinion of the President, the public interests shall require it, he may, by written order, direct the Secretary of the Treasury to suspend the further call for the payment of such indebtedness for such period of time as shall be necessary to maintain the public credit unimpaired: Provided, That such suspension and the reasons therefor shall be reported to Congress within ten days after its next meeting, or immediately, if Congress shall be in session.

Mr. BECK. I desire to ask for a vote by yeas and nays on the amendment substituting the President for the Secretary of the Treasury.

Mr. EDMUNDS. We are in committee. When we get out that can be done. The motion now is to strike out the whole paragraph.

The PRESIDENT pro tempore. The Senator from Kansas [Mr. Plumb] moves to strike out the last paragraph of the amendment, commencing on line 21. It has just been read.

Mr. EDMUNDS. On that question I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. GIBSON. I rise to a parliamentary inquiry. We do not un-

The PRESIDENT pro tempore. The amendment will be again read. The CHIEF CLERK. It is proposed to strike out after the word "dollars," in line 21, the following:

And whenever in the case of any extraordinary emergency, and when, because thereof, in the opinion of the President, the public interests shall require it, he may, by written order, direct the Secretary of the Treasury to suspend the further call for the payment of such indebtedness for such period of time as shall be necessary to maintain the public credit unimpaired: Provided, That such suspension and the reasons therefor shall be reported to Congress within ten days after its next meeting, or immediately, if Congress shall be in session.

The PRESIDENT pro tempore. The question is on striking out these words.

words.

The Secretary proceeded to call the roll.

Mr. BECK (when Mr. Morgan's name was called). The Senator from Alabama [Mr. Morgan] telegraphed me that he desired to be paired on this question. He would vote for the House resolution, and is paired with the Senator from Mississippi [Mr. George]. The Senator from Alabama would vote "yea" if he were here, and the Senator from Mississippi would vote "nay" on this amendment.

Mr. RANSOM (when his name was called). I am paired with the Senator from Illinois [Mr. Logan]. I do not know how he would vote. If he was here, I should vote "nay."

Mr. SAULSBURY (when his name was called). I am paired with the Senator from Vermont [Mr. Morrill]. If he were here, I should

the Senator from Vermont [Mr. MORRILL]. If he were here, I should

vote "yea."

Mr. SAWYER (when his name was called). I am paired with the Senator from Georgia [Mr. COLQUITT]. If he were herê, I should vote "yea."

The roll-call was concluded.

Mr. BLAIR. I have been paired with the Senator from Colorado

Mr. BLAIR. I have been paired with the Senator from Colorado [Mr. Bowen] upon this measure and all questions connected with it, but his pair has been transferred to my colleague [Mr. Pike], who is absent. If the Senator from Colorado were present, he would vote "yea;" and if my colleague were present, he would vote "nay." The result was announced—yeas 29, nays 34; as follows:

P	77 47	-	Ye
Beck,	Eustis,	Maxey,	Van Wyck,
Berry,	Harris.	Mitchell of Oreg.,	Vest.
Blackburn.	Hearst.	Palmer,	Voorhees,

Chace,	Time,	Layne,	

Dawes, Hampton, Platt. ABSENT-13.

Morrill, Pike, Ransom, Saulsbury, Jones of Florida, Colquitt, Fair, Logan, Mitchell of Pa., Morgan, George,

So the amendment to the amendment was rejected.

The PRESIDENT pro tempore. Does the Senator from Kansas insist upon his demand for a division of the question?

Mr. PLUMB. · No, I do not care for a division now.

The PRESIDENT pro tempore. The question recurs on the amendment of the Committee on Finance as amended.

Mr. EUSTIS. I offer an amendment after the word "unimpaired," in line 26, to insert:

Including the payment of bonds and interest thereon, the same being under existing law payable in gold or silver coin, at the option of the Government.

The PRESIDENT pro tempore. The amendment will be reported. The CHIEF CLERK. At the end of line 26, after the word "unimpaired," insert:

Including the payment of bonds and interest thereon, the same being under existing law payable in gold or silver coin, at the option of the Government.

The PRESIDENT pro tempore. The question is on the amendment of the Senator from Louisiana [Mr. Eustis] to the amendment of the Committee on Finance

Mr. EUSTIS. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. EDMUNDS. I should like to hear the Senator from Louisiana explain to us precisely what kind of a horse this Greek is, if he will.

The Secretary proceeded to call the roll.

Mr. BROWN (when Mr. Colquitt's name was called). On this question my colleague [Mr. Colquitt], as I understand, is paired with the Senator from Rhode Island [Mr. CHACE]

Mr. RANSOM (when his name was called). I am paired with the Senator from Illinois [Mr. Logan]. If he were present, I should vote "yea."

Mr. SAULSBURY (when his name was called). I am paired with the Senator from Vermont [Mr. MORRILL]. If he were here, I should

vote "yea."

Mr. SAWYER (when his name was called). I am paired with the Senator from Georgia [Mr. Colquitt]. If he were present, I should

The roll-call having been concluded, the result was announced-yeas 26, nays 37; as follows:

3	SIL DESILI DELL	YEA	S-26.	
Control Control of the Control	Beck, Berry, Blackburn, Brown, Camden, Cockrell, Coke,	Eustis, Gibson, Harris, Hearst, Jones of Arkansas, Jones of Nevada, Kenna,	Mahone, Maxey, Mitchell of Oreg., Plumb, Pugh, Riddleberger, Teller,	Vance, Van Wyck, Vest, Voorhees, Whitthorne.
ó		NAY	7S-37.	
The second of the second of the second	Aldrich, Allison, Blair, Butler, Call, Cameron, Chace, Conger, Cuflom, Dawes,	Dolph, Edmunds, Evarts, Frye, Gorman, Gray, Hale, Hampton, Harrison, Hawley,	Hoar, Ingalls, McMillan, McPherson, Manderson, Miller, Palmer, Payne, Platt, Sabin,	Sewell, Sherman, Spooner, Stanford, Walthall, Wilson of Iown, Wilson of Md.
	I I	ABSE	NT-13.	
	Bowen, Colquitt, Fair, George,	Jones of Florida, Logan, Mitchell of Pa., Morgan,	Morrill, Pike, Ransom, Saulsbury,	Sawyer.

So the amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question recurs on the amendment of the Committee on Finance as amended.

Mr. BERRY. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. CONGER. Let the amendment be read.

The PRESIDENT pro tempore. The amendment will be read.

The CHIEF CLERK. The amendment is to add to the resolution as

it came from the House of Representatives, the following:

It came from the House of Representatives, the following:

Provided, That no call shall be made under the provisions of this resolution until a sum equal to the call is in the Treasury over and above the reserve herein mentioned: And provided further, That the Secretary of the Treasury, in his discretion, may have in the Treasury, over and above the foregoing sums, a working balance not exceeding \$20,00,000; and whenever, in the case of any extraordinary emergency, and when, because thereof, in the opinion of the President, the public interests shall require it, he may, by written order, direct the Secretary of the Treasury to suspend the further call for the payment of such indebtedness for such period of time as shall be necessary to maintain the public credit unimpaired; Provided, That such suspension and the reasons therefor shall be reported to Congress within ten days after its next meeting, or immediately if Congress shall be in session.

Mr. EDMUNDS. I would suggest, as a mere matter of phraseology, there are so many provisoes there, that that last word "Provided" should be changed to the word "and," so as just to continue the clause.

The PRESIDENT pro tempore. If there be no objection the amendment will be so modified. The Chair hears no objection. The Secretary

will call the roll.

The Secretary proceeded to call the roll.

Mr. RANSOM (when his name was called). I am paired with the Senator from Illinois [Mr. Logan]. If he were present, I should vote

Sawyer.

Mr. SAULSBURY (when his name was called). I am paired with the Senator from Vermont [Mr. MORRILL]. If he were present, I should vote "nay."

The roll-call was concluded.

The roll-call was concluded.

Mr. BECK. The Senator from Alabama [Mr. Morgan] is paired with the Senator from Mississippi [Mr. George]. The Senator from Alabama, if present, would vote "nay" and the Senator from Mississippi would vote "yea."

Mr. PLUMB. The Senator from Colorado [Mr. Bowen] is paired on this question with the Senator from New Hampshire [Mr. Pike]. If the Senator from Colorado were present, he would vote "nay."

Mr. SAWYER. I am paired with the Senator from Georgia [Mr. Colquitt], but I understand he would vote "yea," if present, and so I vote "yea."

The result was announced—yeas 36, nays 27; as follows:

The result was announced—yeas 36, nays 27; as follows:

	YEA	AS-36.	
Aldrich, Allison, Blair, Brown, Butler, Call, Camden, Cameron, Chace,	Dawes, Dolph, Edmunds, Evarts, Frye, Gibson, Gorman, Gray, Hale,	Hampton, Harrison, Hawley, Hoar, Kenna, McMillan, McPherson, Miller, Payne,	Platt, Pugh, Sabin, Sawyer, Sewell, Sherman, Stanford, Walthall, Wilson of Md,
	NAY	S-27.	
Beek, Berry, Blackburn, Cockrell, Coke, Conger, Cullom.	Eustis, Harris, Hearst, Ingalls, Jones of Arkansas, Jones of Nevada, Mahone.	Manderson, Maxey, Mitchell of Oreg., Palmer, Plumb, Riddleberger, Teller.	Vance, Van Wyek, Vest, Voorhees, Whithorne, Wilson of Iowa,

ABSENT-13.

Colquitt, Fair,

Jones of Florida, Morrill, Pike, Ransom, Saulsbury, Logan, Mitchell of Pa., Morgan,

Spooner.

So the amendment as amended was agreed to. Mr. SEWELL. I desire to offer an amendment.

As I remarked a few moments ago, a bill was introduced in the Senate in December last, and referred to the Committee on Finance, for the redemption of the trade-dollar. This is the first opportunity I have had to bring the matter to the attention of the Senate. I will not consume any time, but I offer the amendment for the consideration of the Senate.

I will merely state that out of the \$38,000,000 or \$39,000,000 of this class of coin there exists in this country to-day but about \$5,000,000. For some reason pertaining to the laws of trade and the laws of demand and supply the larger part of these obligations are in the hands of my immediate constituents and in the hands of persons in the adjoining State of Pennsylvania. Why they were attracted there I can not explain. I personally know that a great many of the small storekeepers and the savings-banks of my State, particularly in that portion of it adjoining the Delaware River, have the larger number of these coins at the present time, and they are holding them on the faith of the

The present Director of the Mint, alluding in his report to the report of his predecessor, Dr. Linderman, states that in 1878 there were only five and a quarter millions of this coin in the country. He says:

My predecessor, in his annual report for the fiscal year 1883, page 17, recommended the repeal of the provision of law authorizing the coinage of the tradedollar, and also that the outstanding coin of this description be received at the mints in exchange for other silver coin. He estimated that there were at that time from five to seven millions of these coins in the country.

From the above facts I am of the opinion that the estimate of seven millions as the amount in the country is in excess of the actual amount rather than below.

below.

Should the coinage of the trade-dollar, at present suspended under the discretional power reposed in the Secretary of the Treasury, be discontinued by law, and should the mints and assistant treasuries of the United States be authorized to redeem in subsidiary coin such trade-dollars as may be purchased for redemption in sums of \$10 or multiples thereof, the profit to the Government in the form of seigniorage would amount to some 8 per cent., or more than enough to defray the expenses of the recoinage.

I will state that ordinary business men, particularly those located in our country towns, have an idea that if anybody ought to be honest it is the Government of the United States. They do not and they can not understand why it is that they are obliged to hold these obligations of the Government which they have received in the ordinary course of trade or sell them for bullion. I therefore offer the following amendment to come in as additional sections to this joint resolution:

SEC. —. That for a period of six months after the passage hereof, United States trade-dollars, if not defaced, mutilated, or stamped, shall be received at their face value in payment of all dues to the United States, and shall not be again paid out or in any other manner issued.

SEC. —. That the holder of any United States trade-dollars, during the period aforesaid, on presentation of the same at the office of the Treasurer or any assistant treasurer of the United States, may receive in exchange therefor a like amount and value, dollar for dollar, in standard silver dollars or in subsidiary coins (at the option of the holder) of the United States.

SEC. —. That the trade-dollars received by, or paid to, or deposited with the Treasurer or any assistant treasurer or national depositary of the United States shall not be paid out or in any other manner issued, but, at the expense of the United States, shall be transmitted to the coinage mints and recoined into standard silver dollars.

SEC. —. That all laws and parts of laws authorizing the coinage and issuance of United States trade-dollars are hereby repealed.

Mr. ALLISON. That is a very difficult and important subject, as the Senate well knows. It has no relation whatever to this resolution, and therefore, unless some Senator wishes to debate it further, I move

to lay the amendment on the table.

Mr. CAMERON. I hope it will not be laid on the table.
Mr. SEWELL. I hope the Senator will withdraw the motion and let us have a direct vote on it.

Mr. ALLISON. If we can have a direct vote without debate, I have no objection.

Mr. CAMERON. Let us have a fair and square vote.
Mr. ALLISON. I am willing, if we can have it without debate.
Mr. VOORHEES. Let us have the amendment reported. I think

it is the only good thing about the whole matter.

The PRESIDENT pro tempore. The amendment will be again read. The Senate will please come to order so that they may understand the reading

The Chief Clerk read the amendment offered by Mr. SEWELL.

The PRESIDENT pro tempore. The year and nays are asked for on this amendment.

The yeas and nays were ordered.

Mr. MAXEY. I ask the Senator from New Jersey how many trade-dollars there are?

Mr. SEWELL. I made a statement on that point. There are about five million trade-dollars in the country

ing to the amendment offered by the Senator from New Jersey [Mr.

SEWELL].

Mr. EDMUNDS. I do not know whether I am for that measure or not. It has never been exploited or explained by a committee, and it has no relation to or business on this resolution. I neither wish to vote for it nor against it, to prejudice it nor promote it. You might as well put all the bills on the Calendar here. Therefore I move to lay the amendment on the table.

Mr. SEWELL. I ask the Senator from Vermont to withdraw that motion. I asked the same of the Senator from Iowa, and he did me the courtesy to withdraw a similar motion. I want a square vote on

the amendment.

Mr. EDMUNDS. That is exactly what I do not want.

Mr. CAMERON. Let us have a square vote on it.
The PRESIDENT pro tempore. The question is not debatable. Senator from Vermont moves to lay the amendment on the table.

Mr. HOAR. I call for the yeas and nays.

The yeas and nays were ordered, and taken.

Mr. SAULSBURY. I am paired with the Senator from Vermont

[Mr. MORRILL]. If he were here, I should vote "nay."

The result was announced—yeas 31, nays 31; as follows:

	YI	EAS-31.	
Aldrich, Allison, Blair, Butler, Call, Camden, Conger, Cullom,	Dawes, Edmunds, Frye, Gibson, Gorman, Gray, Hale, Hampton,	Harrison, Harrison, Hearst, Hoar, Jones of Arkansas, Kenna, McPherson, Miller,	Palmer, Payne, Pugh, Sherman, Spooner, Walthall, Whitthorne,
	N.	AYS-31.	
Beck, Berry, Blackburn, Brown, Cameron, Chace, Cockrell,	Eustis, Evarts, Hawley, Ingalls, Jones of Nevada, McMillan, Mahone,	Maxey, Mitchell of Oreg., Platt, Plumb, Riddleberger, Sabin, Sewell;	Teller, Vance, Van Wyck, Vest, Voorhees, Wilson of Iowa, Wilson of Md.

Chace, Cockrell, Coke, Sewell; Stanford, Mahone, Manderson, ABSENT-14. Bowen, Colquitt, Dolph, Saulsbury, George, Jones of Florida, Morgan Morrill, Sawyer. Pike, Ransom, Logan, Mitchell of Pa., Fair,

So the motion to lay the amendment on the table was not agreed to. The PRESIDENT pro tempore. The question recurs on the adoption of the amendment.

Mr. SEWELL. Now I ask for a vote on it.
Mr. EDMUNDS. The yeas and nays have been ordered.
The PRESIDENT pro tempore. The Secretary will call the roll on agreeing to the amendment of the Senator from New Jersey.

The Secretary proceeded to call the roll.

Mr. SAULSBURY (when his name was called). If I were not paired with the Senator from Vermont [Mr. MORRILL] I should vote "yea." The roll-call was concluded.

Mr. BROWN. Was the pair of my colleague [Mr. Colquitt] announced with any one? As I understood when he left, he was paired with the Senator from Rhode Island [Mr. Chace]. I think by some arrangement the pair has been transferred to the Senator from Wiscon-

sin [Mr. Sawyer]. Did the Senator from Wisconsin vote?
The PRESIDENT pro tempore. The Senator from Wisconsin [Mr.

Conger, Cullom,

SAWYER] has not voted.

Mr. BROWN. Then I will announce the pair of my colleague [Mr. COLQUITT] with the Senator from Wisconsin [Mr. SAWYER].

The result was announced—yeas 34, navs 29; as follows:

THO TOOLS	e mas manorement	cuo or, majo no, no .	01101101
	Y	EAS-34.	
Beck, Berry, Blackburn, Brown, Cameron, Chace, Cockrell, Coke, Eustis,	Evarts, Gray, Hawley, Hearst, Ingalls, Jones of Nevad: McPherson, Mahone, Manderson,	Maxey, Mitchell of Oreg., Palmer, Platt, Plumb, Riddleberger, Sabin, Sewell, Stanford,	Teller, Vance, Van Wyck, Vest, Voorhees, Wilson of Jowa. Wilson of Md,
	N	AYS-29.	
Aldrich, Allison, Blair, Butler, Call, Camden, Conger,	Dawes, Dolph, Edmunds, Frye, Gibson, Gorman, Hale,	Harris, Harrison, Hoar, Jones of Arkansas, Kenna, McMillan, Miller,	Pugh, Sherman, Spooner, Walthall, Whitthorne,

ABSENT-13. Morrill, Pike, Ransom, Saulsbury, Jones of Florida, Sawyer. Colquitt, Fair, George, Logan, Mitchell of Pa., Morgan,

So the amendment was agreed to.

Hampton,

The joint resolution was reported to the Senate as amended.

Mr. EDMUNDS. What is the pending question?

The PRESIDENT pro tempore. The question is on agreeamendments made as in Committee of the Whole. The question is on concurring in the

Payne.

Mr. ALLISON. In line 22, after the word "emergency," I move to insert the words "not now existing;" so as to read:

And whenever in the case of any extraordinary emergency, not now exist-

Those are the words practically which were suggested by the Sena-

the word placetary when the suggestion of the mover of the amendment. What extraordinary emergency now exists?

Mr. ALLISON. None whatever in my judgment, I will answer the Senator from Colorado.

Mr. TELLER. Then what does it mean?
The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. EDMUNDS. I wish to reserve the last amendment, the tradedollar amendment, for a separate vote on concurrence.

The PRESIDENT pro tempore. The question is on concurring in the first amendment made as in Committee of the Whole as amended.

The amendment was concurred in.

The PRESIDENT pro tempore. The question is upon concurring in the last amendment made as in Committee of the Whole. It will be

The CHIEF CLERK. The Senate, as in Committee of the Whole, inserted the following:

SEC.—. That for a period of six months after the passage hereof United States trade-dollars, if not defaced, mutilated, or stamped, shall be received at their face value in payment of all dues to the United States, and shall not be again paid out or in any other manner issued.

SEC.—. That the holder of any United States trade-dollars, during the period aforesaid, on presentation of the same at the office of the Treasurer or any assistant treasurer of the United States, may receive in exchange therefor a like amount and value, dollar for dollar, in standard silver dollars or in subsidiary coins (at the option of the holder) of the United States.

SEC.—. That the trade-dollars received by, paid to, or deposited with the Treasurer or any assistant treasurer or national depositary of the United States shall not be paid out or in any other manner issued, but, at the expense of the United States, shall be transmitted to the coinage mints and recoined into standard silver dollars.

SEC.—. That all laws and parts of laws authorizing the coinage and issuance of United States trade-dollars are hereby repealed.

The PRESIDENT pro tempore. The question is on concurring in this amendment. [Putting the question.] The noes appear to have it.

Mr. SEWELL. I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call

the roll.

Mr. RANSOM (when his name was called). I am paired on this question with the Senator from Illinois [Mr. Logan]. If he were here, I should vote "yea."

The roll-call was concluded.

Mr. SAULSBURY. I desire to say that I am paired with the Senator from Vermont [Mr. MORRILL]. If he were here, I should vote "yea."
The result was announced—yeas 33, nays 30; as follows:

	YE	AS-33.	
Beck, Blackburn, Brown, Cameron, Chace, Cockrell, Coke, Eustis, Evarts,	Gray, Hawley, Hearst, Ingalls, Jones of Nevada, McPherson, Mahone, Manderson, Maxey,	Mitchell of Oreg., Palmer, Platt, Plumb, Riddleberger, Sabin, Sewell, Stanford, Teller,	Vance, Van Wyck, Vest, Voorhees, Wilson of Iowa, Wilson of Md.
	NA.	YS-30.	
Aldrich, Allison, Berry, Blair, Butler, Call, Camden, Conger,	Cullom, Dawes, Dolph, Edmunds, Frye, Gibson, Gorman, Hale,	Hampton, Harris, Harrison, Hoar, Jones of Arkansas, Kenna, McMillan, Miller,	Payne, Pugh, Sherman, Spooner, Walthall, Whitthorne.
	ABSI	ENT-13.	
Bowen, Colquitt, Fair, George	Jones of Florida, Logan, Mitchell of Pa., Morgan	Morrill, Pike, Ransom, Saulsbury	Sawyer.

So the amendment was concurred in.

Mr. GORMAN. I move to lay the joint resolution on the table.

The PRESIDENT pro tempore. The Senator from Maryland moves that the joint resolution lie on the table.

Mr. GORMAN. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. VANCE. What is the motion of the Senator from Maryland? The PRESIDENT pro tempore. The motion is to lay the joint resolution on the table, on which the yeas and nays have been ordered. The Secretary will call the roll.

Mr. HALE. Let the motion be stated clearly by the Chair.

The PRESIDENT pro tempore. The Senator from Maryland moves to lay the joint resolution on the table.
Mr. HALE. The whole thing?

The PRESIDENT pro tempore. The whole measure. The Secretary will call the roll on agreeing to the motion.

The Secretary proceeded to call the roll.

Mr. SAWYER (when his name was called). I am paired with the Senator from Georgia [Mr. Colourt], but as I understand he would vote "nay," I will vote. I vote "nay."

The roll-call having been concluded, the result was announced—yeas

5, nays 57; as follows: YEAS-5. Vance. Butler. Gray. Hampton, NAYS-57. Jones of Nevada, Kenna, McMillan, McPherson, Aldrich, Altison, Beck, Dawes, Dolph, Edmunds, Sabin. Sawyer, Sewell, Spooner Berry, Blackburn, Eustis, Spooner, Stanford, Teller, Van Wyck, Vest, Voorhees, Waithall, Eustis, Evarts, Frye, Gibson, Hale, Harris, Mahone, Manderson, Blackburn Blair, Brown, Call, Camden, Cameron, Cace, Cockrell, Coke, Maxey, Miller, Mitchell of Oreg., Harrison, Hawley, Hearst, Hoar, Ingalls, Palmer, Payne, Platt, Plumb, Whitthorne Wilson of Iowa. Conger, Cullom, Ingalls, Pugh, Jones of Arkansas, Riddleberger, ABSENT-14. Morrill, Pike, Ransom, Saulsbury, Sherman, Wilson of Md. Bowen, Colquitt, Fair, George, Jones of Florida,

Logan, Mitchell of Pa., Morgan, So the Senate refused to lay the joint resolution on the table. The PRESIDENT pro tempore. Shall the amendment be en-

Mr. INGALLS. Is the joint resolution open to amendment?
The PRESIDENT pro tempore. It is still open to amendment.
Mr. INGALLS. I move to strike out all after the resolving clause and insert what I send to the Chair.
The PRESIDENT pro tempore. The proposed substitute will be read.
The CHIEF CLERK. It is proposed to strike out all after the resolving clause and insert.

ing clause and insert:

That the Secretary of the Treasury shall, beginning September 6, 1886, until thirty days after the meeting of the second session of the Forty-ninth Congress, apply the surplus in excess of \$100,000,000 in the Treasury, in sums not less than \$10,000,000 per month, to the payment of the interest-bearing indebtedness of the United States, payable at the option of the Government.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Kansas [Mr. Ingalls].

Mr. TELLER. I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call

the roll.

Mr. RANSOM (when his name was called). I am paired with the Senator from Illinois [Mr. LOGAN]. If he were present, I should vote

Mr. SAULSBURY (when his name was called). If I were not paired, I should vote "yea."

The roll-call having been concluded, the result was announced-yeas 25, nays 38; as follows:

	YE	AS-25.	
Beck, Berry, Blackburn, Cockrell, Coke, Eustis, Harris,	Mearst, Ingalls, Jones of Arkansa Jones of Nevada, Mahone, Manderson, Maxey,	Mitchell of Oreg., Plumb, s, Riddleberger, Stanford, Teller, Vance, Van Wyck,	Vest, Voorhees, Whitthorne, Wilson of lowe,
	NA	YS-38.	
Aldrich, Allison, Blair, Brown, Butler, Call, Camden, Cameron, Chaee, Conger,	Cullom, Dawes, Dolph, Edmunds, Frye, Evarts, Gibson, Gorman, Gray, Hale,	Hampton, Harrison, Hawley, Hoar, Kenna, McMillan, McPherson, Miller, Palmer, Payne,	Platt, Pugh, Sabin, Sewell, Sherman, Spooner, Walthall, Wilson of Md.
	ABS	ENT-13.	
Bowen, Colquitt, Fair, George,	Jones of Florida, Logan, Mitchell of Pa., Morgan,	Morrill, Pike, Ransom, Saulsbury,	Sawyer.

So the amendment was rejected.

The PRESIDENT pro tempore. The question is on ordering the amendments to be engrossed and the joint resolution to be read a third time.

Mr. VANCE. I ask for the yeas and nays.

Mr. EDMUNDS. Let us take the yeas and nays on the passage.
Mr. VANCE. Very well.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time.

The PRESIDENT pro tempore. The question is, Shall the joint resolution pass

Mr. HARRIS. We are to have the yeas and nays on the passage.

The yeas and nays were ordered.

Mr. BECK. Mr. President, I only desire to say that while I should like to see the trade-dollars retired and other dollars substituted in their place, being thoroughly convinced that the House will not act upon the amendments to the joint resolution at this session, and having heard the criticisms as to the language of the resolution as passed by the House, which it was assumed legalized and crystallized and fastened \$100,000,000 as an absolute reserve, which I think the House can avoid by a new resolution, and as it is increased now to \$120,000,000, I shall vote "nay" so as to give the House another chance to frame a measure next December which may avoid the criticism now brought against the one they sent to us.

The PRESIDENT pro tempore. The Secretary will call the roll on

the passage of the joint resolution.

The Secretary proceeded to call the roll.

Mr. SAWYER (when his name was called). Mr. SAWYER (when his name was called). I understand that the Senator from Georgia [Mr. Colquitt] would vote "yea" on the passage of the joint resolution, and so I shall vote. I vote "yea."

The roll-call was concluded.

Mr. BLAIR. My colleague [Mr. PIKE] is paired with the Senator from Colorado [Mr. Bowen]. If present, my colleague would vote in the affirmative and the Senator from Colorado would vote in the neg-

Mr. RANSOM. I am paired with the Senator from Illinois [Mr.

LOGAN]. If he were present, I should vote "yea."

Mr. COKE. I desire to state that the Senator from Mississippi [Mr. George] is paired on this question with the Senator from Alabama [Mr. Morgan]. The Senator from Mississippi, I believe, would vote

Mr. BECK. The Senator from Alabama would vote "nay." The result was announced—yeas 42, nays 20; as follows:

	YEA	S-42.	
Allison, Aldrich, Blair, Brown, Call, Camden, Cameron, Chace, Conger, Cullom, Dawes,	Dolph, Edmunds, Evarts, Frye, Gibson, Gorman, Gray, Hale, Hampton, Harrison, Hawley,	Hoar, Jones of Nevada, Kenna, McMillan, McPherson, Mahone, Miller, Palmer, Payne, Platt, Pugh,	Riddleberger, Sabin, Sawyer, Sewell, Sherman, Spooner, Van Wyck, Walthall, Wilson of Md,
	NAY	S-20.	
Beek, Berry, Blackburn, Butler, Cockrell,	Coke, Eustis, Harris, Ingalls, Jones of Arkansas,	Maxey, Mitchell of Oreg., Plumb, Stanford, Teller,	Vance, Vest, Voorhees, Whitthorne, Wilson of Iowa.
	ABSE	NT-14.	
Bowen, Colquitt, Fair, George,	Hearst, Jones of Florida, Logan, Manderson,	Mitchell of Pa., Morgan, Morrill, Pike,	Ransom, Saulsbury.

So the joint resolution was passed. Mr. ALLISON. In view of the lateness of the session, I move that the Senate insist upon its amendments to the joint resolution and ask the House for a conference thereon.

The motion was agreed to; and by unanimous consent the President pro tempore was authorized to appoint the conferees on the part of the

VETOED PENSION BILLS.

Mr. BLAIR. I move that the Senate proceed to consider Order of Business 1630, the bill (S. 2005) granting a pension to Mary J. Nottage,

one of the vetoed pension bills.

The PRESIDENT pro tempore. The PRESIDENT pro tempore. The Senator from New Hampshire moves that the Senate proceed to the consideration of the bill (S. 2005) granting a pension to Mary J. Nottage. If there be no objection the question is, Shall the bill pass, the objections of the President to the contrary notwithstanding

Mr. EDMUNDS. No, the question is on taking the bill up.
The PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from New Hampshire to proceed to the consideration of the bill.

The motion was agreed to.
The PRESIDENT pro tempore. The bill is before the Senate.

Mr. BLAIR. I have arrived at an understanding with the Senator from Pennsylvania [Mr. CAMERON], who is in ill health and anxious to go on with the naval bill to-night, that, this bill being taken up for consideration and an order of the Senate being made to print certain reports in the RECORD which it is necessary to have before the Senate, I will then give way informally for the consideration of the naval bill

I move that the reports of the majority and minority in Order of Business 1630, which is the one now before the Senate, Mary J. Not-tage; Order of Business 1685; Margaret D. Marchand, Order of Busi-

ness 1763, Joseph Romiser; Order of Business 1790, Newcomb Parker; Order of Business 1791, John S. Kirkpatrick; Order of Business 1796, Mrs. Annie C. Owen; Order of Business 1812, Marrilla Parsons; and Order of Business 1813, Thomas S. Hopkins, be printed in the RECORD.

Mr. KENNA. Does that require the action of a majority of the

The PRESIDENT pro tempore. It does, if there is objection to the

Mr. KENNA. I object. I see no reason why those campaign documents should be printed in the Record, for that is all they are.

The PRESIDENT pro tempore. If objection be made the rule requires the question to be submitted to the Senate.

Mr. COCKRELL. Can such a document be inserted in the Record,

even by authority of the Senate, unless it is unanimous?

Mr. CAMERON. I hope there will be no objection to it.

Mr. KENNA. I see no earthly reason why that document should go in the RECORD.

Mr. EDMUNDS. May I appeal to the Senator from West Virginia for a moment? On this bill that is now up every one of us would be entitled to demand that the report of the committee, and probably the views of the minority as well (certainly it would be fair that that should be done), should be read, and we should all sit here and hear them read; and being read, they would go in the RECORD. All that the Senator from New Hampshire asks is, to save the trouble of reading these reports through, that they be put into the RECORD without their being read at length here, as we have all looked at them more or less. So I submit to the Senator from West Virginia it is merely a prestion of taking time to shiere.

question of taking time to object.

Mr. KENNA. I can not help that. If any Senator desires to display to the country a scene such as will be presented here when we stand here and have read by the clerks a document which on its face shows that while it is addressed to the Senate it is a mere appeal to the people of the country on an issue made by that report I would rather it should come in that way.

Mr. EDMUNDS. Very good; read on.

Mr. BLAIR. I do not wish that the reports shall be read to-night. I would prefer a vote of the Senate that the reports shall be printed, according to the motion that I made, because the Senator from Pennsylvania is ill to-night and he understands that he is to go on with the naval bill. I ask a vote of the Senate on printing all the reports in the RECORD.

The PRESIDENT pro tempore. The Chair will hold that under the rule a motion of this kind to print is like any other motion, which would go over one day under objection.

Mr. BLAIR. Is a motion to print the report and the views of the minority in the case before the Senate open to objection?

The PRESIDENT pro tempore. It is in the nature of a resolution, and therefore upon objection being made it must go over one day, or the report can be read.

Mr. BLAIR. I will enter the motion and give way informally to the

Senator from Pennsylvania.

The PRESIDENT pro tempore. The Senator from New Hampshire moves that the reports referred to be printed in the RECORD. Chair understands that objection is made.

Mr. KENNA. I object.

The PRESIDENT pro tempore. The motion goes over under objection until to-morrow.

Mr. BLAIR. I submit the motion in the form of a resolution:

Resolved, That the reports of the majority and views of the minority of the Committee on Pensions on Senate bill 2005, Mary J. Nottage; Senate bill 226, Margaret D. Marchand; House bill 1059, Joseph Romiser; Senate bill 1077, granting pension to Newcomb Parker; Senate bill 1797, granting pension to John S. Kirkpatrick; Senate bill 1850, granting pension to Mrs. Annie C. Owen; Senate bill 342, granting pension to Marrilla Parsons; Senate bill 183, for the relief of Thomas S. Hopkins, be printed in the Record.

INCREASE OF NAVAL ESTABLISHMENT.

Mr. CAMERON. I ask that the Senate proceed to the consideration

of the bill (H. R. 6664) to increase the naval establishment.

The PRESIDENT pro tempore. The bill will be read.

Mr. ALLISON. Is the bill now before the Senate for consideration?

The PRESIDENT pro tempore. The Chair will put the question formally. There seemed to be no objection. The question is on agreeing to the motion to proceed to the consideration of the bill.

The motion was agreed to; and the Senate, as in Committee of the

Whole, proceeded to consider the bill.

The bill was reported from the Committee on Naval Affairs with amendments.

The first amendment was, in section 4, line 6, after the word "parties," to strike out the words "otherwise the Secretary of the Navy is hereby authorized to purchase the same, or any portion thereof, and import it;" so as to read:

That the armor used in constructing said armored vessels and for completing said monitors shall be of the best obtainable quality and of domestic manufacture, provided contracts for furnishing the same in a reasonable time, at a reasonable price, and of the required quality can be made with responsible parties.

The amendment was agreed to.

The next amendment was, in section 6, after the words "United States," in line 6, to strike out the following proviso:

Provided, That the Secretary of the Navy may buy abroad and import such shafting and other material or machinery as he may be unable to procure in the United States.

And in line 9, after the word "Provided," to strike out the word "further."
The amendment was agreed to.

The PRESIDING OFFICER (Mr. FRYE in the chair). Those are all the amendments reported by the Committee on Naval Affairs.

Mr. EDMUNDS. In section 6, line 11, after the word "shafting," I move to strike out the words "and other special materials;" so that the proviso will read:

Provided, That the Secretary of the Navy may purchase abroad only such shafting as it may be impossible to obtain in the United States in time for use in the construction of the vessels herein provided for.

I am informed that the Secretary of the Navy only needs to buy shafting abroad; and that is a very dangerous phrase.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Vermont.

Mr. McPHERSON. I should like to say to the Senator from Vermont

that there are many other things besides shafting. There is a certain kind of grates that they purchase to-day, which are used in the present style of engines, and which are not made in this country. Mr. Cramp of the ship firm of Charles H. Cramp & Co., of Philadelphia, enumerated to me quite a lot of articles in the new form of engines which were of no great consequence, but at the same time adapted to the use of those engines, which could not to-day be procured in this country.

those engines, which could not to-day be procured in this country.

Mr. EDMUNDS. We do not want them to-day. We shall want
them when the ship gets forward in a year or two far enough to put in
these grates, &c., and they are perfectly easily constructed by anybody
in this country who has the ordinary establishments of this kind. As
to the shafting, the longest, considering the length of these ships, is such
that they have not any establishments now which can build them; so I do
not object to shafting; but I do not mean for one to commit myself to
giving the Secretary of the Navy power to buy other special materials,
every one of which can be made in this country, from any foreign nation whatever. There is time enough for all these little things.

Mr. McPHERSON. Very well.

Mr. CAMERON. I will accept the amendment proposed by the
Senator from Vermont.

Senator from Vermont.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Vermont.

The amendment was agreed to.

The bill was reported to the Senate as amended.

Mr. WHITTHORNE. Mr. President, I am aware that the sentiment of this country is almost universally in favor of a new navy. As a member of the Committee on Naval Affairs I regret that I have not been able to concur with the majority of that committee, especially in

regard to sections 2, 3, and 9 of the bill.

I regard it myself as a mistake upon the part of the legislative department of the Government to attempt any restrictions whatever upon the executive department. I regard it as a grave mistake that the legislative department shall attempt to say to the Secretary of the Navy how and in what terms he shall contract. These sections, in my opinion, will continue the abuses and errors and opportunities for fraud which have marked the past history of the administration of the Navy Department. But, sir, standing in that minority, I am not here to object to anything that the Senate, in response to the demand of the country for a new navy, shall deem requisite to order.

I have regarded and do now say to the Senate and the country that

I regard that the very gravest error is committed and will be committed in the expenditure of the sum of money contemplated by the third section in the completion of the monitors. It is better to sink that sum of money in mid-ocean than to complete those vessels. will be fraught with mischief. It will lead the public opinion of the country to rely upon a set of vessels which are not in my judgment

worth one cent.

With these remarks, sir, I make no further opposition to the passage of the bill.

The PRESIDING OFFICER. The question is on concurring in the amendments made as in Committee of the Whole.

The amendments were concurred in.

Mr. CALL. Mr. President, I merely wish to make a single remark

before the bill is passed.

I desire to say that as one member of the Senate I am always willing to vote most liberal appropriations for the construction of a navy, but I think that in all great expenditures of public money the expenditure should be made with reference to the necessities of the different parts of the country and not concentrated in one particular part, and that there should be some provision made for the expenditure of this money by the construction of vessels in different parts of the United States, wherever it may be done with equal advantage to the public service. I think if the Naval Committee would give some regard to the expenditure of money in different parts of the country and not to its concen-

tration in the interests of individuals and particular localities the interests of the Navy would be greatly promoted by it.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. CAMERON. I move that the Senate insist upon its amendments and ask for a conference with the House of Representatives

The PRESIDING OFFICER. The Senator from Pennsylvania moves that the Senate insist on its amendments and ask for a conference with the House of Representatives.

The motion was agreed to.

By unanimous consent the presiding officer was authorized to appoint the conferees on the part of the Senate; and Mr. Cameron, Mr. Hale, and Mr. McPherson were appointed.

Mr. EDMUNDS. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 46 minutes p. m.) the Senate adjourned until to-morrow, Saturday, July 31, 1886, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

FRIDAY, July 30, 1886.

The House met at 11 o'clock a. m. Prayer by Rev. Dr. BULLOCK, of Washington, D. C.

The Clerk proceeded to read the Journal of yesterday's proceedings.
Mr. SPRINGER. I ask unanimous consent to dispense with the
further reading of the Journal to-day.

There was no objection, and it was so ordered.

TRUST FUNDS, STATE DEPARTMENT.

The SPEAKER laid before the House the following message from the President of the United States; which was read, referred to the Committee on Ways and Means, and, with the accompanying documents, ordered to be printed:

To the House of Representatives:

I transmit herewith a report of the Secretary of State in reply to the resolution of the House of Representatives of the 27th of May last in relation to trust funds.

GROVER CLEVELAND.

EXECUTIVE MANSION, July 29, 1886.

STATEMENT OF BALANCES, TREASURY DEPARTMENT.

The SPEAKER also laid before the House a letter from the acting Secretary of the Treasury, transmitting a statement of balances due to and from the Government of the United States, in response to a resotion of the House of Representatives passed on the 27th instant; which was referred to the Committee on Ways and Means, and ordered to be printed.

LEAVE OF ABSENCE.

By unanimous consent leave of absence was granted as follows:

To Mr. DARGAN, for one week. To Mr. IKE H. TAYLOR, during the remainder of the session, on account of important business.

To Mr. J. M. TAYLOR, indefinitely, on account of sickness in his

To Mr. Buchanan, indefinitely, on account of sickness in his family. RETURN OF JOINT RESOLUTION FROM THE SENATE.

The SPEAKER. The joint resolution passed yesterday on motion of the gentleman from Georgia [Mr. Norwood] was sent to the Senate with a wrong number, and if there be no objection the following resolution will be adopted:

The Clerk read as follows:

Resolved. That the Clerk be directed to request the Senate to return to the House of Representatives the joint resolution of the House numbered 295, permitting the public building authorized by act of Congress approved June 30, 1886, at Savannah, Ga., to be located not less than 40 feet from another building instead of 50 feet, as provided in said act.

The resolution was adopted.

CONDEMNED GUN-CARRIAGES, SOMERVILLE, MASS.

Mr. HAYDEN. Mr. Speaker, I ask unanimous consent to discharge the Committee of the Whole House on the state of the Union from the further consideration of bill of the House No. 1143, which has been before the House a number of times, and put it upon its passage with an amendment.

The SPEAKER. The bill will be read subject to objection.

The Clerk read as follows:

Be it enacted, &c., That the Secretary of War be, and he is hereby, authorized and directed, if the same can be done without prejudice to the public service, to deliver to the Somerville Grand Army of the Republic, of Somerville, Mass., four condemned gun-carriages, to be used for monumental purposes:

The committee recommend the following amendments:

Strike out, in the seventh line, the words "to be used for monumental purposes" and insert "the same from which the guns were taken and which said Somerville Post, Grand Army of the Republic, has."

Mr. HAYDEN. I offer as a substitute the amendment at the desk. The Clerk read as follows:

Insert after the words stricken out:
"Being the same carriages from which the guns now in possession of said Grand Army post were taken."

The SPEAKER. That is a substitute for the amendment of the com-

Mr. HAYDEN. Yes, sir; it is an amendment which changes the phraseology of the committee amendment only.

The SPEAKER. Is there objection to the present consideration of

the bill?

Mr. REAGAN. If there is no debate I shall not object.

The amendment of Mr. HAYDEN was agreed to.

The bill as amended was ordered to be engrossed for a third reading; and being engrossed, was accordingly read the third time, and passed.

Mr. HAYDEN moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the ta-

The latter motion was agreed to.

. PUBLIC BUILDING, SANTA FÉ, N. MEX.

Mr. JOSEPH. I ask unanimous consent to discharge the Committee of the Whole House from the further consideration of the bill (H. R. 9371) for the completion of a public building at Santa Fé, N. Mex., and put it upon its passage.

The SPEAKER. The bill will be read subject to objection.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Treasury be, and he is hereby, authorized and directed to complete the public building already partly erected at the city of Santa Fé in the Territory of New Mexico, for the use and accommodation of the United States district court, surveyor-general, collector of internal revenue, and for other Government uses at the said city of Santa Fé, at a cost not exceeding the sum of \$52,148; and no plan for the completion of the said building, nor contract or expenditure in connection therewith, shall be approved by the Secretary of the Treasury involving any further expenditure than the sum hereinabove fixed as the limit of cost for the completion of the said building.

There being no objection, the bill was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the

third time, and passed.

Mr. SPRINGER move to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the

The latter motion was agreed to.

JOHN WIGHTMAN.

Mr. FLEEGER. I ask unanimous consent to discharge the Committee of the Whole House from the further consideration of Senate bill No. 2530), for the relief of the legal representatives of John Wightman, deceased, and put it upon its passage.

The bill was read, as follows:

The bill was read, as follows:

Be it enacted, &c., That the claim of the legal representatives of John Wightman, deceased, for and on account of mail service rendered by said John Wightman, deceased, in carrying the United States mails on route numbered 3413, from Pittsburgh to Erie, Pa., a distance of 133 miles, three times a week each way, from August 1, 1859, to and including June 30, 1860, at the rate of \$9,000 per annum for six times a week each way on said route, be, and the same is hereby, referred to the Court of Claims; and the said court is authorized and required to take jurisdiction of the same; and if, upon the evidence in the case, it shall appear to the satisfaction of said court that the said service was performed by the said John Wightman upon the said route six times a week, as contemplated by the contract for said service as originally made July 1, 1856, between the Post-Office Department and the Erie and Meadyille Express and Transportation Company, and which contract was subsequently transferred to said John Wightman, and that the same, or any part thereof, has not been paid for, then and in that case the said court shall render a judgment in favor of claimants for the said service so rendered and not paid for at the rate of compensation provided for in the said contract, any statute of limitations, receipt, or acquittance to the contrary notwithstanding, deducting therefrom the sum of \$375, one month's extra pay received by the claimants.

Mr. McMILLIN. Is there a report?

Mr. McMILLIN. Is there a report?
Mr. SPRINGER. I have given this case personal attention, and

upon examination think it is one that ought to pass.

Mr. WARNER, of Ohio. The report ought to be read.

The SPEAKER. The Clerk will read the report.

The report (by Mr. FLEEGER) is as follows:

The committee have heretofore considered and reported favorably a bill the same in substance as this Senate bill. (See House bill No. 9123, Report No 2695.)

The committee therefore report back this bill (S. 2530) with the recommendation that the same do pass.

Mr. WARNER, of Ohio. That is not a report which gives any satisfactory information.

The SPEAKER. There is another quite lengthy report, which the Clerk will read if there be no objection.

Mr. REAGAN. I object.
Mr. MCMILLIN. I object to the bill, unless we can have some statement about it. It is twenty-eight years old, and we certainly ought to have some reason given for this delay.
Mr. FLEEGER. This was a mail-route from Pittsburgh to Erie, Pa.,

one of the most important mail-routes in the State, passing through the county towns of Butler, Mercer, and Meadville. The mail had been carried six times a week for many years on that route. In 1859, owing

to a failure of an appropriation for the Post-Office Department, the service was curtailed from six times to three times a week. This caused considerable dissatisfaction along the route, and Judge Church, at the request of those interested in a daily mail, came to Washington, saw the President and Postmaster-General, and the Postmaster-General agreed that the mail should be delivered to the contractor and carried six times a week as usual, the contractor trusting to an appropriation by Congress for the payment of the extra three times a week which the service had been curtailed. And so the contractor went on and performed the service six times a week and only received the pay for three times a week. The Postmaster-General recommended the payment for the extra service, but the war came on and the contractor was never

This bill provides that the representatives of the estate shall go to the Court of Claims, and if they can show this service was rendered and that the contractor was not paid for it, they shall receive the amount.

Mr. McMILLIN. Does this simply propose to send them to the

Court of Claims?

Mr. FLEEGER. That is all.

The SPEAKER. Is there objection to the present consideration of

There was no objection.

The bill was ordered to a third reading; and it was accordingly read the third time, and passed.

Mr. FLEEGER moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the

The latter motion was agreed to.

CREDIT TO DISTRICT OF COLUMBIA.

Mr. HEMPHILL. I ask unanimous consent that the Committee of the Whole House on the state of the Union be discharged from the further consideration of the bill (S. 1854) authorizing the Treasurer of the United States to credit the District of Columbia with certain moneys in lieu of investing the same in bonds, and that the same be now considered.

The bill was read.

Mr. HOLMAN. This is a bill of some length and some importance. hope a word of explanation will be permitted, the right to object

Mr. HEMPHILL. I can explain it in two minutes.

Mr. REAGAN. I have no objection to the consideration of the bill if it can be acted upon after two minutes' explanation. But if it shall cause more debate than that I shall insist on it being withdrawn.

Mr. HEMPHILL. This involves a good deal of money to the District of Columbia and the United States. Under the law as it now stands there is a certain sinking fund established here for the retirement of the bonds of the District of Columbia. These bonds, almost all of them 6 and 7 per cent. bonds, have been held in Germany, and are at a very high premium. If we buy these bonds we have to buy them at a premium. They will soon be payable without the premium. It is desired to get the permission of Congress to hold this fund which is being paid by the District of Columbia until the bonds mature instead of paying the premium on them, as will be necessary if they are pur-chased now in open market. That is one class of bonds.

There is another class of bonds. Every contractor in this District who undertakes to do any public work must put 10 per cent. of the contract price in the Treasury to save the Government harmless. That money has to be converted into United States bonds. Those bonds are at a high premium. They are falling in price as they mature. And the question arises whether it is right to take these people's money and put it in bonds of the United States when they are liable to lose the premium and the United States will pay them in a few years nothing but the principal. All we desire is that the money these people put in shall be held by the Treasury, and that they shall have interest upon it the same as we pay on the bonds. It will save the loss to the contractors or the loss to the Government of paying the difference between the premium at which they have now to buy the bonds and the face value of the bonds.

Mr. HENDERSON, of Iowa. Mr. HEMPHILL. In 1891. When do these bonds mature?

Mr. WARNER, of Ohio. I should like to know what gain is there in locking up the money in the Treasury, deriving no interest from it and waiting until these bonds mature. They certainly can be bought and waiting until these bonds mature. They certainly can be bought at rates a little better than that for the Government; and then the money, instead of being locked up, will be out in circulation. I certainly must object to a proposition of that kind.

In the second place, it seems to be proposed to have the Government pay interest on this money deposited in the Treasury. We are not in want of money there. We are not paying interest on deposits in the

public Treasury.

Mr. HEMPHILL. I will state to the gentleman that only 1½ per cent. of the interest will be paid by the Government. The District of Columbia pays the other 1½ per cent. The case as it stands now is just the premium or the contractors must lose it.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. WARNER, of Ohio. I must object,

PUBLIC BUILDING, SPRINGFIELD, MASS.

Mr. ROCKWELL. I ask unanimous consent that the Committee of the Whole on the state of the Union be discharged from the further consideration of Senate bill 263, providing for the erection of a public building at Springfield, Mass., and that the bill be put upon its passage.

The SPEAKER. The bill will be read, after which the Chair will

ask for objections.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Treasury be, and he is hereby, authorized and directed to purchase a site for, and cause to be erected thereon, a suitable building, with fire-proof vaults therein, for the accommodation of the United States post-office, internal-revenue office, and other Government offices, at the city of Springfield, Mass. The plans, specifications, and full estimates for said building shall be previously made and approved according to law, and shall not exceed for the site and building complete the sum of \$150,000: Provided, That the site shall leave the building unexposed to danger from fire in adjacent buildings by an open space of not less than 40 feet, including streets and alleys; and no money appropriated for this purpose shall be available until a valid title to the site for said building shall be vested in the United States, nor until the State of Massachusetts shall have ceded to the United States exclusive jurisdiction over the same, during the time the United States shall be or remain the owner thereof, for all purposes except the administration of the criminal laws of said State and the service of civil process therein.

The Committee on Public Buildings and Grounds recommended an amendment; which was read, as follows:

After the word "dollars," in line 12, insert:

"Nor shall any site be purchased until estimates for the erection of a building which will furnish sufficient accommodations for the transaction of the public business, and which shall not exceed in cost the balance of the sum herein limited, after the site shall have been purchased and paid for, shall have been approved by the Secretary of the Treasury; and no purchase of site nor plan for said building shall be approved by the Secretary of the Treasury involving an expenditure exceeding the said sum of \$150,000 for site and building.

The SPEAKER. Is there objection to the present consideration of this bill?

Mr. BRECKINRIDGE, of Arkansas. I wish to ask the gentleman from Massachusetts one or two questions about this bill. Have you a

port at this place? Mr. ROCKWELL. We have not. I would state to the House that we have no public building in Massachusetts west of Boston. This is in the western part of the State.

Mr. BRECKINRIDGE, of Arkansas. I am talking about the neces-

sity for the building, not about the location.

sity for the building, not about the location.

Mr. ROCKWELL. As to the necessity, there is a letter from the Secretary of the Treasury, written in reply to a letter from the Committee on Public Buildings and Grounds, showing that they need for the post-office at Springfield double the space they now have at command, although they occupy one of the large stores in the city.

Mr. SPRINGER. What rent do they pay?

Mr. ROCKWELL. They pay \$2,300 rent now, but, as this letter shows, they will be obliged before long to pay a rent of \$4,500. Then the rent of the internal-revenue office is \$300 additional, making altographs more than 3 per cent, upon the amount asked.

the rent of the internal-revenue office is \$300 additional, making altogether more than 3 per cent. upon the amount asked.

Mr. BRECKINRIDGE, of Arkansas. You are asking for a customhouse also at this place, I believe.

Mr. ROCKWELL. We are not asking for a custom-house, because the President has vetoed the bill making Springfield a port of delivery, and that is not included and never has been included in this bill. Springfield is a city of 40,000 people.

It is the largest city in Western Massachusetts.

Mr. HOLMAN. It appears that this bill is for a post-office and internal-revenue office only, and I suggest to the gentleman from Massachusetts [Mr. Rockwell] that \$150,000 is a larger sum than is required for a building there for those purposes. I think that \$100,000

would be ample.

Mr. ROCKWELL. The original bill was for \$200,000. A letter was written to the Treasury Department in regard to the very question which the gentleman from Indiana now raises, and the reply was that which the gentleman from Indiana now raises, and the reply was that the site could be obtained and the building constructed for about \$150,000, provided the site could be bought for \$40,000 or \$50,000. Now, unfortunately, in our little manufacturing cities of Massachusetts we can not buy ground as cheaply as it can be bought in other parts of the country, and I think \$50,000 is a fair and reasonable amount for the site, while in the judgment of the Treasury Department \$100,000 will be required for a building adequate for the accommodation of the public business at that point.

Mr. BRECKINRIDGE, of Arkansas. The present rent, you say, is

\$2,300.

Mr. ROCKWELL. That is the present rent, but the Secretary of

the Treasury says they will soon be required to pay a rent of \$4,500.

Mr. HOLMAN. I wish to suggest to my friend from Massachusetts

[Mr. ROCKWELL] that one great trouble in regard to these public buildings arises from the extravagant notions of the Supervising Architect of the Treasury. Every communication that comes to us from that quarter in regard to the cost of a public building favors the largest figure,

and the result is that only a few towns, comparatively, can have public

buildings because of their great cost.

Mr. HENDERSON, of Iowa. This is \$50,000 less than the Super-

vising Architect recommends. The SPEAKER. The bill is not yet before the House for considera-

Mr. WOLFORD. I object.

Mr. BRECKINRIDGE, of Arkansas. I suggest to the gentleman from Massachusetts [Mr. ROCKWELL] that he reduce the amount \$50,000.

Mr. ROCKWELL. Of course I shall have to do anything that gentlemen ask that is proper.

Mr. BRECKINRIDGE, of Arkansas. Well, then, do it.

Mr. ROCKWELL. What andiana [Mr. HOLMAN] suggest? What amount would the gentleman from In-

Mr. HOLMAN. I understand, Mr. Speaker, that some of the friends of this measure have suggested that the appropriation be reduced \$25,-000, making the amount \$125,000.

Mr. ROCKWELL. I will accept that.

The SPEAKER. Does the gentleman from Kentucky [Mr. Wolford] insist upon his objection?

Mr. WOLFORD. I withdraw it.

The amendment recommended by the Committee on Public Buildings and Grounds was agreed to, and also the amendment reducing the total amount appropriated from \$150,000 to \$125,000.

The bill as amended was ordered to a third reading; and it was ac-

cordingly read the third time, and passed.

Mr. ROCKWELL moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the

The latter motion was agreed to.

Mr. REAGAN. I call for the regular order.

PRINTING AGRICULTURAL REPORTS.

Mr. REID, of North Carolina. Mr. Speaker, I desire to present some privileged reports from the Committee on Printing. I am instructed by the Committee on Printing to report back the House resolution (H. Res. 201) providing for the printing of the reports of the Commissioner of Agriculture with the recommendation that the House non-concur in the amendment of the Senate and agree to a conference.

The report was agreed to.

The SPEAKER. During the day the Chair will appoint the managers on the part of House.

REPORT ON PRODUCTION OF PRECIOUS METALS.

Mr. REID, of North Carolina. The concurrent resolution of the House to print the report of the Director of the Mint on the production of precious metals in the United States has been returned from the Senate with amendments, accompanied with a request for a conference. I ask that the Senate amendments be non-concurred in and the request for a conference granted.

There being no objection, it was ordered accordingly.

The SPEAKER. The Chair will appoint during the day the confereees on the part of the House.

PRINTING OF PRIVATE BILLS.

Mr. REID, of North Carolina, from the Committee on Printing, reported back favorably the following resolution; which was considered and adopted:

Resolved, That the Public Printer be directed to inform the House as to the cost of printing the private bills (including what is known as Calendar print) of the House of Representatives during the present session.

Mr. REID, of North Carolina, moved to reconsider the vote by which the resolution was adopted; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

IMPRISONMENT OF JULIO R. SANTOS.

The SPEAKER. When the Chair a day or two ago laid before the House a message from the President of the United States, with certain papers transmitted from the State Department, in relation to the imprisonment of Julio R. Santos, the papers were not ordered to be printed, the Chair calling attention at the time to the fact that they were voluminous. Upon examination of the papers by the Committee on Foreign Affairs, to which they were referred, it is thought that they ought to be printed. If there be no objection the order for printing will be

There was no objection, and it was ordered accordingly.

CORRECTION OF A VOTE.

Mr. PARKER. Upon the vote taken on the 1st of February (current Record, page 989, permanent Record, page 1046) on the resolution of the gentleman from Indiana [Mr. Matson] to suspend the rules and pass with an amendment the bill (H. R. 545) known as the widows' pension bill I am recorded as not having voted. I am conscious of having voted in the affirmative on that question. My recollection is confirmed by the fact that my colleague [Mr. TIMOTHY J. CAMP-BELL], when his name was called, voted in the negative, and in passing down the aisle I called his attention to the fact that I thought he had made a mistake in so voting. When the roll-call was concluded he asked for the reading of the list, and afterward said:

I desire to ask the Chair for my personal information if the resolution offered by the gentleman from Indiana [Mr. Marson] now under consideration is on the

by the gentleman from Indiana [Ar. MAYSON] now under consideration is on the passage of the bill?

The Speaker. If that resolution is adopted the bill is passed.

Mr. TIMOTHY J. CAMPBELL. I did not so understand it, and desire to say that I have voted in the negative, but under no circumstances would I vote against the soldier or the soldier's widow, and therefore change my vote from the negative. ative to the affirmative.

That correction was made by the gentleman upon my suggestion, after I had voted in the affirmative, he changing his vote to the same side of the question; and he recollects the matter as I do. The SPEAKER. The correction will be made.

SUFFERERS BY OVERFLOW IN SOUTH CAROLINA.

Mr. SMALLS addressed the Chair. Several MEMBERS. Regular order.

Mr. SMALLS. Consent has been given that the call for the regular order be withdrawn for a moment to allow me to introduce a joint resolution for reference to the Committee on Appropriations

The SPEAKER. If the gentleman will send the resolution to the

desk it will be referred.

Mr. SMALLS. I ask that the resolution be read. The SPEAKER. The Chair does not understand that the demand for the regular order is withdrawn for the purpose of having the reso-

Intion read, but only to have it referred.
Mr. SMALLS. I ask that it be printed in the Record, as it is very

important.

Mr. TAULBEE. I hope the request to have the resolution printed in the RECORD will be granted.

There being no objection, the joint resolution (H. Res. 210) for the relief of the sufferers by the overflow of the Santee, Pedee, and Waccamaw Rivers in South Carolina was introduced, read a first and second time, referred to the Committee on Appropriations, and ordered to be printed in the RECORD, as follows:

Whereas in consequence of the overflow of the Santee, Pedee, and Waccamaw Rivers in South Carolina, and the inundation of the adjacent country, great loss, destitution, and suffering have been inflicted upon the people residing in said localities; and

calities; and
Whereas large numbers of said people are in danger of starvation unless relief is immediately afforded: Therefore,
Be it resolved by the Senate and House of Representatives, &c., That the sum of
\$100,000 is hereby appropriated out of any money in the Treasury not otherwise
appropriated, the same to be immediately available, to be expended by and under the direction of the Secretary of War in the purchase and distribution of subsistence, stores, and other necessary articles to aid in the relief of destitute persons in the districts recently overflowed by the Santee, Pedee, and Waccamaw
Rivers in South Carolina; and he is authorized to co-operate with the authorities of said State and of the towns situated in said overflowed districts in making distribution of the same.

ties of said State and of the towns situated in said overflowed districts in making distribution of the same.

SEC. 2. That the Secretary of War be authorized, in his discretion, to use any steamer and other boat and vessels belonging to or now employed by the Government, or so many thereof as may be necessary, in the transportation and distribution of the rations and supplies furnished by the United States or individuals to the sufferers by the recent overflow of said rivers; the expense of manning, equipping, and navigating such steamers and boats to be defrayed out of any moneys in the Treasury not otherwise appropriated, which necessary sum is hereby appropriated for that purpose.

ORDER OF BUSINESS.

Mr. GOFF. On Friday last an order was made by the House that to-day, immediately after the reading of the Journal, a vote should be taken upon the bill (S. 838) granting a pension to General Benjamin I ask that the order of the House may now be carried out.

Mr. REAGAN. I submit that the agreement made yesterday by

unanimous consent should be executed.

Mr. GOFF. This will take but a moment. The previous question has been ordered.

Mr. BAYNE. There will be no debate.

Mr. CONGER. The same order was made in regard to the bill (S. 1852) granting a pension to Mrs. Jane R. McQuaide.

The SPEAKER. The bill mentioned by the gentleman from Iowa [Mr. CONGER] is in the same position as the bill named by the gentleman from West Virginia [Mr. GOFF], and is first in order.

Mr. CONGER. I desire to have that bill voted on.

The SPEAKER. It appears that both of these bills after the previous question had been ordered were postponed until to-day, but the Chair thinks that under the order made yesterday by unanimous consent, unless that order be waived by unanimous consent, the consideration of the pension bills returned to the House by the President with his objections must be proceeded with until their consideration is completed.

Mr. REAGAN. I must object to anything that will occupy the time of the House to the exclusion of the important measure relating to in-

terstate commerce.

Mr. GOFF. It will take but a moment to get through with these. Mr. REAGAN. I am sure when these come before the House they will lead to debate, and therefore I must object.

Mr. GOFF. They will be in order after the regular order has been

disposed of to-day anyhow.

Several members demanded the regular order.

The SPEAKER. The bills will come up afterward.

The Clerk will report the first bill called up under the arrangement made on yesterday.

MARY NORMAN.

The Clerk read as follows:

A bill (H. R. 6192) granting a pension to Mary Norman, with veto message of e President.

Mr. JOHNSTON, of Indiana. Before going into the consideration of that bill I ask unanimous consent that members having committee reports may file them with the Clerk.

Mr. REAGAN. I can not consent to that.

The SPEAKER. It is not intended, as the Chair understands the request, that the committees shall be called.

Mr. BLAND. I object, and demand the regular order.
The SPEAKER. The Clerk will report the bill and the message of the President vetoing it.

The bill (H. R. 6192) granting a pension to Mary Norman was read at length.

Mr. MATSON. If no gentleman desires to take the floor in behalf of this bill I shall ask the previous question.

We must have some explanation before Mr. WARNER, of Ohio. we vote.

Mr. BROWNE, of Indiana. If I am recognized I shall ask to have read the report of the Committee on Invalid Pensions as a part of my I am advised that the last report filed by the committee embodies all the material facts in the case.

The SPEAKER. The report will be read.

The SPEAKER. The report will be read.

The Clerk proceeded to read the report.

Mr. SMALLS. Mr. Speaker, Mr. O'HARA, the member of the Committee on Invalid Pensions who made the report, is absent. He has prepared himself for this case and one other case which he reported; and I would ask the chairman of the committee to let this matter go over until his return. I do not know when he will get back.

The SPEAKER. The gentleman has the right to move to postpone its further consideration.

Mr. MATSON. If the gentleman will move to postpone until the fifth day of the next session I think it will be satisfactory.

Mr. SMALLS. I thought it would expedite business to see whether the chairman had any objection to it or not. I will move to postpone

Mr. MATSON. I will object to that. If it is to be postponed it must be postponed to a day certain, because these bills ought not to stand here to interfere with the regular progress of ousiness. They are now to be considered under the order unanimously made on yesterday, and should be finally disposed of.

Mr. BROWNE, of Indiana. I will take the responsibility of moving that it be postponed until the first Wednesday in the next session.

The SPEAKER. It is not necessary to fix a day; it can be called up

at any time.

Mr. SMALLS. Then I move that it be postponed until the next session

The motion was agreed to.

MRS. MARIA HUNTER.

The Clerk will report the next pension bill, with The SPEAKER. the veto message of the President.

The Clerk read as follows:

A bill (H. R. 7167) for the relief of Mrs. Maria Hunter.

The bill was read at length.

The SPEAKER. Under the order of the House twenty minutes are

allowed for debate, ten on each side. Mr. WARNER, of Ohio. I do not wish to take up any time of the

House, but think we should have some explanation of this bill, enough to guide us in our votes upon it. I will ask for the reading of the re-

port.

The SPEAKER. It will be considered as read in the time of the gentleman from Ohio.

Mr. BROWNE, of Indiana. Does the gentleman rise to support the

Mr. WARNER, of Ohio. I think we should have the veto message The SPEAKER. Within the ten minutes allowed for debate the gen-

tleman can have the report read. The Clerk will read the veto message of the President and the report

of the Committee on Invalid Pensions. The Clerk proceeded to read the message and report.

Mr. BURROWS. I rise to a question of order. I do not see how gentlemen can vote on these matters and not listen to them.

The SPEAKER. The point of order is well taken; and the Chair will again appeal to gentlemen on the floor to cease conversation so that the proceedings at the Clerk's desk may be heard. It is useless to read

these documents unless they can be heard by members.

Mr. WARNER. of Ohio. I withdraw the demand for the reading of the report, and will ask to have the President's message read.

The SPEAKER. The Clerk has just read it.

Mr. HOLMAN. I think the report ought to go into the RECORD. Mr. WARNER, of Ohio. There is a minority report in this case. If

it can be printed in the RECORD—
The SPEAKER. The Chair will state that the bill, the veto message of the President, the report of the Committee on Invalid Pensions, and the views of the minority have all been printed in the RECORD.

Mr. WARNER, of Ohio. Very well.

It seems this pension was vetoed because the case was then pending

in the Pension Office. I understand that a pension has since been allowed to the full amount provided under the pension laws, namely,

I fully concur with the President that this is not a case which calls

Mr. BUTTERWORTH. May I ask the gentleman from Ohio a ques-

Mr. WARNER, of Ohio. Yes, sir.
Mr. BUTTERWORTH. Did you or did you not vote to allow to the widows of the several generals who have deceased since the war or who deceased during the war pensions of \$50 a month?

Mr. WARNER, of Ohio. I have voted uniformly against all of these \$50 pension bills. I voted against pensioning by special act in such cases. I have been in favor of leaving them all under the general law.

Mr. BUTTERWORTH. Did you or did you not vote against pen-

sioning the widow of General Hancock?

WARNER, of Ohio. I voted against it. I am on the record in all those cases, and I shall vote in this case against the bill and to sus-

tain the President's veto.

Mr. BUTTERWORTH. I wish I could be induced to believe that the only reason for refusing to the widow of Major-General Hunter the pension proposed in this bill, \$50 a month, was the same that operated on the minds of gentlemen when casting their votes upon the several bills that have passed this House and been approved by the President, granting \$50 per month to the widows of other generals who have deceased since the war. This House voted to the widow of General Hancock a pension of \$2,000 a year. It was very properly done. I voted for it, and very cheerfully. And the President of the United States signed the bill without any compunctions of conscience, so far as we were able to observe.

Major-General Hunter, beyond any question, was an officer of consummate ability, who served his country faithfully and well prior to, during, and after the rebellion. He is dead after more than forty years' service as a soldier. The claim of his widow does not differ from the claims of widows of other general officers who have been voted \$50 a month,

and in some instances much more.

May I ask the gentleman from Ohio a question?

Mr. BUTTERWORTH. Yes, sir.
Mr. MATSON. Do you know the circumstances of Mrs. Hunter? Mr. BUTTERWORTH. That has nothing to do with it. But I do not know what they are. She has applied for a pension.

Mr. MATSON. It has always had to do with it heretofore. Mr. BUTTERWORTH. Not at all. General Hancock drew his pay, from \$10,000 to \$13,000 a year, ever since the war. If his family was not left in comfortable circumstates it was the fault of the administration of his financial affairs and not due to the inadequacy of his pay. I only refer to this to indicate to the House that General Hancock had ample opportunity to provide for his widow. I do not refer to it as a criticism upon the action of Congress in voting his widow a pension of \$2,000 a year. Very far from it. The action of Congress was most commendable. I am desirous to know why the widow of General Hunter is thus discriminated against. Why is she singled out and her claim spurned? I submit to this House the trouble is that General David Hunter was president of the court-martial before which General Fitz-John Porter was tried. If Major-General Hunter had not acted as president of that court I am constrained to believe that the bill which passed this House granting a pension of \$50 per month to his widow would to-day have been a law. The President would, I think, have approved the bill. No objections would have been raised at the Pension Office, where manifestly the reasons for each veto is provided. It seems to be the fixed purpose of the Pension Office to interpose every possible objection which can operate to prevent an applicant who has been rejected by that office from obtaining relief through Congressional action. The President has relied, and naturally enough, upon the Pension Office for the facts, and in the main the reasons for each veto. The facts have not always been placed before the President, and the reasons have in most cases not been such as to commend them to the favor of the members here who voted for the vetoed bills. The only reason given in this case is that Mrs. Hunter has an application pending in the Pension Office. I will consider that objection in a moment.

If any soldier ever deserved well of his country General Hunter did. But for the fearless discharge of his duty-and a delicate duty it was his widow has been refused the pittance of \$50 a month, which has been granted to the widows of his comrades-in-arms. The other evening gentlemen were content to vote \$100 a month to General Kelley. It was a proper thing. I do not find fault with it. It was a just recognition of the services of a meritorious officer, who is old and at the

very sunset of life.

A MEMBER. It was not voted.

Mr. BUTTERWORTH. Gentlemen were ready to vote it. It passed the committee.

I submit it is only even-handed justice, without regard to the financial condition of Mrs. Hunter, to which attention has been called, to grant this pension. It is for her to decide whether or not she needs and will accept this recognition by the Republic of the services rendered by her husband to the country. The same reason which would induce us to refuse \$50 a month to Mrs. Hunter were present to operate against our granting similar amounts to widows of other general officers who have been given pensions of \$50 or \$100 per month.

Mr. HALL. Will the gentleman yield to me for a question?

Mr. BUTTERWORTH. Yes, sir.

Mr. HALL. Has not Mrs. Hunter seen proper to submit to the jurisdiction of the Pension Department and made her application there?

Mr. BUTTERWORTH. Undoubtedly; the record shows that she

has; and so did other widows to whom an increase of pension has been granted by Congress.

Mr. HALL. Has she asked that her case should be taken away from that Department? Her application is based on an entirely different

principle

Mr. BUTTERWORTH. No, sir; her case does not differ from others.
All rest upon the justice and generosity of this Republic in recognizing the heroic services of the officers who are dead, and whose widows are cared for by the Government. Mrs. Hunter's case differs in nothing from those upon which this House has passed so often. She is not a petitioner to this House to ask that the Government recognize the splendid services of her husband. Nor has any widow done so to my knowledge. They have waited, and, except Mrs. Hunter, not in vain, for the Government to do that which is eminently just.

Mr. TAULBEE. Do I understand the gentleman to say that General Hancock drew \$12,000 or \$15,000 a year?
Mr. BUTTERWORTH. He drew the pay of major-general, which, with perquisites or commutation, is, I undertand, about \$13,000.

Mr. TAULBEE. I understand his pay was \$7,500.

Several Members. And the perquisites.

Mr. BUTTERWORTH. I do not know what my friend's understanding is, but General Hancock drew the pay of a major-general, which was large; not too large, not too full. And do not understand me as complaining that the Republic in recognizing the services of that heroic officer made any mistake in granting to his widow a pension of \$2,000 a year. On the contrary, I did and do now most heartily approve what Congress did. But it is a mystery to me why this marked discrimination should be made against the widow of General Hunter.

Mr. TAULBEE. I only wanted to know—
Mr. BUTTERWORTH. I am at a loss to know how it is that when the widow of the personal friend and the comrade-in-arms of General Hancock, who rendered as heroic service, though possibly not in as wide a field of action—when the widow of Major-General Hunter comes here and asks for a pension of \$50 a month we can consistently refuse to grant the pension after we have just voted to General Hancock's widow more than \$166 a month. There are many precedents to general pension; few, if any, for the refusal to do so.

Mr. TAULBEE. I am against them both. I only wanted to know how very naughty a thing you helped to do.

Mr. BUTTERWORTH. I repeatagain I have not claimed that voting more than \$166 a month. There are many precedents for granting the

\$2,000 to the widow of General Hancock was wrong. It was not wrong. But I like consistency. If we could vote \$166 per month to the widow of one gallant major-general we could with good grace vote as much as \$50 per month to the widow of another major-general whose services extend over near half a century

Mr. TAULBEE. Well, I did not vote for that, and I will not vote

Mr. BUTTERWORTH. You are nearly always right, but you are wrong now

Mr. ELDREDGE. The gentleman from Ohio says that this bill was vetoed because General Hunter was president of the court-martial which convicted Fitz-John Porter. How does he or any gentleman here know

whether General Hunter voted for that conviction or not? Mr. BUTTERWORTH. I only know that he was the president of the court-martial which found that Fitz-John Porter had been guilty of dereliction of duty. I only know that he has been denounced for his course on that trial by those who espoused the cause of General Porter, and that it has been assumed that he voted for conviction. Whether he did so or not I do not know, because the proceedings of courts-mar-

tial are under the law kept secret, or supposed to be.

Mr. ELDREDGE. Exactly.
Mr. BUTTERWORTH. But when two cases are presented as here that are on all fours, substantially alike in every respect, I can not understand why we make fish of one and flesh of the other. have the cases of the widows of two officers of equal rank, equally heroic, equally deserving, I can not understand how this House can spurn the one from its door, refusing her even \$50 a month, while voting the other \$2,000 a year. There must be some reason for it aside from the merits of the officers and of the claims of their widows. What is that reason?

Mr. WARNER, of Ohio. Mr. Speaker, there is no question here at

all of General Hunter's ability or of his faithful service to his country an of General Hunter's ability or of his faithful service to his country—none at all. I, for one, have steadily voted against giving to the widow of any officer who died of old age a larger pension than the law allows to the widow of an officer who gave his life on the battlefield. That is the principle upon which I have voted, and upon that principle I shall vote against this bill. Besides that, the circumstances of the widow do make a difference. Whether that consideration ought to make any difference or not it does, and in the case of a gratuity it ought to make a difference. If it was a question of right under the law then the case would be different, but this is purely a gratuity, and the question whether the widow is in need or not may properly be considered in such a case.

Mr. BUTTERWORTH. I want to call attention to the fact that the gratuity or pension is voted in recognition of the heroic service of the officer, and I am not aware that it was ever suggested that Mrs. Hunter is refused the pension of \$50 per month because she is not threatened with starvation. It is a provision which the Government is accustomed to make for the widow of an officer whose services to the country have been great.

een great. You may call it by whatsoever name you will Mr. WARNER, of Ohio. Then let it come in the form of a testi-

mr. WARNER, of Onio. Then let it come in the form of a testimonial of some kind; not in the form of a pension.

Mr. BOUTELLE. Mr. Speaker—

The SPEAKER. For what purpose does the gentleman rise?

Mr. BOUTELLE. I rise to speak-to this question.

The SPEAKER. The time for debate has expired.

Mr. BOUTELLE. I submit that it is hardly fair, Mr. Speaker, to count in the ten minutes on this side the long speech of the gentleman

from Ohio [Mr. WARNER].

The SPEAKER. The Chair did not. The Chair counted that in opposition to the bill. The gentleman from Ohio [Mr. WARNER] occupied nearly all his time in having the report read.

Mr. BOUTELLE. Surely, Mr. Speaker, the gentleman from Ohio [Mr. BUTTERWORTH] has not occupied ten minutes.

The SPEAKER. The Chair understands that he has.

The SPEAKER. The Chair understands that he has.

Mr. BUTTERWORTH. I told my friend [Mr. BOUTELLE] that I would yield him some time, but of course I have not observed how long I have been speaking.

The SPEAKER. The question is, Shall this bill pass, the objections of the President to the contrary notwithstanding?

Mr. BOUTELLE. Mr. Speaker, in view of the course this debate has taken I ask unanimous consent that I may have two or three minutes to call attention to the wording of the President's message. Mr. REAGAN. I object.

Mr. WARNER, of Ohio. The message is in the RECORD and speaks for itself.

Mr. BOUTELLE. I want to call attention to the fact that the President put his veto simply on the ground that the case is in the Pension

Office, where they can grant only \$30 a month.

Mr. SMALLS. Mr. Speaker, I would ask the chairman of the committee, if he is not going to use his time, to give me two minutes.

[Cries of "Regular order!"]

The SPEAKER. The regular order is insisted on. The time for debate on both sides is exhausted. The question is, Shall this bill pass, the objections of the President to the contrary notwithstanding? Upon this question the Constitution requires that the yeas and nays shall be

The question was taken; and there were-yeas 111, nays 108, not voting 103; as follows:

Mr. WILLIS with Mr. STONE, of Massachusetts, on all votes upon vetoes of pension bills.

Mr. BLANCHARD with Mr. HENDERSON, of Illinois, for this day. Mr. RANDALL. I have voted in the negative, but desire to with-

draw my vote, as I find I am paired with my colleague, Mr. HARMER, who if present would vote "ay." The result of the vote was announced as above stated.

PUBLIC BUILDING AT SPRINGFIELD, MASS.

The SPEAKER. The House this morning, upon motion of the gentle-

man from Massachusetts [Mr. ROCKWELL], considered and passed a bill authorizing the construction of a public building at Springfield, Mass. By agreement the amount originally stated in the bill was reduced from \$150,000 to \$125,000. Those figures occurred twice in the bill; but the clerk made the change in only one place. The Chair thinks the understanding upon both sides of the House was that the amount should be reduced wherever it occurred, as it is the same sum and for the same purpose. If there be no objection the correction will be made before the bill is sent to the Senate.

There was no objection.

JOHN W. FARRIS.

The SPEAKER. The Clerk will report the next vetoed pension bill to be voted on under the order of the House.

The Clerk read as follows:

A bill (H. R. 6136) granting a pension to John W. Farris.

Be it enacted, &c., That the Secretary of the Interior be, and is hereby, authorized and directed to increase the pension of John W. Farris, late first lieutenant and adjutant of the Forty-eighth Illinois Volunteers, for disease of eyes, subject to the provisions and limitations of the pension laws.

Mr. BLAND. Mr. Speaker, this is a bill introduced by myself. I am aware that the ten minutes allowed for debate would not suffice for a proper explanation of this case, and that the House, in the closing hours of the session, is not disposed to listen to discussion. Believing that this bill can not at the present time receive a proper hearing, I move that its further consideration be postponed until the next session.

Mr. MORRILL. This bill was introduced by the gentleman from Missouri [Mr. BLAND], and was reported from the Committee on Invalid Pensions by myself. Yesterday I called it up for consideration at the request of the claimant named in the bill. He is a resident at the home of the gentleman from Missouri, who has seen him since yesterday. I hope the request will be granted and that the bill will go over until next session.

Mr. BRECKINRIDGE, of Kentucky. The gentleman from Missouri had better let it go over than have it defeated for want of time to prop-

erly consider it.

The question being taken on the motion of Mr. BLAND that the further consideration of the bill be postponed until next session, it was agreed to.

PRINTING OF AGRICULTURAL REPORTS.

The SPEAKER appointed as conferees on the part of the House on the disagreeing votes of the two Houses on House resolution 201, relating to the printing of Agricultural Reports, Mr. Reid of North Carolina, Mr. Hatch, and Mr. Farquhar.

PRODUCTION OF PRECIOUS METALS.

The SPEAKER also appointed as conferees on the part of the House on the disagreeing votes of the two Houses on the resolution of the House proposing to print report of the Director of the Mint relating to the production of precious metals, Mr. Reid of North Carolina, Mr. BLAND, and Mr. FARQUHAR.

DAVID T. ELDERKIN.

The next privileged business on the Calendar was a message from the

The next privileged business on the Calendar was a message from the President of the United States returning without his approval the bill (H. R. 5995) granting a pension to David T. Elderkin.

Mr. HENDERSON, of Iowa. Mr. Speaker, this bill was introduced by me, referred to the Committee on Invalid Pensions, and reported back favorably from that committee. It is a bill in which I feel deeply interested as well as my people, having been petitioned for by the people of Black Hawk. I do not desire to have it considered at this time. I wish to have a full opportunity to present it with all its merits to the House. I am not willing to have it considered under the ten-minute rule. I therefore move the postponement of the further consideration of this matter until December next. of this matter until December next.

The motion was agreed to.

SALLY ANN BRADLEY.

The next privileged business on the Calendar was a message from the President of the United States returning without his approval the bill (H. R. 5394) granting a pension to Sally Ann Bradley.

Mr. MATSON. As will be seen by the Calendar this matter has already been postponed until the second Tuesday in December next.

Mr. BUTTERWORTH. I did not hear the statement of the gentle-

man from Indiana.

Mr. MATSON. I merely stated this matter had already been post-

poned until December next.

The SPEAKER. The gentleman from Ohio [Mr. GROSVENOR], who had charge of this matter, obtained leave to go home, and he asked for the postponement of this bill until the second Tuesday of December next, which was agreed to, and the matter has therefore been postponed until that time.

MARY ANDERSON.

The next privileged business on the Calendar was a message from the President of the United States returning without his approval the bill (H. R. 7436) granting a pension to Mary Anderson.

Mr. THOMAS, of Wisconsin. Mr. Speaker, I should not at this time

ask the House to consider this bill were it not for the fact that the widow of this soldier is in absolute destitution, and if she is not allowed a pension now will become a public charge, with her eight little children. Believing it is a meritorious case, and that the President has been mistaken in his veto, I wish in the limited time of ten minutes, which is all I have, to give the simple facts of the case.

Richard Anderson, the soldier and the dead husband of this widowed claimant, was in the Army of the United States at the time of the breaking out of the rebellion. He was with General Twiggs in Texas. When that officer went into the rebellion this man and several of his comrades came to Saint Louis and reported to the military authorities. He served out his enlistment in the regular Army, and afterward en-listed in the Seventeenth Wisconsin Regiment, and was with that regiment in every battle during the whole war. He was honorably discharged, and came home afflicted with chronic diarrhea. He received a pension. His was not a mere hospital record. He was a brave soldier during the war. He asked for an increase of his pension. He was weak; he was feeble; he was at death's door. He was sent to the board of surgeons 50 or 60 miles from home. He should not have gone alone, but he had no means to employ a nurse to take care of him. He was examined that evening at 9 o'clock by the surgeons. I have their certificate here and they say he was in a most retirible condition. tificate here, and they say he was in a most pitiable condition. No surgeon or physician would say he could live for three months. After his examination he staggered half a mile from there at night and found the hotel where he was stopping locked up. He then staggered to the depot. He was seen there waiting for the train. He went out of the depot and probably fainted on the track or was too weak to get out of the way of a passing train. He was found the next morning dead, crushed and mangled by a passing train. This is the report of the Committee on Invalid Pensions. The committee say there were no circumstances which would serve as the basis for any contrary judgment.

Mr. Speaker, the President said in his veto message that the only reason he vetoed this bill was because there were circumstances which would indicate suicide; that otherwise he would have approved the bill. I wish to say there are no circumstances indicating suicide. I have authorities here which say—and I read from the decisions of pension cases by the various Secretaries of the Interior—on page 379, as follows:

"Pension laws should be construed and executed in the liberal and generous spirit which prompted their enactment, and when doubts can not be resolved by evidence presumptions should incline toward the claimants." Following this view, in the case of a man who was found dead in his tent with a bullet wound in the head, the fact that he committed suicide can not be presumed; it must be proved before the claim of his widow for pension can be rejected.

Yes, Mr. Speaker, the presumption, if one is indulged in, should go in favor of the soldier. This is the law. The law, sir, but follows the dictates of patriotism, of justice, and of common sense. The presumption should go in favor of the soldier. The law is that you should never presume suicide in such a case. Secretary Delano and Secretary Harlan have so decided in the cases which I have cited where men have been found shot.

In the case I have read to you they allowed a pension to the widow of this man found shot. The authorities are numerous and they are of one opinion, that suicide should never be presumed. Let me read to you from Lawson on Presumptive Evidence, pages 192 and 193:

W is killed by a railroad engine. The presumption is that W could not have escaped the peril if he had desired to. The instincts prompting the preservation of life were said to be properly thrown into the scale of evidence, like the presumption of sanity and innocence.

Again, he says:

A person is found dead. In such case the party alleging suicide must prove it.

The President must have adopted the presumption of suicide in order to have vetoed this bill under the circumstances connected with the case. He had no right to so presume; it is against the soldier; it is a presumption forbidden by law, and against the dictates of humanity.

Mr. HERMANN. Were this man's domestic relations happy with his

Mr. THOMAS, of Wisconsin. Perfectly so. He had a family of eight little children, and they loved and respected him, and he loved them as only a brave and honorable man loves wife and children; and his wife was glad to hear that a pension had been granted, and that the faithful services of her dead husband were remembered by the country and that the bill had passed both House and Senate; and when the President vetoed it, turning all the presumptions against the dead soldier, the Committee on Invalid Pensions carefully re-examined the case and unanimously reported that it should be passed notwithstanding the objections of the President. The committee, sir, after a most careful and laborious re examination, repudiate the reasoning of the veto

Mr. WEAVER, of Iowa. Do I understand you to say that it was

unanimously reported?

Mr. THOMAS, of Wisconsin. Unanimously reported. No one for a moment doubted the propriety of it, as I understand, and the President's action is incomprehensible to them and to me, and is not supdem ported by the facts or by the presumptions of law or the ideas of justice. The President must have misapprehended the facts or deliberately placed the presumptions upon the wrong side. We can not presume

the President would intentionally do wrong; therefore we must conclude he was mistaken.

Mr. WARNER, of Ohio. May I ask the gentleman a question?

Mr. THOMAS, of Wisconsin. Most certainly.
Mr. WARNER, of Ohio. When was this man mustered into the service?

Mr. THOMAS, of Wisconsin. Five years before the rebellion.
Mr. WARNER, of Ohio. Did he serve throughout the war?
Mr. THOMAS, of Wisconsin. Yes, sir; he came from Texas, where
General Twiggs was stationed, to Saint Louis, and presented himself to the military authorities there-

Mr. WARNER, of Ohio. Was he drawing a pension himself when

he died?

Mr. THOMAS, of Wisconsin. Yes, sir. Mr. WARNER, of Ohio. When did he die? Mr. THOMAS, of Wisconsin. In 1882.

This is a most meritorious case, and his widow and children need this bounty of the Government badly. We have granted pensions here to widows of officers from \$30 to \$50 a month and \$2,000 a year where the officers have died, and not from any cause or disease connected with the Army, but in this case, as all the facts show, this man's death is justly chargeable to the disease he contracted in the service.

Mr. BUTTERWORTH. Let me ask my friend a question: What is the ground upon which the President vetoes this bill?

Mr. THOMAS, of Wisconsin. He says he regards it as a case of suicide, or that the circumstances indicate suicide. But as the Committee on Invalid Pensions say, there were no circumstances that indicated any such thing, but that his death is fairly attributable indirectly to his military service. They think that the accident could not have hap-pened if he had been in a suitable condition to have helped himself. The committee say:

From the evidence in this case your committee think the death of this soldier is fairly attributable indirectly to his military service; that at the time of his death his condition, as the result of disease contracted in the service, was such that had the accident not happened he could not have long survived. We therefore recommend that the bill do pass.

Mr. BUTTERWORTH. That is, the light of his life had been burned down to the socket in the military service of his country, and the flicker of it had been extinguished by the train?

Mr. THOMAS, of Wisconsin. Yes, sir, they say he could not have lived but a short time, even if he had not been killed by the train. He

was almost entirely helpless and disabled.

Mr. Speaker, I hope no political considerations will influence any gentleman here in preventing him from doing justice to this widow and her helpless children. She needs the money badly. Her husband lost his life from disease contracted in the service. This is the fair conclusion from all the facts. His widow and children in their misery and poverty, weep with broken hearts over the mistaken charge in the President's veto message that the husband and father committed suicide, and the entire community where Richard Anderson lived and was known are amazed that such a conclusion should have been reached by the President. I call upon you in the name of justice to take this stain off unjustly placed upon the memory of a brave and loyal soldier by the President. He did not deserve reproach when living; let us do justice to his memory now that he is dead.

He was a faithful and brave soldier. He died for his country from disease contracted in the service; as much a sacrifice of his life for his country as though shot down upon the battlefield, and in my judgment the Pension Office ought to have granted the relief. Let us not only do justice to the memory of this brave soldier by denying the charge of suicide, but let us, I implore you, deal with this widow and these orphan children of a brave dead soldier as we have dealt with the widows and orphans of others who have sacrificed their lives for the country. Do not, I pray you, let the President's veto deter you from voting to grant to this poor woman and her children that which before Heaven is justly due from a grateful country to them for the sacrifice which they have made of husband and father for the preservation of

Mr. WISE. Let me ask the gentleman a question. Where did he die?

Mr. THOMAS, of Wisconsin. At Sparta, in Wisconsin, about 50 miles from where he lived.

Mr. WISE. How did he die?

Mr. THOMAS, of Wisconsin. He was crushed by a railroad train. Mr. BRECKINRIDGE, of Kentucky. In what year?

Mr. THOMAS, of Wisconsin. In 1882.

The facts are, he went to be examined for an increase of pension and was examined, and the report showed that he was in a pitiful and most deplorable condition. In fact the report could hardly be read it was so terrible in its description and details. He went late at night about half a mile to a little hotel in the neighborhood of the depot in order to be on hand to go home on the next morning's train. While there waiting for the train, the hotel being closed, he was killed on the railroad track. The committee find from the facts that his death was caused by weakness resulting from disease contracted in the Army, by which he was unable to get out of the way; and yet the President finds that the circumstances indicate suicide.

Mr. CROXTON. What is the amount of the pension?
Mr. THOMAS, of Wisconsin. The ordinary amount fixed by the law, \$12.

[Here the hammer fell.]
Mr. MATSON. Mr. Speaker, this bill appears to be reported back unanimously by the committee with the recommendation that it pass.

I was not present when the bill was called up for consideration in committee, nor did I know that any such case was before the committee until it was called up in the House on yesterday. After some examination I am disposed to think that the President's veto ought to be sustained. I believe, Mr. Speaker, that if this bill becomes a law it will establish the precedent that the widows of all men who are drawing pensions ought to be continued in their pensions without regard to the cause of death. That is a principle against which I have long con-

Mr. BOUTELLE. I understood the gentleman to say that this was

a unanimous report?

Mr. MATSON. I say it so appears. I was not present at the time it was considered, and did not know there was such a bill until yes-

Mr. BOUTELLE. Then you appear against the bill? Mr. MATSON. I am against the principle involved, believing it to

be wrong

Now, this man was killed on the 7th day of February, 1882, by a railroad train. There is no evidence upon the part of any one that the immediate cause of his death had anything to do with his service. The proposition is that because of some remote connection with the service the man met his death by reason of the fact that he was so debilitated and weak as to be unable to get out of the way of possible injury, or possibly that because of the fact of his horribly painful disease he determined to commit suicide.

The committee itself I see says that possibly that might have been the case, and even in that view the claim ought to be allowed. I am not disposed to talk on that proposition, because I am not disposed to combat it. I get behind that and place it on this principle, that the claim can not be allowed unless you proceed to say that the widows of all pensioners ought to have pensions continued. There is no pretense all pensioners ought to have pensions continued. There is no pretense here that this man's death had any relation to his service.

Mr. THOMAS, of Wisconsin: Will the gentleman allow me to ask

him a question? Mr. MATSON.

Yes, sir.

Mr. THOMAS, of Wisconsin. Were you not present in the committee at the time when the original report was adopted?

Mr. MATSON. I can not say.

Mr. THOMAS, of Wisconsin. This report is unanimous.

Mr. MATSON. I have said I do not recollect the case. I do not remember to have heard of it till it was brought up in the House yes-

terday.

Mr. BOUTELLE. The record seems to show you were in favor of this bill twice.

Mr. MATSON. I have stated what the record shows. member to have seen the report in this case until yesterday.

Mr. BOUTELLE. The inquiry is in regard to the first report on the case, which was favorable.

Mr. MATSON. I do not recollect; but even if I had favored it I would have a right to change my mind.

Mr. BOUTELLE. What we wish to find out is whether you had always opposed this case, or whether you have changed your mind.

Mr. MATSON. I am responsible to myself in such matters. When I make up my mind I am apt to do it out of respect to my own convic-

tions and not those of any other gentleman.

Mr. BOUTELLE. We were trying to find out whether you were following that line or whether you had changed your convictions.

Mr. MATSON. What I wish to say is that if this bill shall pass over

the veto it establishes a principle that is wrong and vicious, and gives a basis for the claim that because a man receives a pension his widow should have it after his death. The matter of charity touches the heart but can not reach the judgment of men on propositions to grant pen-

Mr. BURROWS. Will the gentleman allow me?
Mr. MATSON. I have been interrupted sufficiently, and decline to be interrupted further, and I have agreed to yield a portion of my time

to my friend from Illinois [Mr. MORRISON].

The mere matter of charity can not be considered. It is not right for Congress to consider these cases from a mere charitable standpoint. There must be some merit in the case outside of the question of charity. It will hardly be insisted by any gentleman that because of mere charity men or women ought to be pensioned by the Government of the United States, and that is all there is in this case. I yield the remainder of my time to the gentleman from Illinois [Mr. MORRISON].

Mr. BURROWS. Before the gentleman yields will he allow me one

question? I will take just a moment. I want to know the distinction between this case and a bill which the President signed this session where a soldier lost his right arm in the service. passed the bill pensioning the widow because her husband lost his life while out driving his team.

Mr. MATSON. I must decline to yield for a speech.

Mr. BURROWS. The load fell over on him and he froze to death;

and you granted a pension.

Mr. MATSON. I will answer the gentleman. I apprehend there was proof in that case—I do not remember it, but I apprehend there was proof connecting the disability with the death more than in this case

Mr. BURROWS. It was assumed the man's condition led to his

death.

Mr. MORRISON addressed the House. [See Appendix.]
Mr. BUTTERWORTH. I hope the same privilege of extension will be accorded to other gentlemen.

Mr. MORRISON. I consent that it be accorded to any gentleman

who asks it.

Mr. MATSON. I ask for general leave. Mr. MORRISON. I object. I do not object to leave being given to any gentleman who will ask it for himself.

Mr. SMALLS. I ask unanimous consent to extend my remarks on

the Hunter case.

There was no objection.

Mr. THOMAS, of Wisconsin. I may want the privilege of extending my remarks on the pending case.

The SPEAKER. If there be no objection leave will be granted.

There was no objection.

The SPEAKER. The question is, Shall this bill pass, the objections of the President to the contrary notwithstanding? And upon that question the Constitution requires that the yeas and nays shall be

The question was taken; and there were-yeas 120, nays 95, not

voting 107; as follows:

On motion of Mr. BURROWS, the reading of the names of members voting was dispensed with.

The following additional pairs were announced:

Mr. CANDLER with Mr. HAYNES, until further notice.
Mr. STONE, of Kentucky, with Mr. Johnston, of Indiana, for the remainder of the day.

Mr. OATES with Mr. ANDERSON, of Kansas, for the remainder of the

day.
Mr. Green, of New Jersey, with Mr. Zach. Taylor, for the re-

Mr. Greek, of the day.

Mr. LITTLE. Mr. Speaker, my colleague, Mr. McKinley, I am authorized to say, would, if present and not paired, vote "ay" on this question, and would likewise have voted "ay" on the passage of the other vetoed bills voted on to-day.

The SPEAKER. Upon this question 120 gentlemen have voted in the affirmative and 95 in the negative. Two-thirds not having voted

in the affirmative the House refuses to pass the bill.

INTERSTATE-COMMERCE BILL.

Mr. REAGAN. I call up the special order.
The SPEAKER. The Clerk will read the title of the bill. The Clerk read as follows:

An act (S. 1532) to regulate commerce

Mr. REAGAN. I demand the previous question upon the adoption of the amendment reported from the Committee on Commerce and upon ordering the bill to be read a third time.

Mr. O'NEILL, of Pennsylvania. Mr. Speaker, as I understand it we are now to vote upon the amendment proposed by the gentleman

from New York

The SPEAKER. That has been voted upon already by yeas and

Mr. O'NEILL, of Pennsylvania. What is the amendment now proposed?

The SPEAKER. It is the amendment reported from the Committee-on Commerce as a substitute for the Senate bill. Upon that the gen-

on Commerce as a substitute for the Schale bill. Opon that the gentleman from Texas [Mr. REAGAN] demands the previous question.

Mr. O'NEILL, of Pennsylvania. I wish the gentleman would not call the previous question just at this moment. There are two or three amendments that I would like to offer, and I propose to offer them in good faith and with the hope that this House may adopt them.

Mr. REAGAN I would be add to accommodate and friend for the state of the state o

Mr. REAGAN. I would be glad to accommodate my friend from Pennsylvania [Mr. O'NEILL] and other gentlemen, but this subject has been discussed for the last ten years. The bill has to go to a conference at all events, and these suggestions can be made in conference. It is necessary to get the bill out of the way of other bills that are pending, and therefore I think I must insist on the demand for the previous ques

Mr. O'NEILL, of Pennsylvania. But the difficulty is that we can not get these amendments that we propose before the committee of conference, and if the gentleman is so anxious to get his bill into conference, I do not think that the delay of half an hour or so to have some amendments offered, which may be considered by the conferees of the two Houses, would put him backvery far.

Mr.SPRINGER. Every proposition can be brought before the com-

mittee of conference, because we propose to strike out all after the en-

acting clause and insert this amendment as a substitute. Mr. REED, of Maine. We have not discussed the details of this bill at all.

Mr. REAGAN. It is open to amendment.
Mr. BAYNE. I hope my colleague [Mr. O'NEILL] will yield and let this go to a committee of conference.

this go to a committee of conference.

Mr. O'NEILL, of Pennsylvania. Oh, you hope your colleague will yield! Your colleague will not yield.

Mr. REAGAN. Regular order.

Mr. O'NEILL, of Pennsylvania. It is only as a matter of grace that

by the grace given him by this side of the House.

The SPEAKER. The regular order is demanded, and the gentleman from Texas [emanded] and the gentleman from Texas demands the previous question.

The regular order is demanded, and the gentleman

Mr. O'NEILL, of Pennsylvania. And declines to give an opportunity to adopt amendments.

Mr. SPRINGER. The gentleman from Texas insists on his demand for the previous question.

The question was taken on ordering the previous question; and there

were—ayes 92, noes 55.
Mr. O'NEILL, of Pennsylvania. I make the point that no quorum has voted.

Tellers were ordered; and Mr. O'NEILL, of Pennsylvania, and Mr. REAGAN were appointed.

Mr. REAGAN. I call for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and it was decided in the affirmative-yeas 159, nays 57, not voting 106; as follows:

So the previous question was ordered.

So the previous question was ordered.

Mr. STONE, of Kentucky. The gentleman from Indiana [Mr. Johnston] and I were paired on the vetoed pension bills, but on the interstate-commerce bill we are not paired. On this question I have voted in the affirmative, and he, if present, would vote in the same way.

Mr. SOWDEN. My colleague [Mr. Ermentrout] was called away from the city last evening on account of important business, and desired me to ask that he be granted indefinite leave of absence. If he were present he would vote for what is known as the Reagan bill

were present, he would vote for what is known as the Reagan bill.

The SPEAKER. If there be no objection, indefinite leave of absence will be granted to the gentleman from Pennsylvania [Mr. ER-MENTROUT].

There was no objection. On motion of Mr. PAYSON, by unanimous consent the reading of the names was dispensed with.

The result of the vote was announced as above stated.

The SPEAKER. The question is now upon agreeing to the substitute proposed by the Committee on Commerce for the bill of the Senate. Mr. BURROWS. I desire to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BURROWS. According to my understanding the amendment proposed by the committee is to strike out all after the enacting clause of the Senate bill and adopt the bill of the committee. If that proposition be voted down shall we then have a vote on the Senate bill?

The SPEAKER. The vote is now on the Senate bill practically. The question is between the Senate bill and the substitute reported by the Committee on Commerce. Mr. BURROWS. There w

There will be no further vote?

The SPEAKER. There will be a further vote, of course, on the passage of whatever bill may be agreed to.

Mr. BURROWS. I mean if the substitute be voted down?

The SPEAKER. Then the vote would be on ordering the Senate bill to be read a third time.

Mr. REED, of Maine. A is in favor of the Senate bill? A negative vote upon the present question

The SPEAKER. It is. The question is now on agreeing to the substitute proposed by the Committee on Commerce.
Mr. JACKSON and others called for the yeas and nays.
The yeas and nays were ordered.

The question was taken; and it was decided in the affirmative—yeas

So the substitute was agreed to.

During the roll-call, On motion of Mr. PAYSON, by unanimous consent the reading of the names was dispensed with.

The vote was then announced as above recorded.

The bill as amended was ordered to be engrossed and read a third time; and being engrossed, it was accordingly read the third time.

Mr. REAGAN demanded the previous question on the passage of the

Mr. BAKER. I desire to move to recommit the bill with instructions to report forthwith the following amendment.

Mr. SPRINGER. I reserve all points of order on that amendment.

The SPEAKER. The time to make points of order is after it has been read.

Mr. SPRINGER.

Mr. SPRINGER. That is why I reserve all points of order.
Mr. BAKER. I think we will save time if I am permitted to state briefly the difference between this and the bill reported by the committee.

The SPEAKER. Is there objection?
Mr. SPRINGER and Mr. PAYSON. Let it be
The SPEAKER. The amendment will be read. Let it be read first.

The Clerk proceeded to read.

Mr. BAKER. I wish to call attention of the House to the fact that the gentleman from Texas who was so anxious to have this read through is not paying attention to it.

Mr. REAGAN. I have read it several times and know it well and

did not demand the reading of it.

The SPEAKER. Gentlemen will preserve order while the Clerk is reading

Mr. LAWLER. I ask by unanimous consent to dispense with the further reading.

Objection was made.

The reading of the motion to recommit was then concluded, as follows:

An act to regulate commerce; to create an interstate commerce commission and prescribe its power and duties.

and prescribe its power and duties.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the provisions of this act shall apply to any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water when both are used, under a common control, management, or a arrangement, for a continuous carriage or shipment, from one State or Territory of the United States to any other State or Territory of the United States to any other State or Territory of the United States to any other State or Territory of the United States through a foreign country to any other place in the United States through a foreign country to any other place in the United States through a foreign country and carried from any place in the United States and carried to such place from a port of transhipment, or shipped from a foreign country to any place in the United States and carried to such place from a port of entry either in the United States or an adjacent foreign country: Provided, however, That the provisions of this act shall not apply to the transportation of passengers or property, or to the receiving, delivering, storage, or handling of property, wholly within one State or Territory, and not shipped to or from a foreign country from or to such State or Territory, as aforesaid.

not apply to the transportation of passengers or property, or to the receiving, delivering, storage, or handling of property, wholly within one State or Territory, and not shipped to or from a foreign country from or to such State or Territory as aforesaid.

The term "railroad" as used in this act shall include all bridges and ferries used or operated in connection with any railroad, and the term "transportation" shall include all instrumentalities of shipment or carriage.

All charges made for any service rendered or to be rendered in the transportation of passengers or property as aforesaid, or in connection therewith, or for the receiving, delivering, storage, or handling of such property, shall be reasonable and just; and every unjust and unreasonable charge for such service is prohibited and declared to be unlawful.

Sec. 2. That if any common carrier subject to the provisions of this act shall, directly or indirectly, by any special rate, rebate, drawback, or other device, charge, demand, collect, or receive from any person or persons a greater or less compensation for any service rendered, or to be rendered, in the transportation of passengers or property, subject to the provisions of this act, than it charges, demands, collects, or receives from any other person or persons for doing for him or them a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar circumstances and conditions, such common carrier shall be deemed guilty of unjust discrimination, which is hereby prohibited and declared to be unlawful; and any common carrier who shall violate the provisions of this section as a sforesaid shall be liable to all persons who have been charged a higher rate than was charged any other person or persons for the difference between such higher rate and the lowest rate was made on any time contract or understanding, the said common carrier who shall violate the provisions of this act, to make or give any undue or unreasonable preference or advantage to an

ions of this act to charge or receive any greater compensation in the aggregate for the transportation of passengers or of like kind of property, under substantially over the same line, in the same direction, and from the same original point of departure or to the same point of arrival; but this shall not be construed as auctivative or to the same point of arrival; but this shall not be construed as auctivative or to the same point of arrival; but this shall not be construed as auctivative or to the same point of arrival; but this shall not be construed as auctivative or to the same point of arrival; but this shall not be construed as auctivative or the construence of t

than five shall belong to the same political party. Said commissioners shall be first appointed within thirty days after the passage of this act, and shall be legal residents of the State from which they shall respectively be appointed. At least three of the commissioners to be first appointed under this act shall be experienced in railroad affairs, and at least three of their number shall be experienced in commercial or agricultural business. And no person in the employ of or holding any official relation to any railroad company or other transportation company or corporation, or who is many manner interested in any firm or corporation having business relations with any railroad or other transportation company or corporation, or who is engaged in any other business vocation, shall be eligible to act as a commissioner. Said commissioners shall, before entering upon their duties as such, take and subscribe the constitutional oath of office and be sworn to the due and faithful performance of the duties thereof; and any five of said commissioners shall constitute a quorum for the transaction of any of the duties or business of said commission, and may hold meetings thereof at any time or place within the United States or Territories and in the District of Columbia. All examinations or investigations provided for by this act may be held and taken by and before any one of said commissioners if so ordered and directed by said commission, but the proceedings and decisions of said single commissioner therein shall not be deemed final and conclusive until approved and confirmed by said commission.

mission, but the proceedings and decisions of said single commissioner therein shall not be deemed final and conclusive until approved and confirmed by said commission.

Sec. 9. That the commission hereby created shall have authority to inquire into the management of the business of all common carriers subject to the provisions of this act, and shall keep itself informed as to the manner and method in which the same is conducted, and shall have the right to obtain from such common carriers full and complete information necessary to enable the commission to perform the duties and carry out the objects for which it was created; and for the purposes of this act the commission shall have power to require the attendance and testimony of witnesses and the production of all books, papers, tariff's, contracts, agreements, and documents relating to any matter under investigation, and to that end may invoke the aid of any court of the United States in requiring the attendance and testimony of witnesses and the production of books, papers, and documents under the provisions of this section.

And any of the circuit courts of the United States within the jurisdiction of which such inquiry is carried on may, in case of contumacy or refusal to obey a subpectual interest of the court may of the circuit courts of the United States within the jurisdiction of other person, issued to any common carrier subject to the provisions of this act, or other person, issue an order requiring such common carrier or other person to appear before said commission (and produce books and papers if so ordered) and give evidence touching the matter in question; and any failure to obey such order of the court may be punished by said court as for a contempt thereof.

Sec. 10. That any person, firm, corporation, or association, or any mercantile, agricultural, or manufacturing society, or any body-politic or municipal organization complaining of anything done or omitted to be done by any common carrier subject to the provisions of this act in contrave

the matters complained of in such manner and by such means as it shall deem proper.

Said commission shall in like manner investigate any complaint forwarded by the railroad commissioner or railroad commission of any State or Territory, at the request of such commissioner or commission, and may institute any inquiry on its own motion in the same manner and to the same effect as though complaint had been made.

Said commission may in like manner investigate any differences, disagreements, controversies, or disputes that may at any time exist or arise between any railroad company or corporation and the employés thereof, and in case of any differences or disagreements involving the hours of, or the compensation for, labor by the employés of any railroad company or corporation, said commission shall immediately upon receipt by them, from a duly recognized representative of such employés of any such railroad corporation or company of a statement in writing of the differences existing and of the demands or requests made, proceed to investigate and determine the same, exercising therefor all the powers conferred by section 9 of this act, and the decision or award of such commission shall relate back to the date when such differences arose: Provided, Such employés shall not, pending such investigation, obstruct or prevent the usual operation of such railroad and the prosecution of the business thereof as fully and freely as if no differences existed.

No complaint shall at any time be dismissed because of the absence of direct damage to the complainant.

Sec. 11. That whenever an investigation shall be made by said commission, its shall be its duty to make a report in writing in respect thereto, which shall lies and the same and the same proves the respective of the complainant.

freely as if no differences existed.

No complaint shall at any time be dismissed because of the absence of direct damage to the complainant.

Sec. 11. That whenever an investigation shall be made by said commission, it shall be its duty to make a report in writing in respect thereto, which shall include the findings of fact upon which the conclusions of the commission are based, together with its recommendation as to what reparation, if any, should be made by the common carrier to any party or parties who may be found to have been injured; and such findings so made shall thereafter, in all judicial proceedings, be deemed prima factic evidence as to each and every fact found.

All reports of investigations made by the commission shall be entered of record, and a copy thereof shall be furnished to the party who may have complained, and to any common carrier that may have been complained of.

Sec. 12. That if in any case in which an investigation shall be made by said commission it shall be made to appear to the satisfaction of the commission, either by the testimony of witnesses or other evidence, that anything has been done or omitted to be done in violation of the provisions of this act, or of any law cognizable by said commission, by any common carrier, or that any injury or damage has been sustained by the party or parties complaining, or by other parties aggrieved in consequence of any such violation, it shall be the duty of the commission to forthwith cause a copy of its report in respect thereto to be delivered to such common carrier, together with a notice to said common carrier to cease and desist from such violation, or to make reparation for the injury so found to have been done, or both, within a reasonable time, to be specified by the commission; and if, within the time specified, it shall be made to appear to the commission that such common carrier has ecased from such violation of law, and has made reparation for the injury found to have been done, in complained with the report and notice of the c

the matter, on such short notice to the common earrier complained of as the court shall deem reasonable; and such notice may be served on such common clirect; and said court shall proceed to hear and determine the matter speedily as a court of squilty, and without the formal pleadings and proceedings applications of the court of squilty, and without the formal pleadings and proceedings applications; and to this end such court shall have power, if it think fit, to direct and prosecute, in such mode and by such persons as it may appoint, all such increase the court of such persons as the may appoint, all such increase the court of such persons as the property of such persons of such persons of such persons of such persons of such court, or such hearing or on report of any such person or personal to such court, or such hearing or on report of any such person or personal to the court, or such hearing or on report of any such write of injunction or other proper process, mandatory or otherwise, to restrain the such order or requirement of said commission, and enjoining obedience of such order or requirement of said commission, and enjoining obedience of such order or requirement of said commission, and enjoining obedience of such order or requirement of said commission, and enjoining obedience of such order or requirement of said commission, and enjoining obedience of the same; and in case of any disobedience of any such write of injunction or other proper process, mandatory or otherwise, and said court may, if is shall think in, make any control of the proper process, mandatory or otherwise, and said court may, if is shall think in, make any control of the proper process, mandatory or otherwise, and said court may, if is shall think in, make any injunction or other proper process, mandatory or otherwise, and said court may, or the court of the fundament of the proper process, mandatory or otherwise, and such moneys shall be payable as the court shall direct, either to the payer may not be such as a such more shall b

Provided. That the time when any common-law remedy shall be suspended under this section shall not be counted under any statute of limitation against such remedy.

SEC. 21. That no person or corporation shall have authority to engage in interstate commerce after three months from the passage of this act without having procured a license for that purpose from the board of commissioners herein provided for, and one of the conditions of such license shall be the acceptance of this act by such person or corporation, and of such regulations as said board may lawfully make in pursuance thereof. And where any route over which interstate commerce shall be carried between the several States and Territories of the United States includes as a part thereof a railway or water route outside of the United States, no license shall issue for the transportation of interstate commerce over such route, unless the railway company or companies controlling the portions of such route situated within the United States become responsible for and guarantee the observance by those controlling the portions of when any transportation company or companies shall carry traffic between any points over a route or routes located entirely within one State in competition with other companies whose lines between said points are located in more than one State, such company shall, as a condition-precedent to the granting of such license, agree to establish the rates between such points and post schedules thereof in the manner prescribed in, and be subject to the provisions of the sixth section of this act. Such license shall be renewable each year, and may be suspended by the said board for cause after full hearing, and upon the final judgment of a court of competent jurisdiction may be revoked by the said board for a violation of its terms or of the provisions of this act: Provided, That the provisions of this act shall not apply to passenger traffic.

Sec. 22. That the sum of \$150,000 is hereby appropriated for the use and purposes of this act shall

Mr. BAKER. Mr. Speaker, I ask by unanimous consent to be permitted to explain briefly the changes in the pending proposition from the Senate bill.

The SPEAKER. Is there objection?

Mr. REAGAN. I have to object, because if the gentleman from New York be heard what he will say will render necessary remarks on the part of other members

Mr. LONG. Give him five minutes.

Mr. REAGAN. I must object.

The question recurred on the motion to recommit.

The House divided; and there were-ayes 47, noes 109.

Mr. BAKER. No quorum.

The SPEAKER appointed, as tellers, Mr. REAGAN and Mr. BAKER. Mr. WARNER, of Ohio. We might just as well have the yeas and

nays at once.

Mr. PAYSON. I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and it was decided in the negative-yeas 70, nays 158, not voting 94; as follows:

So the motion to recommit with instructions was not agreed to.

The following additional pairs were announced:

Mr. WADE with Mr. GREEN, of New Jersey.

Mr. WHITE, of Minnesota, with Mr. Ermentrout, until further no-

Mr. WADE. I am paired with the gentleman from New Jersey [Mr. Green], and should have voted in the affirmative on this proposition if I had not been paired.

The result of the vote was then announced as above recorded.

The question recurred upon the passage of the bill.

Mr. O'NEILL, of Pennsylvania. I should like to know if the reading of the engrossed bill might not now be demanded? Has the bill

been engrossed?

The SPEAKER. This is already an engrossed bill. The House never orders a Senate bill to be engrossed.

Mr. O'NEILL, of Pennsylvania. I simply wanted to hear it, as it has been some time since it was read, but I shall not insist upon its reading now.

Mr. CALDWELL. I demand the yeas and nays on the passage of the bill.

The yeas and nays were ordered.

The question was taken; and there were-yeas 192, nays 41, not voting 89; as follows:

So the bill was passed.

On motion of Mr. BROWNE, of Indiana, by unanimous consent the reading of the names was dispensed with.

The following additional pairs were announced:

Mr. PEEL with Mr. Allen, of Massachusetts, until further notice.
Mr. McKinley with Mr. Mills, during the remainder of the session.
Mr. McKinley would vote for the Reagan bill if present.

Mr. DUNN. If my colleague, Mr. PEEL, were present he would vote "ay."

The result of the vote was then announced as above recorded.

Mr. REAGAN moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the

The latter motion was agreed to.

Mr. REAGAN. I now move that the House request a conference with the Senate upon this bill.

Mr. O'NEILL, of Pennsylvania. I hope that will not be done until the bill comes back from the Senate. They may agree to it just as it

the bill comes back from the Senate. They may agree to it just as it stands. You can not tell. [Laughter.]

The motion of Mr. REAGAN was agreed to.

The SPEAKER. The Chair will announce the conferees hereafter.

Mr. REAGAN. I wish to state, Mr. Speaker, in reference to the announcement of a pair between my colleague, Mr. MILLS, and Mr. MCKINLEY, that Mr. MILLS also would have voted in the affirmative on this bill if present.

MESSAGE FROM THE PRESIDENT.

A message in writing from the President of the United States was communicated to the House by Mr. PRUDEN, one of his Secretaries, who also informed the House that the President had approved acts of the following titles:

Joint resolution (H. Res. 22) authorizing the preparation of a compilation of the reports of committees of the Senate and House of Rep-

Joint resolution (H. Res. 54) to credit Lieutenants Giles B. Harbor and William H. Scheutze with sea-duty and sea-pay while engaged in the search for Lieutenant Chipp and party, and also for the time employed in bringing home the remains of Lieutenant-Commander De Long and party;
An act (H. R. 3720) for the relief of Francis H. Plummer;

An act (H. R. 1983) to increase the appropriation for the erection of the public building at Reading, Pa.;

An act (H. R. 4670) granting to the county of Clatsop, in the State

of Oregon, the right to construct a bridge across Young's Bay, a navigable stream in said county and State:

An act (H. R. 6337) for the relief of James D. Wood;
An act (H. R. 7191) to provide for the enlistment and pay and to define the duties and liabilities of "general-service clerks" and "general-service messengers" in the Army;
An act (H. R. 7881) to remove the political disabilities of Thomas

R. Ware, of Virginia;
An act (H. R. 8023) to give the assent of Congress to the construction of a bridge by the municipalities of Menominee, Mich., and Marinette, Wis., over Menominee River; and

An act (H. R. 9208) to permit the entry free of duty of foreign goods for exhibition at the fourth biennial exhibition of the United States Bottlers' Protective Association.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. SYMPSON, one of its clerks, informed the House that the Senate agreed to the amendments of the House of Representative to Senate bills of the following titles:

A bill (S. 718) for the relief of Francis Gilbeau; and

A bill (S. 1008) to empower the Board of Foreign Missions of the

Methodist Protestant Church to hold property in the District of Co-

The message further announced that the Senate disagreed to the amendment of the House of Representatives to the bill (S. 2172) restoring to the United States certain of the lands granted to the Northfrom Lake Superior to Puget Sound, and to restore the same to settlement, and for other purposes, agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. DOLPH, Mr. TELLER, and Mr. COCKRELL conferees on the part of the Senate.

The message further announced that the Senate had passed, with amendments in which the concurrence of the House was requested, the bill (H. R. 28) to provide for the appointment and compensation of a district judge for the southern district of Alabama.

The message also announced that the Senate disagreed to the amendments of the House of Representatives to the bill (S. 1599) for the relief of the Phœnix National Bank, of the city of New York, asked a conference with the House on the disagreeing votes of the two Houses thereon, and had appointed as the conferees on the part of the Senate Mr. EVARTS, Mr. INGALLS, and Mr. VEST.

The message also announced that the Senate had passed with amendments the bill (H. R. 9857) in relation to the western judicial district of Wisconsin, requested a conference with the House of Representatives on the said bill and amendments, and had appointed Mr. EDMUNDS, Mr. EVARTS, and Mr. PUGH as conferees on the part of the Senate.

The message also returned to the House in compliance with its request the joint resolution (H. Res. 295) permitting the public building authorized by act of Congress approved June 13, 1886, at Savannah, Ga., to be located not less than 40 feet from any other building, instead of 50 feet, as provided in said act.

RIVER AND HARBOR APPROPRIATION BILL.

Mr. BLANCHARD. I rise to a privileged motion.

The SPEAKER. The gentleman will state it.

Mr. BLANCHARD. I present a report of the committee of conference on the bill known as the river and harbor bill, which I ask to have read with the accompanying statement.

Mr. HATCH. I give notice that I shall raise the question of consideration on that report in favor of the Senate bill reported by the

Committee on Agriculture.

Mr. RANDALL. What bill is that?

Mr. HATCH. The amendment to v The amendment to what is known as the pleuropneumonia bill.

Mr. CONGER. I call up the special order set for to-day, the consideration of the pension bills on the Calendar which were postponed Mr. CONGER.

until this day.

The SPEAKER. There is a privileged report before the House.

Mr. BROWNE, of Indiana. Can not the question of consideration

The SPEAKER. It can be. The Chair will state that before the adoption of the present rules it was the duty of the Chair whenever any resolution or proposition came before the House to submit the question whether the House would then proceed to consider it. But the rule now provides that this question shall not be put unless demanded by some gentleman, and this applies to every proposition of every character that may come before the House. The Clerk will read the rule.

The Clerk read clause 3 of Rule XVI, as follows:

When any motion or proposition is made the question, Will the House now consider it? shall not be put unless demanded by a member.

The SPEAKER. The Chair will state that while the gentleman has the right to make the report and submit it to the House, any gentleman has the right to raise the question whether the House will now proceed to consider it. If the House refuses to consider it it remains on the table, to be called up as a matter of privilege whenever the gentleman sees proper.

Mr. WEAVER, of Nebraska. I ask unanimous consent to have a committee of conference appointed on House bill No. 5003.

The SPEAKER. There is a conference report now pending before the House. The Clerk will read the report.

The Clerk proceeded to read the report.

Mr. DUNN (interrupting the reading). I am satisfied that the difference between the bill as it was before the House and as it is now reported by the committee of conference may be stated by the gentle-

man in charge of the report so as to save time in the reading.

Mr. HATCH. I call for the regular order.

The SPEAKER pro tempore (Mr. BLAND). The regular order being called for, the Clerk will proceed with the reading.

The Clerk continued and completed the reading of the conference report of follows:

port, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7480) "making appropriations for the repairs, construction, and preservation of certain public works on rivers and harbors, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as

That the House recede from its disagreement to the amendments of the Senate and concur in the same with an amendment to which the Senate agrees, to wit: Strike out all after the enacting clause of the Senate amendment and in-

wit: Strike out all after the enacting clause of the Senate amendment and insert the following:

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: Strike out all after the enacting clause and insert the following:

That the following sums of money be, and are hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated, and to be expended under the direction of the Secretary of War, for the construction, completion, repair, and preservation of the public works herein named:

Improving harbor at Rockland, Me.: Continuing improvement, \$22,500.

Improving harbor at Apalachicola Bay, Florida: Continuing improvement, \$12,000; of which \$2,000 may, in the discretion of the Secretary of War, be expended at the Carabello or Crooked River.
For examination and survey of the entrance to harbor at Key West, Fla., \$2,500.
Improving harbor at Pensacola Fla., Carating in the Caraberra of the Secretary of War, be expended at the Carabello or Crooked River.

\$2,500.

Improving harbor at Pensacole, Fla.: Continuing improvement, \$20,000.

Improving harbor at Tampa Bay, Florida: Continuing improvement, \$10,000.

Improving harbor at Gedar Keys, Fla., \$7,000.

Improving harbor at Mobile, Ala.: Continuing improvement, \$90,000.

Improving harbor at Bioxi Bay, Mississippi: Continuing improvement, \$12,-500; which sum, together with the money on hand heretofore appropriated for the roadstead, is hereby directed to be used in deepening the channel from Mississippi Sound to the wharves at Biloxi.

Improving Aransas Pass and Bay up to Rockport and Corpus Christi, Tex.: Continuing improvement, \$101,250.

Improving Brazos Santiago Harbor, Texas: Continuing improvement, \$37,500.

Improvement of entrance to Galveston Harbor, Texas: Continuing improvement, \$37,500.

Improving Pass Cavallo, Texas: Continuing improvement, \$37,500.
Improving Sabine Pass and Blue Buck Bar, Texas: Continuing improvement, \$198,750.

\$198,750.

Improving ship-channel in Galveston Bay, Texas, from Morgan's Cut to Bolivar Channel: Continuing improvement, for which purpose the balance now remaining of the money heretofore appropriated for this work is hereby directed to be expended by the Secretary of War in the completion of said channel, in accordance with the plans heretofore adopted, and in marking out said channel by piles or stakes, so as to enable navigators to find the same without difficulty.

Improving harbor at Ashtabula, Ohio: Continuing improvement, \$30,000.

Improving harbor at mouth of Black River, Ohio: Continuing improvement, \$10,000.

\$10,000.

Improving harbor at Cleveland, Ohio, on the last plan projected, \$93,750; of which \$30,000 are to be used in building a parapet on the existing break water, and the \$100,000 now on hand to be available for work on the last plan.

Improving harbor at Fairport, Ohio: Continuing improvement, \$18,750.

Improving barbor at Huron, Ohio: Continuing improvement, \$3,000.

Improving ice-harbor at the mouth of the Muskingum River, Ohio: Continuing improvement, \$37,500.

Improving harbor at Port Clinton, Ohio, by repairs of existing works, \$2,000.

For the purpose of acquiring the title to the land adjoining the inn \$\mathbf{e}\$ end of the west pier built by the United States for the improvement of the harbor at Port Clinton, Ohio, the Secretary of War shall negotiate with the owner or owners of the land for the purchase thereof at a reasonable price, to be approved by Congress; and if an agreement as to price can not be made with the owner, then the value of the same shall be ascertained in the mode provided by

the laws of Ohio for the condemnation of lands for public uses in that State, the result of said proceedings of condemnation, if taken, to be reported to the next Congress for its approval.

Improving harbor at Sandusky City, Ohio, by dredging the channel through the outer bar and within the bay; and for this purpose the money appropriated by act of July 5, 1884, now on hand, is hereby made available, and the further sum of \$5,000 is hereby appropriated.

Improving harbor at Toledo, Ohio: Continuing improvement of the Maumee River by a straight channel along such line as may be approved by the Secretary of War, \$112,500 and the balance of the \$25,000 heretofore appropriated are hereby made available for clearing the old channel.

Improving harbor at Vermillion, Ohio: Continuing improvement, \$3,000.

Improving harbor at Michigan City, Ind.: Continuing improvement, \$10,000.

Improving harbor at Calumet, Ill.: Continuing improvement, \$75,000.

Improving harbor at Charlevoix and entrance to Pine Lake, Mich.: Continuing improvement, \$20,000.

Improving harbor at Cheboygan, Mich.: Continuing improvement, \$10,000.

Improving harbor at Cheboygan, Mich.: Continuing improvement, \$10,000.

Improvement, \$10,000.

Improving harbor at Cheboygan, Mich.: Continuing improvement, \$15,000.

Improving harbor at Frankfort, Mich., by extension of piers and repairs:

Continuing improvement, \$7,000.

Improving harbor at Grand Haven, Mich.: Continuing improvement, \$30,000.

Improving harbor of refuge at Grand Marais, Mich.: Continuing improvement, \$26,250.

nenf, \$26,250.

Improving harbor at Ludington, Mich.: Continuing improvement, \$56,250.

Improving harbor at Manistee, Mich.: Continuing improvement, \$10,000.

Improving harbor at Marquette, Mich.: Continuing improvement, \$10,000.

Improving harbor at Monroc, Mich.: By repairs, \$2,000.

Improving harbor at Monroc, Mich.: Continuing improvement, \$12,500.

Improving harbor at Ontonagon, Mich.: Continuing improvement, \$13,000.

Improving harbor at Pent Water, Mich.: Continuing improvement, \$10,000.

Improving harbor at Pent Water, Mich.: Continuing improvement, \$10,000. \$15,000.

Improving and repairing harbor of refuge at Sand Beach, Michigan; Continuing improvement, \$75,000; of which not exceeding \$37,500 are to be used in

repairs.

Improving harbor at Saint Joseph, Mich.: Continuing improvement, \$10,000.

Improving harbor at Saugatuck, Mich.: To complete improvement, \$8,000.

Improving harbor at South Haven, Mich.: Continuing improvement, \$5,000.

Improving harbor at White River, Michigan: Continuing improvement, \$10,-

O00.

Improving harbor at Black Lake, Mich.: Continuing improvement, \$5,000. Improving harbor at Ahnapee, Wis.: Continuing improvement, \$15,000; but no part of said sum is to expended until the wharfage over the Government piers at that port shall be made free.

Improving harbor at Green Bay, Wis.: Continuing improvement, \$7,000. Improving harbor at Kenosha, Wis.: Continuing improvement, \$5,000. Improving harbor at Kewaunee, Wis.: Continuing improvement, \$10,000. Improving harbor at Manitowoc, Wis.: Continuing improvement, \$10,000. Improving harbor at Menominee, Wis.: Continuing improvement, \$3,000. Improving harbor of refuge at Milwaukee, Wis.: Continuing improvement on bay and harbor, \$60,000.

Improving harbor at Oconto, Wis.: Continuing improvement, \$8,000. Improving harbor at Port Washington, Wis.: Continuing improvement, \$5,000.

Improving harbor at Racine, Wis.: Continuing improvement, \$10,000.

Improving harbor at Superior Bay and Saint Louis Bay, Wisconsin: Continuing improvement, \$22,500; and the engineer in charge, in his next annual report, shall submit an estimate of the cost of a dredge-boat or other facilities that may be needed for dredging the harbors of Duluth and Superior. Thirteen thousand five hundred dollars of the money hereby appropriated are to be expended in dredging in said Superior Bay and Harbor, and in repairing piers at natural entry, and \$3,000 in dredging Saint Louis Bay, along the dock-line on the Wisconsin shore, from deep water at Connor's Point toward deep water at Grassy Point.

Improving harbor at Sheboygan. Wis.: Continuing improvement \$15,000.

expended in dredging in said Superior Bay and Harbor, and in repairing piers at natural entry, and \$9,000 in dredging Saint Louis Bay, along the dock-line on the Wisconsin shore, from deep water at Connor's Point toward deep water at Grassy Point.

Improving harbor at Sheboygan, Wis.: Continuing improvement, \$15,000. Improving harbor at Shugeon Bay, Wis.: Continuing improvement, \$20,000. Improving harbor at Ashland, Wis.: Continuing improvement, \$22,500. For making free of toll to commerce the Sturgeon Bay and Lake Michigan, Ship-canal, connecting the waters of Green Bay with Lake Michigan, in the State of Wisconsin, \$112,500, or so much thereof as may be necessary: Provided, That no part of said sum shall be expended until the Secretary of War shall have caused an examination to be made by a board of three United States engineers into the importance and value to commerce and navigation of the free use of said ship-canal, and unless the report of said board shall be in favor of making said canal free to commerce: And provided further, That no part of said sum shall be expended until the Secretary of War shall be satisfied, upon investigation, as to the actual cost of said canal to said company; and then only so much of said sum shall be expended as the said Secretary of War shall be satisfied is necessary to reimburse the said company for advances and expenses actually made and incurred in constructing said canal, and in maintaining the same, over and above the net proceeds of the lands granted by Congress to aid in constructing said canal, and over and above the tolls received therefrom, with interest, as provided by the act of Congress making said grant, approved April 10, 1866; and none of said moneys shall be expended except upon a full and abborite conveyance to the United States of said ship-canal, harbor, easements, rights of said work, free and clear of all liens and incurrences and provenents, rights of said work, free and clear of all liens and incurrences and provenents, rights of said work, free and

Improving harbor at Red Wood, Cal.: Continuing improvement, \$5,000.

The sum of \$5,000, or so much thereof as may be necessary, is hereby appropriated for examination, survey, and estimated cost of obtaining a channel 250-feet wide and 24 feet deep at mean low water across the outer bar, and from thence to a point abreast of beacon No. 2, in San Diego Harbor, California; also, of obtaining a navigable channel at least 8 feet in depth at mean low water at Newport Harbor, California; also, of the establishment of a breakwater extending in a southeasterly direction one-fourth of a mile, more or less, along the sunken reef commencing at or near Whaler's Point, so called, at San Luis Obispo Harbor, California.

Improving harbor at Wilmington, Cal.: Continuing improvement, \$75,000.

For removing obstructions in the Missouri River, \$22,500.

Improving the Ohio River: Continuing improvement, \$375,000; out of which sum \$37,500 are to be expended at Grand Chain in removing rocks and other obstructions to navigation at that locality, a sia \$18,730 may be expended in condition of the Great Missouri River, near its junction with the Ohio, as may be necessary to confine the waters of the Great Missin River, near its junction with the Ohio, as may be necessary to confine the waters of the Great Missin River, near its junction with the Ohio, as may be necessary, of said appropriation shall be expended at Great Missin River, and an accordance of the Great Missin River, and the Chief, of the end that the formation of the bar in the Ohio River and the American Stage Stage

portion of this appropriation shall be expended to repair or build levees for the purpose of reclaiming lands or preventing injury to lands or private property by overflows: Provided, however, That the commission is authorized to repair and build levees if, in their judgment, it should be done as part of their plan to afford ease and safety to the navigation and commerce of the river and to deepen the channel: And provided further, That the expenditure of so much of said appropriation as may be required to continue tise improvement of Plum Point and Lake Providence reaches shall be confined to the complete repair and maintenance of the levees throughout said reaches to the height of 2 feet above the flood of 1882, and to the completion of the permeable works of contraction to such extent as may be required to bring the high-water banks of the river to the comparative uniformity of width contemplated in the property of the secretary of War for 1881, volume 2, part 3, page 2783: And provided further, That no works of bank protection or revertment shall be executed in said reaches or elsewhere until a ser it shall be found that the completion of the permeable contracting works and uniform width of the high-water channel will not secure the desired stability of the river-banks: Provided, however, That nothing herein contained shall prevent the construction of revertment works where the banks are caving at Greenville reach, Delta Point, in front of the cities of Vicksburg, Memphis, Hickman, and Columbus: And provided further, That contraction works shall be built at the same time in the wide portions of the river immediately above thesaid revenuentworks. Of the amount herein appropriate to represent works. Of the amount herein propries at New Orseland to the complete of the contraction works shall be built at the same time in the wide portions of the cities of Vicksburg, Memphis, and of keeping open an averaged to the contraction of the Red and A tenfalays Rivers by preventing further enlargement of the latter strea

as may be deemed by the United States officer supervising the improvement of said harbor most judicious and practicable and for the best interests of such improvement.

Sec. 4. The Secretary of War shall prescribe such rules and regulations as may be necessary to secure a judicious and economical expenditure of the money herein appropriated, and shall cause to be made and submitted to Congress annual reports, together with maps and plans, including the report of the Mississippi River Commission, on or before December 1, giving detailed statements of the work done, contracts made, the expenditures thereunder or otherwise, and balances of money on hand up to November 1, and the effect of such work, together with such recommendations as he may deem proper. He shall, at the same time, report to Congress all cases in which piers, breakwaters, locks, and dams, or other structures or works built or made by the United States in aid of commerce or navigation are used, occupied, or injured by a corporation or an individual, and the extent and mode of such use, occupation, or injury. He shall report, at the same time, whether any bridges, causeways, or structures now erected or in process of erection do or will interfere with free and safe navigation.

Sec. 5. It shall be the duty of the Secretary of War to apply the money herein appropriated for improvements other than surveys and estimates, in carrying on the various works, by contract of the rules, as may be most economical and advantageous to the Government. Where said works are done by contract, such contract shall be made after sufficient public advertisement for proposals, in such manner and form as the Secretary of War shall prescribe; and such contract shall be made after sufficient public advertisement for proposals, in such manner and form as the Secretary of War shall prescribe; and such contract shall be made after sufficient public advertisement for proposals, in such manner and form as the Secretary of War shall prescribe; and such contracts as the Secretar

SEC. 6. For examinations, surveys, and contingencies, and for incidental repairs, for which there is no special appropriation, for rivers and harbors, \$100,000: Provided, That no survey shall be made of any harbors or rivers until the Chief of Engineer shall have directed a preliminary examination of the same by the local engineers in charge of the district, or an engineer detailed for the purpose; and such local or detailed engineer shall report said Chief of Engineers whether, in his opinion, said harbor or river is worthy of improvement, and shall state in such report fully and particularly the facts and reasons on which he bases such opinion, including the present and prospective demands of commerce; and it shall be the duty of the Chief of Engineers to direct the making of such survey if, in his opinion, the harbor or river proposed to be surveyed be worthy of improvement by the General Government; and he shall report to the Secretary of War the facts, and what public necessity and convenience may be subserved thereby, together with the full reports of the local engineer. Said reports of preliminary examinations and surveys shall be made to the House of Representatives, and are hereby ordered to be printed when so made.

made.

SEC. S. That the Secretary of War shall report to Congress, at its next and each succeeding session thereof, the name and place of residence of each civilian engineer employed in the work of improving riversand harbors by means and as a result of appropriations made in this and succeeding river and harbor ap-

propriation bills, the time so employed, the compensation paid, and the place at and work on which employed.

And the Senate agree to the same.

NEWTON C. BLANCHARD, THOS. J. HENDERSON. Managers on the part of the House. S. J. R. MCMILLAN, O. D. CONGER. M. W. RANSOM, Managers on the part of the Senate.

Mr. BLANCHARD and Mr. HATCH rose.

Mr. HATCH. I move that the House take a recess until 8 o'clock this evening for business under the special order.

The SPEAKER. The rules require the managers of the conference on the part of the House to present a written statement. The gentleman from Louisiana [Mr. BLANCHARD] desires to make a request with regard to that statement.

Mr. BLANCHARD. I ask unanimous consent to dispense with the reading of the statement and that it be printed in the RECORD.

Mr. HATCH. I object. Mr. BROWNE, of Indiana. Mr. BROWNE, of Indiana. Let it be printed with the understanding that the RECORD shows the question of consideration is pending.

Mr. HATCH. I want every member here to hear it read and to read it in the RECORD. This is unlike any other report ever made from a

conference committee of the House.

Mr. BURROWS. The mere reading will not convey so much information as seeing the statement in print. Let it be printed.

Mr. RANDALL. I move that the House do now adjourn.

The question being taken, there were—ayes 66, noes 57.

Mr. BAYNE and Mr. HEPBURN called for tellers.

The SPEAKER. The hour of 5 o'clock having arrived the House under its previous order is in recess until 8 o'clock this evening.

EVENING SESSION.

The recess having expired, the House reassembled at 8 o'clock p. m., and was called to order by Mr. McMillin, as Speaker pro tempore. The Clerk read the following letter from the Speaker:

SPEAKER'S ROOM, HOUSE OF REPRESENTATIVES, Washington, D. C., July 30, 1886.

Hon. Benton McMillin is designated to preside as Speaker pro tempore at the session of the House this evening. JOHN G. CARLISLE, Speaker.

Hon. John B. Clark, Jr., Clerk House of Representatives.

LOUISE PAUL. Mr. MATSON. Before moving that the House go into Committee of the Whole House to consider pension bills on the Private Calendar I ask unanimous consent on behalf of the gentleman from New York [General VIELE] to call up a bill from the Calendar for consideration in the House. General Paul, at the battle of Gettysburg, had both eyes shot out. He lived until within the last three months. I was informed by Major Maginnis, formerly a Delegate from Montana, and who was acquainted with General Paul, that for ten years prior to his death he had spasms every half-hour. He was a great sufferer, and died without leaving his family any property. His family is now separated, not being able to maintain a home. I feel that this is a case that ought to be considered, and I ask unanimous consent that the Committee of the Whole House be discharged from the further consideration of the bill, and that it be now considered.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll the name of Louise Paul, widow of Brig. Gen. Gabriel R. Paul, deceased, late of the United States Army, and pay her a pension at the rate of \$50 per month, from and after the passage of this act.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana that the Committee of the Whole House be discharged from the further consideration of this bill and that it be now considered?

Mr. WALLACE. Reserving the right to object, I ask for the reading of the report.

The Clerk read in part the report (by Mr. LOVERING), as follows: The Committee on Invalid Pensions, to whom was referred the bill (S. 2502) granting a pension to Louise Paul, having had the same under consideration, report back the bill, adopting the Senate report as their own, and recommend the passage of the bill.

[Senate Report No. 1262, Forty-ninth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (8, 2502) granting a pension to Louise Paul, have examined the same, and report:

The claimant, Louise Paul, is the widow of the late Brig. Gen. Gabriel R. Paul. She has presented the following statement in support of the present bill granting her a pension as his widow:

Statement of facts in support of a bill to grant a pension to Louise Paul, widow of Brig. Gen. G. R. Paul, United States Army.

Brig. Gen. Gabriel R. Paul was born in Saint Louis, Mo., appointed to West Point from that State, and graduated in July, 1834. From 1834 to 1839 he was on frontier duty, and in 1839 was engaged in the Forida war. From 1839 to 1842 he was on recruiting duty, and in 1842 was in the war against the Seminole Indians, a camp of whom he surprised near Tampa Bay. He served with distinction throughout the Mexican war, having taken part in the defense of Fort Brown, the battle of Monterey, siege of Vera Cruz, the battle of Cerro Gordo (where he was wounded), Contreras, Churubusco, and Molino del Rey. He led

the storming party at Chapultepec, which captured the enemy's flag, and was for this act of gallantry brevetted major. For his service in Mexico he was presented by the citizens of Saint Louis with a sword. From 1848 to 1850 he was in garrison at Fort Leavenworth, 1850-51 at Jefferson Barracks, and in 1851-52 on frontier duty at Corpus Christi, Tex.

In 1852 he served with the Rio Grande expedition, in which he captured Carvajal and his gang of desperadoes. He was also in the Utah expeditions of 1853-59-60, and was engaged in the surprise and capture of a camp of hostile Indians on Spanish Fork. He was actively engaged in the late war, having rendered valuable service in New Mexico in 1861-62. Subsequently he served with the Army of the Potomac, taking part in the battles of Fredericksburg and Chancelorsville and in its Pennsylvania campaign. At the battle of Gettysburg, while in command of a brigade, he was seriously wounded, a bullet entering his head about 14 inches behind the right eye and on a level with it, passing through his head and emerging through the left socket, carrying the left eye with it. Thus in an instant the vision of both eyes was completely destroyed, and at the same time the senses of smell and of hearing were greatly impaired.

From the effects of this wound he suffered acutely ever after in the shape of violent attacks of pain in the head and of epilepsy, necessitating the constant presence of an attendant. During the last few years of his life these epileptic attacks became very frequent, not only daily, but sometimes to the number of six during the day and night. It was in one of these attacks of unusual severity, and the direct consequences of it, that he died, as shown by the report of the attending Army surgeon, a certified copy of which is appended hereto.

The career of General Paul was a series of gallant exploits in his country's defense, covering a period of nearly thirty years of actual service in the field, and embracing the Florida wars, the Mexican war, and closing with th

R. A. MARMION, United States Navy.

Mr. BRECKINRIDGE, of Arkansas. Mr. Speaker, I suggest that

that is enough of the report. It gives a very full history of the case.

The SPEAKER pro tempore. Does the gentleman from Louisiana
[Mr. WALLACE] withdraw his demand for the reading of the report in full?

Mr. WALLACE. I do not desire to have it read further.

The SPEAKER pro tempore. The question is on ordering this bill

to a third reading.

Mr. PRICE. Mr. Chairman, I move to strike out the words "at the rate of fifty dollars per month from and after the passage of this act" and insert in lieu thereof the words "subject to the provisions and limitations of the pension laws."

Mr. WARNER, of Ohio. What would this widow be entitled to un-

der the law?

Mr. MORRILL. Thirty dollars a month.
Mr. WARNER, of Ohio. Is she receiving a pension now?
Mr. MORRILL. I judge not, from the report.
The SPEAKER. The question is on the amendment proposed by the gentleman from Wisconsin [Mr. PRICE].

Mr. MORRILL. Before that motion is put, Mr. Speaker, I desire to say that after listening to the report in this case I hope there is no member of this House who will object to giving this poor woman \$50 a month. I do not desire to take up time in discussing the case, but I call attention to the facts recited in the report as to the career of this officer. Fifty-one years spent in the service of his country, losing both eyes at the battle of Gettysburg, suffering for years all the tortures it is possible for any human being to suffer, and dying from the effects of his wounds—in view of such a record it seems to me that \$50 a month

is little enough for us to give the destitute widow of such a soldier.

Mr. PRICE. If the gentleman had not taken up time on this bill I would not have felt called upon to reply to him. Mr. Speaker, we are not persioning this officer. Mr. boart not pensioning this officer. My heart goes out in sympathy for that woman as much as that of the gentleman from Nebraska can possibly

do.

Mr. MORRILL. I am not from Nebraska.

Mr. PRICE. Kansas. I beg pardon of the Nebraska delegation. But the services and suffering of this officer have nothing to do with this case. The gentleman knows, and we all know, that there is neither sense nor honesty in giving this woman any extraordinary pension more than would be given to the widow of any other good soldier. However, I do not want to talk, and I will not take up the time of the House. [Cries of "Vote!" "Vote!"]

The question was taken on the amendment of Mr. PRICE, and it was

rejected.

The bill was then ordered to a third reading; and it was accordingly

Mr. MATSON moved to reconsider the vote by which the bill was passed; and also moved that the motion to reconsider be laid on the

The latter motion was agreed to.

Mr. MATSON. Mr. Speaker, I now move that the House resolve itself into Committee of the Whole for the purpose of considering the special order.

Mr. WALLACE. Mr. Speaker, before that question is put, I wish

to suggest that the thermometer seems to present about five degrees of temperature for each member who is present this evening, and under the circumstances I think a motion to adjourn would be very much in order. Therefore, I move that the House do now adjourn.

The motion was not agreed to.

The motion of Mr. MATSON that the House resolve itself into Committee of the Whole for the purpose of considering bills under the special order was then agreed to.

The House accordingly resolved itself into Committee of the Whole,

Mr. DOCKERY in the chair.

Mr. WEAVER, of Iowa. Mr. Chairman, I suggest that members present be allowed to call up such bills as they desire. There are some Senate bills that can be passed upon.

Mr. LONG. I must object to that, Mr. Chairman. six weeks to reach a case which is now near the head of the Calendar.

Mr. RICE. I must object also. Mr. LONG. Do I understand, Mr. Chairman, that the cases are to Mr. WEAVER, of Iowa. The gentleman can call his case up.
Mr. LONG. If I could be sure of an opportunity to call up my case

would not object.

Mr. GUENTHER. I must object, Mr. Chairman, to any such arangement. Let us take the cases in their regular order.

The CHAIRMAN. Objection is made. The Clerk will report the

bills on the Calendar in their order.

JACOB S. BIDDLE.

The first business was the bill (H. R. 4712) to place the name of Jacob S. Biddle on the pension-roll.

Mr. MATSON. I ask unanimous consent that that bill be passed

over informally.

There was no objection, and it was so ordered.

Mr. BRECKINRIDGE, of Arkansas. Mr. Chairman, I ask unanimous consent that when the title of a bill is read by the Clerk, if no one rises in his place to ask its consideration, it shall be at once passed

over by the Clerk without any formal motion to that effect.

The CHAIRMAN. That course will be pursued unless objected to.

Mr. WARNER, of Ohio. Then only the cases of those who have friends will be considered.

Mr. BRECKINRIDGE, of Arkansas. Well, there is nobody here to

speak for them. Mr. WARNER, of Ohio. Suppose there is a report and the committee are here

Mr. BROWN, of Pennsylvania. Regular order. Mr. WARNER, of Ohio. Give all an equal chance

The CHAIRMAN. Does the gentleman from Ohio [Mr. WARNER] object?

Mr. WARNER, of Ohio. No, I do not object.

The CHAIRMAN. In the absence of objection, that order will be made. The Chair requests that when the title of the bill is read, any gentleman desiring its consideration will rise in his place and so state.

FRIDOLINE GLASTETTER.

The first business on the Private Calendar was the bill (S. 2132) granting a pension to Fridoline Glastetter.

Mr. MORRILL. I ask the consideration of that bill.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Fridoline Glastetter, late a private in Company F, Second Illinois Light Artillery Volunteers.

Mr. WALLACE. I call for the reading of the report.

The report was read.

The CHAIRMAN. If there be no objection this bill will be laid aside to be reported to the House with a recommendation that it do

Mr. WALLACE. I think this is either the third or the fourth evening on which this bill has been presented; and it has been objected to on each occasion. From my standpoint it bears but little merit, and I shall object to it.

Mr. MORRILL. Then I ask unanimous consent that this bill be passed over informally, retaining its place on the Calendar. I will only say that I consider it a bill of a great deal of merit.

There being no objection, the bill was passed over informally, retaining its place on the Calendar.

SAMUEL SAWYER.

The next business on the Private Calendar was the bill (H. R. 4028) granting a pension to Samuel Sawyer.

Mr. RICE. I ask consideration of this bill.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Samuel Sawyer, late of Company G, Thirty-sixth Massachusetts Volunteers:

Mr. WALLACE. I call for the reading of the report in this case.

The report (by Mr. LOVERING) was read, as follows:

The report (by Mr. Lovering) was read, as follows:

The Committee on Invalid Pensions, to whom was referred House bill 4028, submitted the following report:

Samuel Sawyer enlisted in Company G, Thirty-sixth Massachusetts Volunteers, August 13, 1862, and was discharged for disability June 8, 1865; he filed declaration for pension June 28, 1880, alleging "heart, rheumatic, and kidney troutbles." His claim was rejected October 31, 1885, on the ground, "no record of alleged diseases, no satisfactory medical evidence of treatment in service or since discharge. Rheumatism only disease now found, and is not shown to have been contracted in service."

The evidence in this case is as follows:

Simon Goos, of Milibury, Mass., neighbors, testify:

"That they have known claimant since 1858; at time he enlisted, in 1862, and a long time prior thereto he was a strong, healthy man, apparently free from all bodily infirmity of sany kind, and particularly free from rheumatism, kidney, and heart disease, with which he was troubled on his return in June, 1885."

Edward T. Raymond, lieutenant and captain, testifies:

"Claimant was a strong, robust man when he entered the service, and was a good soldier, and that during his term of service he contracted disabilities and was under treatment in hospital for same."

Alonzo Davidson, captain claimant's company, says:

"Claimant was sent to United States general hospital at City Point, Va., in September, 1864, with chronic diarrhea and rheumatism, and was discharged the service by reason of disability."

Andrew J. Adams and David A. Powers, claimant's company, testify:

"That in June, 1863, from exposure, claimant was taken sick with what the regimental surgeon called 'heart and kidney trouble,' and that claimant suffered very much from same."

Warren Tyler, M. D., North Brookfield, assistant surgeon Thirty-sixth Massachusetts Volunteers, certifies:

"I have no doubt but that I treated Mr. Sawyer for the disease he describes in the winter of 1863."

George F. Parish, hospital steward,

The CHAIRMAN. If there be no objection, this bill will be laid aside to be reported to the House with a recommendation that it do pass.

Mr. WALLACE. I ask that this bill may go over.
The CHAIRMAN. The gentleman from Louisiana [Mr. WALLACE]

objects to the consideration of this bill.

Mr. RICE. I call for a vote.

The question being taken on laying the bill aside to be reported favorably to the House, there were—ayes 33, noes 1.
Mr. WALLACE. No quorum.

Tellers were ordered; and Mr. WALLACE and Mr. RICE were ap-

Mr. NEECE. I ask unanimous consent that this bill be passed over informally, retaining its place on the Calendar.

Mr. RICE. I object. This is as good a case as any on the Calendar. I know this man; I know all these witnesses.

Mr. GOFF. There could not be a stronger case. Mr. RICE. No better case is on the Calendar.

Mr. LYMAN. If we can not pass this bill we will go home.

The committee proceeded to divide; and the tellers reported—ayes 40.

The CHAIRMAN. Those voting in the negative will now pass between the tellers.

Mr. LOUTTIT. One member who is himself a teller can not pass

between the tellers. [Laughter.]
Mr. WALLACE. When I consider myself right, forty men out of three hundred and twenty-five are not going to persuade me out of my convictions. If they think they are going to do so, they are very much mistaken.

Mr. LONG. I hope the gentleman from Louisiana [Mr. WALLACE] will give me his attention one moment. I ask him whether, in view of the fact that he is the only member of the House voting against this bill, he does not think it worth while to give us the reasons why he thinks the bill should not pass. All the members now present with the exception of the gentleman are satisfied this is a good case and that the bill should become a law. If the gentleman, in the exercise of his own independent judgment, has come to a different conclusion, does he not think it right and fair to the rest of us that he should state the grounds of his judgment? Let us discuss this question fairly and squarely as if there were a full attendance. If this applicant is not entitled to a pension, let us vote against the bill. If on discussion it is found to be a meritorious case, let us vote for it. I wish the gentleman would state his reasons.

Mr. WALLACE. I have no objection in the world to doing so,

though it is a little out of order.

The CHAIRMAN. The gentleman from Massachusetts [Mr. Long] asks unanimous consent that the gentleman from Louisiana may be !

permitted to give his reasons against the bill. The Chair hears no objection.

Mr. WADE. I would like to limit the gentleman's time.
Mr. WALLACE. "The gentleman" is only proposing to make a

Mr. WALLACE. The gentleman is only proposing to make a statement in order to oblige you.

Mr. WADE. It does not oblige me.

Mr. WALLACE. Regular order, Mr. Chairman.

Mr. LONG. I would also append to the proposition just stated the request that my colleague [Mr. RICE] may state his reasons for the bill. Mr. WALLACE. A gentleman on your side has objected in such a rude manner that I do not propose to proceed further. I would be out of order at all events in making a statement.

Mr. LONG. No one objects.

The CHAIRMAN. The gentleman from Massachusetts [Mr. Long] asks unanimous consent that his colleague [Mr. RICE] may be permitted to give the reasons why he thinks this bill should receive favorable consideration. Is there objection? The Chair hears none. The gentleman from Massachusetts [Mr. RICE] will proceed.

Mr. RICE. Mr. Chairman, I submitted no remarks on the bill when the report was made because I felt the reading of the report was sufficient explanation of the facts and the facts as stated in the report would command the approval of the House. But as objection has been made to the bill, I will proceed in a very few words to state why I think it ought to pass.

It appears here from the testimony before the committee, testimony sufficient to satisfy them, that this man was in the service three years and that he was discharged for disability. That proves he was a sound

man when he entered the service.

Then there is the testimony of his neighbors, whom I know and whom I know to be respectable, that he went into the service a sound, robust

Mr. LONG. That is proved by his having been mustered into the service.

Mr. RICE. I say nothing about the fact that he was sound and ro-ne service. That is considered sufficient proof he was sound and ro-I say nothing about the fact that he was mustered into the service. bust at the time.

Here is the testimony of the men who knew him that he was a sound, robust man when he entered the service. Here is the record testimony which the gentleman wants that at the end of three years' faithful service he was discharged because of the disability which he incurred in the service.

It is true the hospital records do not show he was sick with rheumatism while he was in the service, but they do show he was in the hospital on account of sickness. His regimental surgeon states he knew that sickness was rheumatism. His comrades say it was rheumatism. One of the hospital stewards states the surgeon admitted Mr. Sawyer was known in the hospital as a badly used-up man. So there is no question he left the service as a badly used-up man; that he was in the hospital; that he was discharged for disability; there is no question about that from the record testimony in the cas

Then there is the testimony of his captain, of his surgeon, and of his comrades he was sick with rheumatism during his service. Then there is the testimony of his neighbors that he has been a sick man ever since he left the service. There is also the fact of the board of surgeons before whom he was examined, which said his disability is now total on

account of rheumatism.

Mr. WARNER, of Ohio.

Mr. RICE. Certainly.

Will the gentleman allow me-

Mr. WARNER, of Ohio. Taking the report as true, I can not understand why this claim should not be allowed at the Pension Office.

Mr. RICE. I admit I can not understand why it is not allowed.

Mr. CANNON. Let me ask the gentleman this question: Should the American Congress refuse to do justice in a proper case, as this is by the statements of the report of the committee; should we refuse because some clerk in the Pension Office neglects to properly adjudicate the claim?

Mr. WARNER, of Ohio. Do you wish me to answer now?

Mr. CANNON. I do not wish to take up the time of the House.
Mr. WARNER, of Ohio. Mr. Chairman, I will answer the question
of the gentleman from Illinois by showing it to be impossible to do justice by special acts to all those who come here for relief; and to prove the by special acts to all those who come here for relief, and to prove this, let me give you some figures. There have been introduced into this House about 4,000 pension bills; or, to be exact, 4,127. A large num-ber, I do not know just how many, has been introduced in the Senate. There have been introduced and referred to the Committee on War Claims 4,116 bills and petitions, and 1,327 to the Committee on Claims. Besides these, 993 have been sent to the Committee on Military Affairs and 200 to the Naval Committee. All, or nearly all these of course are private bills. Other committees, too, have private bills, so that altogether over 10,000 bills, petitions, and joint resolutions of a private character, asking for relief, have been introduced so far in the House in this Congress. Besides these there are some two or three thousand in the Senate. Now let us see how long it would take to consider and pass mpon all these bills.

Mr. BAYNE. Does not the Committee on Pensions report adversely two out of three of the pension cases referred to it?

Mr. WARNER, of Ohio. I do not understand that it does. The

figures show that of those considered about one thousand were reported favorably and some five hundred and fifty adversely; and it is fair to presume that as much time is consumed in investigating a claim reported adversely as to one reported favorably.

Mr. BAYNE. Undoubtedly.
Mr. WARNER, of Ohio. And therefore what the gentleman says does not affect my argument at all.

Now, to give ten minutes' time to the reading of the reports and the consideration, the engrossment and third reading and passage of the bills, and certainly no one would think less time would be required in fact the average length of time necessarily consumed would no doubt exceed ten minutes, would take-

Mr. GOFF. But the gentleman takes no account of the number of bills that are rejected—the cases reported adversely from the committee.

Mr. WARNER, of Ohio. Let me continue these figures now. It would be necessary to give at least as much time as I have indicated, whether the bills are considered favorably or unfavorably.

Mr. GOFF. But not those reported adversely.

Mr. WARNER, of Ohio. I do not yield to the gentleman.

Mr. GOFF. But I want to call the gentleman's attention to the point

that in the estimate he should exclude the rejected cas

Mr. WARNER, of Ohio. I say to give an average of but ten minutes to each one of these 4,500 pension bills alone would require one hundred and twenty-five days' time of the House, counting six hours to a session, or practically all the time of the session to act upon private pension bills alone. If to pension bills we add all other private bills before the House and give ten minutes to each claim, we could not get through with all of them if we sat herefrom December to December, and did nothing else, or considered no public matters at all.

Again, these private bills increase every session. There are twice as many this session as there were a few sessions back, and more than there were altogether the first twenty-five years of the existence of the Government, and if we go on considering and allowing these claims in this manner, or even allowing one out of every ten which are presented, we may expect at each recurring session of Congress a large increase in the bills introduced. For if this is found to be the place, and by special act the way to get relief, they will come here more and more of them. This would be true not only of pension claims but of all other claims, which shows, Mr. Chairman, that it is absolutely impossible to mete out even justice to all in this manner.

Mr. GOFF. Then how would you do it?
Mr. WARNER, of Ohio. Before answering that question let me go a little further in this line, for I am trying to show how impossible

Mr. PERKINS. Let me ask the gentleman a question.
Mr. WARNER, of Ohio. Not now; let me conclude this point. I
want to show how impossible it is for us to do justice to claimants or

transact at all this business in this manner.

Now, suppose but one thousand private bills should pass in a session, if the President should take ten or fifteen minutes for the examination of each one of them, and if he is to sign a bill he must of course be expected to look into it, and it would take certainly as much time as I have indicated to half consider a bill, then how much time do you suppose it would take him to examine one thousand private bills and

append his signature to them?

Why, it would take a large fraction of his time. But if, instead of one thousand bills, it is proposed to pass four or five thousand bills in a session, as we must if we expect to do anything like even justice to all, the President would have time to do little else but examine and sign this class of bills. So that we would be brought to the pass that in this great country with its multiplicity of public interests, which requires all the time and energy of the Executive, he would be called upon to give his time to private claims and let public matters go. we act upon all the bills now before us-and those who introduced them think they ought to be acted upon—and the Executive looks into each one of them, neither he nor we could do anything else. It is no answer to say that it is not expected that all private bills introduced will be considered. How else can their merits be determined? What justice is there in considering one and refusing to consider another, or in considering one thousand out of five thousand and neglecting the rest? The very essence of injustice is inequality where there ought to be equality. The evil lies in adhering to this method of meting out justice by private acts instead of providing a specific and more considered. think they ought to be acted upon-and the Executive looks into each tice by private acts instead of providing a speedier and more equitable way. It is not fair or right to give consideration only to those who have influential friends here to push and urge their claims and refuse others less fortunate.

I have given these figures and made the deductions I have to show the necessity of devising other means than by private bills to do justice to petitioners, and to satisfy the ends of justice as affecting this class of claimants. What a spectacle, moreover, the American Congress, What a spectacle, moreover, the American Congress, consisting of three hundred and twenty-five members of the House and seventy-eight Senators from all parts of the Union, presents to the world, sitting here as a sort of revisory board over cases that have been passed upon in the Pension Office! To-day a vetoed bill was before the House and laid aside till December, simply increasing a pension by changing the rating from that fixed by the medical board. Suppose we take up

that business and propose to pass here on the ratings of soldiers for the various kinds of disability, reviewing the decisions of medical boards, to what would that lead? There are between three and four hundred thousand pensioners, and if it was found that pensions could be increased in this way there would be no limit to the number of bills that would come here; the House would be flooded with them if we once entered upon that character of legislation. This session we have passed over six hundred pension bills, which is more than were passed in the whole eight years of General Grant's administration, and the records of the House show as more bills are passed more come to the House for relief.

Mr. GUENTHER. What remedy would the gentleman suggest?
Mr. WARNER, of Ohio. A complete remedy would require no doubt
a material change in the pension laws, at any rate justice can never be fairly dealt out in the manner we are now proceeding.

Mr. RICE. What is the argument the gentleman is making? Is

it against this particular bill or against the general principle?

Mr. WARNER, of Ohio. I am not making an argument against this bill; on the contrary I think, as I said before, from the reading of the report that it is a meritorious case.

[Cries of "Vote! Vote!"] Mr. RICE. Then let us pass it.

Mr. PERKINS. I want to ask the gentleman a question.
Mr. WARNER, of Ohio. Very well, I will yield; but if the call for a quorum is withdrawn so that the House can proceed with the consideration of the bill before us, I will take up no more time.

Mr. PERKINS. I want to ask this question: If the House had agreed to the Senate amendment to the Mexican pension bill at the last session of Congress would not this difficulty have been greatly ob-

Mr. WARNER, of Ohio. Well if the House had agreed to give men pensions whose names were on the rolls for only fourteen days and who never performed an hour's service

Mr. BROWN, of Pennsylvania. That was not the proposition.

Mr. WARNER, of Ohio. That was the effect of the amendment. Mr. BROWN, of Pennsylvania. Never with reference to the Union

Mr. WARNER, of Ohio. For myself I object to pension bills of that character.

Mr. WADE. I make the point of order that the gentleman is not discussing the matter before the House, and I think he is not in order.

Mr. NEECE. I move that the committee rise. Mr. FUNSTON. If we are not to consider any of these bills because we can not consider them all, why should we consider any of the cases on the Calendar?

on the Calendar?

Mr. WADE. I insist on my point of order. This whole thing is not relevant to the case now before the committee.

Mr. FUNSTON. My question is, are we to consider none of these bills because we can not consider all?

The CHAIRMAN. The gentleman from Kansas [Mr. FUNSTON] will please suspend until the gentleman from Missouri [Mr. WADE] can have an opportunity of stating his point of order.

Mr. WADE. The point of order I make is that all this talk is not relevant, from the fact that it is not addressed to the bill before the

relevant, from the fact that it is not addressed to the bill before the committee.

The CHAIRMAN. The point of order is well taken. The gentle-man occupying the floor will confine himself to the question before the

Mr. WARNER, of Ohio. I think I am confining myself to the question, and will answer the question which has been addressed to me by the gentleman from Kansas. I have said the essence of injustice was inequality in the law where there ought to be equality. It can never be right to consider a few favored cases and refuse or neglect to consider others equally meritorious. The trouble lies in the method. congress can easily provide ways to have all, not a few but all claims considered, and that is what ought, in my opinion, to be done now. There will, of course, always be exceptional cases that can not well be provided by general laws, but if only such cases come here they could easily be attended to. But that is a different thing from trying to meet all cases by special legislation. Legislative bodies have never made good courts. It can provide courts and that is what we ought to do now.

Mr. WADE. I insist on my point of order.
Mr. WARNER, of Ohio. The gentleman from Missouri had better
quiet his disturbed spirit. I hope I can be permitted to discuss this
question without further interruption from the gentleman from Mis-

Mr. CONGER. I rise to a question of order. The CHAIRMAN. The gentleman will state it.

Mr. CONGER. My point of order is that unanimous consent was given to the gentleman from Louisiana [Mr. WALLACE] and the gentleman from Massachusetts [Mr. RICE] to make some statements as regards the bill under consideration; and I understand any other pro-

ceedings are out of order.

The CHAIRMAN. Unanimous consent was given to the gentleman from Louisiana [Mr. WALLACE] to make a statement of the reasons why he opposed this bill. He declined to avail himself of that privi-

lege. Then unanimous consent was given to the gentleman from Massachusetts [Mr. RICE] to make a statement, which entitled him to one hour, and he yielded a portion of his time to the gentleman from Ohio [Mr. WARNER].

Mr. WALLACE. I beg to state to the Chair that I did not yield.

After the gentleman from Massachusetts had an opportunity to make

his statement-

The CHAIRMAN. The gentleman from Louisiana [Mr. WALLACE] was not recognized because he did not claim the floor.

Mr. WALLACE. Unanimous consent was given to me to make a statement.

The CHAIRMAN. But the gentleman did not take the floor.

Mr. WARNER, of Ohio. I did not know that I had said anything calculated to disturb gentlemen so much. If we could proceed to do any business, to pass any bills-Mr. LONG. Let us do it.

Mr. WARNER, of Ohio. If we could do that I would yield the floor

any moment.

Mr. LONG. It was understood the gentleman from Louisiana [Mr.

WALLACE] was to state his reasons for opposing the bill.

Mr. WARNER, of Ohio. And he has declined to do so; and I decline to be interrupted any more.

Mr. RICE. I rise to a question of order.

The CHAIRMAN. How much time did the gentleman from Massachusetts [Mr. RICE] yield to the gentleman from Ohio [Mr. WAR-NER !

Mr. RICE. I did not yield any definite time. I now yield him five

minutes

Mr. WARNER, of Ohio. I hope I will not be disturbed again. I have simply given figures pertaining to the bills before us, and the reasons why it is impracticable and impossible to go on indefinitely in the course we are now pursuing, and the necessity of devising some better method. One of the things which I think we ought to do immediately is to increase the number on the pension board of appeals and to give to that board some equity powers. That would itself relieve the House of a large number of the pension cases before it by providing for their better consideration elsewhere. I think all will agree that that would be better than to consider now and then one of the large number that come here and let the rest go on the plea that we have not the time to consider more. Propositions are now pending to provide for sending private claims to a court of claims, and some measure of this kind ought to pass, and doubtless will. But it is equally important to make similar provisions for pension cases. Then the spectacle of a Congress composed of a House of three hundred and twenty-five members and a Senate of seventy-six members sitting as a court on little petty claims would no longer be presented. For whole days these petty claims have been used to block the course of public business; for whole days, as the other day, keeping back bills forfeiting land-grants and the interstate-commerce bill.
Mr. WADE. Mr. Chairman-

Mr. WARNER, of Ohio. I decline to be interrupted further. The gentleman from Missouri will please resume his seat. I insist he shall

mot occupy my time.

Mr. WADE. I insist that the gentleman from Ohio has no time. The CHAIRMAN. Does the gentleman from Missouri rise to a question of order?

I made the point of order that the gentleman from Ohio was not talking to the question before the committee. The Chair sustained the point of order. Now he is going on in the same line.

The CHAIRMAN. The gentleman from Ohio [Mr. WARNER] is an

old member, familiar with the rules. The Chair hopes he will confine

himself within the rules.

Mr. WARNER, of Ohio. While I am on the floor I wish to say a word about the bill which has been referred to to-night and which came from the Senate, in the general provisions of which I agree, but which I think ought to be amended before it passes this House. I refer to Senate bill 1866. This bill sets up a standard of \$24 a month for total disability for claims pensioned under that act, while all who get pensions under former acts for wounds incurred in battle or other disability are rated upon a scale of \$8 a month. This is an inequality which ought not to exist, and in this respect at least the bill should be amended. Whatever standard is established the scale should be the same for the same or like disabilities, no matter under what act the pension is allowed. By this bill the old veterans pensioned long ago for disabilities incurred in battle would still be rated on the basis of \$8 per month, while those who come in under this act would get three times as much for the same disabilities. This is so glaring an injustice that no one can approve of it.

Then, again, this bill allows claim agents \$25 on contracts for every claim presented under that act. As the bill came from the Senate it would seem calculated to fatten claim agents more than it helps soldiers. In these two particulars at any rate this bill ought to be amended,

and then it would be a great improvement on the Mexican pension bill, to which my friend from Kansas [Mr. Perkins] referred.

Mr. Chairman, I had not intended to say a word to-night, and only rose because I was asked certain questions which led me to give some reasons why this method of attempting to remedy evils and do justice

to private claimants by special legislation must of necessity give way to something more practicable. A halt on this method of legislation must sooner or later be called, and I think the time has come now. I am sure gentlemen generally will agree with me in that. But I agree that until we provide some better way we must consider these bills as best we can.

But the facts and figures I have presented show us the necessity of providing a better way. As to the particular case before us I was surprised on hearing the report read, that it was necessary to bring the case here at all. I do not and can not understand why such a case, if the facts be as they are stated in the report, can not be allowed and has not been allowed in the Pension Office.

Mr. CONGER. Will the gentleman answer a question?
Mr. WARNER, of Ohio. I will if I have time.

Mr. CONGER. How many private pension bills has the gentleman himself introduced this session?

Mr. WARNER, of Ohio. Oh, quite a large number—for want of a better system. I do as the rest do. I introduce bills, but unfortunately not many of them get consideration.

The CHAIRMAN. The time of the gentleman from Ohio has ex-

pired.

Mr. RICE. Mr. Chairman, I will reserve the remainder of my time until the gentleman from Louisiana [Mr. WALLACE] has spoken, if

he desires to speak upon this bill.

Mr. WALLACE. Mr. Chairman, it seems to me that this proceeding is so entirely out of order and so different from what it should be under the rules of parliamentary law that it can be explained only upon the ground that this is a meeting of the House for the special purpose of passing pension bills, and bears out the character and reputation which the House has so long enjoyed for doing on such occasions acts which are entirely outside of the range of parliamentary law. Therefore I do not consider that I am called upon to make any explanation of my reasons for opposing this bill; but, in consideration of the requests of some of my friends that I should do so, I am perfectly willing to state to the House why I object to the bill. I will endeavor to do so in as few words as possible, and I trust that it will not lead to any further debate, occupying our time unnecessarily.

The gentleman from Ohio [Mr. WARNER] has struck the key-note of my objection to this bill in asking why the Pension Office could not allow this applicant a pension under the law. The gentleman from Massachusetts [Mr. Rice] has drawn my attention to a statement here that this soldier was discharged for disability. If he was discharged for disability, did not the Pension Office have the records of that disability? And if the disability was so great that he had to be discharged from the Army on account of it, was it not great enough to justify the Pension Office in allowing him a pension? But no, it was not great enough; the disability was not sufficiently marked, as the result of his career in the Army, to entitle him to a pension there incurred.

Indeed, so slight was the disability that not until fifteen years afterward did he discover that he had this severe case of rheumatism which rendered it impossible for him to contend in the great struggle of life. I do not find any testimony in this case that is strong enough to overcome the statement of the Pension Office, which is that there is "no record of alleged diseases, no satisfactory medical evidence of treatment in service or since discharge. Rheumatism is the only disease now found, and it is not shown to have been contracted in service."

For fifteen years it was impossible to discover that this disease was the result of the man's service in the Army. Now, I do not think it is necessary to go any further than that. The other testimony in the case is only such as we find in all these cases—testimony made by indulgent friends who are willing to stretch their memories more or less, providing they do not do violence to their consciences, who certainly go as far as their consciences will allow them to go, and perhaps a little further. And, Mr. Chairman, it must be remembered that the reports in these cases are made up by the friends of the claimants.

The testimony before the committee is all put there by the claimant and his friends, and there is no chance to have any rebutting testimony unless it comes through the Pension Office. Now, if the statement of the Pension Office in this case is not strong enough to rebut the testimony on the other side which comes from indulgent and friendly fellow-soldiers, I certainly do not understand the nature or weight of evidence. And, Mr. Chairman, as these pension bills have been brought in to such a large extent, it is evident that a line must be drawn somewhere; and that being so, I think it ought to be drawn on a case of this kind, which

presents so little merit.

I have made no captious opposition to this bill. I did not call for a quorum until it was forced upon me. As to laying over bills, there is a bill here that has been laid over for four consecutive pension nights. Undoubtedly that bill will be brought in here at some session when there are but few members present and no one who knows anything about it, no objection will be made, and it will be passed. I do not think that is fair or proper legislation. These cases should be taken up in regular order. I have consented to this pension legislation here night after night rather than be regarded as an obstructionist, particularly as the meetings heretofore have been somewhat respectable in point of numbers.

Mr. RICE. This has come up in its regular order. Will the gen-

tleman now withdraw his call for a quorum upon condition that the bill shall be considered as reported favorably to the House, the previous question ordered upon it, the vote to be taken in the full House?

Mr. WALLACE. At next session? If it goes over until next ses-

sion I have no objection, but the House is now crowded with other bills of far greater magnitude and importance. I have no desire to obstruct legislation this evening. I did not call a quorum until I was compelled to do so, although I could have done it on the first bill.

Several MEMBERS (to Mr. RICE). Let it go over until next session. Mr. RICE. I accept the proposition.

The CHAIRMAN. The proposition of the gentleman from Massa-

Mr. RICE. I made the proposition. I am content that there shall be a favorable report to the House, that the previous question be con-

Mr. WALLACE. I object to a favorable report. I have no objection to permitting the question to go to a full House.

Mr. BAYNE. Then let it be simply reported to the House.

Mr. WALLACE. Reported to the House. I have no objection to

The CHAIRMAN. And that a vote be taken on the first Friday in December.

Mr. WARNER, of Ohio. The first Friday after the first Monday. Mr. RICE. I understand that the bill is to be favorably reported.

The CHAIRMAN. Reported to the House and the previous question considered as ordered and a vote taken on the bill on the first Friday

of the next session. Is that the agreement?

Mr. CANNON. I would like to ask the gentleman from Massachusetts a question. It is virtually conceded, then, that the Committee of the Whole shall cease to consider this bill and that it go to the con-

sideration of the House—
Mr. RICE. With a favorable report from the committee.
Mr. CANNON. With a favorable report from the committee. Then, if I understand, it is conceded that this man deserves legislation, and

that this course of proceeding—

Mr. WALLACE. I object to further discussion.

Mr. CANNON. I make a point of order, and I ask the Chair to sustain me in it.

Mr. WALLACE. I object to this discussion.
Mr. CANNON. I asked the gentleman from Massachusetts to yield

to me till I asked a question.

The CHAIRMAN. The Chair is of opinion that debate is not in or-

Mr. CANNON. I believe the gentleman from Massachusetts has twenty or thirty minutes. I ask the gentleman to let me state my

Mr. WALLACE. I make the point that no right to transfer time was given. When unanimous consent was granted, it was granted individually to the gentleman from Massachusetts and myself.

The CHAIRMAN. The gentleman from Massachusetts had thirty minutes of his time remaining. The proposition was made by the gentleman from Louisiana, which the Chair understood the gentleman from Massachusetts to accept. If the proposition is objected to—
Mr. CANNON. I am not objecting, but I am trying to see—
Mr. WALLACE. I object.

The CHAIRMAN. Then the gentleman from Massachusetts will be recognized for thirty minutes.

recognized for thirty minutes.

Mr. CANNON. I rise to a question of order. I want to know whether the gentleman from Louisiana holds within his person as a member of the House all the dignity and all the rights of all the members on this floor.

Mr. WALLACE. Now, the gentleman is making another point of order. Can he make two points of order at the same time?

Mr. RICE. I call for the regular order.

The CHAIRMAN. Debate is not in order at this time except by unanimous consent. The proposition, as the Chair understands, is this—that this bill shall be reported to the House——

this—that this bill shall be reported to the House—
Mr. RICE. Favorably reported.
The CHAIRMAN. That the previous question be ordered, and that a vote be taken upon it the first Friday of next session.
Several Members. That is it.
The CHAIRMAN. Is there objection?
Mr. RICE. I understand the report is to be favorable.
Mr. WALLACE. No; I object to that.
A Member. Now read the next bill.
Mr. CANNON. No; the next bill can not be read until I understand about this. If the gentleman from Louisiana has the right to dictate

If the gentleman from Louisiana has the right to dictate our proceedings to the exclusion of everybody else I want to know it. I want to know whether it is agreed that this case shall go with a favorable report to the full House, provided the vote upon it be postponed till next session.

The CHAIRMAN. The Chair did not so understand the proposition

of the gentleman from Louisiana.

Mr. CANNON. What is the proposition then?

The CHAIRMAN. The Chair understood the proposition of the gentleman from Louisiana to be this: that the bill should be reported

to the House—the first proposition was that it be favorably reported, but as the Chair was proceeding to state that proposition the gentle-man from Louisiana at once arose and said, "not favorably reported" now the Chair understands the proposition to be that the bill shall be reported to the House with the previous question considered as ordered, and that a vote be taken on the measure the first Friday of the next session. That the Chair understands to be the proposition.

Mr. CANNON. In other words, this poor man is to be kept out of his pension for four months to satisfy the gentleman from Louisiana.

Mr. SKINNER. I rise to a parliamentary inquiry. I desire to know whether, when a bill is reported from the Committee of the Whole to the House, it is not necessary that it be reported either favorably or unfavorably. Can it be reported "dry so?" [Laughter].

The CHAIRMAN. The Chair is of opinion that a bill can be re-

ported without recommendation.

Mr. RICE. I do not consent that the bill shall be reported to the

House otherwise than favorably.

Mr. LONG. The gentleman from Louisiana on reflection will not object to that, because so far as action has been taken in the committee it has been favorable to the bill. You can not report it if you report the truth other than favorably, because the vote has been 40 to 1. It is of little consequence how it is reported to the House, because after it has been reported to the House the vote of the House must come to determine the matter.

Mr. WALLACE. If it is of sufficient importance to the gentleman from Massachusetts to refuse to let it go without report to the House, it is of sufficient importance to refuse to permit it to go to the House with a favorable report. If it is a matter, as the gentleman says, of little consequence how the bill is reported to the House, why then does the gentleman object to the bill being reported to the House unless it

goes there with a favorable report?

Mr. LONG. Because that is the truth, that it has been favorable

considered.

The CHAIRMAN. Is there objection to the proposition it shall go

to the House without a favorable report?

Mr. RICE. I object.

The CHAIRMAN. The gentleman from Massachusetts is entitled to the floor and will proceed with his remarks.

Mr, RICE. I will reserve my time.

The CHAIRMAN. The Chair is in error. The gentleman from Massachusetts [Mr. RICE] not claiming his time, the tellers will resume their places. The Chair will ask the gentleman from Massachusetts whether he claims the floor.

Mr. RICE. I will take the floor and yield to the gentleman from

Illinois [Mr. CANNON].

Mr. NEECE. I move the committee rise.

The CHAIRMAN. The gentleman from Massachusetts has yielded to the gentleman from Illinois.

Mr. CANNON addressed the committee. [See Appendix.]

Mr. RICE. I yield to the gentleman from Wisconsin [Mr. PRICE].
Mr. PRICE addressed the committee. [See Appendix.]
The CHAIRMAN. The gentleman from Massachusetts [Mr. RICE] has seven minutes of his time remaining.

Mr. RICE. Mr. Chairman, I introduced this bill in this House because I believed it to be a just case. I believe that the claim should have been allowed in the Pension Office; but as it was not allowed there, I exercised my right in introducing it here. It was favorably reported by the committee; the report was unanimous. It has been voted upon twice in this Committee of the Whole; and each time the vote has been in its favor, only the gentleman from Louisiana [Mr. WALLACE] dissenting.

True, there is not a quorum here to-night, nor has there been a quorum

on any night when pension bills have been considered.

Nor on any other night. A MEMBER.

Mr. RICE. Nor on any other occasion when there has been an even-

ing session for the transaction of business

Representing, therefore, this brave and broken soldier-broken by three years' service for the flag which, thanks to the efforts of such men, still waves over the gentleman from Louisiana for his protection and the protection of his swampy State, I do not feel that I should be and the protection of his swampy State, I do not feel that I should be justified in accepting anything less from this committee than that which they are so ready to give, that is, a favorable report to the House upon the merits of this case. For that I stand; that I claim. I should be pusillanimous, I should be false to my constituents, false to my State, were I to accept less. If the gentleman from Louisiana, asking as he does so many favors for his locality, sees fit, standing here alone, to interrupt and arrest the business of this committee, upon him be the responsibility of doing it; I shall contribute no aid in that direction. I call for the regular order. [Applease]

on. I call for the regular order. [Applause.] Mr. WALLACE. Mr. Chairman, I think I have a little time. After all this eloquence from the other side, certainly I am not going to be

shut off from my defense.

Mr. RICE. I have called the regular order.

The CHAIRMAN. The gentleman from Louisiana has occupied only fifteen minutes of his time.

Mr. RICE. Did he reserve the remainder?

Mr. WALLACE. I did.

The CHAIRMAN. The Chair so understood the gentleman.
Mr. WALLACE. I have only a few words to say in answer to the
remarks of the gentleman from Wisconsin [Mr. PRICE]. He accuses me of obstructing the consideration of pension bills. Without beating about the bush in any way I deny, in toto, the accusation. I have simply performed what I consider to be the duty of each member of the House in regard to legislation coming before it. I have called a quorum upon bills which I deemed to be objectionable. I have done so upon conscientious conviction-not from captious or obstructive spirit. On some occasions bills have been passed here which I believed to be meritorious; and I have not undertaken to block legislation, except when a small portion of the House, far less than a quorum, has endeavored to force upon me measures which, with my ideas of right and wrong, I deemed to be entirely without merit, as I deem this bill to be.

I have never raised an objection or called a quorum where I could allow a bill to be passed over informally. Where I could not conscientiously agree to the merits of a case in this House I have consented to allow it to be passed over. I have never raised my voice at any time to block legislation. Two bills have passed to night and I have raised no opposition to them because they seemed to be meritorious.

But six I have the right to the everying of my own independ in this

But, sir, I have the right to the exercise of my own judgment in this House. When only twenty-nine or thirty or forty members are present I claim the right to express my views and if possible to defeat what

I deem to be bad legislation.

I have heard quorums called more frequently on that side of the House than on this, and when efforts were being made to pass bills for the benefit of the nation at large and not merely for the benefit of an individual who has been discovered away off in the backwoods of some Congressman's district. I have seen on that side of the House a quorum called again and again when bills for the public welfare were under

consideration in this House.

Mr. PRICE. Was it a pension bill?

Mr. WALLACE. Not on a pension bill, of course. That is but a small matter and of no national consequence. Gentlemen on the other side have raised the question of no quorum on questions of the greatest

side have raised the question of no quorum on questions of the greatest national importance involving the public welfare.

Mr. PRICE. I did not.

Mr. WALLACE. Your side did. You did it in following the lead of men whom you allowed to control you. I do not allow any man to control me, or any one party to control me upon legislation I deem to be without merit. In such a case, where I am satisfied the legislation is neither just nor proper I will do everything in my power to defeat it. It comes, therefore, with very bad grace for gentlemen on that side of the House who have called quorums on bills of the greatest public advantage to come here and charge me with having called a consum on advantage to come here and charge me with having called a quorum on bills which I deem to be without merit and which affect not the public welfare but merely one individual.

Mr. GUENTHER. Did you ever raise the question of no quorum on

any other than pension bills?

Mr. WALLACE. I will answer that in a few minutes. I have not got to that yet. One gentleman to-night claims that the most important bills are passed without a quorum voting, such as appropriation They are not for the benefit of one single individual. not private bills. They are not for the benefit of any one district or a small portion of any one district. They are for the benefit of the nation, and the disbursements under them are nearly all fixed by law, and those that are not receive the closest scrutiny of a full House, and besides are treated very differently in committees from private bills. If necessary in those cases a quorum can be made to appear and vote for or against them. I defy any member to show that any such bill has been passed by this House on the call of the yeas and nays without the presence of a quorum. No such bill has ever been passed without the presence of a quorum.

The gentleman refers to the printing business being passed without a quorum at an evening session. I was not here and do not know any-

As to the last night's bills, to which the gentleman has also alluded as evidence of my inconsistency, let me say they were private bills which were upon the Calendar, and it was my desire and intention, as no doubt it was of all the other members, to legislate for the welfare of the country. It was the agreement, in the consideration of those bills upon the Private Calendar, that one objection would be sufficient to force the bill to be passed over. Therefore it was not a case where to force the bill to be passed over. Therefore it was not a case where it was necessary or requisite to call for a quorum, because a single objection would answer the purpose of preventing the passage of any bill which was considered to be without merit. I did object to every case that seemed so, unless another member anticipated me. It was not such a case as we have here in sessions like that this evening with a small number of members present, and when attempts are made to force through a bill void of merit without the presence of a quorum.

The other night, when the House was considering business coming from the Post-Office and Post-Roads, there was no quorum; and the gentleman from Wisconsin again charges me with inconsistency, because I did not block that legislation. Those bills were of the greatest importance to the country, bills of the utmost importance to the welfare of the people, for the benefit of all and not for the benefit of one or

two individuals; yet the gentleman from Illinois [Mr. CANNON] called for a quorum after only one had passed to defeat the passage of such bills. I should like to know, therefore, with what grace he can come here and criticise me for calling a quorum on individual matters, which I deem to be without merit, when he called for a quorum to defeat the passage of a bill of national importance, because it did not meet his approval, and thereby blocked action upon subsequent bills of the utmost

As I said before, gentlemen who are here at these night sessions are generally, without exception, members who have their own private bills; they come here waiting for their bills to be reached on the Cal-endar. Therefore I claim, as a jury sitting on these cases, they are not qualified and not competent. I claim their unanimous indorsement does not amount to anything with the presence of thirty or forty members only out of three hundred and twenty-five members of the House, with each member present interested personally in his own little scheme

with each member present interested personally in his own little scheme and very careful not to interfere with the passage of bills in which other members of the thirty or forty present are interested.

I can show the gentleman from the records of this House on the 15th day of May where forty-four pension bills were passed in this body by (I am told) twenty or twenty-one members and only three reports were read. I would like to know, Mr. Chairman, what knowledge those gentlemen had enabling them to pass upon the forty-one bills whose reports were unread—

reports were unread-

Mr. CANNON. Let me interrupt the gentleman.

Mr. WALLACE. I do not yield for an interruption at this time.

When I am through the gentleman can have the floor.

Mr. CANNON — Just a word if the gentleman will allow me, by

Mr. CANNON. Just a word, if the gentleman will allow me, by ay of explanation.

Mr. WALLACE. I can not yield.
Mr. BRECKINRIDGE, of Arkansas. Unless the gentleman from Illinois rises to a question of privilege, it is not in order to interrupt the gentleman. It is not courteous to the gentleman from Louisiana while occupying the floor.

Mr. CANNON. But as the gentleman has alluded to me personally, I wish to make a statement.

Mr. WALLACE. I will allow the gentleman time when I am

I instance this case, Mr. Chairman, of the 15th of May, contained in the record of the proceedings of that day, where these forty-four bills were passed and where but three reports were read, and one of these cases was the widow of a Revolutionary soldier who could not have been much less than one hundred years old. I am told by a gentleman who was present that there were some twenty-one members in the House at

Mr. PRICE. I must deny the accuracy of that statement.

Mr. WALLACE. There is the record.

Mr. PRICE. But as to the twenty-one members Mr. WALLACE. You do not deny my statemen

Mr. WALLACE. You do not deny my statement. Mr. PRICE. Not your statement but his statement, your informant's statement.

ant's statement.

Mr. WALLACE. I give the statement as it was given to me, and I take it for granted that it is accurate.

Mr. LEHLBACH. Were you present last evening?

Mr. WALLACE. I was.

Mr. LEHLBACH. How many reports were read?

Mr. WALLACE. All of them while I was here. Not a bill passed last night while I was present unless the report was read or a gentleman stated that the report was lengthy, and he made a statement upon his own responsibility as a member of this House, which I should be sorry to dishelieve. sorry to disbelieve.

Mr. LEHLBACH. Two of the bills were reported last night by my-

self and the reports were not read.

Mr. WALLACE. Then it was when I was absent from the House. Every bill while I was present last night that was passed was passed after the report was read, or after, as I have said, an explanation was made to obviate the reading of a lengthy report, which the House regarded as satisfactory; and I think gentlemen who were present while

I was here will bear me out in that statement.

Now, the gentleman from Wisconsin [Mr. PRICE] and the gentleman from Illinois [Mr. CANNON] seek to criticise me for the position I have taken with reference to these pension bills. I have already stated my views on a former occasion, and my only reason for entering upon these general remarks to-night is to deny emphatically that I have done anything inconsistent with the original stand I have taken, which I now maintain and shall continue to maintain as long as I am a member of this House. Where bills are presented which I consider are void of merit, and where it is attempted to force them down my throat by a meager attendance in this House of forty out of three hunthroat by a meager attendance in this House of forty out of three nun-dred and twenty-five members, I shall use my privilege as a member of this House to defeat them. The principle by which I am guided is this, that these doubtful cases should only be passed by a quorum of the House, if passed at all. I have insisted upon the reading of the reports because I do not think we should be called to act upon such cases when but one individual in the House, the man who prepares the

reports, knows anything about them.

The bills referred to these two pension committees are so numerous the

work has to be divided among subcommittees of one—and that one is often personally interested in the bill referred to him—and the committee itself accepts his report without scrutiny. The wording of these reports indicates the bias of their authors. The testimony for claimant is exaggerated and given prominence that against him is impugned or soft-

In conclusion, I deny the charge that I have made an exception of special pension legislation to demand the presence of a quorum. While my views are decidedly averse to appropriations of Treasury funds by a small minority, I have yielded where the number of members present reached to respectable proportions, and have contented myself by calling a quorum only where I deemed a bill a bad one and where no other course was open to defeat it. I would have applied the same rule to every private bill on the Calendar under similar conditions, but in my brief membership those conditions have not arisen. It so happens no legislation has been carried so far to a disgraceful extreme as that granting special pensions, and for that reason, and that alone, has my action against that been so marked.

Of the private bills passed at this session over six hundred have been for special pensions, or one hundred more than the number passed during the eight years of President Grant's administration. On reference to the RECORD, on four nights the reports of which I selected at random I find an average of over fifty bills passed each night, and seldom if ever more than five reports read during any evening. The attendance on these occasions was barely 10 per cent. of the membership of the House. Is this proper or correct legislation? Is my effort to block it the worst record I have made here, and for which I am to "answer to my own constituents and the country," as a gentleman suggested? If so, I shall not fear much to meet the issue. My constituents did not send me here to sit by and consent even by my silence to legislation I consider shamefully lax and indefensible, and the country is not any more sympathetic, I believe, with legislation adopted at these Friday night scances. The granting of pensions proper and just is a sacred night seances. The granting of pensions proper and just is a sacred duty of governments; the payment of its debts to private citizens also; but both should be granted and paid under the Constitution and in the form at least of law.

Will the gentleman permit a question?

Mr. WARNER, of Ohio. It seems that this debating society has gone on long enough; I ask the regular order.

Mr. WALLACE. I yield to the gentleman from West Virginia for

a question.

Mr. GOFF. I simply desired to go back to the case under consideration. I understood the gentleman to say in his remarks when first on the floor as to this particular case, that if there was any evidence that disclosed that the soldier was suffering with rheumatism in the service he would consider it a meritorious case, and that it was because the medical testimony did not disclose that fact he made that objection. Now, I say to the gentleman that if he examines the record in this case

Mr. WALLACE. I have done so.

Mr. GOFF. He will find that the captain of this company states in an affidavit that this man in the year 1864 was sent to the hospital at City Point, Va., suffering with chronic diarrhea and rheumatism.

Mr. WALLACE. I have already explained my views on that matter, that if he was disabled as reported, the Pension Office has no record of his discharge on account of that disability.

Mr. GOFF. I understood you to say that there was no testimony to disclose the fact that he suffered from rheumatism during the war.

Mr. WALLACE. Your Pension Office says there was none. Mr. GOFF. The trouble is there are many cases where the medical

history of the soldier does not disclose the specific disease.

Mr. WALLACE. Would the hospital records not show the fact that

he was discharged for disability, if it was a fact?

Mr. GOFF. It would show that he was discharged, without giving the specific disability; and that is his particular case. I know of many instances, and the gentleman will find them in many records connected with the military service of the country, where men were discharged for disability without mentioning the particular disability.

Now then this soldier comes in here and cures the record by giving

the affidavit of his captain that that specific disability was rheumatism, and I submit to the gentleman the case is one where the applicant is

entitled to a pension.

Mr. WARNER, of Ohio. I rise to a question of order. I understood it was agreed unanimously this case should go over until the first Friday of December.

Mr. GOFF. The gentleman is mistaken.

The CHAIRMAN. Objection was made to that proposition.

Mr. CANNON rose.

The CHAIRMAN. Does the gentleman from Louisiana [Mr. Wal-

Mr. WALLACE. Yes, sir.
Mr. CANNON. From the remarks of the gentleman from Louisiana I gather he thought I had attempted to criticise him personally. Certainly he is my peer and the peer of every gentleman on the floor. He must answer to himself, to his constituency, and to his country for the position he takes here, and no doubt he is willing to do so, as I must

answer to myself for any position I take on this or any other matter. In my remarks touching the course of the gentleman from Louisiana I was not seeking to criticise him personally. But I addressed myself to the reasons he gave for objecting to this bill, which it occurred to me were not sufficient. I desire to say that much, because the gentleman

were not sumcient. I desire to say that much, because the gentleman probably misunderstood me.

Mr. WALLACE. That is quite satisfactory.

The CHAIRMAN. Before the Chair announces the vote—
Mr. WALLACE. I ask the Chair what vote he is about to announce.

The CHAIRMAN. The result of the vote as reported by the tellers.

Mr. WALLACE. I make the point that the Chair has already announced it. I called for a division

Mr. WALLACE. I make the point that the Chair has already announced it. I called for a division.

The CHAIRMAN. On the original vote the gentleman called for a division. The result of that vote was announced by the Chair. Then the point was made of no quorum. The Chair appointed as tellers the gentleman from Louisiana [Mr. WALLACE] and the gentleman from Massachusetts [Mr. RICE]. They reported the result to the tally aller and that could have not yet here appropried by the Chair. Pendclerk, and that result has not yet been announced by the Chair. ing the announcement unanimous consent was given to the gentleman from Massachusetts and the gentleman from Louisiana to make state-

Now, the Chair desires to advise the committee before this announcement is made that the clerks are wearied and worn out by the protracted proceedings of the last few days. When this vote is announced and the point is then made that no quorum voted, if it should so appear, the rules require that the rollshall be called. No motion to rise can be made under those circumstances. The Chair desired before an-

nouncing the vote to suggest what is the fact as to the physical condition of the clerks.

Mr. PERKINS. I again ask unanimous consent that this bill be laid aside and reported to the House with the previous question ordered on it, and that it shall then go over till the first Friday of December for a vote in a full House.

cember for a vote in a full House.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent that this bill be reported to the House, that the previous question be ordered, and that a vote be taken on the bill on the first Friday of the next session. Is there objection to the gentleman's request?

Mr. RICE. I object.

The CHAIRMAN. Then it becomes the duty of the Chair—Mr. McMILLIN. I suggest that it would be well to let the bill take that course so that members present may have an opportunity of having a few more cases considered this evening.

The CHAIRMAN. But the gentleman from Massachusetts has ob-

Mr. PERKINS. My suggestion is that the bill be favorably reported to the House, that the previous question be ordered on it, and that no vote be taken on its passage until the first Friday of December.

The CHAIRMAN. Is there objection to the request?

Mr. WALLACE. I will not object to that.

The CHAIRMAN. The Chair hears no objection, and it is so ordered.

The Clerk will report the next pension bill on the Calendar.

ORDER OF BUSINESS

Mr. SKINNER. I ask unanimous consent— Mr. GUENTHER. I object to any request for unanimous consent. Mr. LONG. I call for the regular order.

Mr. GUENTHER. I withdraw my objection for the present.

The CHAIRMAN. The Chair has recognized the gentleman from North Carolina [Mr. SKINNER] to state his request, which he has a right to do. When he has stated it, then it will be in the power of gentlemen to object.

Mr. SKINNER. I merely want to say to the committee in the first place that I have never bothered this committee by asking unanimous

Mr. GUENTHER. Have you been here before at these Friday evening sessions?

Mr. SKINNER. I have been here several times.
The CHAIRMAN. The gentleman will state his request.
Mr. SKINNER. There is an old man ninety-five years of age who is now receiving a pension of \$8 a month. He was a soldier in the war of 1812. He is blind and lame and can not hear. He came here two or three months ago-

Mr. GOFF. Offer your bill.
Mr. SKINNER. I ask unanimous consent to offer the bill providing

pension for this old man for present consideration.

Mr. LONG. Without objecting, I may state that I represent the next case on the Calendar where the woman is old. I will not object to the gentleman's request if the bill I represent can be considered

Mr. GUENTHER. I will ask the gentleman from North Carolina does the case he calls up stand on the Calendar?

Mr. SKINNER. It does.
Mr. GUENTHER. Where?
Mr. SKINNER. It stands late on the Calendar. The old man is likely to die before the next session of Congress.
Mr. GUENTHER. I withdraw my objection.

The CHAIRMAN. Is there further objection to the request of the gentleman from North Carolina? The Chair hears none. The Clerk will report the bill.

BRYANT WATERS.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby; authorized and directed to increase the pension allowed Bryant Waters, late a private in Capt. I. G. Blount's company, Eighteenth Regiment United States Infantry, who served in the war of 1812, to 550 per month.

The report (by Mr. Cowles) was read, as follows:

The report (by Mr. COWLES) was read, as follows:

Your committee has had under consideration a bill (H. R. 7988) for relief of Bryant Waters, asking that his pension be increased from \$8 per month to \$50 per month. There is no question about the soldier's calistment and service, and he is now on the pension-rolls at \$9 per month. The evidence shows that he is ninety-five years of age, deaf, and almost totally blind, requiring constant attention and waiting upon. He is also very poor and unable to provide for himself. Your committee think that under these circumstances the pension of this old soldier should be increased to \$30 per month in order to make the necessary provision for his comfortable support for the short portion of life that reptains to him by the usual course of nature.

Your committee therefore recommend that the bill, amended as indicated

Your committee therefore recommend that the bill, amended as indicated in this report, do pass

There being no objection, the bill was laid aside to be reported to the House with the recommendation that it do pass.

REBECCA WISWELL.

The next business on the Private Calendar was the bill (H. R. 9129) granting a pension to Rebecca Wiswell.

Mr. LONG. I ask the consideration of that bill.

The bill was read, as follows:

Be it enacted, &c. That the Secretary of the Interior be, and he is hereby, authorized and directed to place the name of Rebecca Wiswell, an Army nurse, on the pension-roll, and pay her a pension of \$12 per month.

The report (by Mr. LOVERING) was read, as follows:

The report (by Mr. Lovering) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the petition of Rebecca Wiswell, report:

Rebecca Wiswell was one of the efficient corps of Army nurses whose devoted and untiring labors, under the superintendency of Dorothy Dix, form one of the brightest pages in the history of the conflict of nearly quarter a century ago. She entered service in March, 1862, her labors ceasing at her discharge in July, 1865. Her services were rendered at the Seminary Hospital, Georgetown, D. C., and hospitals at Winchester and Fortress Monroe, her whole term covering the period of three years and four months. She is now seventy-nine years of age, poor and infirm.

She presents in support of her claim certain papers and documents, from which the following have been taken, which certainly prove her to have been a valuable assistant to Miss Dix.

The following letter of August 23, 1865, explains itself, and was written after the close of her labors and return to her home:

Washington, D. C.

Washington, D. C.
My Good Miss Wiswell: I am too busy to write more than a line acknowledging your letter. I was glad to hear of your safe return and pleasant meeting with your friends, and I hope the good Massachusetts air has already done you much good. Nearly all the hospitals are closed, but much to be done in the division hospitals.

Yours, kindly,

D. L. DIX,
Superintendent United States Hospital Nurses.

Frederick N. Knapp, associate secretary United States Sanitary Commission, who was stationed in Washington during a large part of the time from 1861 to 1865, says, April 5, 1886;

"I had constant opportunity of knowing of the devotion of Rebecca Wiswell to her duties as nurse in the Army hospitals. To her intelligence and fidelity the life of many a soldier was due."

Charles P. Shepard, Concord, N. H., January 19, 1886, says:

"Miss Wiswell took care of me five months at the Seminary Hospital. I think she was the most faithful person I ever saw. She saved my life by her vigilance and skill in nursing, and others, if alive, can testify to the same thing."

Eleazer Shaw, of Plymouth, Mass., testifies:

"That he has known Miss Wiswell for more than thirty years; she is now seventy-nine years of age, and within my certain knowledge all the property she possesses would not pay the expenses of her burial. At the time of her entering service as a nurse she was vigorous and well, and that since her discharge she has gradually and steadily become enfeebled in health. She is dependent upon others for a living and at best can not long survive."

J. B. Brewster, M. D., Plymouth, Mass., May 1, 1886, says:

"That for twenty-five years I have been a practicing physician; for many years have known Rebecca Wiswell, and have had her under my care. She suffering from a disease of heart of long standing, and is also unable to get about on account of dropsy of the lower extremities from the same cause. I do not hesitate to declare that in my opinion her present infirmities are greatly due to her exhauster and faithful labors as an Army nurse for more than three years of the late war."

William T. Davis, chairman board of selectmen, Plymouth, Mass., in a letter to Hon. Joun D. Long, House of Representatives, dated April 25, 1886, says:

"Dear Governor: Let me add to what my friend, Dr. Brewster, has stated to Hon. Joun D. Long. House of Representatives, lated April 25, 1886, says:

"Dear Governor: Let me add to what my friend, Dr.

asked for in her few remaining days, and therefore report back the accompanying bill and recommend its passage.

Mr. BRECKINRIDGE, of Arkansas. Mr. Chairman, I desire to ask the gentleman from Massachusetts [Mr. Long], who has charge of this bill, to state what he knows of the practice in cases of this character.

Mr. LONG. The practice has been, as shown by the records of the present session and of former sessions of Congress, to grant special pensions in cases of this kind. There have been many such pensions granted, as the records will show. Early in the present session Mother Pickerdyke was given a pension of \$25 a month, and Miss Gill was given a pension of \$20.

In this case the pension proposed is only \$12 a month. This lady is now seventy-nine years old. She served as a nurse three years and nine months during the war, and was indefatigable in the service, as appears from the evidence of the soldiers whom she nursed, of the selectmen of the town where she lives, and of the physicians of the town. This is certainly as meritorious a case as any that has been before us; the precedent has been established, and I trust that the bill will be

laid aside to be reported to the House with a favorable recommendation.

Mr. BRECKINRIDGE, of Arkansas. Mr. Chairman, I wish to say in connection with this case that my understanding is—though I may be mistaken—that we grant pensions to nurses only where they have actually suffered from exposure in hospital service. For instance, if on account of such service a nurse has contracted some malignant disease we grant her a pension.

The most heroic traits of character are frequently displayed in the discharge of the duties of a nurse, and disability arising from such service should be recognized. It presents a logical and proper claim upon the Government, but the service I believe is strictly a civil serv-It is not expected to expose one who engages in it to the perils of battle, and if there is not general legislation providing for cases in which such persons have become disabled from the contraction of disease in the service I should certainly be in favor of such legislation. A person in the civil service who is wounded during an engagement upon a man-of-war is permitted to be pensioned the same as if he had been in the military service, and if there is not analogous general legislation covering the class of cases of which I have just spoken, I should very cheerfully vote for it, and in the absence of such general legislation I would very cheerfully vote to grant a pension in such a case. I do not, however, understand that this is a case of that character.

This claimant is evidently a most worthy woman. She has been a nurse, and evidently a most faithful one. But it does not seem to be shown that she carried out of the service any germs of disease, or that she is disabled in consequence of any disease incurred while in the service, and, as I understand, she never was in the military service of the Government. Now, such a case presents the strongest claims upon charity; but, so far as the evidence has been developed, it is not a case which would be entitled to such recognition by way of a pension as is given to a person disabled in the military service or in the line of mil-

itary service. I do not see that this most worthy woman has any claim except to the civil charities of the country, with this addition, that she has the strongest possible claim upon those whose everlasting friendship she must have won in the discharge of her work of mercy; and I can not believe that any American community would permit so worthy a woman to be destitute of those social beneficences which would make her comfortable in her last days. Nor do I believe that men who were brave enough to go into battle and incur wounds which brought them under her tender care—wounds which are the evidences of courage and the badges of honor—would be unmindful of the personal obligation

and the debt of gratitude that they owe to her.

Strong as are the claims of this character which this woman presents, I do not think the case one which is entitled to the military recognition which we are giving here to-night; and unless my mind is disabused of that impression, I shall, with a spirit of entire kindness and strictly from what I deem the observance of right principles in preventing confusion of policy—entering upon local and personal charities here instead of discharging the class of duty which we are here to discharge-I shall in that spirit ask that this case be passed over and not be permitted to operate as an obstruction to other cases which would

perhaps encounter no objection.

Mr. LONG. Mr. Chairman, I feel very certain that I can disabuse

Mr. BONG. And charman, I see very certain that the mind of the gentleman from Arkansas.

Mr. BRECKINRIDGE, of Arkansas. I trust you can.

Mr. LONG. And bring this case within the rule which the gentleman suggests. I understand the gentleman to say that if there were a general law providing for army nurses who, in rendering service as such, had suffered from exposure or disease, he would cheerfully support the measure

Mr. BRECKINRIDGE, of Arkansas. Make it a little stronger-

say, who have incurred disability.

Mr. LONG. There is no such general law; but I understood the gentleman to say that in the absence of such general law, if a special case of the kind could be shown, he would cordially support it.

Mr. BRECKINRIDGE, of Arkansas. Yes.

Mr. LONG. Now this is, of course, not a matter of charity. If it were, there is no community in Massachusetts or Arkansas or any other State of the American Union where a woman of this character in need of charity would not receive it. This is a case in which the rights of one who was a servant of the Government in its time of need should be considered by the American Congress. The gentleman, if he will look at the report carefully, will see that this woman was an Army nurse; she was thus engaged in the military service of her country.

The very term "Army nurse" implies that she was not in civil employment. If the gentleman will read the first extract on the first page

of the report he will find that Miss D. L. Dix, superintendent of United States hospital nurses, recognizes Miss Wiswell as one of that class of nurses. Mr. Frederick N. Knapp, associate secretary of the United States Sanitary Commission, which rendered such valuable service in connection with the Army, also makes affidavit, showing that this woman comes within the first requirement indicated by the gentleman from Arkansas; in other words, that she was a part of the Army organization, rendering service "as nurse in the Army hospitals." She was probably paid for her service a small sum, whatever it may have been, \$12 or \$20 a month.

A MEMBER. Twelve dollars a month.

Mr. LONG. Eleazer Shaw, of Plymouth, Mass., one of her neighbors, gives testimony which brings the case within the gentleman's second requirement:

At the time of her entering service as a nurse she was vigorous and well, and that since her discharge she has gradually and steadily become enfeebled in health. She is dependent upon others for a living and at best can not long sur-

Dr. J. B. Brewster, of Plymouth, Mass., one of the most eminent physicians in that part of the State, testifies:

I do not hesitate to declare that in my opinion

He gives his professional opinion-

her present infirmities are greatly due to her exhausting and faithful labors as an Army nurse for more than three years of the late war.

Mr. William T. Davis, chairman of the board of selectmen of Plymouth, Mass., who enlisted something like a thousand men, testifies to the same effect.

You thus have here a case exactly like that of a private soldier who enlists in the service of the country and from exposure incurred in that service becomes enfeebled and suffers disability. This woman is now seventy-nine years of age. Over twenty years ago she offered her services to her country. She was enlisted in the corps of Army nurses. She served upon the field, in the open air, in the camp, wherever a soldier required her aid. She rendered this service for three years and nine months; and in the opinion of an eminent and reliable physician of her own county she derived directly from that service the causes of the impairment of her health. Being now seventy-nine years of age, feeble, and suffering disability from her labors as a nurse, this woman asks that she may have accorded to her the same pension which has been granted to other nurses under similar conditions.

Mr. WARNER, of Ohio. I desire to inquire whether this nurse drew pay while in the service.

Mr. LONG. My impression is that she did, though I can not answer from my own knowledge. She was regularly enlisted, just like a soldier who drew his \$13 a month. I think this case meets all the requirements which any gentleman can suggest-does so indeed much more fully than many other cases that we have had here, for this woman incurred greater disability than many other nurses, some of whom

came out of the service in comparatively good health."

Mr. BRECKINRIDGE, of Arkansas. To my mind it would not be a matter of any moment whether this woman was regularly enlisted in the service or not if she actually rendered service and incurred disability. I would consider the case upon its merits, not on any technical ground. I will ask the gentleman whether there is any record that this woman during the war was sick from overwork or exposure?

Mr. LONG. Yes, there happens to be a very satisfactory record on that point. I ask the gentleman to read the letter of Miss Dix, superintendent of the United States hospital nurses.

Mr. BRECKINRIDGE, of Arkansas. Will the gentleman read the

Mr. LONG. This letter was written to Miss Wiswell upon her re-

turn home from her service as nurse. Washington, D. C. My Good Miss Wiswell: I am too busy to write more than a line acknowledging your letter.

Mr. BRECKINRIDGE, of Arkansas. What date is that?

Mr. LONG. August 23, 1865. Mr. BRECKINRIDGE, of Arkansas. Read on further.

Mr. LONG. I will read the whole of it:

I was glad to hear of your safe return and pleasant meeting with your friends, and I hope the good Massachusetts air has already done you much good. Nearly all the hospitals are closed, but much to be done in the division hospitals. Yours, kindly,

R. L. DIX, Superintendent United States Hospital Nurses.

Mr. BRECKINRIDGE, of Arkansas. Am I to understand she left

the hospital temporarily on account of being broken down by incessant labor as a nurse

Mr. LONG. The war being over and her health having become impaired this was the natural expression of the superintendent of the hospital, that the healthy Massachusetts air had already done her good.

If the gentleman will allow me he ought not to be too technical about

Mr. BRECKINRIDGE, of Arkansas. I do not mean to be technical

Mr. LONG. He ought not to be too particular to find out whether a woman had a headache or had rheumatism, but with these Army nurses the test is this: Did they render service? Were they connected with the Army? Was there any reason to believe their health was impaired by reason of their service in the Army?

Mr. BRECKINRIDGE, of Arkansas. That is the doctrine. I will

Mr. BRECKINKIDGE, of Arkansas. That is the doctrine. I will say, if the gentleman will permit me—

Mr. LONG. I think you have evidence of all that here.

Mr. BRECKINRIDGE, of Arkansas. I think there is some indication of that in the letter of the surgeon written to her when she sought repose at the close of her labors. The evidence is herservice indicates most arduous fidelity. I attach a good deal of importance to the opinion of the distinguished physician that he believes the exposure she underwent at that time was permanent in its effects. I believe something in that doctrine, for I believe men never recover, and women, too, never recover from certain exposures and trials their peculiar fiber and tenacity of purpose may enable them to undergo without being prostrated at the time. While I still have some doubts about this coming within the proof, yet I think there are strong grounds of probability, and I will give the benefit of that doubt in favor of the claimant.

Mr. LONG. I move the bill be laid aside to be reported to the

House with the recommendation it do pass.

The motion was agreed to.

Mr. MATSON. I move the committee rise. [Cries of "No!"]

The CHAIRMAN. The Chair asks the gentleman to withhold that motion until the gentleman from Wisconsin can ask for unanimous con-

Mr. GUENTHER. I ask unanimous consent to call up a bill (8. 2325) and to put the same upon its passage.

Mr. SPOONER. I have been waiting two or three nights to have called up the very next case on the Calendar, which is a meritorious

The CHAIRMAN. Does the gentleman object.
Mr. SPOONER. I think I must.
Mr. MATSON. I now renew my motion.

The House divided; and there were-ayes 91, noes 23.

So the committee refused to rise.

JANE D. MUMFORD.

The next business on the Private Calendar was the bill (S. 1184) granting a pension to Jane D. Mumford.
Mr. SPOONER. I ask for the consideration of that bill.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Jane D. Mumford, mother of Dudley C. Mumford, late captain of Company G, Nineteenth Massachusetts Volun-

The report (by Mr. Lovering) was read, as follows:

The report (by Mr. Lovering) was read, as follows:

The Committee on Invalid Pensions, to whom was referred the bill (S. 1184) granting a pension to Jane D. Mumford, have had the same under consideration, and, adopting the Senate report as their own, report the bill back to the House and recommend its passage.

Jane D. Mumford, widow, is the mother of Dudley C. Mumford, late captain of Company G, Nineteenth Massachusetts Volunteers, who, after nearly three years of active, efficient, and honorable military service, during which he was promoted from second to first lieutenant and then to captain, was killed in action at Prospect Hill, Virginia, May 31, 1861. He is highly commended as having been a brave and meritorious officer. His mother's claim for pension was rejected by the Pension Office on the ground of non-dependence.

The facts relating to the question of dependence are well set forth in a statement of the claimant on file with her claim in the Pension Office, and abundantly verified by other evidence, from which your committee quote the following:

"Before he entered the Army I received all his wages and took care of him, providing his support and clothes and supplying all his wants, as a mother should. After he entered the Army, and up to the time of his death, the same course was pursued in all respects, except that he did not live at home, and there were certain bills in camp which he had to pay himself. With the exception of such bills, he always, from the time he entered the Army until his death, continued to send his pay to me, and I continued to supply his wants in clothing and such things as he needed, just as I had done before.

"I do not mean to give the committee to understand that the pay of my son, Captain Mumford, supplied all my wants. I had a husband, always in feeble health, since dead, whose wages also contributed to the support of the family. Thus you will see that I was dependent upon my son's pay for support. The family never accumulated anything; and as both were taken away, I was

me many bitter tears. Could I live without it, I would prefer to receive no price for that which was to me beyond all price."

The husband died March 6, 1868, leaving Mrs. Mumford with two young children and a small sum of money, which was necessarily soon expended in her and their support and in removing to and establishing herself at Providence, R. I., where an opportunity was open to her as a teacher in the public schools. In that employment she has until recently secured a support; but her age and feeble health have now compelled her to abandon that vocation, and the consequent necessity of urging her claim for relief presses upon her with continuously increasing force.

Believing that the proper degree of dependence is established by the testimony, the committee recommend the passage of the bill.

On motion of Mr. SPOONER, the bill was laid aside to be reported to the House with the recommendation that it do pass.

NANCY MASON.

Mr. GUENTHER. Mr. Chairman, I renew my request to take up Senate bill No. 2325, to grant a pension to Nancy Mason, and put it

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and the same is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Nancy Mason, widow of William A. Mason, formerly a private in Company K, Third Wisconsin Cavalry.

Mr. BRECKINRIDGE, of Arkansas. I ask that the report in this case be read.

Mr. GUENTHER. I think I can make a brief statement that will satisfy the gentleman of the merits of this case. I will read from the report. On the 21st day of August, 1885, Dr. Earle H. Ostrander, whom I know very well as a most eminent and reputable physician of

Appleton, Wis., Says:

I certify that William Mason, of Company K, Third Wisconsin Cavalry, died on February 21, 1885, from or of renal dropsy and other complications, said to have been contracted while in the service. I was his family physician before he enlisted, and never knew him otherwise than a healthy man.

This testimony is supplemented by the testimony of his neighbors, whose affidavits show that his disability commenced immediately after his return from the service; that he was a cripple and could not labor, and so continued. I have numerous petitions from the Grand Army posts and a number of letters from that part of the country, which all indicate the same condition of affairs and ask that this pension be granted. The widow, Mrs. Mason, is very destitute, and if ever there was a case which appeals to our sense of gratitude it is this one; and I

hope the bill will be passed without objection.

Mr. WALLACE. What is the amount of pension granted.

Mr. GUENTHER. The widow's pension fixed by the law, \$12 a month.

Mr. BRECKINRIDGE, of Arkansas. It does not appear by any statement contained in the report that he came out of the service by reason of that disability.

Mr. GUENTHER. Oh, yes; it does. Mr. BRECKINRIDGE, of Arkansas. Where?

Mr. GUENTHER. The physician certified, as I have shown you, as to the diseases from which he suffered and died, and that he was a healthy man before his enlistment; and his neighbors testify that immediately after his return from the service he was a cripple and unable to perform labor. That connects the disease with his service in the

Mr. BRECKINRIDGE, of Arkansas. Let the report be read. I think

that would be more satisfactory.

The report (by Mr. WINANS) was read, as follows:

The Committee on Invalid Pensions, to whom was referred Senate bill 2325, report that they have examined the same, and adopt the Senate report, as follows:

[Senate Report No. 990, Forty-ninth Congress, first session.]

[Senate Report No. 990, Forty-ninth Congress, first session.]

On the 2d of September, 1884, William A. Mason filed an application for a pension for disability contracted in the Army, and alleging chronic rheumatism. He was a private in Company K, Third Wisconsin Cavalry; enlisted February 29, 1884; was discharged September 29, 1895, serving one year and seven months. In his declaration he says his disability commenced directly after his discharge, and that he had suffered continuously from that time until he applied for a pension. From an examination of the papers in the file, it does not appear that his case was very thoroughly investigated. There is no report from the records of the Surgeon-General, and, as usual, that of the Adjutant-General says, "Regimental hospital records or company returns not on file." It identifies the soldier and his service, and shows that his standing is good.

The Pension Office ordered the claimant before an examining surgeon. In the surgeon's report he relates what the soldier told him, among other things that he thought he had rheumatism, because the doctor told him so; also, that he had disability from epilepsy and congestion of the liver, and from these there was an aggregate of total disability; but in his opinion it was not incurred in the service. There is no other report of a medical investigation of the man's case. The medical referee of the Pension Office thought the hospital records should be obtained before final action, but they were not. Again, the same referee was of the opinion that the claimant had mistaken his diagnosis; that the disability was not rheumatism, but from disease of liver; and it was finally concluded that he should be ordered before a board of examiners, but there is no record of any such proceeding. So far as the Pension Office is concerned the case is in a very imperfect condition. On the 21st of August, 1885, Dr. Earle H. Ostrander, of Appleton, Wis., says:

"I certify that William Mason, of Company K, Third Wisconsin Cavalry, died on February

not labor, and so continued. It is shown that by reason of his sufferings and poverty he was unable to go to the examining surgeon, and that he was a suffering, helpless man for years before he died.

In the opinion of the committee his disability is sufficiently shown; that he died from disease contracted in the service, and that it is not material by what name it is called. There is also proof that Nancy Mason, for whose redief the accompanying bill provides, was his wife. The bill is reported favorably, with a recommendation that it do pass.

Mr. BRECKINRIDGE, of Arkansas. The family physician, as that report discloses, states that this applicant died from a dropsical complaint, and that he was free from it before he went into the service.

Mr. GUENTHER. No, not that exactly, but that he never knew him otherwise than as a healthy man. That was of course before he enlisted, as the report shows.

Mr. BRECKINRIDGE, of Arkansas. But he does not state when he

contracted the disability.

Mr. GUENTHER. No, because of course he could not know that. Mr. BRECKINRIDGE, of Arkansas. He leaves a gap of some twenty years between the time when this man entered the service and the date

of his affidavit, which was made shortly after the death of the party.

Mr. GUENTHER. There is a gap of course between the physician's testimony, that is to say, before the war and the last testimony taken, because he probably had other medical attendance during that time. But the physician says that he was a healthy man when he enlisted, and the neighbors say that immediately after his return he was a crippled man and incapacitated from labor. I claim that that shows the connection between the service and the disability; and if so, then by reason of that disability his widow is entitled to a pension. That is reason of that disability his widow is entitled to a pension. That is the finding of the committee. It is also shown that by reason of his sufferings and poverty he was unable to get an examining surgeon.

Mr. BRECKINRIDGE, of Arkansas. But that is not the point at

The same physician who testifies to his soundness before entering the Army testifies of his own immediate knowledge of the cause of his death. Now that physician also states that this disease was "said to have been contracted" while in the service. Where was the man during all the intervening time? Was the physician not cognizant of his dis-

ease during these twenty years?

Mr. GUENTHER. Yes, sir; he so states.

Mr. BRECKINRIDGE, of Arkansas. No; he does not. He testified that he died of this disease, but not that it was of long standing. Now, there is a very unfortunate lapse in the physician's testimony in that regard. He does not give any statement whatever as to the progress of the disability. He takes him twenty years ago as a sound man, and does not say anything of his condition during the twenty years until the end of it, when he is a dead man; and the surgeon of the Pension Office expresses the opinion that the disability was not incurred in the service. Now I sake my friend to let this bill as a control of the progress. service. Now, I ask my friend to let this bill go over. I do not be-lieve it is a proper case to pass.

Mr. GUENTHER. Let me appeal to the gentleman not to make

that objection. From numerous letters this widow is most destitute.

Mr. BRECKINRIDGE, of Arkansas. But that is not an argument

Mr. GUENTHER. Oh, yes; it is an argument.
Mr. BRECKINRIDGE, of Arkansas. Not at all; for even if she was rich and had a proper claim she would be just as much entitled to it. Mr. GUENTĤER. Let me read the last part of this report again:

In the opinion of the committee his disability is sufficiently shown; that he died from disease contracted in the service, and that it is not material by what name it is called.

Mr. BRECKINRIDGE, of Arkansas. But that is not my opinion.

Mr. GUENTHER. No; I wish it was.

Mr. BRECKINRIDGE, of Arkansas. Nor is it the opinion of the examining surgeon.

Mr. GUENTHER. I do not give much for the opinion of many of

the examining surgeons.

Mr. BRECKINRIDGE, of Arkansas. Nor is it the opinion of the family physician, who says it is "reported" that the disease was contracted in the service. He does not claim that it was.

Mr. GUENTHER. No; I will read that again.

Mr. BRECKINRIDGE, of Arkansas. It is not necessary.

Mr. GUENTHER. But the family physician testifies to his condi-tion before entering the service, and then his neighbors come in and make affidavit, certifying that when he returned from the Army he was broken in health and unable to work. That I claim connects the disability with the service. The widow is poor and dependent upon her own exertions; and I think in connection with the testimony on file that ought to be sufficient to establish the case.

Mr. BRECKINRIDGE, of Arkansas. The whole question is whether she has a proper claim on this body to relieve these necessities.

Mr. GUENTHER. Will you allow me to take a vote in the House

the same as in the other case?

Mr. BRECKINRIDGE, of Arkansas. Oh, yes.
Mr. GUENTHER. Will you agree that the bill shall be reported to
the House with the understanding that a vote shall be taken in the House?

Mr. BRECKINRIDGE, of Arkansas. Take the vote here.

Mr. GUENTHER. Then I call for a vote.

The CHAIRMAN. The question is, Shall the bill be laid aside to be reported to the House with the recommendation that it do pass? The question being taken, it was decided in the affirmative.

ELIZABETH GARAGHTY.

Mr. SCOTT. I am like my friend from North Carolina [Mr. SKIN-NEE]. I do not think I have asked unanimous consent either of the Committee of the Whole or of the House since I have been a member of this body; and I think I ought to have something to go home to my constituents upon. [Laughter.] I ask unanimous consent to call up for consideration at this time the Senate bill No. 2366. It is reported unanimously by the Committee on Invalid Pensions; and I think the committees of the House and of the Senate, having examined the case, ought to know whether it is a proper bill or not.

The CHAIRMAN. Is there objection to the request of the gentle-

man from Pennsylvania?

There was no objection. The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Elizabeth Garaghty, widow of Michael Garaghty, late of Company A, Forty-fourth Wisconsin Volunteers.

The bill was laid aside to be reported to the House with the recommendation that it do pass.

CHARLES HAHNEMAN.

Mr. ROCKWELL. I ask unanimous consent to call up for consideration the bill (H. R. 8180) to increase the pension of Charles Hahneman. This is a case where the man can not live long. I ask unanimous consent to call up for consider-

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Treasury be, and he hereby is, authorized to increase the pension of Charles Hahneman, late a private in Company C, Forty-first New York Volunteers, and pay him at the rate of \$24 per month, in lieu of the pension now paid him.

Mr. ROCKWELL. I ask for the reading of the report. The report (by Mr. LOVERING) was read, as follows:

Mr. ROCK WELLL. I ask for the reading of the report.

The report (by Mr. Lovering) was read, as follows:

The Committee on Invalid Pensions, to whom was referred House bill \$180, beg leave to submit the following report:

Charles Hahneman, late a private in Company C, Fortieth Regiment Massachusetts Volunteers, is borne upon the pension-roll, certificate 96792, at the rate of \$12 per month for double hernia. He applied for an increase of pension, basing the same upon asthma contracted in the service. This claim was rejected because of claimant's inability to furnish evidence of contraction in the service and in line of duty. The surgeon of regiment is dead, and he has made diligent but ineffectual efforts to find the whereabouts of the officers of his company. The evidence in the claim discloses the fact that the claimant is in a most pitiable condition, his hernia being aggravated by straining when coughing to such a degree as to totally unfit him for manual labor of any kind, even the lightest. Dr. Frank K. Paddock testifies to an acquaintance with claimant for the last twenty years, and that in that time claimant has always been troubled with the asthma, and has been treated for it by several physicians, as well as by himself; that since 1881 he has not been able to do any work whatever.

The board of examining surgeons at Pittsfield, Mass., December 3, 1884, says:
"The claimant is a marked example of chronic asthma, with muscular emphyema. He has a dozen or more scars of varicose ulcers, with varicose veins of right leg; the veins are supported by elastic stockings. He has also right complicated direct scrotal hernia; diameter of the ring, 2 inches or more. It is impossible to give adequate support by a truss, in consequence of the very large size of the ring and the complicated results he is disabled for the performance of any manual labor, and we rate second grade, \$24 per month."

November 4, 1885, he was again examined by the board at Springfield, Mass., who say:
"Large right oblique inguinal hernia, ex

November 4, 1885, he was again examined by the board at Springfield, Mass., who say:

"Large right oblique inguinal hernia, extending into and distending the scrotum; tumor measures 14 inches in circumference. We believe it impossible to retain it with any truss. He is evidently suffering severely from asthma, as shown by the characteristic breathing. Veins of right foot, leg, and thigh varicose to a marked degree; half dozen cicatrices on anterior and lateral aspect of leg below knee; right east three-quarters of an inch larger. We rate total second grade, or \$24 per month."

Claimant states he has been unable to do any work for years, between the asthma and the hernia.

The case of this soldier is so well known in the town where he lives it attracts general attention and sympathy by its extreme phases of suffering and poverty. Rev. C. D. Hills, pastor of the M. E. church in Pittsfield, in a letterto Hon. F. Rockwell, dated June 3, 1886, says:

"Charles Hahneman made out to drag himself to Troy to obtain a truss. He was experimented upon, but without success, and is now without any truss whatever. He is indeed in a most terrible condition, and his poor wife ought to have the burden lightened by an increase of pension. He can not live long. Oh, that a redeemed nation would do more for its disabled saviors."

Your committee are of opinion that the pension, for reasons given, should be increased. They therefore report back the accompanying bill and recommend its passage.

Mr. BRECKINRIDGE, of Arkansas. I wish to ask the gentleman from Massachusetts one question. Why was not this pension given

under the general law?

Mr. ROCKWELL. Because under the general law this applicant draws a pension for double hernia, \$12. He now asks for \$24 on the ground that he should get the increase for asthma. His regiment was cut to pieces and he could not find the evidence required by the Department to show that the asthma was contracted in the service.

Mr. BRECKINRIDGE, of Arkansas. If from any cause the disability increases can not the pension be proportionately increased to the

maximum rate

Mr. ROCKWELL. They say not at the department. They say that can not be done except for another disability.

Mr. LAIRD. I call attention to an obvious error in the bill as the

Clerk read it. It authorizes the Secretary of the Treasury to do so and It should be Secretary of the Interior.

Mr. ROCKWELL. That is a misprint.

The CHAIRMAN. If there be no objection that error in the bill will be corrected.

There was no objection, and the bill was laid aside to be reported to the House with the recommendation that it do pass.

MILTON P. SHOCKLEY.

Mr. WEAVER, of Iowa. I ask unanimous consent to call up for consideration the bill (S. 1398) granting a pension to Milton P. Shock-The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Milton P. Shockley, late a member of Company C, Second Regiment of Ohio Volunteers, in the Mexican war.

The report (by Mr. STRUBLE) from the Committee on Pensions was

read in part.

Mr. MATSON. I ask unanimous consent that without the reading of the report being completed, it be printed in the RECORD.

There was no objection.

The report in full is as follows:

There was no objection.

The report in full is as follows:

The Committee on Pensions, to whom was referred Senate bill 1398, having had the same under consideration, would respectfully report as follows:

Milton P. Shockley, being insane, petitions, through his guardian, Joseph W. Rodgers, of Montezuma, Iowa, to be allowed a pension for scurry and resulting disabilities incurred in the Mexican war while on board a gunboat on the Rio Grande River.

The claim was rejected on the ground of "no satisfactory evidence to prove origin of disability in the service." That claimant was a sound man before enlistment is abundantly shown by the cyldence. That he incurred a severe disability, was treated in the hospital therefor, and was discharged as unfit for further service on account of disability, is shown by several witnesses and the surgeon's certificate of discharge. There is no positive testimony as to the nature of his disability, and for this reason his claim was rejected. His condition immediately after discharge, and for several months, is testified to by two reputable neighbors, who were well acquainted with him before his enlistment, and with whom he spent considerable time, at frequent intervals, as soon as he returned from the service.

They testify that claimant was almost helpless, partially paralyzed in his lower limbs, and incapacitated for doing much work; and from the testimony of several others, who were acquainted with him since 1850, it appears that he grew worse from the time of his discharge to time of application in 1883. The testimony of several neighbors and three family physicians proves that since 1875 he has been totally blind and deaf, and without the use of his legs, and wholly dependent upon the support of his wife and children.

The examining surgeon, instructed by the Pension Office to examine claimant, reports: "Progressive paralysis of lower extremities; involuntary action of bowels and kidneys for four or five years; complete deafness, and conjunctivitis of right eye.

"The applican

Mr. BRECKINRIDGE, of Arkansas. There is no question, I presume, as to this man having served in the Mexican war?
Mr. WEAVER, of Iowa. None at all.

ORDER OF BUSINESS.

Mr. MATSON. I move that the committee rise.

The motion was not agreed to; there being—ayes 9, noes 14.
Mr. FUNSTON. I ask unanimous consent to call up for consideration the bill (H. R. 7696).

Mr. MATSON. I call for the regular order.

The CHAIRMAN. The regular order is demanded, which cuts off

all requests for unanimous consent. The Clerk will report the next bill

The Clerk read as follows:

A bill (S. 2144) granting an increase of pension to Grace F. Edes.

Mr. PERKINS. That is an adverse report. I ask that it be passed

There was no objection.

The Clerk read the title of the next pension bill on the Calendar, as follows:

A bill (S. 1783) granting an increase of pension to George Bliss.

Mr. PERKINS. There is also an adverse report in that case. I ask that the bill be passed over.

There was no objection.

The Clerk read the title of the next pension bill on the Calendar, as

A bill (H. R. 9130) granting a pension to Sarah O'Brien.

The consideration of this bill was not called for.

The Clerk read the title of the next pension bill on the Private Calendar, as follows:

A bill (H. R. 7911) granting a pension to Daniel Schultheis.

The consideration of this bill was not called for.

GEORGE W. ROBAUGH.

Mr. FUNSTON. The gentleman from Indiana [Mr. Matson] withdraws the demand for the regular order.

Mr. MATSON. I withdraw the demand for the regular order so far as regards the bill called up by the gentleman from Kansas [Mr.

FUNSTON], with the understanding that the committee shall thereafter

Mr. FUNSTON. I renew my request for the present consideration of the bill (H. R. 7696) for the relief of George W. Robaugh.

The bill was read, as follows:

Be it enacted, &c., That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of George W. Robaugh, late of Company C, Twenty-third Regiment Kansas Militia.

The Clerk commenced to read the report (by Mr. MORRILL).

Mr. WEAVER, of Iowa (interrupting the reading). That is certainly enough.

Mr. WALLACE. I would like to hear the whole of the report read. The Clerk resumed and concluded the reading of the report, as fol-

The Committee on Invalid Pensions, to whom was referred the bill (H. R. 7696) granting a pension to George W. Robaugh, submit the following report:

The evidence in this case shows that claimant enlisted October 21, 1864, in Company C, Twenty-third Regiment Kansas Militia; that about the 25th of October he was detailed to take charge of a saw-mill to manufacture lumber to be used at Fort Leavenworth, and while thus engaged his right arm was crushed in the machinery, rendering amputation necessary.

The witnesses in this case are men of high character, and their statements are circuit in full

he was detailed to the charge of the analysis and the manufacture lumber to be used an achinery, rendering amputation necessary.

The winesses in this case are men of high character, and their statements are given in full.

Hon. Frank H. Belton, commissioner of labor of Kansas, testifies:

"That he is acquainted with George W. Robaugh, and knows him to be the identical person who enlisted as a private in Company C, Twenty-third Kansas Millitia; that the said George W. Robaugh, while in the line of his duty at or near Nearman Station, in the State of Kansas, did, on or about the 26th of October, 1864, become disabled in the following manner: The said Robaugh was one of a detail made to go to Nearman Station, in Wyandotte County, Kansas, to run a saw-mill and saw lumber for the use of the Government, and that on or about October 25, 1864, while in the line of his duty as engineer, and in charge of the machinery, his right arm was caught in the machinery, and was so injured as to cause amputation at or near the shoulder-joint of said right arm; that the facts are personally known to the affiant by reason of being in charge of a detail of men made from the Twenty-third Regiment of Kentucky State Millita to go to Nearman Station, in Wyandotte County, Kansas, to run a steam saw-milled the state of the discovernment to build fortifications at Fort Leavenworth.

"Said George W. Robaugh was one of that detail, and was engineer and in charge of the machinery, and while so engaged go this right arm caught in the machinery, and was so injured as to cause amputation of said right arm at or near shoulder-joint. I was away from the mill at the time of the accident, but was there soon after. Saw claimant and his injuries before he was moved from the mill, and assisted in moving him. The said George W. Robaugh enlisted in Company C, Capt Philip Kescher, at Wyandotte, Kans., at the same time I did, and drew arms and ammunition. The enlistment was made during the excitement of the Price raid, and was late in the evening. We draw

Mr. WALLACE. I ask the gentleman who has called up this bill

why it is that this pension was not allowed by the Pension Office?

Mr. FUNSTON. Under the general laws they can not allow a pension for service in the militia. This man was in the Kansas militia and served during the Price raid. It is not a case that could be pensioned

under the general law.

Mr. BRECKINRIDGE, of Arkansas. I think it is stated in the report that this man was in the military service of the United States. Did he serve under the Federal Government?

Mr. FUNSTON. Certainly; but he was in the State militia. Mr. BRECKINRIDGE, of Arkansas. But he served under the command of Federal officers.

Mr. FUNSTON. Yes; and the same day that he enlisted he was detailed to work in a saw-mill, and got his arm crushed.

Mr. BRECKINRIDGE, of Arkansas. Well, we allow pensions in

cases of that kind.

There being no objection, the bill was laid aside to be reported to the House with the recommendation that it do pass.

Mr. MATSON. I move that the committee do now rise.

The CHAIRMAN. The gentleman from Indiana [Mr. MATSON]
moves that the committee rise. Pending that motion the gentleman from Wisconsin [Mr. PRICE] asks unanimous consent to extend his remarks in the RECORD.

There was no objection.

The motion of Mr. MATSON was agreed to.

The committee accordingly rose; and the Speaker pro tempore [Mr. McMillin] having resumed the chair, Mr. Dockery reported that the Committee of the Whole had had under consideration bills on the Private Calendar under the special order, and had instructed him to report back sundry bills with various recommendations.

SAMUEL SAWYER.

The SPEAKER pro tempore. The bill (H. R. 4028) granting a pension to Samuel Sawyer is reported from the Committee of the Whole with the recommendation that the previous question be considered as ordered, and that the consideration of the bill be postponed until the first Friday after the first Monday in December next, which will be the first Friday of next session. If there be no objection that order will be made.

There was no objection, and it was so ordered.

BILLS PASSED.

Bills of the following titles, reported from the Committee of the Whole without amendment, were severally ordered to be engrossed and read a third time; and being engrossed, were read the third time, and

A bill (H. R. 9129) granting a pension to Rebecca Wiswell; and A bill (H. R. 9696) for the relief of George W. Robaugh.

Amendments to bills of the following titles, reported from the Committee of the Whole, were severally agreed to; and the bills as amended were severally read a third time, and passed:
A bill (H. R. 7988) granting an increase of pension to Bryant Waters;

and

A bill (H. R. 8180) to increase the pension of Charles Hahneman. Senate bills of the following titles, reported from the Committee of the Whole without amendment, were severally read the third time, and passed:

A bill (S. 1184) granting a pension to Jane D. Mumford;
A bill (S. 2325) granting a pension to Nancy Mason;
A bill (S. 2366) granting a pension to Elizabeth Garaghty; and
A bill (S. 1398) granting a pension to Milton P. Shockley.
Mr. MATSON moved to reconsider the several votes by which the

bills were passed; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

The House then, on motion of Mr. MATSON (at 10 o'clock and 50 minutes p. m.), adjourned.

PETITIONS, ETC.

The following petitions and papers were laid on the Clerk's desk, under the rule, and referred as follows:

By Mr. HEARD: Petition of R. M. Myrich, of Moniteau County, Missouri, asking pay for stores taken and used by the United States Army—to the Committee on War Claims.

By Mr. HOLMES: Petition of W. W. Clarke, of D. B. Northam, and 53 others, and of L. P. Peterson and others, citizens of the Des Moines Valley, Iowa, protesting against the passage of House bill 9809—to the Committee on the Public Lands.

By Mr. LOWRY: Papers relating to the claim of Mrs. A. M. Coss-ler, of Mobile County, Alabama, and of Fannie M. Guion, of Holmes County, Mississippi—to the Committee on War Claims. By Mr. LYMAN: Petition of William Leidentopf and F. A. Burke for

relief-to the Committee on Claims.

By Mr. McCOMAS: Papers and claim of James M. Andrews for re--to the same committee.

Also, petition of soldiers of Cumberland, Md., in behalf of Joseph Romiser's pension bill—to the Committee on Invalid Pensions.

By Mr. NEAL: Petition of James A. Bassett and of M. W. W. Etter, administrator of Joseph L. Etter, deceased, of Hawkins County, and of James Scott, of White County, Tennessee, asking compensation for stores taken and used by the United States Army—to the Committee on War Claims.

By Mr. PETERS: Petition asking a pension for Jane G. Moore, and also petition asking a pension for Mary G. McClure—to the Committee on Invalid Pensions

By Mr. RICHARDSON: Petition of L. D. Sugg, of Lincoln County, Tennessee, asking payment of his claim against the United States—to the Committee on War Claims.

By Mr. W. J. STONE, of Missouri: Petition of J. M. Bell, of Vernon

County, Missouri, asking pay for stores used by the United States Armyto the same committee.

By Mr. STRAIT: Resolution of La Grange Post, No. 79, Grand Army of the Republic, protesting against attaching any special tax to pension bills-to the Committee on Invalid Pensions.

By Mr. WEBER: Petition in favor of a bill to pension all honorably

discharged soldiers and sailors—to the same committee.

The following petitions, asking for the passage of House bill 7887, repealing timber-culture, pre-emption, and desert-land acts; of House bill 7021, for adjustment of railroad and other land grants; of bill forfeiting all railroad land grants the conditions of which have not been strictly complied with; of House bill organizing the Territory of Oklahoma: of Senate bill organizing a portion of the great Sioux reservation homa; of Senate bill opening a portion of the great Sioux reservation to settlement; of bill prohibiting aliens from holding land in the United States; of bill making Presidential and Congressional election days holidays, and punishing bribery; and of bill directing disbursement of at least \$200,000,000 Treasury surplus, and substituting Treasury notes for bank notes retired, were severally referred to the Committee on the Public Lands.

By Mr. CONGER: Petition of Assembly No. 4882, Knights of Labor,

of Des Moines, Iowa.

By Mr. RANNEY: Petition of W. H. Cate and 36 others, citizens of the third district of Massachusetts.

SENATE.

SATURDAY, July 31, 1886.

The Senate met at 11 o'clock a. m

Prayer by the Chaplain, Rev. J. G. Butler, D. D.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. HOAR, and by unanimous consent, the further reading was dispensed with.

PETITIONS AND MEMORIALS.

Mr. HARRIS presented a preamble and resolutions of the Merchants' Exchange and Cotton Exchange of Memphis, Tenn., favoring the grant of authority to the Kansas City and Memphis Railroad and Bridge Company to construct a railroad bridge across the Mississippi River at Memphis, Tenn.; which was ordered to lie on the table.

He also presented a resolution of the Merchants' Exchange and Cotton Exchange of Memphis, Tenn., recommending that the Mississippi River Commission be sustained and that the improvement on that river be continued; which was ordered to lie on the table.

Mr. HARRIS. I also present the memorial of Austin Miller and a large number of other citizens of Hardeman County, Tenn., and the memorial of A. W. Brockway and a large number of other citizens of Haywood County, Tenn., remonstrating against the passage of any act forfeiting the lands granted to the Gulf and Ship Island Railway Company. I move the reference of the memorials to the Committee on Public Lands.

The motion was agreed to.

Mr. MANDERSON. I present a petition signed by a large number of citizens of Northern Nebraska, praying that the lands of the Great Sioux Nation may be opened to settlement. As that matter has been acted on, I move that the petition lie on the table.

The motion was agreed to.

REPORTS OF COMMITTEES.

Mr. SAWYER, from the Committee on Pensions, to whom was referred the bill (S. 2687) granting a pension to William B. Barnes, reported it with an amendment, and submitted a report thereon.

INVESTIGATION OF CUSTOMS FRAUDS.

Mr. ALDRICH. I report from the Committee on Finance the following resolution, and ask for its present consideration:

Resolved. That the Committee on Finance, by subcommittee or otherwise, continue the investigation of frauds and abuses in the customs revenue during the recess of Congress, with the powers and authority conferred by the resolutions of the Senate of December 21, 1881, and January 19, 1886.

The resolution was considered by unanimous consent, and agreed to.

RELATIONS BETWEEN LABOR AND CAPITAL.

Mr. BLAIR. I offer the following resolution for action:

Resolved. That the Committee on Education and Labor be directed to continue, with a view to its completion during the ensuing vacation, the investigation of the relations between labor and capital authorized and directed by Senate resolutions of August 7, 1982, and February 26, 1883, with the same rights and powers conferred by previous resolutions of the Senate.

Mr. EDMUNDS. I think we had better reflect a little on that. The PRESIDENT pro tempore. Objection being made, the resolution will lie over under the rule.

BONDED EXPORT WHISKY.

Mr. DAWES. On the 22d of June last the Secretary of the Treasury responded to a resolution of the Senate of June 8, 1886, with very valuable information in reference to whisky which had been sent out of the country in bond. A portion of the communication which came in afterward was referred to the Committee on Finance. This matter was laid upon the table at my request to be examined. I think it is a matter which deserves the attention of the Committee on Finance, and therefore I move to take the papers from the table and refer them to

the Committee on Finance, and, if proper, with instructions that they examine into the same, and report at the next session what steps are

necessary, if any.

The PRESIDENT pro tempore. The Senator from Massachusetts moves that the communication of the Secretary of the Treasury in regard to the subject-matter stated be referred to the Committee on Fi-

Mr. DAWES. With instructions to examine into the same, and report at the next session what action, if any, is necessary growing out of the matter.

The PRESIDENT pro tempore. With instructions as stated. The question is on agreeing to the motion.

The motion was agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had passed the following bills:

A bill (S. 1184) granting a pension to Jane D. Mumford;

A bill (S. 1398) granting a pension to Jane B. Mumiora;
A bill (S. 1398) granting a pension to Milton P. Shockley;
A bill (S. 2325) to grant a pension to Nancy Mason;
A bill (S. 2366) granting a pension to Elizabeth Garaghty; and
A bill (S. 2502) granting a pension to Louise Paul.
The message also announced that the House had concurred in the amendments of the Senate to the following bills:

A bill (H. R. 28) to provide for the appointment and compensation of a district judge for the southern district of Alabama; and A bill (H. R. 9857) in relation to the western judicial district of Wis-

consin.

The message further announced that the House had passed a joint resolution (H. Res. 295) permitting the public building authorized by act of Congress approved June 30, 1886, at Savannah, Ga., to be located not less than 40 feet from any other building, instead of 50 feet, as provided in said act, in which it requested the concurrence of the Senate.

AMERICAN ANNIVERSARY CELEBRATION.

The PRESIDENT pro tempore. If there be no further "concurrent or other resolutions," the Chair lays before the Senate a resolution which comes over under objection, which will be read.

The Chief Clerk read the resolution submitted yesterday by Mr.

HOAR, as follows:

Whereas the approaching centennial anniversary, in 1889, of the adoption of the Constitution of the United States, and that of the four hundredth anniversary, in 1892, of the discovery of America by Christopher Columbus, are two important historical events, fraught with great patriotic interest, not only to the citizens of this Republic and of the governments of the western hemisphere, but also mark occasions of transcendent importance in the history of the civilized world: Therefore,

Be ti resolved, That a committee of five members of the Senate, of whom the President of the Senate shall be one, be appointed to consider, formulate, and report at the next session of Congress a plan for properly celebrating, at the capital of the Republic, these two illustrious anniversaries. Said committee are authorized to act in concert with any similar committee of the House of Representatives, and to sit during the recess.

The PRESIDENT protempore. The Chair wishes to take this occasion to state that he believes, by a careful examination of Rule XIV, that he was in error yesterday in excluding the Senator from Massachusetts from having this resolution presented the next day after it was reported; but the Chair acted in accordance with the uniform custom of his predecessors so far as he knew, and especially of his immediate predecessor. Therefore, as the Senate had itself construed by its practice the rule, the Chair feels disposed to adhere to that until the Senate reverses it or the Committee on Rules may take the subject-matter into consideration.

The question is on agreeing to the resolution submitted yesterday by

the Senator from Massachusetts [Mr. HOAR].

Mr. HOAR. I should like to amend the resolution in order to meet Mr. HOAR. I should like to amend the resolution in order to meet the objection of the Senator from Maine [Mr. HALE] which I have conversed with him about, by inserting "seven" instead of "five" and by directing the committee to report on "the expediency of" as well as a plan. It is not the purpose to commit the Government to anything whatever by this resolution, and I suppose the committee will be able to do their duty in the early days of the next session. I do not think it will require any labor in vacation. do not think it will require any labor in vacation.

The PRESIDENT pro tempore. The amendment will be stated.

Mr. CULLOM. I understand that the President of the Senate ad-

heres to his decision of yesterday?

The PRESIDENT pro tempore. He follows the practice of the Sen-

ate rather than the rule.

Mr. CULLOM. Then how does this resolution get before the Senate? The PRESIDENT pro tempore. The resolution was afterwards introduced by the Senator from Massachusetts as an individual Senator,

and it now comes up in regular order.

Mr. FRYE. Which under the ruling of the Chair has much greater

privilege than a report from a committee. The PRESIDENT pro tempore. According to the practice of the

Mr. CULLOM. I reported a resolution from a committee a few days since and I see that it has gotten onto the Calendar.
Mr. EDMUNDS. That is where it belongs.

Mr. CULLOM. I had better withdraw it and introduce it individ-

I do not, at this late stage of the session, desire to introduce a topic that would excite debate or difference of opinion in regard to a mere matter of parliamentary law. At some convenient time in the next session, if this question should come up again, I shall ask the Chair to submit it to the Senate.

I agree with the present opinion of the Chair that the rule is what I claimed yesterday, and I think I should be able to satisfy the Chair that the usage he speaks of is not of such long standing as would warrant a departure from the letter and spirit of the rule. I do not care,

however, to bring it up now.

Mr. CULLOM. Do I understand the Senator to hold that an individual resolution has preference over a resolution reported by a com-

Mr. HOAR. No, just the contrary. If the Senator will pardon me, I do no desire to dwell on this matter—

Mr. CULLOM. Nor do I.

Mr. HOAR. I reported day before yesterday by direction of a committee a Senate resolution which went over one day on objection. Then on my desiring to have it called up yesterday the Chair expressed the opinion that it had gone to the Calendar, and that a resolution reported by a committee, though a Senate resolution alone, did not have the same privilege which a resolution introduced by a single Senator would have. I did not care about detaining the Senate, and though I expressed, with great respect to the Chair, my dissent from the proposition, I thought it better to introduce a separate resolution of my own and have it go over to to-day; and now I have it up, so that it is in order either way.

The rule, on examination, does not make any provision for a calendar whatever except that it is to be a calendar of bills and joint resolutions, not of Senate resolutions alone. Then it says, without specifying where the resolutions come from, that any resolution, without saying whether it comes from a committee or anywhere else, shall go over one day if

there be objection.

But, as I said, I should like to have the other matter disposed of and let the question of order go until some time when the Senate has nothing

Mr. EDMUNDS. Mr. President-

Mr. EDMUNDS. Mr. President—
Mr. HOAR. May we not have the amendment read?
Mr. EDMUNDS. I should be glad to have the opportunity to submit a few observations on the subject that my friend from Massachusetts has occupied the time of the Senate upon.
Mr. HOAR. I said I did not desire to occupy time, but I merely answered the question put by the Senator from Illinois.
Mr. EDMUNDS. Then the Senator from Massachusetts spoke against

his own will, for he proceeded to make an argument of great force in support of his view. Now, I do not wish to have the Chair labor through the whole vacation under the strain of that influence in that direction without some observations being submitted the other way.

Mr. HOAR. Postpone it until after the resolution is acted on.

Mr. EDMUNDS. I would have postponed it if the Senator from Massachusetts had, but I think I can not postpone it now.

This subject was considered, I must imagine, when the Committee on Rules framed the present rules. Before that time we had a calendar of resolutions; they stood by themselves, and would accumulate. and accumulate, and not being acted upon we had to go through the whole list every day, calling them along. That was found to be inconvenient, and it was thought that the best way was to drop that part of it altogether and to have one single Calendar. In respect of the rule which says "a calendar of bills and joint resolutions," taking that rule alone, it does not seem to be a calendar for anything else; but that does not imply that you can not have a calendar of some other kind besides that, and it may be on the same piece of paper.

But when you turn to another rule, on the subject of reports of committees, it states that they shall not be acted upon without unanimous consent on the day they are offered. It speaks then of business which the Senate has already taken in hand and which has been brought forward by a committee for consideration, where every kind of business ought to stand on an equal footing and no other; whereas the rule about resolutions refers to the first introduction of a resolution which may be a surprise to the Senate, that it shall lie over one day before the Senate is called upon to act on it at all, either to agree to it, or to refer it, or

to do anything else with it.

In this state of the rule as it now stands, the then presiding officer called the attention of members of the Committee on Rules to the subject and the somewhat confusing state of it all as to what was to be done with a resolution which had been referred to a committee, for illustration, for that illustrates just as well, and which was reported; and it was thought that the true and systematic construction of the and it was thought that the true and systematic construction of the whole thing together would be to have a resolution which came from a committee stand on the same footing that a bill did, and go on in its order of business to be considered by the Senate.

If that is not a good way to do, the Committee on Rules, without our straining ourselves on deciding what the rules now mean, can report a rule one way or the other and the Senate can pass it.

Thanking my friend from Massachusetts, I leave the subject. The PRESIDENT pro tempore. The amendment proposed by the

Senator from Massachusetts will be reported.

The CHIEF CLERK. It is proposed to amend the resolution in line 1 by striking out "five" and inserting "seven," and in line 3, after the word "Congress," by inserting "the expediency of and; "so as to make the resolution read:

Resolved, That a committee of seven members of the Senate, of whom the President of the Senate shall be one, be appointed to consider, formulate, and report at the next session of Congress the expediency of and a plan for properly celebrating, at the capital of the Republic, these two illustrious anniversaries. Said committee are authorized to act in concert with any similar committee of the House of Representatives, and to sit during the recess.

Mr. HAWLEY. Mr. President, this is just precisely a moment when things of this sort ought to have careful consideration. It is possible, if we are careless about it now, that many weeks of consideration and de-It is possible, if

bate will be of next to no use three or four years hence.

Certain gentlemen, respectable men—and I have no criticism to make upon them or their motives—have been printing pamphlets and issuing circulars urging the United States to undertake a most extraordinary and expensive and extensive celebration in this city within two or three years, combining a celebration of the discovery of this continent by Columbus and a celebration of the anniversary of the adoption of the Constitution. I perceive that they contemplate a great international exhibition, whose buildings are to be placed upon the public grounds below here. They contemplate also in addition to the first part thereof distinctive State exhibition buildings to be erected by each of the several States and, I believe, the Territories. They contemplate further than that the permanent retention of certain of those buildings and the permanent location of an exhibition upon those grounds

We have a very remarkable, scientific, interesting, and valuable permanent national museum already established, which not only represents in general the ethnology, the history of the human race in all respects, industrial and all other, of ancient times, but comes down to the present day and endeavors to put in there a specimen of the most perfect work in all the various lines of manufacture. That, in my judgment, is enough of a permanent museum. It is a permanent exhibition, its plan highly scientific, its execution thoroughly scientific.

The scheme proposed by these gentlemen contemplates taking these invaluable public grounds, putting up, even on the beautiful grounds directly in front of the Smithsonian, exhibition buildings, making some of them permanent, with the idea that exhibitors, manufacturers in this country and elsewhere, especially in this country, will keep those buildings supplied with articles interesting for exhibition and probably

of commercial value to themselves.

I shall not speak long about it, but I desire to call your attention to the fact that the expenses of any great exhibition, especially of any great international exhibition, are not paid by the shareholders; they are not even paid by the Government, which may contribute one, two, three, four, or five million dollars; they are paid by the exhibitors; and it costs anywhere from ten to fifty or a hundred dollars up to a hundred thousand dollars to manufacture their goods and put them on exhibition and care for them and return them and all that. At the internation and care for them and return them and all that. At the international exhibition in Philadelphia in 1876 one exhibitor expended \$100,-000 upon his exhibit there.

Now, the question whether the manufacturers and business men of the country are ready to come there even for six months.

Another is as to whether they are to be ready to keep up a peration. Another is as to whether they are to be ready to keep up a peration. I have not

the slightest idea that they are.

There is no permanent exhibition of the character that has ever been anything but a disastrous financial failure. When the Philadelphia exhibition was over, so fascinating had it been, so beautiful were some of those buildings, that a class of men desired to perpetuate it. Every one sympathized with their enthusiasm and their patriotism; but after the year 1876 had passed over the patriotism had been satisfied, and the thing became cold commercial business, and it was a disastrous failure, as it has been everywhere. Manufacturers will not keep up any form of national exhibition as a branch agency for the exhibition of their goods.

These considerations, hastily thrown in here, serve to show that these gentlemen, who from the best of motives are contemplating an exhibition of illimitable extent and perpetuity here, have not in my judg-

ment considered this question.

The resolution is not even yet quite carefully enough drawn. The Senator from Massachusetts slightly amended it at my suggestion, but it takes it for granted now, it seems, that there is to be such a thing. It ought to be carefully guarded, so that the committee shall be instructed to make a thorough inquiry as to the wisdom and nature of an exhibition, and if they deem it wise they should say why and how and

what sort of exhibition, and then report a plan.

Mr. HOAR. The Senator has not attended to the change I made.

Mr. HAWLEY. He has with the utmost care attended to every word of it. Will the Secretary please read it again?

The PRESIDENT pro tempore. The Secretary will again state the amendment of the Senator from Massachusetts. The CHIEF CLERK. In line 1 strike out "five" and insert "seven,"

and in line 3, after the word "Congress," insert the words "the expediency of;" so as to read:

That a committee of seven members of the Senate, of whom the President of the Senate shall be one, be appointed to consider, formulate, and report at the next session of Congress the expediency of and a plan for properly celebrating, at the capital of the Republic, these two illustrious anniversaries.

Mr. HAWLEY. They are to report a plan for celebrating these anniversaries. They had better be instructed to consider the expediency of a plan, and if such shall be deemed expedient the nature thereof,

and what in their judgment should be done, &c.

Mr. HOAR. That is exactly what they do by the resolution, as I understand it. I wish the Secretary would read once more what he has just read. It is almost in language what the Senator says he desires, and was so intended. They are to report first the expediency of having anything at all. If they conclude that there should be something, then

their plan; and they commit the Government to absolutely nothing.

Mr. HAWLEY. The remarks of the Senator will help to construe it
in case of doubt, but if I am able to read the English language it requires that committee to report upon the expediency of the celebration

and to report a plan.

Mr. CULLOM. It commits the Government to do it.

Mr. HAWLEY. I do not want any shadow of commit I do not want any shadow of committal in this res-That is what I mean. I do not want anybody to say to us that having adopted the resolution we decided to start it. wish to prejudge the case. It may be we shall deem it worth while, but I warn you it is a matter involving several millions of dollars.

Mr. HOAR. It was the purpose of the resolution to be as absolutely

free from committing the Government to anything as the English language could make it; and I can not now after hearing my honorable friend from Connecticut who has taken occasion to state before he has heard it what he thinks is the plan of somebody, and to assume it-

Mr. HAWLEY. I have heard it and read it.

Mr. HAWLEY. I have heard it and read it.

Mr. HOAR. It seems to me that my friend has not listened with his usual care to the language of the resolution, or else that he has failed to understand it. The resolution proposes that there shall be a committee to consider the expediency of doing the thing at all, and if they find it expedient then to report their plan. The committee certainly will be discreet, and will understand what they do.

Mr. VOORHEES. Mr. President, as a member of the Committee on the Library, before which this matter has been brought and in whose presence it has been discussed, I desire to say a single word.

It is true, as the Senator from Connecticut says, there are certain

gentlemen who have in their minds the idea of celebrating in an imposing manner two great events, one perhaps greater than the other. The first is the discovery of this continent, and the next and perhaps the greatest is the adoption of the Constitution. They have approached that committee of Congress, which they conceive has such matters in charge, and they have talked with us about it. This resolution prooses no more than to authorize a committee especially to confer with them until Congress meets again and then make a report. It is no committal to a celebration at all, but it is that act of respect which is due to the gentlemen who came before us and due to the occasions which they discuss and submit; and the discussion as to whether expositions are good things or bad things, or whether the shareholders get the profits or where they go to, is a hundred miles ahead of the point where we are now.

This is merely a response to a movement on the subject, and I think a proper response. It can harm nobody, and when we meet here again the committee, I trust, will be able to enlighten Congress upon the subject, so that we can intelligently take it up and consider it.

is all there is of it.

Mr. HOAR. To give them a hearing; that is all.
Mr. VAN WYCK. Mr. President, I fail to notice any suggestion
made by the Senator from Massachusetts or the Senator from Indiana as to the immediate necessity for any action on the part of Congress. The exposition that may be had is three years distant. It is not contemplated to have it before 1889, and three years intervene before the exposition or the celebration or whatever it may be; and where is the necessity for this haste to thrust this matter in at the expiring days of the session?

Mr. HOAR. The Senator will pardon me. The "three years" will be only two at the end of the next short session of Congress. All that is proposed by the resolution is to give certain gentlemen a respectful hearing. The Library Committee is not large enough, it is not composed of men of experience in that particular, to undertake it. are certain men who want to be heard. That is all there is of it.

Mr. VAN WYCK. This matter has been agitated in the local papers here for some time, and it would have been competent for the Library Committee or the Senator from Massachusetts to have introduced a

resolution on the subject early in the session.

Mr. SEWELL. For the information of the Senator from Nebraska I will state that a resolution was introduced on the subject and was referred to the Committee on the Library and by them investigated to a certain extent. Some of the members of the Library Committee, feeling that they could not give the time necessary for a thorough investigation of this subject, asked through the Senator from Massachusetts

for the passage of a resolution creating a special committee.

Mr. VAN WYCK. Then it would seem strange that when the resolution was referred to the Library Committee some time ago (how far back I do not know), now, within two or three days of the end of the ession, this matter comes not from the committee but from a single

Mr. SEWELL. I beg your pardon, it comes by order of the committee.

Mr. VAN WYCK. This resolution is from a single Senator.

Mr. SEWELL. But it was introduced by order of the committee. Mr. VAN WYCK. The doubt is not yet resolved, why this matter was suffered to linger until now when questions which are pressing and of importance and necessity can not be considered by this body. There of importance and necessity can not be considered by this body. There are many important measures to-day demanding consideration which can not be heard, important matters which should be disposed of before the next session of Congress; but there is thrust in at the last hour almost of the session a proposition to provide for an examination into the propriety of an exposition, or fair, or celebration to be held nearly three years hence. That is the point I make.

I suppose this thing very probably will keep until the next session of Congress. There is no time better to consider the matter here contemplated by the resolution than the first month of the session.

templated by the resolution than the first month of the session. Senator, the whole Senate, both bodies have more time the first month of a session than at any other period; far more than during a recess of

the Senate.

I desire to suggest what we always have occasion to suggest at the end of every session, the desire to continue the lifetime of committees during the recess, and when there are not enough of those, then to formulate some new committee with power to sit during the recess of the Senate; and why? In eight months that we have been in session Senators have not had the time or the disposition. There have been eight months of this session when Senators have been here, and now they are gasping for breath and waiting impatiently till the time shall come for final adjournment that they may hasten away; and what then? Four months, and then another session of this body. Would they contemplate coming back here in August? No. Or in September? Oh,

no; probably not.

I fail to see, even if this work is of great importance, that this matter will be facilitated by the meeting of the committee during the recess. I trust we shall commence early-it is not early, but latethat we shall commence now and say that we will not continue the lifetime of useless committees and make a needless expenditure upon the Treasury, or create new committees and new commissions which will have practically no effect at all. If this matter should be inquired into, the very first month of the next session is the time, when nothing will be done, because nothing ever is done before the holidays. Then will be a most admirable time for the Committee on the Library, or a special committee if it shall be deemed necessary, to investigate this

Besides, there is great force in what the Senator from Connecticut has said; and there is no Senator on this floor more capable of having a judicious and correct opinion on this subject than the Senator from Connecticut, because he himself, from his familiarity with expositions of this kind, is able to state the result from the beginning. I supposed the time had come, after the experience at Philadelphia and New Orleans, that this Government was presumed to be organized and created for other purposes than to run expositions of that kind. I supposed Congress had had enough of them, and I supposed the American people had had enough of them, after the accounts were settled with the New Orleans exposition. And what now?

Another grand scheme is projected and proposed for the city of Wash-

Is there not enough done for this and for other localities by the General Government that it should be called in to foster and sustain a proposition of this kind? If Washington or any other community desires to celebrate the four hundredth anniversary of the discovery of America, it is at liberty to do so. But this is for Washington. Did the Senate propose to aid the exposition up in Minnesota the other day? No; and why? Senators pooh-poohed the proposition. Oh, no, you can not aid Minnesota in her exposition; you can not even give the proposition a respectful hearing, but banish it without any consideration. You never could think of doing that; but here is a proposition to have two more expositions. They are important anniversaries certainly. Every historical event, when you come to its anniversary, is important.

What do we propose to do under our Constitution of limited powers, I ask our friends on the other side, because I think that is what they call the Constitution, one of limited powers? It was questioned every time heretofore when Congress was asked to make appropriations for such a purpose. It was questioned when we made the appropria-tion for Philadelphia, and it was claimed that we were transgressing beyond the Constitution. When we made an appropriation for New Orleans its constitutionality was questioned in advance. But the financial results were demonstrated afterward, very much to our sorrow and that of the Treasury. Now, the Senator from Connecticut sounds properly a warning in this matter, a matter involving the expenditure of millions of dollars

There will be time enough to consider the matter when the city of Washington shall have consummated a plan. When Washington has consummated her plan in this city for an exposition of this kind and shall come to Congress and ask for help, then will be abundant time for us. They are the persons and the authority to propose the plan, the scheme, and then when they have done that, and when they want either the aid of Congress or of the Treasury, or want the authority and influences and aid of officers of the Government, that will be another matter.

I trust that we shall not inaugurate now this proposition of forming committees and making expenditures needlessly and unnecessarily from

the Treasury

Mr. HAWLEY. Mr. President, I will just make a protest, without discussion, against any intimation of the Senator from Nebraska, whether intentional or unintentional, that the exhibition at Philadelphia was unexpectedly costly to the country, or that it was not worth in my judgfifty times what it did cost. It was the best investment ever made in this country. I let that go.

I suggest that the resolution be put in this shape:

That a committee of five members of the Senate-

Or seven members of the Senate, as the Senator from Massachusetts now wishes to have it-

of whom the President of the Senate shall be one, be appointed to consider the expediency of properly celebrating at the capital of the Republic these two illustrious anniversaries—

Those referred to in the preamble-

and if said celebration shall be deemed expedient, they shall report upon the method, cost, and general plan thereof at the next session of Congress.

I have no objection to that form. Mr. HOAR. Let that be read.

The PRESIDENT pro tempore. The resolution as amended by the Senator from Connecticut will be read. The resolution as proposed to be

The CHIEF CLERK. In the first line of the resolution, before the word "members," strike out "five" and insert "seven;" in the second line of the resolution, after the word "consider," strike out the words "formulate and report at the next session of Congress a plan for properly celebrating at the capital of the Republic these two illustrious anniversaries" and insert:

The expediency of properly celebrating at the capital of the Republic these two illustrious anniversaries, and if said celebration shall be deemed expedient, they shall report upon the method, cost, and general plan thereof at the next session of Congress.

Mr. HOAR. It seems fitting that I should state a little more fully what my desire to save the time of the Senate made me abridge, supposing the matter would be perfectly clear and unquestioned to every reasonable mind.

Gentlemen of the city of Washington of high respectability, well known have communicated to the Library Committee of the Senate a desire to be heard in regard to the propriety of celebrating the two greatest events in American opinion of human history, certainly two of the three greatest events, the Declaration of Independence being the third. They appeared and stated respectfully to the committee their desire, and they said that they were informed unofficially, but without any doubt, that the diplomatic representatives of all the other American republics to whom the formation of the committee to the committee their desire, and they committee the committee their desire, and they can be committee their desire, and they can be committeed to the committee their desire, and they can be committeed to the committee their desire, and they can be committeed to the committee their desire, and they can be committeed to the committee their desire, and they can be committeed to the committee their desire, and they can be committeed to the committee their desire, and they can be committeed to the committee their desire, and they can be committeed to the committee their desire, and they can be committeed to the committee their desire, and they can be committeed to the committee their desired to the committee the committee their desired to the committee their desired to the committee the committee their desired to the committee their desired the committee their desired to the committee their desired to the committee their desired the committee their desired the committee their desired their desired the committee the committee their desired the committee their desired the committee their desired republics to whom the formation of our Constitution has been an example, who are the children of American liberty on this continent, would join in celebrating and in celebrating here in our country these two great events in which they have a common interest, and in the glory of which they have a common share—the establishment of a written constitutional government, and the discovery of the continent which doubled the size of this globe for the purposes of civilized habitation.

Is not that a respectful, decent, proper request? I can state of my own knowledge that the historical societies throughout the country have expressed an earnest desire to have the first of these events properly marked, as the centennial of the Declaration of Independence was properly marked. Two Senators are present whose names are immortally blended with that great celebration in 1876.

In addition to that, the people in Spain are moving, and the Royal Historical Society of Madrid (I think that is the title of the society), took more than a year ago measures for having a national or international commemoration of that event in which Spain had so large a

That being a respectful request in regard to a dignified and proper subject of inquiry, coming from American citizens, the Library Committee found itself embarrassed by the fact that it was composed of only three persons, the smallest committee of the Senate, that it was crowded with other work, that its members were crowded with work in other committees, and that no one of its members possessed the requisite and competent experience to be able to pass even upon the original question whether there were obstacles in the way of a celebration at all, what should be the proper plan, what should be the proper place, and therefore we reported to the Senate, without asking for any authority being given to a committee which would involve any expenditure, that a committee of seven members should be appointed who should take this

subject into consideration, who probably could learn in the interval what was desired, and might in the leisure days of the beginning of the next session be able to give these persons their hearing and make proper report. That is the whole of it.

It is not intended to commit the Government to anything. Perhaps it is not quite within the bounds of good taste, but I had taken great pains to urge upon the Senator from Connecticut himself, who was the president of the celebration of 1876, to serve on the committee and upon the President of the Senate, who in accordance with the terms of this resolution will be a member of the committee, so that we have two of the most conservative and discreet Senators of the body.

Mr. President, I think the American people will demand somewhere that we shall join with the other nations of the earth who are eager to express their exultation, delight, and gratification at these two great events in human history. I sympathize as strongly as is possible with the desires of those gentlemen who have a special duty to guard the Treasury against extravagant and lavish expenditure that we shall not get committed under a hurry and enthusiasm to any extravagant expenditure. I especially desire that to be done from the fact that I have had the very unimportant duty of introducing this resolution, because anybody who commits the Government to that will be covered in the end with mortification and disgrace. Nothing of that kind is risked here. But it does seem to me that when gentlemen of the character of these gentlemen come and ask for a respectful hearing, it is proper that we should say "Certainly you may be heard and your plan may be considered; the Senate will be able to take care of it." As I said, the sidered; the Senate will be able to take care of it." As I said, the Library Committee, as you know very well, Mr. President, from having been so long its chairman, is not situated so as to be able to take

the responsibility of dealing with the subject itself.

Mr. HALE. Mr. President, a project for a celebration of either of these great historic events participated in by representatives of foreign powers at Washington, drawn together by common sympathy and makpowers at Washington, drawn together by common sympathy and making a great festal occasion, is one thing; an industrial exposition of the growth of the United States, of all the things which contribute to our material greatness, is entirely another thing; and I am here and now squarely opposed to Congress at this late day doing anything that will commit us to any such exposition here. When the time shall come that the United States shall repeat on a greater scale the great industrial exposition of 1876, in some one of the great cities of the country where trade and commerce and manufactures do center. I shall be willwhere trade and commerce and manufactures do center, I shall be willing to consider that subject fairly and to give a proper plan support; but Washington is the last place for anything of that sort. There is not an argument that can be urged in favor of this city; all the arguments are the other way, for some other place; and I should not be willing for one to support any resolution here that I thought would commit the United States to the project of a great industrial exposition in Washington. And I hope the Senator from Connecticut [Mr. HAWLEY]—I did not have the pleasure of listening to what he said, being busy in conference, from which I have run in for a few moments only—in preparing his amendment to this resolution has carefully guarded that, and if the resolution passes that a careful and conservative committee will be appointed that will see to it that the United States does not get involved in any future enterprises such as will inevitably, as the Senator from Massachusetts has said, come back "to plague the inventor" and overwhelm with shame everybody who has sought to get the United States committed to any such project.

It seems to me from listening to the Senator's proposition that he has

guarded this very carefully, and I agree with him in the general design

and purpose of this celebration.

Mr. HAWLEY. I would not say anything further but from a sort of impression that the Senator from Massachusetts left upon my mind that he supposed I was unwilling to hear a respectful petition from prominent citizens of Washington. I am not. They are entitled to a respectful consideration and a careful examination of the subject. have I the slightest objection in the world to a becoming celebration of the anniversaries of those great events. I think it is well that there should be one of some sort; but whether it should be in the nature of two or three days' literary or other exercises here in which the representatives of foreign governments and the immediate people of our own Government should be requested to join, is one matter; and whether there should be connected with this and as a part of it a grand, extensive, and permanent commercial affair, is entirely another question. It is only that there should be due care about that that I am anxious.

As to the value of international exhibitions conducted with proper prudence and wisdom, I have not the slightest doubt in the world that they pay abundantly the nations that hold them. Never has one been held that in many respects has not absolutely revolutionized the industries of the country which held it. That was not the question. Senator seems to disclaim, and honestly means to disclaim, that he was senator seems to disciaim, and honestly means to disciaim, that he was committing us at all to such an undertaking; but as the original resolution said, a committee shall "be appointed to consider, formulate, and report at the next session of Congress a plan for properly celebrating," and "the plan" before him was the one about which I say there ought to be caution. That is all. I think my amendment is safe.

Mr. HOAR. I accept the Senator's amendment, and it means ex-

actly the same thing. The difference between my honorable friend and myself is a difference in the understanding of the meaning of language. I do not understand that a committee to formulate and submit to the Senate a plan commits anybody to anything. I entirely agree with my honorable friend from Connecticut that international exhibitions are good things when they have the right kind of a president, of which we have had some experience in this country.

The PRESIDENT pro tempore. The resolution as modified will be

The Chief Clerk read as follows:

Resolved. That a committee of seven members of the Senate, of whom the President of the Senate shall be one, be appointed to consider the expediency of properly celebrating at the capital of the Republic these two illustrious anniversaries; and if said celebration shall be deemed expedient they shall report upon the method, cost, and general plan thereof at the next session of Congress. Said committee are authorized to act in concert with any similar committee of the House of Representatives, and to sit during the recess.

Mr. SAULSBURY. Mr. President, I am opposed to committing the Government to an exhibition in any shape or form. I regard this as the initiation of an attempt toward the expenditure by this Government of several million dollars very unnecessarily. That the events spoken of in the resolution were very important events nobody disputes; that the discovery of America and the adoption of the Consti-tution are highly interesting to the American people everybody ad-mits. Every child ten years old that has ever gone to school has learned all that he can in reference to the discovery of America or the history of the Federal Constitution.

We had an exhibition ten years ago, which has been much lauded, at Philadelphia. That, I believe, was about the first of the kind in this country. The result was a financial failure entirely. It may have had very beneficial effects in other directions, but it was a finan-

cial failure, involving not only the General Government but the people of the country in a very large expenditure of money.

Then we had the exposition at New Orleans at an expenditure of about a million and a half of dollars on the part of the General Government, a complete failure; and if good resulted from it in any respect, I do not know what it is.

This is a proposition to celebrate in the city of Washington these two important events. It seems to me if there is any necessity of celebrating these events the city of Washington is not the place. could you get from the business people of this community in erecting the buildings or in carrying out the plan? You had from Philadelphia, you had from New Orleans very material assistance from the local State and municipal governments; but what can you have in the city of Washington? I doubt whether you could raise \$20,000 to-day in the city of Washington, from the gentlemen who are so interested in having an exhibition here, to aid in carrying it out. Very likely they are interested. If I kept a large hotel here I would be in favor of it perhaps too. ested. If I kept a large notel here I would be in lavor of it perhaps too. If I kept a saloon or a tobacco-shop here, perhaps I would be in favor of it. I might be in favor of it then; but I say now that if this thing is to be carried on at all, it is to be carried on at the expense of the people of this whole country, and not much of it will fall on the people of the city of Washington. This is taking the first step toward the expenditure of a large amount of money out of the Federal Treasure. We have heard from the Sengtor from Massachusetts that Sanis and

We have heard from the Senator from Massachusetts that Spain and other nations of Europe feel largely interested in an enterprise of this So you can see it is looking now not only to a celebration by our own people but to inviting the other powers of the earth to come here and participate in it, and perhaps every foreign power will be invited to be here at the expense of the General Government in the capital of our country; and it would not be seemly to invite the heads of governments of other countries to be represented here without extending to them that courtesy to which they would be fairly entitled, to be entertained at the expense of the Government of the United States.

To this whole plan, from beginning to end, I am utterly opposed. I

deny that there is any legitimate power in the Constitution to authorize the Congress of the United States to take the money that the people of the country have paid by taxation into the public Treasury and appropriate it for any such purpose. I learned my views of constitutional power from the generation who succeeded the men who framed the Constitution. There has been a very wide departure from the doctrines which they taught, I know. I should be glad to see the American statesmen of this day brought back to the position occupied by the men who preceded them in the affairs of Government, who believed in a strict construction of the powers of the General Government, granting to the General Government whatever is necessary and proper to maintain the Federal Government in its full force and vigor, but securing and reserving to the States and to the people thereof every right which is not ex-

pressly given, or which does not by necessary implication arise in the Federal Government out of the express grants of the Constitution.

I deny that there is any power in the Federal Government to tax me or to tax any other citizen of the United States for the purpose of making a frolic for the people of Washington or any other city in the United Maintain your Government, as I before remarked, in its full force and vigor; but at the same time you have no right to become the almoners of bounty and charity, and especially do not do this act which is of very doubtful propriety—call upon the people of the country to

come up and celebrate at a vast and enormous expense to themselves events of this kind.

I am opposed, therefore, to the resolution in any shape. I think the resolution as amended by the Senator from Connecticut is in better form than that introduced by the Senator from Massachusetts, but I am opposed to taking the first step, and I am in favor here and now of saying to the people of Washington and to everybody else that feels interested in this matter, "We wash our hands clear of all such enterprises."

Mr. HAWLEY. I beg pardon for saying a word or two more. I feel like making a very humble disclaimer when anybody compliments me for my connection with the Philadelphia exhibition. one of a hundred and twenty, more or less, concerned in the government of that affair; but nevertheless as I was a member it imposes on me the duty of defending the enterprise if it be unjustly criticised.

The State of Pennsylvania was generous in that matter; the city of Philadelphia was generous beyond measure; the people of the city of Philadelphia in their individual capacities were generous and hospitable and patriotic. The General Government constituted that enterprise, set it on foot, and published it to the world, and the world was invited to come there, and when the hard times made financial help a necessity the General Government put a million and a half at the disposal of the enterprise, every dollar of which was repaid to the Treasury. I do not wish to have the Senator from Delaware speak of that exhibition as a financial failure without emphasizing the fact that after the Government extended aid by what was intended to be in the first place a loan, upon a decision of the Supreme Court of the United States the million and a half advanced by the Government was paid back dollar for dollar; but the Government paid the expense of its own very creditable and useful exhibition of the several Departments of the Government in its own Government building; that it paid for as an exhibitor; but it contributed directly to the expenses of that exhibition only a sum of about \$20,000, expended for printing the bonds, &c.

The PRESIDENT pro tempore. The question is on the adoption of

the resolution as modified.

Mr. VAN WYCK. I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. DAWES (when Mr. MAXEY'S name was called). I am paired with the Senator from Texas [Mr. MAXEY], who is absent from the Senate Chamber at this time. I do not know how he would vote on this resolution if present, and I withhold my vote on that account.

The roll-call having been concluded, the result was announced—yeas

41, nays 12; as follows:

YEAS-41.

Aldrich, Beck, Blair, Brown, Butler, Call, Camden, Chace, Conger, Dolph, Eustis,	Evarts, Frye, Gorman, Gray, Hampton, Harrison, Hawley, Hoar, Ingalls, Kenna, MeMillan,	Mahone, Manderson, Miller, Mitchell of Oreg., Palmer, Platt, Plumb, Pugh, Ransom, Sawyer, Sewell,	Sherman, Spooner, Stanford, Teller, Voorhees, Walthall, Whitthorne, Wilson of Iowa.
	NA NA	YS-12.	
Berry, Blackburn, Coke,	Cullom, Edmunds, Harris,	Payne, Saulsbury, Vance,	Van Wyck, Vest, Wilson of Md,
	ABS	ENT-23.	
Allison, Bowen, Cameron, Cockrell, Colquitt, Dawes.	Fair, George, Gibson, Hale, Hearst, Jones of Arkansas.	Jones of Florida, Jones of Nevada, Logan, McPherson, Maxey, Mitchell of Pa	Morgan, Morrill, Pike. Riddleberger, Sabin.

So the resolution was agreed to.

By unanimous consent, the President pro tempore was authorized to appoint the committee; and he appointed Messrs. HOAR, SEWELL, HAWLEY, VOORHEES, GORMAN, and EUSTIS.

VETOED PENSION BILLS.

The PRESIDENT pro tempore. The Chair lays before the Senate a esolution submitted yesterday by the Senator from New Hampshire Mr. BLAIR] which comes over under the rule. The resolution will

The Chief Clerk read the resolution, as follows:

Resolved, That the reports of the majority and views of the minority of the Committee on Pensions on Senate bill 2005, Mary J. Nottage; Senate bill 226, Margaret D. Marchand; House bill 1059, Joseph Romiser; Senate bill 1077, granting pension to Newcomb Parker; Senate bill 177, granting pension to John S. Kirkpatrick; Senate bill 1850, granting pension to Mars. Annie C. Owen; Senate bill 342, granting pension to Marrilla Parsons; Senate bill 183, for the relief of Thomas S. Hopkins, be printed in the Record.

Mr. BLAIR. As explained last night by the Senator from Vermont [Mr. EDMUNDS] and myself, this resolution is offered for the purpose of saving the time of the Senate, now so valuable by the approaching close of the session.

The PRESIDENT pro tempore.

The resolution was agreed to.

The question is on the resolution,

The reports mentioned in the resolution are as follows:

MARY J. NOTTAGE,

[Senate Report No. 1424, Forty-ninth Congress, first session.] IN THE SENATE OF THE UNITED STATES. JUNE 30, 1886.—Ordered to be printed.

Mr. BLAIR, from the Committee on Pensions, submitted the following report (to accompany bill S. 2005, returned by the President with his objections there-

to):
The Committee on Pensions, to whom was referred the message of the President returning Senate bill 2005, granting pension to Mary J. Nottage, widow of Thomas Nottage, late a sergeant of Company F, Third New Hampshire Volunteers, with the executive disapproval, have considered the same, and have reexamined and reconsidered the evidence in support of the claim of this soldier's widow for a pension.
The committee report the veto message back to the Senate and recommend the passage of the bill, the President's objections to the contrary notwithstanding

the passage of the bill, the President's objections to the contrary notwithstanding.

It is said that never since the foundation of the Government has there been an executive veto of a private pension bill, save in a single instance, until the present session. How that may be is of no consequence, but so great has become the number of such vetoes interposed by the present Executive, all within a few weeks past, and so extraordinary the censure, sometimes rudely expressed and in nearly every instance severely implied, of the action of the two Houses of Congress and of their committees, upon whom has devolved the wearisome and generally unappreciated labor of investigating these claims, accompanied in many cases by such ridicule of, and evident disgust with, the claims themselves, that your committee feel that they are justified in a brief review of the circumstances involved.

selves, that your committee feel that they are justified in a brief review of the circumstances involved.

In doing this a strong effort will be made to restrain a not unnatural feeling of indignation, which, if permitted to assume the proportions which the provocation justifies, would wholly destroy those respectful forms of expression which must be maintained in official intercourse between the different officers and Departments of the Government. This becomes the more necessary in proportion as it is rendered the more difficult by reason of the unjust and unexampled style in which some of the messages of the President are expressed. It shall be the effort of the committee to get on in this difficult matter without violating the courtesies of official intercourse by imitating an example which, so far as we are aware, is without precedent and which, so far as we are concerned, shall remain so.

We have caused an examination of the files of the two Houses of Congress to be made, and we think with a substantially accurate result, including the first session of the Forty-ninth Congress from its commencement to the 26th day of

There have been 3,788 bills for private pensions, or for increase of private pensions already granted, introduced in the House, and 764 in the Senate; 530 House bills and 88 Senate bills have passed both branches and gone to the President

There have been 3,788 bills for private pensions, or for increase of private pensions already granted, introduced in the House, and 764 in the Senate; 530 House bills and 88 Senate bills have passed both branches and gone to the President for his approval.

The President has vetoed so far 45 House bills and 23 Senate bills, or 26 per cent, of the Senate bills and 8½ per cent, of the House bills which have been submitted for his approval. These vetoes have been accompanied with declarations of distrust of the merits and good faith of the mass of other legislation which he can not veto for want of time.

It is necessary to state the facts, although your committee is not insensible to the special condemnation which this disparaging contrast between the proportion of Senatorial ill-work as compared with that of the House inflicts upon them. Each House, however, is responsible for every bill which reaches the Executive. The actual work done in the way of passing bills by the Senate is as follows: House bills passed by the Senate 530, Senate bills 292. There would seem to be enacted upon or rejected by the House of bills introduced in the House, about six-sevenths of the whole number, while the Senate has acted favorably upon about three-eighths of the whole number of bills originally introduced in that body thus far during the session.

It will also be observed that but a small proportion of those introduced are reported by either House. It is, in fact, impossible to investigate them generally and fully, and it is all that mortal strength can perform to act upon those which are believed to be clearly just. It is but an idle waste of time to write up adverse reports as a rule, and only those who have comparatively little else to do who can spend time in making reports against doubtful claims which are likely yet to be made good ones by testimony which may be produced later in the same or in subsequent sessions.

We observe further, that whatever may be said to the contrary, it is very selfoun that a member of the Hou

mitted to pursue its scandalously extravagant career unchecked to the end of the session!

The vetoes have covered not far from \$20,000, or perhaps \$25,000, and applicants for special relief are expected to know better than to press Congress and the President further for a redress of their wrongs. These sums of money are not to be despised by this nation, but it would be a comfort to know that it rightly belongs to us—or, at least, that if withheld wrongfully it did not cost health and life to those and the dependent relatives of those whose valor and sacrifices preserved our institutions and made the official existence possible which has saved this cash to the surplus in the Treasury. The present population of his country is at least sixty million souls, and our wealth not less than sixty billions of dollars. We have, also, let us feel grateful to Providence, a most encouraging prospect for the future.

Much criticism has been indulged in by the President of the methods of legislation pursued by the two Houses of Congress, and however uninformed he may be upon the subject, and however unintentionally by reason of want of knowledge he may have misrepresented to the country the methods of legislation which have been pursued in like cases ever since Congresses and Parliaments have existed, and which have, since Parliaments became free, been safe from Kingly and Presidential interference, all the same the people are misled by the unwarranted statements of the President as to the manner in which legislation upon pensions, claims, and the like is, and of necessity must be, conducted.

A claim or a private pension act can be discussed in committee and debated in the Senate as long as an appropriation bill; and therefore the conduct of affairs compels on the part of Congress, if not on the part of any other Department of the Government, some attention in the division of time and labor to the relative importance of the interest involved. Pension claims always require the investigation of questions of fact and appeal to

vestigation of facts be made by a full jury of seventy-six Senators, nor by the whole three hundred and twenty-five members of the House of Representatives, nor by both Houses in full assembly concurring. It is essential that at least one capable and honest mind should examine thoroughly each case in each House of Congress, and in all cases of doubt and difficulty or of unusual features that the committee and the House should do the same. That we aver to be the usual and ordinary course of the transaction of the pension business of the Senate, and to have been so during the session, all statements to the contrary notwithstanding.

and ordinary course of the transaction of the pension business of the Senate, and to have been so during the session, all statements to the contrary notwith-standing.

The printed reports of the committee have been on the personal files of every Senator for days, and in some cases for months, on all the bills which have been passed by the Senate. Alert objectors from the ablest Senators not on the committee have watched its work and the progress of these bills through the Senate, objecting and discussing whenever they believed there was cause to do so in the careful and proper discharge of their duty. And if formal headings and phrases common to all bills have been sometimes omitted, and in consequence of long delays there have been, when an opportunity finally came, many cases rapidly passed when there was no ground for opposition, it was only a convenient dispatch of public business, hurtful in no way, usual always, and to be commended by any intelligent observer.

The pension business of the Senate has never been better done than during this session. Those members of the committee who have performed the most have been as careful as any, and derision of their patient, conscientious, and exhausting labors to help along these noblest and best portions of God's poor and the country's benefactors can originate only in a wise and noble nature which is misled, or in one that, if informed, sadly needs reconstruction or recreation.

There has been from year to year an accumulation of this work, and both Houses of Congress have this session made great exertions to perform that which came from their predecessors as well as the increase from more recent rejections by the Pension Office, together with new cases arising outside the jurisdiction of that institution. Still the Presidenf is wrong when he attempts to stigmatize the industry of this Congress as a reckless and scandalous disregard for bublic duty and waste of the public treasure, and says that there has already been three times as many pension bills passed as i

reputation it may be justified in pointing out an occasional error on the part of the accuser.

The files of papers in these vetoed cases, which are now in possession of your committee, contain the letter of the Assistant Secretary of the Interior, under date of June 14, 1886, stating that he incloses enrolled bills as follows, enumerating one hundred and eighteen House bills and eleven Senate bills, and instructing the Commissioner of Pensions as follows:

"Please cause the same to be critically examined, and report to this Department whether, in your opinion, any objections to their approval are known to exist. In cases where objections exist they should be specifically set forth."

This indicates, of course, unmistakably that the President relies upon the Commissioner for his facts.

Any one who knows the prolonged and critical examination required would at once discredit the pretense of thorough personal investigation in the large number of cases which go to the Executive. It is, of course, impossible.

In every, or nearly every, vetoed case Congress, by the action of both Houses, has overruled the action of the Commissioner of Pensions. Thereupon the President calls upon the Commissioner, whose physical condition is well known, to sustain the action of his office, and he naturally does so to the best of his ability. It should not be forgotten that oftentimes the reports of the two Houses contain severe and deserved reprimand of the action of the Pension Office.

Why the President should initiate this game of shuttlecock and pelt a coordinate department of the Government with vetoes based upon the review of the action of Congress by some subordinate of the Commissioner of Pensions is a topic which will bear thought, but perhaps may be left without discussion. Why the finding of the two Houses of Congress should be discredited and attributed to unworthy motives, indifference, or incapacity, while the reassertion by the pension clerk that he is right and Congress wrong is accepted as the basis of fact in thes

limited to what may already be done by the Pension Office under the general law.

It is difficult to write in that rudimentary way upon the nature of pensions and the various grounds of compensation, charity, and public polley which is necessary in order to remove this impression. It is sufficient to observe that the jurisdiction of the legislative power of this Government is larger than that of the Commissioner of Pensions, and that sooner or later, although it may cost the country a prolonged and steady effort, this truth will become apparent.

But it should be remembered that in a very large number of these bills passed by Congress important original written evidence is filed with the committees or presented verbally, as in hearings before other committees upon all public questions which come before legislative bodies; and often the applicant is present with his statement and his palpable disabilities. This evidence is not available to the Executive, at least without the asking, and never has been in possession of the Pension Office. Consequently in nearly every case the Congressional statement stands upon stronger proof than the finding of facts which the President sets up in disapproval of the bill.

The several pension bills vetoed by the President, with the evidence in each case, have been re-examined by the member of the committee who submits this report, and it is his belief that in every instance—twenty-three in number—the veto of Senate bills granting relief to claimants of pension has wrought injustice to them, and that the statement of facts submitted by the Senate committee in support of the bills was true upon the evidence, and that statements of fact in the veto messages, so far as they conflict with findings of Congress, is untrue and wrong. Such brief notes upon each case as may facilitate further examination of the evidence, together with the Senate report and the veto of the President, are herewith submitted.

Further and more particular reports in the several cases will be submitted by the

No. 1.-MARY J. NOTTAGE, WIDOW OF THOMAS NOTTAGE.

The evidence on file in the Pension Office fully corroborates all the allegations of fact in the report of the Senate committee. In addition thereto there was filed December 15, 1885, the following statement addressed to Hon. H. W. BLAIR, United States Senate: NASHUA, N. H., December 15, 1885.

SIR: We most respectfully and earnestly ask your assistance in held of Mrs. Mary J. Nottage, of this city, widow of the late Thomas Nottage, sergeant Company F, Third New Hampshire Volunteers, whose claim for pension seems to be hung up for want of sufficient medical testimony.

We personally knew Thomas Nottage; he was discharged from service on sur-

geon's certificate of disability, and his death resulted from the disease contracted in the Army.

It is impossible for the widow, on account of decease of the attending physicians, to procure a complete chain of medical evidence, and for this reason the case seems to be laid aside.

Knowing the claim to be just, and the widow and children worthy and deserving, we appeal to you to have the claim taken up and further examined.

Most respectfully,

E. J. COPP. H. A. MARSH. W. H. D. COCHRAN. GEORGE F. WILBER. DANA W. KING.

(Indorsed:) General Copp, Captain Marsh, Colonel Cochran, Dr. Wilber, and Colonel King are all gentlemen who rendered great service to their country during the war and are citizens of Nashua and among the leading citizens of the State of New Hampshire. Their statement is filed in the Pension Office with the following indorsement: "Request of veteran officers of Nashua, N. H., praying for allowance of claim upon their personal knowledge. General Copp. register of probate, Colonel King, register of deeds, Captain Marsh, late postmaster, Colonel Cochran, prominent citizen. These gentlemen are very careful always in indorsing claims, and there is no doubt that this case should be allowed.

"Respectfully,

"H. W. BLAIR."

To this statement, the case having already been rejected, the office makes the

DECEMBER 26, 1885.

Madam: Your pension claim, No. 270607, as widow of Thomas Nottage, late sergeant Company F, Third New Hampshire Volunteers, was rejected August 6,1885, on the ground that the soldier's fatal disease, consumption, was not the result of his military service. The letter recently filed, signed by E. J. Copp, H. A. Marsh, W. H. D. Cochran, George F. Wilber, and Dana W. King is not sufficient to reopen the claim, and the office adheres to its action. This information is given at the request of Hon. H. W. Blair, who has made personal inquiry in relation to the claim.

Very respectfully,

WM. E. McLEAN, First Deputy Commissione

The soldier attained the rank of sergeant, was in the service a year, and discharged for disability. If the evidence is not of the technical form that the office has a right to require if itsees fit, there would seem to be no reason why the two Houses of Congress might not be indulged in a discretion to allow a claim like this, which appears to be substantial and worthy, basing their action upon evidence as formal and reliable as that upon which they act in other important legislation, such as appropriation and tax bills, and others, requiring and affecting the very largest expenditures. It can not be expected that the great mass of testimony in these pension cases should be detailed at length in the reports of the Government, from its foundation down, are unsupported by any formal testimony. Witnesses have appeared before committees, verbal and unsworn statements are made, letters are sent in, in fact anything in the nature of evidence calculated to convince the mind, it has been the universal practice to receive and act upon in legislation of the most important character. There is no reason why pension legislation should be singled out as an exception to the uniform practice of Congress when such evidence is received in matters of far more importance pecuniarily than these pension bills.

We append the report of the committee and the President's veto, and leave it to the people to judge between the President and this soldier's widow and her two fatherless children.

[Senate Report No. 438, Forty-ninth Congress, first session.]

[Senate Report No. 438, Forty-ninth Congress, first session.]

The claimant, Mary J. Nottage, is the widow of Thomas Nottage, late sergeant of Company F, Third New Hampshire Volunteers, No. 276607. She made application at the Pension Office, but it was rejected on the ground that the cause of the death of the soldier was not a result of his military service.

It appears that the soldier enlisted August 15, 1861, and served until discharged-September 17, 1862. He died January 8, 1879, and the widow applied June 24, 1880.

The record in the Adjutant-General's Office states that he was "discharged for disability," and his certificate of discharge for disability is on file, showing in detail his condition at that time. The certificate of his attending physician, that he died of "consumption," is also on file.

E. P. Emerson, general agent of the New England Life Insurance Company, testifies that an examination was made July, 1860, by Dr. James B. Greely, who reported that the soldier was of good constitution, and vital organs normal. He was insured in their company.

Dr. Josiah G. Graves testifies that he was soldier's family physician for many years before his enlistment; attended him in 1853 for lung fever, and his books show he made fourteen professional visits to him; has no knowledge of any other sickness up to the time of his enlistment, and his relations were such that if he had had any disease or disability he would have known it. So far as affiant knows, the soldier was sound man when he enlisted, and had been since his illness in 1853.

The evidence of several comrades is on file, showing that he was sick in the

knows, the soldier was sound man when he enlisted, and had been since his illness in 1853.

The evidence of several comrades is on file, showing that he was sick in the service with malaria and kidney trouble, and became thin, pale, and weak. Several witnesses testify to his condition since that time, as having worked with him and seen him constantly, and that he was during the whole time unfit for any hard manual labor, and remained so until he died; that during all those years he suffered a great deal; that he frequently kept about his business, although suffering with remittent fever and general debility; that he had piles, and became very weak and feeble, and had a cough ever after he came out of the service on the slightest exposure to cold.

Without detailing all the evidence, your committee state that they believe that it fairly establishes the fact that the soldier died from the results of his service. His system seems to have been shattered and never to have recovered; and it seems but fair to presume that the "consumption," which is stated to have been the final stage of his disease, was a legitimate result of the condition in which he left the service and afterward continued. If there could be any doubt we feel disposed to give this widow the benefit of it, and therefore recommend the passage of the bill.

[Senate Ex. Doc. No. 175, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill No. 2005, with his objections thereto.

I hereby return without approval Senate bill No. 2005, entitled "An act granting a pension to Mary J. Nottage."

The beneficiary named in this bill is the widow of Thomas Nottage, who entisted in August, 1861, and was discharged for disability September 17, 1862. The assistant surgeon of his regiment, upon his discharge, certified the cause to be "disease of the urinary organs," which had troubled him several years.

He died of consumption January 8, 1879, nearly seventeen years after his discharge, without ever having made any application for a pension.

In 1880 his widow made an application for pension, alleging that he contracted in the service "malarial poisoning, causing remittent fever, piles, general debility, consumption, and death," and that he left two children, both born after his discharge, one in 1866 and the other in 1874.

The only medical testimony which has been broughtto my attention touching his condition since his discharge, is that of a single physician to the effect that he attended him from the year 1873 to the time of his death in 1879. He states that the patient had, during that time, "repeated attacks of remittent fever and irritability of the bladder with organic deposits:" that "in the spring of 1878 he had sore throat and cough, which resulted in consumption, of which edied."

The claim of the widow was rejected in July, 1885, on the ground that "the soldier's death was not the result of his service."

I am satisfied that this conclusion of the Pension Bureau was correct.

EXECUTIVE MANSION, Washington, June 22, 1886.

EXECUTIVE MANSION, Washington, June 22, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington, on Monday, the 7th day of December, 1885.]

An act granting a pension to Mary J. Nottage

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Mary J. Nottage, widow of Thomas Nottage, late a sergeant of Company F, Third New Hampshire Volunteers.

JOHN G. CARLISLE, Speaker of the House of Representatives. JOHN SHERMAN, President of the Senate pro tempore.

I certify that this act originated in the Senate.

ANSON G. McCOOK,
Secretary.
By CHAS. W. JOHNSTON,
Chief Clerk.

The evidence in this case is very brief compared with that which accumulates in most of these rejected cases, and we print the same in full, that there may be a ray of light let in upon our pension inquisition. If it were possible to spread before the country the full record of the Pension Office in most of these rejected applications where Congress passes bills for special relief that institution would be destroyed by public indignation forthwith.

The system of investigation is such and the rules of action and methods of decision of such a character that the ablest and best efforts of officials must often result in the perpetration of gross injustice. But an institution which disburses \$69,000,000 yearly, and which decides everything within itself and without the discipline of that popular opinion which keeps our courts and juries comparatively true to the ends for which they are established, has so far been able to protect itself, and to grow little better, if not worse, notwithstanding strong efforts which some members of the Senate have been making for years past to send these questions of fact to more competent and impartial tribunals.

DECLARATION AND EVIDENCE ON FILE IN THE PENSION OFFICE IN THIS CASE, Widow's pension.

Claimant, Mary J. Nottage, Nashua, Hillsborough County, N. H. Soldier, Thomas Nottage, sergeant Company F, Third New Hampshire Vol-

Eimer A., born Dec. 12, 1866; Leslie A., born Mar. 8, 1874.

Eimer A., born Dec. 12, 1866; Leslie A., born Mar. 8, 1874.

Recognized attorney: H. B. Atherton, Nashua, Hillsborough Co., N. H.

Submitted for rejection, July 27, 1885, D. M. Kerr, examiner.

Approved for rejection: Cause of soldier's death not the result of his service, which has been legally accepted, July 30, 1885.

MERIFIELD,

Medical Reviewer.

Important dates: Enlisted Aug. 15, 1861; discharged Sept. 17, 1862; died Jany. 8, 1879; declaration, June 24, 1889; invalid application filed, none; former marriage of soldier, none; claimant's marriage to soldier, June 2, 1858.

Submitted for rejection on ground that soldier's death was not due to service, fatal disease originating since discharge.

History of altorneyships.—First appointment May 31, 1880, by claimant. Name and post-office, H. B. Atherton, Nashua, N. H.

Allegations of claimant.—Other children of soldier by former wife, none; other children of soldier by claimant, none alleged.

SUMMARY OF PROOF.

No former marriage of soldier.—The marriage is shown by declaration. The marriage of Thos. Nottage and Mary J. Holt, June 2, 1853, as shown by copy of public record. Filed June 24, 1880.

Dates of birth of children.—Elmer A., Dec. 12, 1866; Leslie A., Mar. 8, 1874, shown by copy of public record. Filed June 24, 1880.

(Stamped:) Rejected Aug. 1, 1885.

WAR DEPARTMENT,

Washing...

Respectfully returned to the Commissioner of Pensions.

Thomas Nottage, jr., Company F, 3rd Regiment N. H. Volunteers, was enrolled on the 15th day of Aug., 1861, at Concord, N. H., and is reported present to July and Aug., 1862. Disch'd for disability Sept. 17, 1862.

H. C. CORBIN,

Assistant Adjutant-General,
By D. MOMUS.

[Army of the United States. Certificate of disability for discharge.]

[Army of the United States. Certificate of disability for discharge.]
Sergeant Thomas Nottage, jr., of Caplain James F. Rundlett's Company (F), of
the 3d New Hampshire Regiment of United States Infantry Vols., was enlisted
by Capt. James F. Rundlett, of the 3d N. H. Regiment of Infantry Vols., at
Nashua, New Hampshire, on the thirtieth day of July, 1861, to serve 3 years; he
was born in Quincy, in the State of Massachusetts; is thirty-one years of age,
five feet ten inches high, dark complexion, black eyes, black hair, and by occupation when enlisted a bootmaker. During the last two months said soldier
has been unfit for duty 30 days. Sergeant Thomas Nottage, jr., has been sick
much of the time since enlistment with gravel complaint. Although always
willing, his services are ever uncertain.
Station: Hilton Head, S. C.
Date: Sept. 11th, 1862.

JAMES F. RUNDLETT,

JAMES F. RUNDLETT, Capt. 3d N. H. Vols., Commanding Company.

I certify that I have carefully examined the said Sergeant Thomas Nottage, jr., of Captain Rundlett's company, and find him incapable of performing the duties of a soldier, because of lithier renalis arenosa, which has troubled him

several years, and now increasing. He has passed stones several times since in service, and been under treatment. A few days since 2 passed as large as small sized peas, attended with the usual symptoms.

(Stamped:) Department of the Interior, Oct. 17, 1862. Pension Office.

Declaration of a widow for pension or for increase of pension.

STATE OF NEW HAMPSHIRE, County of Hillsborough, ss:

County of Hillsborough, ss:

On this 28th day of May, A. D. 1880, personally appeared before me, clerk of the supreme court, a court of record within and for the county and State aforesaid, Mary J. Nottage, aged 44 years, who, being duly sworn according to law, makes the following declaration in order to obtain the pension provided by acts of Congress granting pension to widow: That she is the widow of Thomas Nottage, jr., who enlisted under the name of Thomas Nottage, jr., at Nashua, N. H., on the 30th day of July, A. D. 1861, in Company F, Third Regiment New Hampshire Volunteers, in the war of rebellion (1861), who contracted malarial poisoning, causing remittent fever, piles, general debility, consumption, and death. That he was discharged at Hilton Head, S. C., September 17, 1862, by reason of surgeon certificate of disability, and he died on the 8th day of January, A. D. 1879, who bore at the time of his service the rank of sergeant in the service aforesaid.

That she was married under the name of Mary J. Holt to said Thomas Nottage, jr., on the 2d day of June, A. D. 1853, by Rev. Mr. Dennis, at Lowell, Mass., there being no legal barrier to such marriage; that neither she nor husband had been previously married; that she has to the present date remained his widow; that the following are the names and dates of birth of all his legitimate children yet surviving who were under sixteen years of age at the father's death, to wit: Elmer A., of soldier by claimant, born December 12, 1866; Leslie A., of soldier by claimant, born March 8, 1874. That she has not abandoned the support of any one of her children, but that they are still under her care or maintenance; that she has not in any manner been engaged in, or aided or abetted, the rebellion in the United States; that no prior application has been filed; that she hereby appoints, with full power of substitution and revocation, Henry B. Atherton, of Nashua, N. H., her attorney, to prosecute her claim; that her residence is No. 28 Cross street, and her post-office address is Nashua, N. H., box 1221.

MARY J. NOTTAGE.

E. M. BOWMAN. THOMAS FLOOD.

Thomas Flood.

Also personally appeared E. M. Bowman, residing in Nashua, N. H., and Thomas Flood, residing in Nashua, N. H., persons whom I certify to be respectable and entitled to credit, and who, being by me duly sworn, say that they were present and saw the claimant sign her name to the foregoing declaration; that they have every reason to believe from the appearance of said claimant and their acquaintance with her that she is the identical person she represents herself to be; and that they have no interest in the prosecution of this claim.

E. M. BOWMAN, THOMAS FLOOD.

Sworn to and subscribed before me this 31st day of May, A. D. 1880, and I hereby certify that the contents of the above declaration, &c., were fully made known and explained to the applicant and witnesses before swearing; and that I have no interest, direct or indirect, in the prosecution of this claim.

[L. s.]

G. A. RAMSDELL,

Clerk Supreme Court.

(Stamped:) Department of the Interior, Pension Office, June 24, 1880.

Questions to a physician approved by the company or its agent.

I. How long and how intimately have you been acquainted with the person whose life is proposed in the foregoing application?

Answer. Fifteen years.

II. Do you consider the person to be of good constitution?

Answer. Yes.

Answer. Yes.

III. Does the person now enjoy good health in every respect?

Answer. Yes.

IV. Please state the temperament, usual rate of pulse per minute, and the condition of the lungs, heart, and other vital organs of the proposed life from a personal examination.

Answer. Pulse, 78; nervous-bilious temperament; vital organs, nominal.

V. How often to your knowledge, and of what diseases has he or she been sick?

sick?

Answer, I have never known him to be seriously ill.

VI. What are his or her habits as affecting health and the chances of life?

Answer. Habits good.

VII. Please to state what you know of the constitution, diseases, and state of health, present or past, of the proposed life or of his or her parents unfavorable to his or her chances of long life?

Answer. Parents both living, three brothers and three sisters living, two died in infancy, one sister died aged 17 years of female troubles.

VIII. Is the life as good a one for insurance as the average of persons of the same age of good constitution, in good health, or better, or not so good, and in what degree?

Answer. As good as the average.

IX. Have you any interest or do you propose to have any in the policy if issued?

issued? Answer, No.

NASHUA, N. H., July 21st, 1860.

JAMES B. GREELY, M. D.

I, Edward P. Emerson, on oath depose and say that I reside in Nashua, N.H., and am the general agent for New Hampshire and Vermont of the New England

Mutual Life Insurance Company, of Boston, Mass., and I have access to the records of said company, and the foregoing is a correct copy from said records of the examination of Thomas Nottage, jr., for life insurance in said company, and said Nottage was insured in said company, and the said Thomas Nottage, jr., was well known to me for twenty-five years or more, and was the identical Thomas Nottage, jr., who was a sergeant in Co. "F" of the 3d Regt. N. H. Vols., and who died in said Nashua some time in the month of January, 1879, and I have no interest whatever in the claim of his widow for a pension; that I have no hesitation in saying said Nottage was sound and free from disease at the time of enlistment, and that from and after his discharge from the service aforesaid up to the time of his death he was sick and ill from exposure, hardship, and disease contracted in said service, and that he finally died in consequence thereof.

E. P. EMERSON.

JANUARY 7, 1880.

STATE OF NEW HAMPSHIRE, Hillsborough, ss:

Personally appeared Hon. Edward P. Emerson, well-known to me as a credible witness and one of the most respected citizens of Nashua, N. H., and made oath to the foregoing affidavit by him subscribed before me, and I have no interest in said claim.

[SEAL.]

E. J. COPP, Register of Probate.

(Stamped:) Department of the Interior, Pension Office, June 24, 1880.

I, Josiah G, Graves, M. D., on oath depose and say that I have practiced medicine in Nashua, N. H., for in fact forty years and more, and that I was well acquainted with Thomas Nottage, jr., of said Nashua, late a sergeant in Company F, of the Third Regiment of New Hampshire Volunteers, and whose widow, Mary J. Nottage, is an applicant for a widow's pension. That I was the family physician of said Thomas for many years up to his enlistment in 1861, and of his father before him, and that I attended said Thomas Nottage, jr., in March, 1863, for lung fever, and my books show that I made fourteen professional visits to him. I have no knowledge of his having any sickness before or after that time up to the time of his enlistment, and my acquaintance and relations with him were such that if he had had any disease or disability prior to his enlistment I believe I should have known of it. That so far as I know he was a sound man when he enlisted, and had been such since his illness aforesaid, in March, 1853. I have no interest whatever in the claim of his widow for a pension.

STATE OF NEW HAMPSHIEF.

STATE OF NEW HAMPSHIRE, Hillsborough, ss:

February, 1880, personally appeared Josiah G. Graves, M. D., to me well known as a credible witness, and a leading physician and surgeon for many years in this vicinity, and made oath to the foregoing affidavit by him subscribed before me, and I have no interest in said claim.

E. J. COPP.

Register of Probate.

(Stamped:) Department of the Interior, Pension Office, June 24, 1880.

(Stamped.) Department of the Interior, Pension Office, June 24, 1880.

I, Elbridge J. Copp, of Nashua, in the county of Hillsborough and State of New Hampshire, on oath depose and say I was adjutant of the 3d N. H. Vols.; that I was well acquainted with Thomas Nottage, sergeant in Co. F. of said regiment; that I have a distinct recollection of the serious sickness and intense suffering of said Nottage during the summer of 1862, while the regiment was stationed at Hilton Head, S. C., the disease being chiefly from malaria and kidney trouble, and resulting in his discharge from the service for disability; that I was well acquainted with said Nottage at the time of enlistment, and for some years before, and know he was an able-bodied, healthy man; that I met him frequently since 1864, living most of the time in the same city, and that he was out of health, gradually growing worse to the time of his death. I have no interest in this claim.

terest in this claim.

Personally appeared before me this 4th day of June, 1883, and subscribed and made oath to the foregoing affidavit. I have no interest in the claim.

DANA W. KING,

Justice of the Peace.

E. J. COPP. Register.

STATE OF NEW HAMPSHIRE, Hillsborough, ss:

Hillsborough, ss:

I, E. J. Copp, register of the probate court in and for said county, hereby certify that, at the date of the attestation hereunto annexed, Dana W. King was a justice of the peace in and for said county, in said State, duly commissioned and constituted, and that to his acts and attestations as such, full faith and credit are, and ought to be, given in and out of court, and I believe said signature to be genuine. I also certify that said court is a court of record.

In testimony whereof I have hereunto set my hand and affixed the seal of said court this 4th day of June, A. D.1883.

E. J. COPP, Register.

[SEAL.] (Stamped:) U. S. Pension Office, Feb. 7, 1884.

STATE OF NEW HAMPSHIRE, County of Hillsborough, ss:

In the matter of the claim for widow's pension of Mary J. Nottage, widow Thomas Nottage, late of Company F, Third Regiment New Hampshire V

Thomas Nottage, late of Company F, Third Regiment New Hampshire Volunteers.

Personally came before me, a justice of the peace in and for aforesaid county and State, Alfred P, Hayden, aged 42 years, and Norman E. Cobb, aged 47 years, residents of Nashua, in the county of Hillsborough, State of New Hampshire, who, being duly sworn, declare in relation to aforesaid case as follows:

That they were members of said company (said Hayden, sergeant, said Cobb, private); that they well knew said Nottage; that he was in good health, robust, and strong, and he remained in good health until the summer of 1862; that in the summer of 1862, while on Hilton Head Island, doing picket duly, when it came his turn to go on duty from Stony Plantation, where the company was, to White House Landing, he was unable to go, which was the first we noticed of his being sick. He did some light duty after. The regimental hospital was with us in the Stony Plantation mansion. He was treated in said hospital. He had swamp fever, the result of malaria, and before the summer was out suffered very much from irritation of kidneys and bladder. He grew thin and pale, and weak, and kept growing worse so that he suffered the most intense pain. His countenance became yellow, as though he had the jaundice. It was understood that he could not live but a short time unless sent away; so that in the fall of 1882 he was discharged on account of his said disability. To our knowledge he passed gravel, which was attended with much suffering. The surgeon of the regiment, Moulton, was away north, sick. Assistant Surgeon Eaton attended said Nottage, and said B. F. Eaton is, we are informed, dead. We saw but little of said Nottage after our return from the Army.

We further declare that we have no interest in said case, and are not concerned in its prosecution, and are not related to said claimant.

Affiant's signature: NORMAN E. COBB.

P. O. Address: Nashua, N. H., Box 456, Affiant's signature: NORMAN E. COBB.

Sworn to and subscribed before me this day by the above-named afflants; and I certify that I read said affldarit to said afflants, and acquainted them with its contents before they executed the same; that said afflants are personally known to me; that they are credible persons and so reputed in the community in which they reside. I further certify that the word Buzzel was erased, and the word Moulton was added before execution, and that I have no interest, direct or indirect, in the prosecution of this claim.

Witness my hand and seal this 27th day of October, 1883.

JAMES A. LEACH,

Justice of the Peace.

Certificate of authority of J. P. on file. (Stamped:) U.S. Pension Office, February 7, 1881.

FORT CLARK, TEX., July 30, 1884.

To the Hon. Commissioner of Pensions, Washington, D. C. :

To the Hon. Commissioner of Pensions, Washington, D. C.:

Sir: The widow of the late Thomas Nottage, of Nashua, N. H., having applied to me for testimony with regard to her husband's service, to be used in support of her claim to be placed upon the pension list, I hereby certify that at time of enlistment of said Thomas Nottage in the Third Regiment New Hampshire Volunteers he was well known to me and believed to be in sound physical condition, and known to have passed all the examinations required of him preparatory to his "muster into service."

He was enrolled in Company "F." of the 3d N. H. Vols. I was captain of said company; Nottage became a sergeant, and was discharged as such on surgeon's certificate of disability at Hilton Head, S. C., about the 20th of September, 1862. I know by personal knowledge that the said Thomas Nottage was broken down with faithful service, and that he was not discharged until it was evident to all that it was necessary to save his life.

I further certify that I met the said Thomas Nottage several times after the war at his home at Nashua, N. H., and always found him suffering from the effects of his service, and advised him to apply for the pension I believed him entitled to receive from the Government.

From the facts known to me, I believe that his death was hastened from effects of disease contracted during the war, and that his widow's claim is entitled to all consideration provided for like cases.

Very respectfully, your obedient servant,

JAMES L. RANDLETT.

JAMES L. RANDLETT,

Captain 8th Cavalry, late Lieut. Col. 3d N. H. Vols.

(Stamped:) U. S. Pension Office, August 19, 1884, B.

(Stamped:) U. S. Pension Office, August 19, 1834, B.

I, Jonathan H. Nottage, on oath depose and say that I reside in East Boston, Mass., and am employed in the iron works at the United States navy-yard at Charlestown, Mass., and have been so employed about two years, and that prior thereto I was assistant foreman, having charge of one room, for eight or nine years in said East Boston, of the Atlantic Works, and worked at the Hoosac Tunnel and in Nevada, and that I am a brother of Thomas Nottage, jr., late of Nashua, N. H., and a sergeant in Co. "F," of the 3d Reg't N. H. Vols., who died January 8, 1879, and whose widow, Mary J. Nottage, is an applicant for a widow's pension. That said Thomas Nottage, jr., incurred malarial poisoning in said service, and was discharged in consequence; that when he came home in fall of 1862 he was very emaciated, weak, and ill; at that time he looked as if he could not live a month. He was a shoemaker by trade, but during that year did not gain sufficiently to work at his trade. He was suffering with remittent fever. In the latter part of 1863 or first of 1864 I secured him a place in my room in the Atlantic Works, where no hard work was required, he not being obliged to lift a pound, but had charge of a machine where judgment and skill were required more than any bodily exertion.

This was done with a full understanding of his case by the foreman. Here he worked with me in my room until about 1871, and during the whole time I favored him about his work so that he had no hard manual labor to perform, and this was because during the whole of said time he was unfit for any hard manual labor, and remained so until he died, on account of his disabilities contracted in the service aforesaid; and after he left East Boston he went to Fitchburg, Mass., and for a few months worked for the Fitchburg Machine Company, at work similar to what he had done under me in the Atlantic Works. Following that work at East Boston he came to meat the Hoosac Tunnel, where I was master mechanic in charge

COMMONWEALTH OF MASSACHUSETTS, Suffolk, ss:

This 7th June, 1880, personally appeared Jonathan H. Nottage, to me well known as a credible witness and respectable, and made oath to the foregoing affidavit by him subscribed before me, and I have no interest in said claim and am not concerned in its prosecution.

Justice of the Peace and Clerk of the Municipal Court of the
East Boston District in the City of Boston. SEAL.

(Stamped:) Department of the Interior, Pension Office, June 24, 1880.

General affidavit.

STATE OF MASSACHUSETTS, County of Suffolk, ss:

County of Suffolk, ss:

In the matter of Mary J. Nottage, widow of Thomas Nottage, claimant, for original pension No. 270607, late sergeant, Company F, Third Regiment, New Hampshire, Volunteers.

Personally came before me, a notary public in and for aforesaid county and State, Williams. Williams, a citizen of Boston, county of Suffolk, State of Massachusetts, well known to me to be reputable and entitled to credit, and who, being duly sworn, declares in relation to aforesaid case as follows:

I was personally acquainted with the said Thomas Nottage. In 1864, 1865, and 1866 he was employed at the Atlantic Iron Works, in East Boston, where I was then and am now employed, and for about two years during that time he resided in the same house that I did and I saw him daily. My recollections of

him are that he was sick a great deal and unable to work steadily; that he was absent from the shops and confined to his house very often days at a time, on account of sickness from diseases which I understood at the time he had contracted while in service in the Army in 1861 and 1862.

My post-office address is 60 Princeton street, East Boston, Mass.

I further declare that I have no interest in said case, and am not concerned in

its prosecution. Attest:

WM. S. WILLIAMS.

Sworn to and subscribed before me this day by the above-named affiant, and I certify that I read said affidavit to said affiant, and acquainted him with its contents before he executed the same. I further certify that I am in no wise interested in said case, nor am I concerned in its prosecution.

Witness my hand this 24th day of May, 1883.

[SEAL.]

ANDREW P. FISHER.

I, Willard S. Allen, clerk of the municipal court of East Boston district, in and for aforesaid county, State, do certify that Andrew P. Fisher, esq., who bath signed his name to foregoing affidavit, was at the time of so doing a notary public in and for said county and State, duly commissioned and sworn, that all his official acts are entitled to faith and credit, and that his signature thereunto is official acts are entitled to later and genuine.

Witness my hand and seal of office this 25th day of May, 1883.

CHAS. F. TOLLES, Justice of the Peace.

(Stamped:) Pension Office, June 2, 1880.

NASHUA, N. H., June 6, 1885.

Hon, J. C. BLACK:

DEAR SIR: In the claim of Mary J. Nottage, widow of Thomas Nottage, jr., late Company F, Third Regiment New Hampshire Volunteers, No. 270607, will you be so kind as to inform me what further evidence is required to complete the claim?

Very respectfully,

II. B. ATHERTON.

(Stamped): U. S. Pension Office, June 8, 1885.

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, D. C., June 3, 1885.

Washington, D. C., June 3, 1885.

Madam: In your claim for pension, No. 270807, as widow of Thomas Nottage, late of Company F, Third New Hamshire Volunteers, the date and cause of soldier's death should be shown by a verified copy of the public record, and by the affidavit of the physician who attended him in his last illness.

Return this letter with the evidence.

Very respectfully,

JOHN C. BLACK, Commissioner,

Mrs. Mary J. Nottage, Nashua, N. H.

(Stamped): U. S. Pension Office, July 3, 1885.

NASHUA, N. H., May 25, 1885.

General J. C. Black.

Commissioner of Pensions, Washington, D. C.:

Sie: Will you please advise me personally in regard to my claim for widows' pension No. 270607, which has been pending for a long time.

It was filed with evidence several years ago by Capt. H. B. Atherton, a lawyer of this city.

In the winter of 1882, upon the request of Hon. James F. Briggs, M. C., it was taken up, and new evidence called for, which was given; since then I have heard nothing from it.

Capt. James F. Randlett, Eighth Cavalry, U. S. A., with whom my late husband, Thomas Nottage, enlisted in the Third New Hampshire Volunteers in 1861, is familiar with the case, and I think he has written about it, and still I can hear nothing, and being almost discouraged and really in need of the relief it will bring to me and my family, I now appeal to you, asking that something be done to hasten its adjustment.

I am, respectfully,

MARY J. NOTTAGE,

Widow of late Thomas Nottage, Sergt, Co. F. 3 N. H. V.

MARY J. NOTTAGE, Widow of late Thomas Nottage, Sergt. Co. F, 3 N. H. V.

(Stamped:) U.S. Pension Office, May 27, 1885.

U. S. PENSION OFFICE, January 4, 1885.

U. S. Pension Office, January 4, 1885.

Madam: Your pension claim, No. 276607, as widow of Thomas Nottage, late a member of Co. F. 3d N. H. Vols., was rejected July 30, 1885, on the ground that the soldier's fatal disease, consumption, was not contracted in, nor was it in any way a result of, his military service.

It appears from the records of the War Department that he was never fit for military duty, and was discharged for a disease that had existed several years before his enlistment. It further appears that he had an attack of lung fever in March, 1853, and that the final attack that proved fatal occurred in the spring of 1878. There appears to be no reason why the claim should be reopened or further considered.

The information is given at the request of Hon. H. W. Blair, who has made personal inquiry relative to the claim.

Mrs. Mary J. Nottage,

Nashua, N. H.

East Div. will bring papers to desk, with examiner, for Senator BLAIR, who is

McLEAN, D. C. (Stamped:) First Deputy Commissioner, Jan. 4, 1886. U. S. Pension Office.

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, D. C., June 26, 1886.

Washington, D. C., June 26, 1886.

Hon. John I. Mitchell,
Chairman Senate Committee on Invalid Pensions:

Sir: In compliance with your request, I have the honor to herewith transmit the papers in the pension case of Mary J. Nottage, as widow of Thomas Nottage, late of Co. "F," 3d N. H. Vols. (No. 270607).

This claim was rejected August 6, 1885, on the ground that the soldier's death, of consumption, in 1879, was not the result of any disability that had its origin in the service and line of duty.

Very respectfully,

JOHN C. BLACK, Commissioner.

The examiner imperfectly briefs this for action as follows:

BEFORE SERVICE.

EFORE SERVICE.

E. P. Emerson, Nashua, N. H.—General agent New Eng. Life Insurance Co.; records show that an examination of soldier was made July, 1860, by Dr. Jas. B Greely, who reported that soldier was of good constitution, and vital organi normal. (He was insured in their company.) (Filed June 24, 1880.)

Dr. Josiah G. Graves.—Was soldier's family physician for many years before his enlistment. Attended soldier in March, 1853, for lung fever, and his books show that he made fourteen professional visits to him. Has no knowledge of any other sickness up to the time of his enlistment, and his relations were such that if he had any disease or disability he would have known of it. So far as affiant knows he was a sound man when he enlisted, and had been since his illness in 1853. (Filed June 24, 1880.)

DURING SERVICE.

DURING SERVICE.

Elbridge J. Clapp, Nashua, N. H.—Adjutant 3 N. H. Vols.; well acquainted with soldier; has a distinct recollection of soldier's serious sickness and intense suffering during the summer of 1862, while the regiment was stationed at Hilton Head, S. C., the disease being chiefly malaria and kidney trouble, and resulting in his discharge for disability. (Filed February 7, 1884.)

Alfred P. Hayden, comrade: Norman E. Cobb, comrade.—Soldier was in good health until the summer of 1862, when he became unable to go on picket duty. This at Hilton Head, S. C. He was treated in reg. hosp. He had swamp fever, the result of malaria, and before the summer was out suffered very much from irritation of kidneys and bladder. He grew thin, pale, and weak, and kept growing worse. His countenance became yellow as though he had the jaundice. He was discharged on account of his disability. To affiant's knowledge he passed gravel, which was attended with much suffering. (Filed Feb'y 7, 1884.)

SINCE SERVICE.

Jonathan H. Nottage, E. Boston, Mass.—Soldier's brother, Soldier incurred malarial poisoning in service and was discharged in consequence. When he came home in the fall of 1862 he was very emaciated, weak, and ill, and looked as if he could not live a month—was suffering from remittent fever. Soldier worked with affiant until 1871, and during the whole time affiant favored him, being unfit for any hard manual labor, and remained so until he died. He finally became unable to work, and growing worse died Jan'y 8, 1879. During all these years he suffered a great deal, and frequently kept about his business, although suffering with remittent fever and general debility. He had piles, and became very weak and feeble, and had a cough ever after he came out of the service on the slightest exposure to cold. (Filed June 24, 1880.)

William S. Williams, Boston, Mass.—In 1864, '65, and 66 was employed at the same place with soldier. Affant's recollections of him are that he was sick a great deal, and unable to work steadily; that he was absent from the shop and confined to his house very often days at a time on account of sickness from diseases which affiant understood had been contracted in the service. (Filed Feb'y 7, 1884.)

J. N. Lothrop, Boston, Mass.—Employed soldier after his discharge. On account of sickness soldier was unable to work full time. Had him a part of 1864, '65, and 66, and he was troubled more or less of the time with disease which affiant understood was contracted in the service. (Filed Feb'y 7, 1884.)

Dr. E. F. McQuesten, Nashua, N. H.—Soldier was under affiant's care from July, '73, to his death, January 8, 1879. During the years '73, '74, '75, and '76 he suffered from repeated attacks of remittent fever, occasioned by malarial poisoning; also from frintability of bladder, with organic deposits. In 1877 (autumn) he had'an ischio-vectal abscess, which culminated in anal fistula, which never

healed. In the spring of '78 he had sore throat and cough, which gradually increased, phthisis pulmonalis resulting. (Filed June 24, 1890.)

Same affant.—Soldier died of phthisis pulmonalis Jan'y 8, 1879. (Filed July 3,

Public Record, Nashua, N. H.—Soldier died at Nashua, N. H., Jan'y 8, 1879, of consumption, aged 47. (Filed July 3, '85.)

No. 2.—Thomas S. Hopkins.

No. 2.—Thomas S. Hopkins.

There appears to be no dispute as to the facts in this case. The applicant was entitled to arrears of pension had he applied prior to the 1st day of July 1890. At that time and for some time previous thereto he was incapacitated by mental and physical disabilities, and thereby prevented from making application within the limitation fixed by law. As soon as the incapacity was removed he applied for a pension, and his application was allowed.

The question is, whether the Government should treat the soldier with that degree of liberality which has characterized the common law for centuries in the case of lunatics and minors, and others under like circumstances, to whom their legal rights are restored whenever the infirmity or disability under which they have suffered shall have been removed.

Relief by special act has heretofore been extended in the Forty-sixth, Forty-seventh, and Forty-eighth Congresses in cases involving the same principle, and a bill for the relief of Mr. Hopkins passed the House in the first session of the Forty-seventh Congress.

In regard to the rating for and the amount of arrears granted by the bill as it reached the President, it is proper to observe that he is wholly wrong in estimating the amount as though the bill gave for the whole time since his discharge at the same high rate which he now receives. On the contrary, the bill provides expressly for such rating by the Commissioner as he would have made upon that point he must take, and the result would have been not more than one-fourth or one-third the amount which by its magnitude seems to have stimulated the veto in this case.

[Senate Report No. 279, Forty-ninth Congress, first session.]

[Senate Report No. 279, Forty-ninth Congress, first session.]

[Senate Report No. 279, Forty-ninth Congress, first session.]

Thomas S. Hopkins, late a private in Company C, Sixteenth Regiment Maine Volunteers, seeks relief from the limitations of the arrears-of-pensions act of March 3, 1879, on the ground that from a time some months prior to the passage of said act down to a period subsequent to the 30th of June, 1880, he was prevented, by reason of the extreme severity of his illness and by mental and physical disabilities, from making an application for arrears in accordance with the provisions of said act. It appears that upon the first return of mental strength, and as soon as he could dictate a letter, namely, on November 20, 1880, that he made an application for a pension, which was granted him.

This claim received consideration in the first session of the Forty-seventh Congress, and a bill granting the relief sought for passed the House of Representatives. The Senate Committee on Pensions, however, reported adversely upon it, on the ground that the evidence was not sufficient to substantiate the claimant's disability. Subsequent to this report additional testimony upon this point was procured, including the following statement from Drs. W. W. Johnston and H. D. Fry, his attending physicians, which statement seems to your committee as conclusive evidence of the fact that during the time within which applications could be made for arrears of pension under the act above referred to the claimant was mentally and physically disabled from taking advantage of its provisions, and for these reasons the committee believe that the petitioner is entitled to the relief sought for, and they recommend the passage of the accompanying bill as a substitute for Senate bill No. 183.

United States of America,

District of Columbia, ss:

W. W. Johnston, M. D., and H. D. Fry, M. D., of the city of Washington, D. C., being duly sworn, depose and say:

That they have been the regular medical attendants of Thomas S. Hopkins during his long illness.

That his disease has been the severest case of nervous exhaustion which has ever come under their observation.

That from March 8, 1879, and for many months previous thereto, down to November, 1830, he was absolutely disqualified, both mentally and physically, from attending to the business of applying for a pension, or any other business, by reason of the intensity of his symptoms; and that there were no intervals, however short, during that period when he could have safely undertaken the work.

That the effort he made in applying at so early a date has seriously retarded his recovery.

his recovery.

That he is still confined to his bed, and requires the constant attendance of

That we have no pecuniary interest in the result of his pension claim.

W. W. JOHNSTON, M. D.,

1401 H St., N. W.

H. D. FRY, M. D.,

819 14th St., N. W.

Subscribed and sworn to before me, this 7th day of June, 1882.

[SEAL.] MILTON C. BARNARD,

Notary Public.

[Senate Ex. Doc. No. 185, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill 183 with his objections thereto.

JUNE 21, 1896.—Read and ordered to lie on the table.
JUNE 23, 1886.—Referred to the Committee on Pensions and ordered to be printed.

To the Senate:

To the Senate:

I hereby return without my approval Senate bill No. 183, entitled "An act for the relief of Thomas S. Hopkins, late of Company C, Sixteenth Maine Volunteers."

This soldier was enrolled in the Army June 2, 1862, and discharged June 30, 1865. He was sent to the Government Hospital September 20, 1863, and thereupon transferred to the Invalid Corps.

He filed his declaration for a pension in November, 1880, alleging that while in the service he contracted malarial fever and chronic diarrhea, and was seized with convulsions, suffering from great general debility.

A pension of \$30 a month was granted to him June, 1881, dating from the time of filing his application, which sum he has been receiving up to the present time. This bill proposes to remove the limitation fixed by the law of 1879 prescribing the date prior to which an application for pension must be filed in order to entitle the claimant to draw the pension allowed from the time of his discharge from the service.

from the service.

If this bill should become a law it would entitle the claimant to about nine thousand dollars of back pension. This is claimed upon the ground that the soldier was so sick from the time of the passage of the act creating the limitation up to the date allowed him to avail himself of the privilege of the act that he could it the labelian. out file his claim.

I think the limitation thus fixed a very wise one, and that it should not, in fairness to other claimants, be relaxed for causes not mentioned in the statute, nor should the door be open to applications of this kind.

The beneficiary named in this bill had fifteen years after the accruing of his claim, and before it is alleged that he was incapacitated, within which he might have filed his application and entitled himself to the back pension now applied for.

The facts here presented come so far short of furnishing a satisfactory excess for his delay that, in my judgment, the discrimination asked in his favor should not be granted.

EXECUTIVE MANSION. June 19, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington on Monday, the 7th day of December, 1885.]

An act for the relief of Thomas S. Hopkins; late of Company C, Sixteenth Maine Volunteers.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Thomas S. Hopkins, late a private in Company C, Sixteenth Maine Volunteers, now on the pension-roll, be, and he is hereby, exempted, by reason of mental incapacity, from the limitation prescribed in section 2 of the act of Congress approved March 3, 1879, entitled "An act making appropriations for the payment of the arrears of pensions granted by act of Congress approved January 25, 1879, and for other purposes," and he shall be entitled to and there shall be paid to him the same rate of pension, and the same arrears thereof, as if his application for a pension had been filed with and allowed by the Commissioner of Pensions prior to June 16, 1880.

JOHN G. CARLISLE,

Speaker of the House of Representatives,
JOHN SHERMAN,
President of the Senate pro tempore.

I certify that this act originated in the Senate.

ANSON G. McCOOK, Secretary, By CHAS, W. JOHNSON, Chief Clerk.

No. 3.-James Butler-Senate Bill 2025.

We submit this case upon the undisputed statements of fact, as contained in the report of the Senate committee, which we print, together with the veto of the President.

Soldier was formally mustered in August 23, 1864, and honorably discharged September 12, 1864, on account of comminuted fracture of lower third right femur since muster in.

[Senate Report No. 552, Forty-ninth Congress, first session.]

[Senate Report No. 552, Forty-ninth Congress, first session.]

The claimant, James Butler, late a private of Company F, First New Hampshire Heavy Artillery, applied for a pension at the Department November 10, 1871, alleging disability from breaking his right leg just above the knee at Concord, N. H., September 9, 1864. It appears that the soldier received a pass from the captain of his company until the next morning and went home in the city; that he got up in the morning before light to return to camp and started; that in passing to camp he fell into a cellar where a house had just been removed, breaking his right leg. The records show that he was discharged September 12, 1894, by reason of rejection on organization of company at general rendezvous, Cencord, N. H., per General Order No. 243, War Department, A. G. O., 1884, on account of comminuted fracture of lower third right femur since muster into service. It also appears that he was treated in the hospital at Concord. The testimony of Capt, D. J. Flanders is to substantially the same effect, and further states that he was rejected on organization of the company, after his muster in, and that he received the injury while in the service and in the line of duty. There is other corroborating testimony.

The examining surgeon found him disabled three-fourths.

This case was rejected by the Department upon the ground that the soldier, who was on his way to his regiment, under orders to return at the expiration of his leave, and who was disabled without his own fault, did not contract the disability in line of duty.

Your committee, however, think otherwise, and recommend the passage of the bill.

[Senate Ex. Doe. No. 180, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill No. 2025, with his objections thereto.

JUNE 23, 1886.—Read, referred to the Committee on Pensions and ordered to be

To the Senate:

To the Senate:

I hereby return without approval Senate bill number two thousand and twenty-five, entitled "An act granting a pension to James Butler."

This claimant was enrolled as a private in a New Hampshire regiment August 23, 1894, but on the organization of his company, on the 12th day of September, 1864, he was discharged on account of a fracture of his leg, which happened on the 11th day of September, 1864.

It appears that before the organization of the company to which he was attached, and on the 10th day of September, he obtained permission to leave the place of rendezvous for the purpose of visiting his family, and was to return the next day. At a very early hour in the morning, either while preparing to return or actually on his way, he fell into a new cellar and broke his leg. It is said that the leg fractured is now shorter than the other.

His claim for pension was rejected in December, 1864, by the Pension Bureau, and its action was affirmed in 1871 upon the ground that the injury was received while the claimant was on an individual furlough, and therefore not in the line of duty.

Considering the fact that neither his regiment nor his company had at the time of his accident been organized, and that he was in no sense in the military service of the United States, and that his injury was received while on a visit, and not in the performance of duty, I can see no pretext for allowing a pension in this case.

No. 4.—Cornelia R. Schenck.

No. 4.—CORNELIA R. SCHENCE.

A re-examination of the evidence in this case clearly shows that the disability alleged was contracted in the service. The fact that a long time clapsed before the application for pension was made is no evidence that the disability is not pensionable. Any one conversant with the history of the soldiers of our armies knows that in many cases persons fully entitled to pensions have declined from motives of the most honorable and patriotic character to avail themselves of the a sistance of the Government through the medium of the pension laws, and it seems hard, if not brutal, to make their abstinence from the assertion of a right which has relieved the Government of an annual payment for a pension justly due for more than twenty years the ground of refusing to do justice upon the facts proven in the case when at last necessity or any good cause inclines the claimant, or those who may represent him, to assert that right.

It is also objected that the case is still pending in the Pension Office. It is usual for Congress to await the decision of that tribunal in cases pending before it, but that is not a legal objection to special action by Congress. It is only a rule of practice of the committee and of Congress for its convenience, and neither the Pension Office nor the President can with propriety criticise the exercise of Congressional discretion in such case.

The principal facts are stated in the report of this committee, which we append hereto, as well as the message of the President.

[Senate Report No. 597, Forty-ninth Congress, first session.

[Senate Report No. 597, Forty-ninth Congress, first session.

[Senate Report No. 597, Forty-ninth Congress, first session.

That the records show that Daniel F. Schenck enlisted as a private in Company D, Fiftieth New York Engineers; that he was promoted to lieutenant and captain for meritorious services, and was detailed upon special duty in organizing the defenses of Washington. The affidavit of George N. Falley, a captain in the same regiment of engineers, states that "Lieutenant Schenck was often on detached service, and during the spring of 1863 reported directly to General Barnard, of Washington, making drawings and engaged on the fortifications about that city," and "regarding his value to the service would say he rose from the ranks to be captain of his company. He was the only officer in our regiment below the grade of captain ever assigned to the important duty of drafting and overseeing the construction of fortifications."

Claimant states that while he was engaged in overseeing the work above mentioned, Captain Schenck contracted the disease in the line of duty which ultimately caused his death. These statements are substantiated by affidavits of soundness before enlistment, and to the existence and continuance of the disease after he was mustered out; also by the affidavits of physicians who treated him, and who testify that the disease which caused his death (entero-colitis) was the result of disabilities incurred during service in the Army.

Taking into consideration all the evidence on file in this case, the committee believe it to be their duty to report in favor of this bill and recommend its passage.

Message from the President of the United States, returning Senate bill 1584, with his objections thereto.

June 21, 1886.—Read and ordered to lie on the table. June 23, 1886.—Referred to the Committee on Pensions and ordered to be printed.

To the Senate :

I hereby return without approval Senate bill number fifteen hundred and eighty-four, entitled "An act for the relief of Cornelia R. Schenck."

It is proposed by this bill to grant a pension to Mrs. Schenck as the widow of Daniel F. Schenck, who entered the military service of the United States in August, 1861, and was mustered out October 21, 1864.

The record of his service contains no mention of any disability; he died in December, 1875, of a disease called gastro-enteritis, which, being interpreted, seems to denote "inflammation of the stomach and small intestines." So far as the facts are made to appear, the soldier, neither during the term of his service nor during the eleven years he lived after his discharge, made any claim of any disability.

nor during the eleven years he from the Pension Bureau in 1885, ten years after disability.

The claim of his widow was filed in the Pension Bureau in 1885, ten years after her husband's death, and is still undetermined.

The fact that her application is still pending in that bureau is sufficient reason why this bill should not become a law.

A better reason is based upon the entire lack of any facts shown to exist which entitle the beneficiary named to a pension.

GROVER CLEVELAND.

EXECUTIVE MANSION, June 21, 1886.

We add the memorial of the Grand Army in this case, received while reading proof and laid before the Senate this morning:

No. 5 .- HARRIET WELCH.

No. 5.—Harriet Welch.

The principal facts upon which this claim is based are set forth in the previous report of this committee, which is hereto appended. The reason alleged by the Pension Office for the rejection of this claim is that the death of the soldier did not result from the service. The following newspaper account of his death appeared at the time:

"Cyraneous Welch (or Deuney, as he was generally called), a veteran and pensioner of the last war, was killed on the track of the Wisconsin Central Railroad, about four miles north of this place, on Wednesday might or Thursday morning last, and was mangled in a fearful manner, his head having been cut in two just above his eyes and his brains scattered along the track. He had been to Green Bay attending to some business relating to his pension and returned on the 11 p. m. train. He was known to have left Hilbert, but was not known to have ever reached Chilton, and it is supposed that he fell from the 11 p. m. train and was lying on the track when the 1 a. m. train going north killed him. An inquest was held by Esq. Green, of this city, and a verdict rendered in accordance with the facts. The deceased was an industrious and hard-working man, and was an engineer at Zech Bros. mill, and leaves a wife and seven small children to mourn his loss."

No question is raised as to the legality of the marriage, which seems to have resulted in long cohabitation and the birth of seven children. The claimant was married to the soldier June 7, 1868. There is nothing in the evidence to justify the slur which the President casts.upon the chastity of this widow and the legitimacy of her seven fatherless children. Pensions have heretofore frequently been granted in cases similar to this. Human nature cries out aloud for the allowance of pension in such a case, and if this woman, with her seven small children, is to be deprived of it, your committee at least are glad that the responsibility rests elsewhere.

We print the Senate report and the veto of the President, and recomm

[Senate Report No. 295, Forty-ninth Congress, first session.]

[Senate Report No. 295, Forty-ninth Congress, first session.]

Harriet Welch is the widow of Cyraneous Welch, private, Company C, Thirty-eighth Regiment Wisconsin Volunteer Infantry, who was pensioned for gunshot wound of his left leg, received in the military service and in the line of his duty. The rate of pension was increased from one-half to three-quarters because of increasing disability in the wounded leg. Again applying for increase of pension, he was directed to report for examination before the examining board of surgeons convened at Green Bay, Wis. Returning from Green Bay, Wis., he fell from the cars and was killed, September 7, 1877.

John Hammer filed affidavit May 22, 1881, that "soldier's leg was so crippled that he could not depend upon it and that it gave way many times and caused him to fall." That it is his belief that in attempting to pass from one car to another while returning from Green Bay his leg gave out and caused him to fall between the cars, when he was crushed to death.

'In view of all the facts, the committee believe it to be their duty to report in favor of this bill, and recommend its passage, with the following amendment: Strike out in the seventh, eighth, and ninth lines the words "at the rate of eight dollars per month and two dollars per month for each of her children under the age of sixteen years," and insert "and her minor children" in lieu thereof.

[Senate Ex. Doc. No. 179, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 1383, with his objections thereto.

JUNE 23, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed. To the Senate:

I return without approval Senate bill No. 1383, entitled "An act granting a pension to Harriet Welch."

ion to Harriet Welch."

The beneficiary named in this bill asks for a pension as the widow of Cyraneous Welch, who was wounded in 1864 while in the service, and was pensioned therefor in 1867. In 1876 his rate of pension was increased. In 1877 he appears to have applied to have his pension again increased. It is alleged that upon such application he was directed to appear before an examining board or a surgeon at Green Bay, Wis., for examination, and in returning to his home from that place on the 7th day of September, 1877, he fell from the cars and was killed, his remains having been found on the track the next morning.

No one appears to have seen the accident, but it is claimed that he could not depend upon his wounded leg, and that it "gave way many times and caused him to fall." From this statement the inference seems to have been indulged that his death was attributable to the wound he had received thirteen years before.

that his death was attributable to the would be refered by the Pension Fore.

The widow's claim, based upon this state of facts, was rejected by the Pension Bureau on the ground that the accident resulting in death was not the result of his military service; and on an appeal taken to the Secretary of the Interior from that determination the same was sustained.

Though this widow admits that prior to her marriage with the deceased soldier she had married another man whom she could only say she believed to be dead, I believe her case to be a pitiable one, and wish that I could join in her relief. But unfortunately official duty can not always be well done when directed solely by sympathy and charity.

GROVER CLEVELAND.

I certify that this act originated in the Senate.

ANSON G. McCOOK, By CHAS. W. JOHNSON, Chief Clerk,

No. 6.-Dudley B. Branch.

No. 6.—Dudley B. Branch.

The evidence in support of this case is briefly stated in the report of the Senate committee, hereto annexed, and there is nothing but surmise and conjecture to contradict the positive sworn testimony of the various witnesses which establishes the statements made in that report. The best medical and other evidence obtainable shows the soundness of the soldier at enlistment, and the disability with which he is now afflicted, hernia, is clearly shown to have existed from and ever after the battle in which he alleges he received it. The evidence also accounts reasonably for his failure to furnish medical testimony of early treatment, but there is an abundance which is reliable and undisputed to establish the origin and continuance of the disability.

The Government's own examining surgeon says:

"Judging from his present condition and the evidence before me, it is my belief that the said disability did originate in the service aforesaid and line of duty."

The veto is a negation of all the evidence in the case; but after a re-examination of the case, your committee are of opinion that there is nothing whatever to impeach the reliability of that evidence. It is not contradicted from any source, and why the claim should have been rejected by the Pension Office is difficult to conceive. Plaintiffs would seldom recover a verdict from injuries of their countrymen if they were obliged to produce stronger evidence than has been furnished in this case to establish their claims. The peculiar nature of the injury often induces those who are suffering from it to conceal their physical condition for years, of ar as possible; besides, patriotic motives in innumerable instances have prevented any application whatever for a pension for years, and sometimes for life, on the part of those justly entitled to receive it. Only lack of information as to the evidence itself, or willingness to reject a claim upon the most trifling grounds, can account for the rejection of this.

We append hereto the report of t

[Senate Report No. 399, Forty-ninth Congress, first session.]

[Senate Report No. 399, Forty-ninth Congress, first session.]

That it appears from the papers on file in this case that Dudley B. Branch was a sergeant in Company F. Seventh Regiment Indiana Volunteers, and was injured June 9, 1862, at the battle of Port Republic, Va.

Declaration for pension filed December 17, 1875, claimant alleging inguinal hernia on left side, resulting from an injury received in the line of his duty at the battle of Port Republic, June 9, 1862.

Claim rejected June 28, 1883, on the ground of "no record of hernia and inability to furnish any evidence to show origin in service in line of duty."

Affidavit of claimant states that at battle of Port Republic, when the retreat was ordered, he saw a wounded comrade lying on the field, and he went forward hoping to assist him away, but becoming closely pressed by the enemy he was compelled to leave his companion and run to make good his escape. In getting over a fence he fell heavily, striking a stone or hard substance, and received the hernia in his left side. In escaping from the enemy he was cut off from his command, but rejoined it after eight days; that the only person he met in escaping was I-ieutenant Holmes, of Company F, Seventh Regiment Indiana Volunteers, who was afterwards killed in battle.

Claimant's statement is substantiated by affidavit of Hurum P. Mullikin, dated May 22, 1883, in effect that claimant and he had been boys together, and he knew that claimant had no rupture prior to enlistment, and that he always had excellent health before the injury; that affiliant was in the same company and regiment with claimant, and knew of his receiving the injury alleged at the battle of Port Republic, and that claimant and George R. Davenport, dated April 7, 1882, in effect that claimant was disabled by reason of the rupture two-thirds of the time. Also by affidavits of William Harris and George R. Davenport, dated April 7, 1882, in effect that claimant was disabled by reason of the rupture two-thirds of the time. Also by affidavit of Thom

of the service.

Claimant's statement is further corroborated by examining surgeon's certificate dated July 14, 1831, in which he says that claimant is obliged to keep the parts adjusted with an instrument, and can not go at all without it; and he suggests one-half pension, or \$4\$ per month. The certificate is signed by W. J. Hoadley, examining surgeon.

Taking into consideration all the evidence filed in this case, your committee believe it to be their duty to report in favor of this bill, and recommend its passage.

[Senate Ex. Doc. No. 152, Forty-ninth Congress, first session.] Message from the President of the United States returning Senate bill 857, with his objections thereto.

MAY 24, 1886.—Read, laid upon the table, and ordered to be printed.

To the Senate of the United States:

To the Senate of the United States:

I hereby return without approval Senate bill number eight hundred and fifty-seven, entitled "An act granting a pension to Dudley B. Branch."

This claim is based upon the allegation, as appears by the committee's report, that the person named in the bill has a hernia, and that on the 9th day of June, 1862, while in the military service and in the line of duty, "in getting over a fence he fell heavily, striking a stone or hard substance, and received the hernia in his left side."

In December, 1875, thirteen and a half years thereafter, he filed an application for a pension, which was rejected by the Pension Bureau on the ground that there was no record of the alleged hernia, and the claimant was unable to furnish satisfactory evidence of its origin in the service.

The fact is stated in the committee's report that late in the year 1863 this soldier was transferred to the Invalid Corps, and the records show that he was thus transferred for a disability entirely different from that upon which he now bases his claim. He was mustered out in September, 1864, at the end of his term of service.

of service.

I am convinced that the rejection of this claim by the Pension Bureau was correct, and think its action should not be reversed.

I suppose an injury of the description claimed, if caused by violence directly applied, is quite palpable, its effect usually immediate, and its existence easily proved. The long time which clapsed between the injury and the claimant's application for a pension may be fairly considered as bearing upon the merits of such application; while the fact that the claimant was transferred to the Invalid Corps more than a year after he alleges the injury occurred, for an entirely different disability, can not be over looked. In the committee's report the statement is found that the beneficiary named in the bill was in two different hos-

pitals during the year 1863; and yet it is not claimed that the history of his hos-pital treatment furnishes any proof of the injury upon which his claim is now

No. 7.—DAVID W. HAMILTON.

A re-examination of the evidence in this case abundantly supports the allegations of fact contained in the former report of this committee. There seems to be an impression in the Pension Office, reproduced in the message of the President, that if at any time prior to enlistment a disease or disability may have existed of a like character with that complained of as having been contracted in the service and line of duty, the claim is necessarily false, on the ground that there could have been no complete recovery. Upon that theory this case was apparently rejected.

The evidence is clear that the disability complained of, if it existed at all prior to the service, was fully recovered from, but that it again appeared after exposure and hardship sufficient to have produced it originally in an ordinary case. And even if this were not so, there can not be the slightest doubt that the disability was aggravated and increased by his service.

This man was a soldier for nearly four years, and made an honorable record Both Houses of Congress have declared, and the general sentiment of the country has indorsed the principle, that acceptance and muster in to the military service must be taken as sufficient evidence of soundness at the time he entered the service. And when to this is added four years of actual service it is impossible to justify the rejection of a well-proven claim upon the ground that the disability existed prior to enlistment. The strong language of the previous report of your committee appears to have been fully justified, and is adhered to so far as evil consequences are concerned. The fault is largely in the system itself.

We append hereto the Senate report, and also the message of the President

We append hereto the Senate report, and also the message of the President. [Senate Report No. 557, Forty-ninth Congress, first session.]

itself.

We append hereto the Senate report, and also the message of the President.

[Senate Report No. 557, Forty-ninth Congress, first session.]

The claimant, David W. Hamilton, was a first lieutenant in Company E. Seventh Regiment Indiana Volunteers. He enlisted September 13, 1861, and was discharged July 11, 1864. He was subsequently in the service in Company C. Fifty-first Indiana Volunteers, from October 21, 1864, to May 23, 1865. He filed a declaration for pension November 29, 1879, alleging that in March, 1862, between Winchester and Edington, Va., from hard marching he contracted enlargement of the spermatic cord. The claim was rejected by the Pension Office "on the ground that the alleged disability existed prior to enlistment."

It would appear that this action of the Pension Office was based upon the following statement from the records of the Adjutant-General's Office:

"It appears from the rolls on file in this office that David W. Hamilton was mustered into the service of the United States as a first lieutenant, Company E, Seventh Regiment of Indiana Volunteers, to date September 13, 1861, and as a captain to date June 12, 1862. Rolls to June 39, 1862, 'present;' July and August, 1862, 1862, upon 1862, 'absent on surgeon's certificate.' Record books Third Corps, Army of Virginia, show that he tendered his resignation August 16, 1862, on surgeon's certificate on account of continued ill health, but the papers are not onfile. Records of said corps and army are incomplete, and there are no record books of company or regiment on file and no medical certificates. Roll for September, October, November, and December, 1862, 'absent sick;' January and February, 1862, 'absent on detached service,' and so borne to October 31, 1863. He was appointed in Veteran Reserve Corps on account of 'chronic enlargement of the spermatic cord of several years' standing, consequent upon hydrocele, which has not been radically cured, and accepted on the fer liveling and the records of several years' standing, consequent u

[Senate Ex. Doc. No. 155, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 1290, will, his objections thereto.

May 26, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed.

To the Senate of the United States :

I herewith return without approval Senate bill rumber twelve hundred and ninety, entitled "An act granting a pension to Dtv d W. Hamilton."

A claim for pension filed by him in November, 1879, was rejected by the Pension Bureau on the ground that his alleged disability existed prior to his enlist-

A claim for pension filed by him in November, 1879, was rejected by the Pension Bureau on the ground that his alleged disability existed prior to his enlistment.

An examination of the records in the Adjutant-General's Office, and a statement from the Pension Bureau derived from the claimant's application there for pension, with a reference to the report of the committee to whom this bill was referred, disclose the following facts:

The claimant was mustered in the service as first lieutenant in September, 1861, and as captain June 12, 1862. He reported as present with his company until the 30th of that month. For the six months immediately following the latter date he is reported as "absent, sick," and for ten months next succeeding and until October 27, 1863, as "absent on detached service." On the day last mentioned he tendered his resignation at Camp Morton, in the State of Indiana, to enable him to accept an appointment as captain in the Invalid Corps. He was thereupon so appointed upon account of "chronic enlargement of the spermatic cord of several years' standing, consequent upon hydrocele." He remained in the Invalid Corps until July 12, 1864, when, upon the tender of his resignation, he was discharged.

Less than four months afterward, and on the 6th day of November, 1864, he was mustered in the service as a captain in another regiment of volunteers, and on the 17th day of November, 1865, again tendered his resignation, and was finally discharged.

Upon his application for pension under the general law, fourteen years thereafter, he admitted that he suffered from hydrocele as early as 1856, but claimed that an operation then performed for the same had given him permanent relief. It will be seen that the claimant's term of service was liberally interspersed with sick-leave, detached service, resignations, and membership in the Invalid Corps. He admits having the trouble which would naturally result in his alleged disability long before he entered the service; the surgeon upon whose certificate he was a

sired.

After the Pension Bureau has been in operation for a score of years since the late civil war, equipped with thousands of employés charged with no other duty except the ascertainment and adjustment of the claims of our discharged soldiers and their surviving relatives, it seems to me that a stronger case than this should be presented to justify the passage of a special act, twenty-three years after an alleged disability, granting a pension which has been refused by the Bureau especially organized for the purpose of allowing the same under just and liberal laws.

I am by no means insensible to that influence which leads the judgment toward the allowance of every claim alleged to be founded upon patriotic service in the nation's cause. And yet I neither believe it to be a duty nor a kindness to the worthy citizens for whose benefit our scheme of pensions was provided, to permit the diversion of the nation's bounty to objects not within its scope and purpose.

GROVER CLEVELAND.

No. 8.-WILLIAM H. BECK.

No. 8.—WILLIAM H. BECK.

A careful re-examination of the evidence in this case only serves to confirm the opinion of your committee, as expressed already in their printed report (Senate Rep. No. 598), that this claimant should have been allowed a pension at the Pension Office.

The claimant alleged that the epileptic trouble with which he suffers was caused by a jar to the head from heavy firing, and the veto message seems to assume that the cause alleged could not have produced the trouble complained of. To this the only reply we think necessary to make is the evidence itself, and the remark that injuries to the head resulting in temporary or permanent disease of the brain were a common result of the cause which is alleged to have produced the disability in this case. It may seem otherwise to one having little knowledge upon this subject, but theories are often disproved by additional information. It seems to us that to reach a favorable conclusion upon this bill it is only necessary to be familiar with the evidence, and that there is nothing in this case inconsistent with common experience during the late war.

The facts appear in the report of this committee, annexed hereto, to which are added the message of the President and letters of Pension Office and of claimant to Commissioner and to Hon, J. J. Ingalls.

[Senate Report No. 598. Forty-ninth Congress, first session.]

[Senate Report No. 598. Forty-ninth Congress, first session.]

[Senate Report No. 598. Forty-ninth Congress, first session.]
That the records in this case show that William H. Beck, enlisted as a private in Company K, Eighth Regiment Iowa Volunteers, on September 21, 1861, and was discharged April 20, 1866. Declaration for pension filed April 4, 1879, alleging that on or about June 15, 1863, claimant incurred epilepsy, since which time epileptic attacks come on from one to ten days apart; claim rejected on the ground "that there is no record of the alleged epilepsy, and claimant has declared his inability to furnish testimony of commanding officer as to origin, of regimental surgeon showing treatment in service, or medical testimony showing existence at discharge."
Claimant testifies that on or about May 18, 1863, he came from guard duty, and went to sleep in a trench in the hot sun close to where a piece of heavy artillery was being fired almost constantly, and the next thing claimant realized was that he was being carried to a temporary hospital in rear of the trenches where he remained a few days, and then returned to duty, and that ever since that time the epileptic fits have become more frequent and severe.

Claimant's testimony is corroborated by affidavits of comrades Corporal M. Ryan and private L. M. Kensey, who found him in the trench as stated, and that at each discharge of the artillery it brought on another fit.

Also the testimony of Samuel B. Davidson, who was present at that time, and who had been with claimant from September 21, 1861, until that time, and knew he was sound and healthy.

Testimony of claimant is further corroborated by affidavits of neighbors and friends, and the family physician, as to claimant being sound and free from epilepsy or other diseases before enlistment, and the testimony of neighbors as to the occurrence of the epileptic fits since claimant's discharge.

To all this testimony there is to be added the certificate of the examining surgeon under the direction of the Pension Office, signed L. A. Perce, M. D., to the effect that he contracted this disease in the service, and that he is "entitled to one-half total pension for privates, or \$4."

We can see no reason why this pension should not have been allowed by the Pension Office.

Taking into consideration the evidence on file the committee believe it their duty to report in favor of this bill, and recommend its passage.

[Senate Ex. Doc. No. 181, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill 1400, with his objections thereto.

June 23, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed.

To the Senate:

I hereby return without approval Senate bill number fourteen hundred, entitled "An act granting a pension to William H. Beck."

This claimant enlisted in 1861. He re-enlisted as a veteran volunteer January I, 1864, and was finally mustered out April 20, 1866. In all this time of service his record shows no medical treatment or claim of disability. Indeed, an abstract of his re-enlistment, January I, 1864, shows a medical examination and perfect soundness.

Notwithstanding all this, he filed his declaration on the 4th day of April, 1879, nearly thirteen years after his discharge, alleging that in June, 1863, he incurred epilepsy, to which he has been subject since, and that his fits have been from one to ten days apart. To connect this in some way with his military service, he stated that the doctor at a hospital said his epilepsy was caused "by jar to the head from heavy firing."

Six months after his alleged "jar" and his consequent epilepsy, he re-enlisted upon a medical certificate of perfect soundness, and served more than two years thereafter.

Every conceded fact in the case negatives the allegations of his declaration, and the rejection of his claim necessarily followed.

If this disease can be caused in the manner here detailed, its manifestations are such as to leave no doubt of its existence, and it seems to me simply impossible, under the circumstances detailed, that there should be any lack of evidence to support the claim upon which this bill is predicated.

[West. Div., H. F. B., Inv. 227317.]

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, June 25, 1886.

Sir: In response to your request, I have the honor to transmit herewith the papers in the claim of William H. Beck, late of Company K, Eighth Iowa Vol-

papers in the claim was rejected on the ground that there is no record of alleged epi-lepsy, and claimant is unable to furnish satisfactory evidence of its existence in service or at discharge.

Very respectfully,

JOHN C. BLACK,

Hon. John I. MITCHELL, Chairman Committee on Pensions, United States Senate.

[Western Div. J. F. C. Ex'r. Inv., No. 277317, William H. Beck, Co. K, 8th Reg't Iowa Vols.]

Department of the Interior, Pension Office, Washington, D. C., February 1, 1886.

Washington, D. C., February 1, 1886.

Sir: Your invalid pension claim above referred to, for epilepsy, was rejected February 21, 1881, on the ground that the records of the War Department afford no evidence of the incurrence or existence of said disease while you were in the service; but do show that you re-enlisted as a veteran volunteer January 1, 1864, six months after the date at which you claim to have contracted epilepsy; that you were examined by a surgeon and pronounced sound and free from all bodily defects and mental infirmity at that time, and that you served until April, 1866, without having been reported sick or absent, or in any way incapacitated for military duty.

It also appears from your own statements that you are unable to furnish medical evidence of treatment for epilepsy while in the service, at date of discharge, or for several years thereafter; that you did not tell any one that you had epilepsy, and no one knew that you had fits until about 1879 or 1880.

In view of these facts, the testimony of comrades and neighbors, filed since the date of rejection, is not considered sufficient to change the status of the case; and the claim can not receive favorable consideration by this office unless you can farnish competent medical evidence showing that you were treated for epilepsy while in the service, or immediately after your discharge in April, 1866.

This information is furnished at the request of Hon. John J. Ingalls, who has made personal inquiry relative to your claim.

Very respectfully,

JOHN C. BLACK,

Mr. WILLIAM H. BECK, Russell, Kans.

RUSSELL COUNTY, KANSAS, February 18, 1886.

Russell, Kans.

Rebruary 18, 1886.

Sir.: I have by your kindness received Commissioner Black's reply to my claim. I beg you to please to forgive your humble servant for taking the liberty to ask you to do him the honor of hearing a plain, truthful statement of the facts in the case. I emisted in the Eighth low Yolunteer Infantry September 11, 1861. In June, 1863, at siege of Vickaburg, after coming off guard duty one morning I was found writhing in a fit of epilepsy, and was ordered taken to the hospital, some distance in the rear. By the time the hospital was reached I had so far recovered as to be able to sit up, and took no medicine; consequently, the surgeon in charge made no record of the case, and in a few days I returned to duty, having no thoughts of ever being troubled again with what I afterwards learned to be epilepsy. On January 1, 1864, I re-enlisted as veteran volunteer in same regiment, and served until discharged, April 20, 1866. I had frequent light attacks of this disease, which had but little injurious effect (as I thought then), so I said nothing aboutit for a year or more after my discharge. I then applied to a physician for relief, which he could not give; nor did he tell me I was afflicted with that disease epilepsy. Dr. Baker, an old and reliable physician, assured me it was, and that it was caused by lying in the hot sun, and the jar caused by the discharge of a heavy siege gun, near which I was lying. I know I have furnished the evidence of one non-commissioned officer, and I kink two, and another comrade, who were present at the time. My memory is being so weakened by these fits that I can not tell how many witnesses I did furnish at the time of application, but their evidence is there. I also sent the evidence of ten or twelve neighbors and comrades in regard to my health for several years prior to enlistment, and down to the present time. These witnesses are as reliable as any commissioned officer or surgeon. But no, because all my commissioned officers are dead, and because the su

Hon. J. J. INGALIS.

No. 9.-James C. Chandler.

A re-examination of the evidence in this case fully sustains the statement of fact set forth in the Senate report, the President's objections to the contrary notwithstanding. It is difficult to see why this bill should not become a law. The captious and unfounded inferences and innuendoes contained in the veto message can not shake the proof that is in the case.

We append hereto the former report of this committee and the message of the President.

[Senate Report No. 414, Forty-ninth Congress, first session.]

[Senate Report No. 414, Forty-ninth Congress, first session.]

The claimant, James C. Chandler, enlisted in Company A, Ninth Regiment Indiana Volunteers, August 27, 1861, and was discharged June 1, 1862, for disability. He re-enlisted January 3, 1864, in Company M, Eleventh Indiana Cavalry, and was mustered out September 19, 1865. He first applied for a pension May 14, 1869, alleging that while detailed to guard company wagon at Pittsburg Landing, about April 8, 1862, the horses ran away, and in endeavoring to stop them he was thrown down and the fore wheel of the wagon ran over his left ankle, dislocating the joint, causing ulcer sores and lameness. In a subsequent application he alleges typhoid fever and resulting rheumatism and disease of back in region of kidneys, contracted at Corinth, Miss., in May, 1862. The first application was rejected because of no record in the War Department of alleged injury to ankle (medical records Ninth Indiana Volunteers, Pittsburg Landing, Tenn., not on file), and no positive evidence of its origin in service and line of duty. The second application was rejected because of no disability from same since date of the filing of the application.

The evidence filed is very voluminous. Claimant states that the assistant surgeon who treated him for typhoid fever and the physician who treated him on his way home are both dead.

Major Milroy testifies that claimant's left ankle was dislocated by a wagon running over it at Pittsburg Landing about April 2, 1862, and that the disability existed as long as he was under affiant's observation. This testimony is corroborated by that of Surgeon Sherman, who treated him for the injury.

Comrades America and Chapman testify that claimant incurred typhoid fever at Corinth, Miss., and was sent away from regiment; was sick two weeks before sent to hospital.

Major Hannum testifies that he knew claimant well while in service and prior to enlistment; that for a period of about five months following March, 1865, he frequently heard claimant complain

two or three times per year after that, the principal treatment being for chills, rheumatism, &c.

This evidence is corroborated by that of neighbors and comrades as to lameness in back and rheumatism since discharge.

The medical board rate his disability at one-fourth.

Your committee believe that the evidence filed shows that claimant was disabled in some degree by reason of his service in the Army, and therefore report the bill, with a recommendation that it do pass.

[Senate Ex. Doc. No. 149, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill 1630, with his objections thereto.

MAY 24, 1886.—Read, laid upon the table, and ordered to be printed.

May 24, 1886.—Read, laid upon the table, and ordered to be printed.

To the Senate of the United States:

I return without approval Senate bill number sixteen hundred and thirty, entitled "An act granting a pension to James C. Chandler."

It appears from the report of the committee to whom this bill was referred, and from an examination of the official records, that the proposed beneficiary first enlisted on the 27th day of August, 1861, and about nine months thereafter, on the first day of June, 1862, was discharged on account of disability arising from chronic bronchitis.

Notwithstanding the chronic character of his alleged disability, he enlisted again on the third day of January, 1864, seventeen months after such discharge. No statement is presented of the bounty received by him upon either enlistment.

No statement is presented of the bounty received by him upon either enlistment.

He was finally mustered out on the nineteenth day of September, 1865.

He first applied for a pension under the general law in May, 1869, alleging that in April, 1862, he was run over by a wagon and injured in his ankle. This accident occurred during his first enlistment, but instead of the injury having been then regarded a disability he was discharged from such enlistment less than two months thereafter, on account of chronic bronchitis.

It appears from the committee's report that his application was rejected, and that another was afterward made alleging that the claimant had been afflicted with typhoid fever, contracted in May, 1862, resulting in "rheumatism and disease of the back in region of kidneys."

This application was also rejected on the ground that any disability that might have arisen from the cause alleged "had not existed in a pensionable degree since the date of filing the claim therefor," which was February 10, 1885.

There still remained an appeal to Congress; and probably there was not wanting those who found their interests in advising such an appeal and who had at hand Congressional precedents which promised a favorable result. That the parties interested did not miscalculate the chances of success is demonstrated by the bill now before me, which in direct opposition to the action of the Pension Bureau grants a pension to a man who, though discharged from enlistment for a certain alleged disability, made two applications for a pension based upon two distinct causes, both claimed to exist within two months prior to such discharge, and both different from the one upon which he accepted the same; and notwithstanding the fact that the proposed beneficiary, after all these disabilities had occurred, passed an examination as to his physical fitness for re-enlistment, actually did re-enlist, and served till finally mustered out at the close of the war.

If any money is to be given this man from the public Treasury,

If any money is to be given this man from the public Treasury, it should not be done under the guise of a pension.

GROVER CLEVELAND.

EXECUTIVE MANSION, May 24, 1886.

cember, one thousand eight hundred and eighty-five.]

Act granting a pension to James C. Chandler.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of James C. Chandler, late of Company A, Ninth Indiana Volunteers and Eleventh Indiana Cavalry.

JOHN G. CARLISLE,

Speaker of the House of Representatives.

President of the Senate pro tempore,

I certify that this act originated in the Senate.

ANSON G. McCOOK, By CHAS, W. JOHNSON

No. 10.-M. ROMAHR.

No. 10.—M. ROMAHR.

The regiment to which this claimant was attached was made up of men over forty-five years of age, consequently not liable to military service, who enlisted with the understanding that they were to perform guard duty and the like, but were nevertheless put into the most active service, and made a most honorable record. The claimant is now over 70 years of age, and poor.

The message contains an erroneous statement of the facts, as is shown by the brief of the evidence made up by the Pension Office, and every allegation in the report of your committee heretofore appears to be fully sustained by the evidence. We deem it unnecessary to do more than to append, in connection with a portion of a letter from the claimant, the report of this committee and the message of the President.

Camanche, Iowa. March 30, 1883. CAMANCHE, IOWA, March 30, 1883.

To the Pension Commissioner:

To the Pension Commissioner:

With this I send you such evidence as I have been able to find. Our regimental surgeons, Finley and Dorn, are dead; therefore I send the statement of my family physician, Dr. C. H. Manning, at present in Chicago; also my captain's and my own sworn statements, and that of one of my comrades, P. B. Littlejohn, who was about two years our orderly sergeant. Evidence that I was a perfectly healthy man when enlisted, and have not met with an accident to break my shoulder since the war I can procure any number of witnesses, as I have not changed my residence for thirty-one years, but as to eye-witnesses of the accident I have not been able to get them; the postmaster of Vincennes has not answered my letter of inquiry, neither can I find out where comrade Blake is, or if he is dead or alive. I respectfully submit this evidence and wait for further orders.

[Senate Report No. 526, Forty-ninth Congress, first session.]

The records show that said Romahr was a private in Company K, Thirty-seventh Regiment Iowa Volunteers, and enlisted in September, 1862, and was discharged on May 24,1865.

Declaration for pension filed December 5, 1882, in which claimant alleges varioose veins, caused by standing guard in the winter of 1862-63; also an injury to breast and right shoulder, caused by railroad accident while he was on detail duty, about May 15, 1865.

Claim rejected March 6, 1884, on the ground that claimant can not furnish satisfactory evidence as to origin of disability in line of service.

It is shown by the affidavit of Dr. C. D. Manning that claimant was a healthy, robust man before enlistment, which statement is corroborated by affidavit of Capt J. G. Crane, Company K, Thirty-seventh I lowa Volunteers, and also by affidavit of Corpl. P. B. Littlejohn, Company K, Thirty-seventh I lowa, the latter testifying to the varicose veins and to the injury to shoulder; saw the viens when the trouble was originally discovered, as stated by claimant, and knows he was injured while on detailed duty, as stated, by train going through a bridge. Claimant has been treated by Dr. C. D. Manning, who was his family physician: from 1871 to 1880, and he treated him for varicose veins and neuralgia of shoulder, which the doctor swears seems to have been broken. Claimant was compelled to give up his trade because of the varicose veins and lameness in shoulder; knows that claimant has grown worse from year to year.

The foregoing statements are corroborated by the certificate of the examining surgeon, which states that he found the varicose veins as stated, and that they were very much enlarged; also that claimant has a dislocation of the collar-bone, leaving the joint dropped downward an inch, so as to impair the forward motion of the arm. Certificate signed by P. J. Farnsworth, examining surgeon, Taking into consideration all the evidence on file in this case, the committee believe it to be their duty to report in favor of this bill, and recommend its passage.

[Senate Ex. Doc. No. 160, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 1441, with his objections thereto.

JUNE 1, 1886.—Read, referred to the Committee on Pensions, and ordered to be

To the Senate:

I return herewith Senate bill number fourteen hundred and forty-one, entitled "An act granting a pension to M. Romahr."

The beneficiary named in this bill enlisted September 13, 1862, and was discharged May 24, 1865.

He filed his claim in the Pension Bureau December 5, 1882, alleging that in the winter of 1862 from being put on duty—standing guard excessively—he became afflicted with variouse veins. His Army record shows no disability of any kind, though he served more than two years after the date at which he alleges his injury was incurred. His application was rejected on the ground that no record of his disability appeared, and that the evidence of the same filed upon such application was insufficient.

The claim now made to Congress for relief is the same as that made to the Pension Bureau, with the allegation added that in May, 1865, his breast and shoulder were injured by a railroad accident while he was on detail duty. If the latter described injury really existed, it is exceedingly strange that it found no place in his claim before the Pension Bureau; while the account given of the cause of his alleged varicose veins must surprise those who are at all familiar with the character of that difficulty and the routine of Army service. His continued performance of military duty after he incurred this infirmity, the fact that he made no claim for pension on that account until twenty years had passed, and the unsatisfactory evidence now produced to support his allegation, tend to induce the suspicion that the decision of the Pension Bureau was entirely just and that this bill is not based upon substantial merits.

GROVER CLEVELAND.

No. 11.—Augustus F. Stevens.

A re-examination of the evidence in this case shows that the original report is a fair statement of its merits and of the evidence in support thereof. It is, however, of a character that an honest, capable man could decide either to allow or reject it; if he were biased against pension claims generally, he would probably refuse to allow it, but if, on the other hand, he were inclined in favor of such claims, and disposed to give the benefit of every reasonable doubt to those who periled their lives to save their country in its time of need, he would probably admit the claim.

We append hereto the report of the committee, heretofore made, and the message of the President.

[Senate Report No. 619, Forty-ninth Congress, first session.]

The record shows that the petitioner enlisted as a private in Company L, Second Regiment Illinois Cavalry, on the 12th of August, 1861, and was discharged October 4, 1861. The regimental surgeon, who issued the certificate of discharge,

October 4, 1861. The regimental surgeon, who issued the certificate of discharge, says:

"I find him incapable of performing the duties of a soldier, because of general debility, advanced age, unfit for service before entering."

He asks for a disability pension on the ground that he contracted chronic diarrhea, or dysentery, while in the service. It appears from the evidence that he has long been a broken-down man; that he has been continously treated for the aliments-named and for other complaints. There is evidence from comrades and from other persons who have known him long showing that he was in good health when he enlisted, and that his illness almost immediately succeeded that event, but there is a quantity of contradictory testimony biased in about equal proportion for and against the claimant.

From the fact that the petitioner was less than sixty days in the service, it would appear almost impossible that he should have contracted disease in the line of duty; nevertheless, he was accepted as a sound man, which he undoubtedly was to an extent that qualified him for occupation that enabled him to carn a support. If he was not fit to enter the military service, the fault was not his that he was accepted and sent to the front, and, while it is possible that his age and other infirmities were a disqualification, the committee are of the opinion that if he had been rejected, as it is asserted he should have been, he would have been in better physical condition, and not in his present needy circumstances.

The bill is therefore reported favorably, with a recommendation that it do pass,

[Senate Ex. Doc. No. 163, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 1725, with his objections thereto.

JUNE 3, 1886.—Read, referred to the Committee on Pensions, and ordered to be

To the Senate .

I return herewith, without approval, Senate bill number seventeen hundred and twenty-six, entitled "An act granting a pension to Augustus Field Ste-

vens."

It appears that this claimant enlisted August 21, 1861, and was discharged on the 3d day of October, 1861, after a service of less than two months, upon a medical certificate of disability which represented him as "incapable of performing the duties of a soldier because of general debility, advanced age, unfit for service before entering."

His claim is not based upon any wound or injury, but he alleges that he contracted chronic diarrhea or dysentery while in the service. The committee to whom the bill was referred by the Senate admit that "there is a quantity of contradictory testimony, biased in about equal proportion for and against the claimant."

His claim was rejected by the Pension Bureau in 1882, and again in 1885, after a special examination concerning the facts, on the ground that the claimant had failed to show any pensionable disability contracted while he was in the serv-

ice.

The medical certificate upon which he was discharged makes no mention of the disorders of which the applicant for pension now complains, but contains other statements which demonstrate that no allowance should be made to him by way of pension, unless uch pension is to be openly and confessedly regarded as a mere charity, or unless the medical certificate made at the time of discharge, with the patient under observation, is to be, without any allegation to that effect, impeached.

I am not prepared either to gratuitously set at naught two determinations of the Pension Bureau, one very lately made, after a special examination—and especially when the evidence produced before the committee to reverse the bureau's action is admitted to be "contradictory" and "biased in about equal proportion for and against the claimant."

GROVER CLEVELAND.

EXECUTIVE MANSION, June 2, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington on Monday, the seventh day of December, one thousand eight hundred and eighty-five.]

one thousand eight hundred and eighty-five.]

An act granting a pension to Augustus Field Stevens.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Augustus Field Stevens, late a private in Company L, Second Regiment Illinois Volunteer Cavalry.

Speaker of the House of Representatives.

Speaker of the House of Representatives.

President of the Senate pro tempore.

I certify that this act originated in the Senate. ANSON G. McCOOK, Secretary.

No. 12.-John S. Williams. This soldier served from July 1, 1861, until he was discharged, July 26, 1865, and the question raised in this case is as to the origin or of the incurrence of the disability in the service. He produces the evidence of two comrades, who are shown by confidential inquiries, made on the part of the Pension Office, to be truthful, establishing the origin of the disability in such service; also the evidence of Lieutenant-Colonel, now Judge, Hines, that although he did not witness the accident, yet he heard of it at the time from members of the regiment, of which he was an officer. There seems to be no good reason to doubt that it was so received. The claimant was in a regiment commanded by ex-President Huves.

Was so that the remaining facts are sufficiently well set forth in the report of this committee, annexed hereto, together with the message of the President.

[Senate Report No. 312, Forty-ninth Congress, first session.]

[Senate Report No. 312, Forty-ninth Congress, first session.]

The claimant, John S. Williams, was a private in Company K, Twelfth Ohio Volunteers, and of Company C, Twenty-third Ohio Volunteers. He applied to the Pension Office for a pension, but his claim was rejected by the Department on the ground "that there is no record of alleged injury of left shoulder, and that the claimant is unable to furnish the testimony of his surgeon or officers, or other satisfactory evidence of incurrence in the service and line of duty."

The existence of the injury and disability at the present time is admitted. Treatment for two months by the regimental surgeon for injury is shown as a matter of record. The claimant himself and several comrades testify to his receiving the injury, as alleged, in line of duty, and the continuance of the disability from then until the present time is also shown by comrades and other apparently reliable testimony. The claimant shows that the doctors, surgeons, and officers who knew him are dead, and that would seem to be a satisfactory reason for his failure to procure their testimony. We are unable to see any reason for the rejection of this claim. The examining surgeon finds the existence of the disability, and certifies that in his belief from his examination it was received in the service and in line of duty. There is no suggestion of fraud, nor anything to justify the suggestion if it were made.

Your committee recommend the passage of the bill.

[Senate Ex. Doc. No. 162, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill No. 789 with his objections thereto.

JUNE 3, 1886.—Read and referred to the Committee on Pensions and ordered to be printed.

To the Senate:

To the Senate:

Senate bill number seven hundred and eighty-nine, entitled "An act granting a pension to John S. Williams," is herewith returned without approval.

This claimant enlisted in 1861. He alleges that his shoulder was dislocated in 1862 while ferrying troops across a river. The records of the War Department fail to furnish any information as to the alleged injury. He served afterward until 1865 and was discharged. His claim for pension was rejected by the Pension Bureau in 1882, twenty years after the time he fixes as the date of his injury; and after such long delay he states as an excuse for the unsatisfactory nature of his proof that the doctors, surgeons, and officers who knew him are dead.

Considering that the injury complained of is merely a dislocation of the

shoulder, and in view of the other facts developed in the case, I think the Pension Bureau arrived at a correct conclusion when this claim was rejected.

GROVER CLEVELAND.

No. 13.-EDWARD AVERS.

No.13.—EDWARD AYERS.

The evidence in this case extends over a period of some twelve years or more, and is comprised in a bundle of papers made up of closely written pages, making a mass about 9 inches long and 7 inches deep.

A careful re-examination of this evidence shows that the facts stated in the Senate report are clearly proven, and it is of such an overwhelmingly preponderating character as, in the opinion of your committee, would be sufficient to convict in case of a criminal prosecution. In our judgment there is no excuse for any honest, impartial, and capable tribunal to reject this case upon the evidence as it was produced before the Pension Office.

This man appears to have been the best soldier in his company. His claim was rejected upon the pretense that he was unfit for service when mustered in or that his disability existed prior to enlistment. It seems that he had at some time in early life cut his foot, and had been slightly lame from it, possibly some other trifling and temporary hurt, but that did not prevent his being an exceedingly strong and able-bodied man, fit for the war, and as such he was accepted. The injury for which it is now proposed to grant him a pension is to the hip, which is shown to be a case of bad dislocation; one witness says, "now completely out of joint, three inches above the original entirely disabling him from manual labor."

It has been alleged that the soldier deserted, which is not in accordance with

which is shown to be a case of oad dislocation; one witness says, "how completely out of joint, three inches above the original, entirely disabling him from manual labor."

It has been alleged that the soldier deserted, which is not in accordance with the facts. He did not desert. He was on detached service when hurt, went to his home for care instead of the hospital, grew worse and overstaid his time, for which he was marked as a deserter. He, however, returned to the service when sufficiently well to do so. Such technical desertions were innumerable by many of the best soldiers, and general legislation has in a large class of cases removed the consequences thereof.

Your committee consider the disallowance of this claim by the Pension Office as a great and inexcusable outrage, and a gross reflection upon the capacity, if not the integrity, of its management. It is, in short, the case of a most excellent soldier, who was actually and seriously disabled, but who avoided hospitals and doctors all he could. He contracted that disability in rendering good service to the country, from which he has suffered ever since.

By the rejection of the case in the Pension Office he is precluded from obtaining any arrears of pension from the date of discharge to which he is undoubtedly entitled, so that even should the present bill become a law he will suffer a great wrong at the hands of his country. This is, however, by reason of a new and we think wrong ruling by the present Commissioner.

Your committee do not pretend that the case is free from conflicting testimony, but do contend that a fair examination of it sustains the report heretofore made upon the controverted matters of fact. The reception of the injury is testified to by several comrades whose testimony is unimpeached, as well as the continuance of the consequent disability and its gradual aggravation and increase until the present time. It seems that he was at the time detailed from his company, and having in charge a piece of artillery, a piece of shell from o

INDIANAPOLIS, IND., Marion County:

To Committee on special pension claims before Congress:

To Committee on special pension claims before Congress:

I most respectfully ask your immediate attention by informing me as to the final result of said action pertaining said claim of which has been and is since proven to be a lawful and just claim for actual injury received on or about the 30th of April, 1863, at the battle of Day's Gap, in the State of Alabama, said injury of left hip caused by a limb striking me on said hip, dislocating the same for life.

I further desire to state my claim referred to above has been pending on files ever since 1872, since which time I have produced a large number of affidavits showing positive proof of my oft-repeated assertions; and I further declare that I am suffering from said alleged injury to the extent that I am wholly unable to perform any manual labor, and gradually growing worse upon me.

I again most respectfully appeal to your justice in the matter of right by granting one who is and has been lawfully entitled to same ever since my discharge in 1805.

Yours, with truth and justice,

EDWARD AYERS, Company F, 51st Indiana Infantry Volunteers, claim 181,306,

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, D. C., January 9, 1886.

SIR: In response to your request I have the honor to transmit herewith the papers in the claim for pension of Edward Ayers, late a private of Company F, Fity-first Indiana Volunteers, claim No. 181,306. The claim was rejected on the ground that the alleged injury to hip existed prior to claimant's enlistment.

Very respectfully,

WM. E. McLEAN, Acting Commissioner.

Hon. John I. Mitchell, Chairman Committee on Pensions, United States Senate.

DONOVAN, ILL., August 4, 1885.

Mr. Commissioner BLACK:

Sir: I write you in behalf of my son Edward Ayers, of Company F, Fifty-first Regiment Indiana Volunteers, claim R 181306, which has been pending about

twelve years. I wish to know the real cause of delay or rejection. Three years ago he received answer that if he would furnish the testimony of one of his officers his claim would be recognized and settled; that was furnished, and the case was still delayed. Then was sent a special agent to his place for confirmation of testimony on both sides of the question, and the testimony of Captain McGuire, their (the Government's) own witness, testified to his ability as a soldier, able and did duties of a soldier; not only that, he was the best soldier in his (McGuire's) company; and all that he did say that could in any way be construed to milliate against his own testimony was that he though he was lame in his foot; in that he was partly correct, as he dideut his foot a while before he entered the service, but was entirely well, so much so it did not interfere with his examination; but he does not claim lameness in his foot, but in his hip, which is knocked completely out of joint three inches above the original, and is pronounced one of the worst cases of hip dislocation, entirely disabling him from manual labor. Now, as touching the possibility of his being lame in his hip before he entered the service, we give two very good reasons why this could not be the case. First, the family doctor, Mr. Million Robbin's testimony, who has known him ever since he was a child; second, his acceptance in the service and his record as a soldier. As touching his testimony, it is overwhelming in multiplicity and directness. Three of his comnades testify directly to his getting hurt at the battle of Day's Gap while on the raid. Now as regards his hospital, it is plain to an inquiring mind, is easily explained. A very short time after the battle, if not at the time they were captured and the men paroled and sent home, being struck with a limb on the hip while exchanging shots with enemy, he being in a two-gun battery at the time, being [un] able to move with the boys, he preferred to go home. Of course his wound did not culminate or

GEORGE W. AYERS, Donovan, Iroquois County, Ill.

[National Military Home, Ohio.]

To all whom it may concern, especially the honorable bodies assembled:

To all whom it may concern, especially the honorable bodies assembled:
SIRS: In claim of Edward Ayers for pension, whose number is 181306, Company F, Fifty-first Indiana Veteran Volunteers, I most respectfully call your attention to the following facts in relation to said claim and its rejection: I enlisted in the year 1861 at Shelbyville, Shelby County, Indiana, and was enrolled at Indianapolis, Ind., as a private in said company and regiment, and with the rest was examined and pronounced sound and able-bodied man. I was admitted as such and soon after was sent with said command to the front for action. I did serve faithfully until I was injured, which occurred on or about the 30th of April, 1863, at the battle of Day's Gap, Alabama, while during the Streight raid. My full time served was four years and eight months, including the two months off receiving treatment for said injury. During part of that time I served as a detailed member of the Eighth Indiana Battery to act as cannoneer. I served one year, when I was assigned to my old command again to take part in said raid.

Two pieces of cannon accompanied said raid, and I having had experience in

months off receiving treatment for said injury. During part of that time I served as a detailed member of the Eighth Indiana Battery to act as cannoneer. I served one year, when I was assigned to my old command again to take part in said raid.

Two pieces of cannon accompanied said raid, and I having had experience in Eighth Battery, I was again detailed to help man one of the guns while on said raid, and while so acting I became disabled in the following manner: A shell from enemy's guns struck off a limb of a tree near me and said limb struck me on left hip joint, thereby dislocating the same, the injury so disabling me that I was unfit for further manual duty for some time thereafter. At time of injury our command was on a charge, and soon after my comrades' return I was conveyed on limber of cannon, as there was no other way of conveyance at that time, and with said comrades suffered it through until with them was captured, and within twenty days was paroled for our homes. And then, and not until then, while at home, did receive medical aid, of which the affidavit of said treatment is now on file at Washington, D. C. Suffice it to say, at that time I gave pension but little or no thought on account of my folks being well off. But, sirs, since which time, in the year 1573, circumstances altered my case. My hip grew worse, my means less, and my chances for a livelihood very critical. If inally concluded to apply for a pension, solely upon the grounds of its being a just claim against the Government, and all there was to do was simply to ask for my rights.

Honorable sirs, in the year of 1835 I had located at Shelbyville, Shelby County, Indiana. In the latter part of same year I met an accident by a fall from an apple-tree, sustaining an injury of left arm. At another time, in the latter part of 1831, I received an injury by cutting my left foot with an ax, but it being only a flesh cut between the bones, it soon healed up, so that I was not disabled therefrom at the time of my my latter of the province of the

good standing, I do heartily recommend them, as well as will refer you to my folks as to their good standing and my truthful assertions, based upon good grounds by reason of their close attention to me. Now, honorable sirs, with this plain and simple statement, with justice backing it up, I trust that all wrongs will be righted by numbering me among those that are on the rolls for a just pension.

[Senate Report No. 602, Forty-ninth Congress, first session.]

[Senate Report No. 602, Forty-ninth Congress, first session.]

The petitioner was a member of Company F, Fifty-first Indiana Volunteers. His application has been pending a long time before the Commissioner of Pensions, and the testimony is voluminous, and to some extent contradictory. The claim is based upon an alleged injury to the hip, received at the battle of Day's Gap, Ga., in April, 1863: and the ground of rejection is that the injury existed prior to enlistment. The record evidence proves that he was in this engagement, but there is no proof from this source that he was wounded. By numerous comrades who were present it is proven that he was hurt by the explosion of a shell, as claimed. It is also shown that he has been disabled ever since; and the examining surgeon specifically describes the wound, and twice verifies that he is permanently disabled.

From the fact that a man was exceedingly liable to injury under the circumstances in which he was placed, and from the evidence of eye-witnesses, the committee are of opinion that he was wounded as alleged. As to existence of the disability before enlistment, it does not seem probable or even possible that the soldier would have been accepted in the shattered condition described by the evidence on file.

The bill is reported favorably, with a recommendation that it do pass.

[Senate Ex. Doc. No. 151, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 363, with his objections thereto.

MAY 24, 1886.—Read, laid upon the table, and ordered to be printed. To the Senate of the United States:

A bill which originated in the Senate entitled "An act granting a pension to Edward Ayers," and numbered three hundred and sixty-three, is herewith returned without approval.

The person named in this bill enlisted October 3, 1861, in an Indiana regiment, and was mustered out of the service December 13, 1865. He represents that he was injured in the hip at the battle of Day's Gap, April 39,1863, and for this a pension is provided for him by the bill under consideration. His application for pension has been rejected by the Pension Bureau on the ground that it was proved on a special examination of the case that the claimant was injured by a fall when a boy, and that the injury complained of existed prior to his enlistment.

ment.

There is not a particle of proof or a fact stated either in the committee's report or the records in the Pension Bureau, so far as they are brought to my notice, tending to show that the claimant was in hospital or under medical care a single day during the whole term of his enlistment.

The report of the committee contains the following statement:

"The record evidence proves that he was in this engagement, but there is no proof from this source that he was wounded. By numerous comrades who were present it is proven that he was hurt by the explosion of a shell as claimed. It is also shown that he has been disabled ever since; and the examining surgeon specifically describes the wound, and twice verifies that he is permanently disabled. From the fact that a man was exceedingly liable to injury under the circumstances in which he was placed, and from the evidence of eye-witnesses, the committee are of opinion that he was wounded as alleged."

A wound from a shell causing the person injured to be "disabled ever since" usually results in hospital or medical treatment. Not only is there no such claim made in this case, but, on the contrary, it appears that the claimant served in his regiment two years and nearly eight months after the alleged injury, and until he was mustered out.

It is represented to me by a report from the Pension Bureau that after his al-

until he was mustered out.

It is represented to me by a report from the Pension Bureau that after his alleged wound, and in May or June, 1863, the claimant deserted, and in July of that year was arrested in the State of Indiana and returned to duty without trial. If this report is correct, the party now seeking a pension at the hands of the Government for disability incurred in the service seems to have been capable of considerable physical exertion, though not very creditable, within a few weeks after he claims to have received the injury upon which his application is based.

EXECUTIVE MAYSION MAY ALSES.

EXECUTIVE MANSION, May 24, 1886.

No. 14.-JAMES E. O'SHEA.

No. 14.—James E. O'Shea.

A re-examination of the evidence in this case satisfies your committee that the original report made by them is just, and that the statements therein are fully borne out by the testimony. It would seem that this soldier was a very braveand trustworthy man, a scout and prisoner of war who rendered dangerous and most efficient service. He has many wounds and is a completely brokendown man. We have seen him. He is now in the Soldiers' Home in this District, Instead of being a deserter the records prove that although tried he was found "not guilty." The report of this committee is right, and the sneers of the veto uncalled for. Apparently there can have been no examination whatever of the evidence by the author of the veto in person. To veto this brave and patriotic old soldier into history as a deserter in addition to all the rest is a carelessness, to say the least, of which your committee has not been guilty. Here is food for thought and an opportunity for reparation.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, Washington, March 12, 1886.

My DEAR BOB: The bearer, James E. O'Shea, is an old soldier of the volunteer army. From a careful examination of his case I am satisfied that he has been

unjustly treated, and if you can do anything to assist him until his case (application for pension) in Congress is settled, it will be appreciated and fully deserved.

He was charged on the records with desertion. I found the facts to be, that he was tried for desertion, but found not guilty. I therefore removed the charge, and his bill will doubtless pass both Houses of Congress in due time. General Logan I understand has charge of it.

Yours, faithfully,

THOMAS WARD, Ass't, Adit, Genl. U. S. A.

Capt. Robert Catlin, Deputy Governor Soldiers' Home, Washington, D. C.

JNO. A. LOGAN.

To the Governor of the Soldiers' Home, Washington, D. C.:

To the Governor of the Soldiers' Home, Washington, D. C.:

Your petitioners would respectfully represent that the bearer of this petition,
James E. O'Shea, late of Company F, Twenty-third Illinois Volunteers, is an
old soldier who is trying to get a pension by reasons of disabilities which he
claims were contracted while doing duty as a soldier. He is in very needy circumstances and is a worthy man.

We respectfully ask that you will admit him to the privileges of the Home
while he is prosecuting his claim for pension.

THOMAS WARD, A. A. G.

CECIL CLAY,

Bvt. Brig. Gen., U.S. A., Chief Clerk Dept. of Justice,
JOHN W. MAHAN.

JOHN W. MAHAN,
Formerly Major 9th Mass. Vol. and Bet. Lt. Col. U. S. V.,
Vice-Pres., representing 5th Corps Society Army of Potomac, 1878.

We print the Senate report and the veto:

[Senate Report No. 607, Forty-ninth Congress, first session.]

[Senate Report No. 607, Forty-ninth Congress, first session.]

The committee ascertain from the record report that this claimant enlisted in April, 1861, and was discharged in October, 1864. He asks to be pensioned for disability occasioned by a gunshot wound in the leg, which was disallowed on the ground of want of evidence that he received the wound in the line of duty. The examining surgeon finds the wound, and describes the entrance and exit of the ball; also a wound or sear in the head, and the nearly total loss of sight of one eye. The report of the Surgeon-General shows that the soldier was in hospital more than once, but the record does not give the cause for which he was treated. The Adjutant-General's report shows that the man was under discipline for some irregularities, but, notwithstanding this and the lack of the required proof that he was wounded in the line of duty, the committee are of the opinion that, situated as he was, he was very liable to, and very probably did, receive the wound from which he has suffered and is still suffering.

The fact that the records of the War Department are often imperfect works great hardship to men who apply for pensions, and where there is reasonable proof testimony should not deprive him of relief.

Inasmuch as there is proof that the soldier received the wound, and that he is badly disabled from it and other causes shown by the medical examiners, and that he is old and destitute, the bill is reported favorably with a recommendation that it do pass.

[Senate Ex. Doc. No. 161, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill 327, with his objections thereto.

June 3, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed.

I return without approval Senate bill number three hundred and twenty-seven, entitled "An act granting a pension to James E. O'Shea."

From the report of the committee to whom this bill was referred, I learn that the claimant enlisted in April, 1861, and was discharged in October, 1864.

He filed a claim in the Pension Bureau alleging that he received a saber wound in the head March 7, 1862, and a gunshot wound in the left leg in the autumn of the same year.

It appears upon examination of his military record that there is no mention of either disability, and that he served two years after the time he claims to have received these injuries. So far from being disabled, it is reported as an incident of his army life that in the year 1864 this soldier was found guilty of desertion and sentenced to forfeit all pay and allowances for the time he was absent.

desertion and sentenced to forfeit all pay and allowances for the time he was absent.

The report of the committee, in apparent explanation of the lack of any official mention of the injuries alleged, declares that "the fact that the records of the War Department are often imperfect, works great hardship to men who apply for pensions;" and his conviction of desertion and the lack of proof to sustain his allegations as to his injuries are disposed of as follows in the committees report:

"The Adjutant-General's report shows that the man was under discipline for some irregularities, but, notwithstanding this and the lack of the required proof that he was wounded in the line of duty, the committee are of the opinion that, situated as he was, he was very liable to, and very probably did, receive the wound from which he has suffered and is still suffering."

I am convinced that there exists serious difficulty on the part of the claimant, instead of in the record of the War Department; that the kind of irregularity for which he was under discipline is calculated to produce a lack of confidence in his merits as a pensioner; and that the fact of his situation being such as to render him liable to receive a wound is hardly sufficient to establish his right to a soldier's pension, which is only justified by injuries actually received and affirmatively proven.

GROVER CLEVELAND. GROVER CLEVELAND.

EXECUTIVE MANSION. June 2, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington, on Mouday, the seventh day of December, one thousand eight hundred and eighty-five.]

An act granting a pension to James E. O'Shea.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of James E. No. 15 .- J. D. HAWORTH.

No. 15.—J. D. HAWORTH.

A careful re-examination of the eviderce in this case will convince any fair mind that the report heretofore made by the committee (Senate Report No. 633) does not state the claimant's case as strengly as it should be. The ground alleged for the rejection of this case is that the disease of the eyes, from which claimant suffers, existed prior to enlistment. In regard to that we are of opinion, that although there may have been a hereditary tendency to weakness of the eyes, yet it appears clearly that the serious development of this trouble was almost wholly attributable to his service, and that it has continued ever since. The soldier rendered long and faithful service, and the rejection of his claim on the ground that the disability was contracted before entering it works exceeding hardship and injustice. This man is old, poor, and blind, and the country which he served so well and faithfully ought to help him in this extremity. It will help him if there is any soul left in it.

We append hereto in further explanation the petition of his citizens and comrades respecting the veto, as well as the Senate report containing a statement of the facts, and the message of the President.

Headquarters Charlton Post, No. 143, G. A. R.,

HEADQUARTERS CHARLTON POST, No. 143, G. A. R., Richland, Jowa, June 14, 1886.

Whereas a bill pensioning our comrade, James D. Haworth, has passed both

Whereas a full pensioning our comrade, values 1. It was a full branches of Congress; and
Whereas Grover Cleveland, President of the United States, has vetoed the same, thus depriving a worthy, honored, and a deserving ex-soldier and comrade of the benefit of the action of the said Congress, which is his just dues;

Whereas we, as citizens and comrades, have known said comrade, James D. Haworth, intimately and well, some of us from a time dating before the late war, and believing that a great injustice has been done our comrade, leaving a stigma upon his character, that of perjury: Therefore, be it Resolved, That we earnestly condemn the action of the President in said veto, and believe that he was not properly informed in the case; that we ask, and earnestly insist that the United States Senate and House of Representatives, and each member thereof, to use their best endeavors to pass the same over the veto of the President, that justice may be done to our comrade, neighbor, and friend, who served in the Army for three years.

Resolved, That comrade James D. Haworth has our permission to furnish the Senate Committee and Committee of the House on Pensions, also such members of Congress, a copy of these resolutions at his pleasure.

Unanimously adopted by Charlton Post, No. 143, June 14, 1886.

Adjutant.

[Senate Report No. 633, Forty-ninth Congress, first session.]

[Senate Report No. 633, Forty-ninth Congress, first session.]

That the records in this case show that the claimant was a sergeant in Company H, Thirty-third Regiment Iowa Volunteers, and that he served with the regiment until about the month of April, 1863, when he began to complain of "sore eyes," and was treated for sore eyes by Assistant Surgeon William Scott, of the Thirty-third Iowa Volunteers, and that he excused claimant from duty at Little Rock, Ark., in the spring or summer of 1863, "because of blindness in right eye and weakness of left eye;" and there is evidence to show that he did not continue in his regiment after this time, but was transferred to Company H, Twenty-first Regiment, Veteran Reserve Corps, where he remained until the expiration of his term of service, when he returned to his home.

Declaration for pension filed February 20, 1879, in which claimant alleges "sore eyes, with complete loss of right eye, and injury to the left eye." Claim rejected November 4, 1880, on the ground that there is "no satisfactory proof that the affection of the eyes is due to disability arising from service, but existed prior to service."

The affidavits of the claimant's mother, two sisters, and a brother clearly show that the claimant could not see out of his right eye from early childhood, and was called "blind" in that eye, although their testimony shows that he could see a little out of that eye, but not much.

One sister testifies that claimant did use an "eye-water" to bathe his eyes with occasionally when they became "sore," and that it was the same eye-water as his father used, who was said to have the same trouble with his eyes.

It appears from this testimony, therefore, that the claimant had "sore eyes," and that it was the same eye-water as his father used, who was said to have the same trouble with his eyes, and that the sight of the right eye was much impaired even in childhood, so that it appears from this testimony to show that the claimant's eyesight has failed since he entered the service,

enlisted.

The committee believes that it is the object of the Government to pension all who are deserving and who have been impaired in health by faithful services performed, and it is shown by the record that the claimant is not able to perform manual labor, and often requires help to enable him to get about, and that in consequence of his infirmity he is very poor. It is also shown that the disease is steadily progressing and it will not be long before claimant may become totally blind.

Taking into consideration the evidence on file in this case, your committee he

Taking into consideration the evidence on file in this case, your committee be-lieve it to be their duty to report in favor of this bill and recommend its pas-

[Senate Ex. Doc. No. 158, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 1253, with his objections thereto.

May 28, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed. To the Senate:

I hereby return without approval Senate bill number twelve hundred and fifty-three, entitled "An act granting a pension to J. D. Haworth."

It is proposed by this bill to grant a pension to the claimant for the alleged loss of sight in one eye and the impairment of the vision of the other.

From the information furnished me, I am convinced that the difficulty alleged by this applicant had its origin in causes existing prior to his enlistment, and that his present condition of disability is not the result of his service in the Army.

GROVER CLEVELAND.

No. 16.-ALFRED DENNY.

No. 16.—ALFRED DENNY.

The principal facts in the case are set forth in the previous report of this committee, hereto appended. The examining surgeon in this case reports as follows: "This man has inguinal hernia of both sides. I have at times seen him suffer very much from the left side, pain being very great indeed. He is compelled to wear a double truss or his bowels would descend into the scrotum." The claimant states in his declaration that "being a post quartermaster he could not be treated by a regimental surgeon, but, upon the contrary, was treated by a private physician," and that he had no comrades, not being a member of any company or regiment.

James B. Welsh, United States examining surgeon, testifies that he has been the claimant's family physician ever since the war; that since claimant's return from the service he has been a continual sufferer from hernia; that he frequently attended claimant for jaundice and other diseases, which were aggravated by hernia; that he is totally incapacitated for the performance of manual labor. This is the testimony not only of his family physician but of a sworn examiner of the Department, whose professional action and statements are relied upon by the Government in the adjudication of pension claims. Why his testimony should be rejected in this case it is impossible to conceive.

The sneer in the veto at the wounds received by so many of our gallant cavalry during their long rides and furious charges in the war indicates a state of mind that incapacitates, at least temporarily, an official for considering impartially a pension claim.

It would be well if the horns of public indignation could be so applied that our soldiers could get simple justice in these times of peace.

[Senate Report No. 521, Forty-ninth Congress, first session.]

[Senate Report No. 521, Forty-ninth Congress, first session.]

[Senate Report No. 521, Forty-ninth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (S. 1192) granting a pension to Alfred Denny, beg leave to report back the same with recommendation that it do pass.

Alfred Denny was mustered into the United States service as a captain and assistant quartermaster of volunteers on the 12th day of June, 1863, and was honorably discharged on the 3d day of June, 1864. His declaration for original invalid pension, signed and sworn to on the 4th day of March, 1884, shows that "while in the service and in the line of his duty at Chambersburg, in the State of Pennsylvania, on or about the 25th day of August, 1863, he was, by the sudden movement of his horse, thrown upon the horn of his saddle, and received an injury, causing a rupture or hernia" that "being a post quartermaster he could not be treated by a regimental surgeon, but, upon the contrary, was treated by a private physician."

The statement of the examining surgeon for the county in which Mr. Denny lives, Preble County, Ohio, dated July 19, 1884, shows from the time that Mr. Denny left the United States s rvice, as above stated, he has suffered from rupture, "so much so that within the last three years the other side became affected, and a hernia appeared, which, from some cause, produced most excrutiating pain, so that a council of physicians had to be called in the case, his life being despaired of for the time." The examining surgeon further states that he was Mr. Denny's physician "before he went into the service," and has been "since he came out;" and he asserts that "I know that he has been wholly incapacitated for manual labor ever since he came out of the Army, by reason of the continual suffering from these ruptures and consequent troubles."

The Commissioner of Pensions required Mr. Denny to furnish evidence of "a commissioned officer or member of the company" to which he belonged, which it was manifestly impossible for him to do, as he belonged to no company or regiment, being

ment, e.c.

Under all the circumstances the committee are of the opinion that Mr. Denny is entitled to a pension, and recommend that the bill be amended by striking out of lines 5 and 6 the words "at the rate of \$20 per month," and inserting in lieu thereof the words "subject to the limitations and provisions of the pension laws"

[Senate Ex. Doc. No. 176, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill 1192, with his objections thereto.

JUNE 23, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed.

To the Senate:

To the Senate:

I return herewith without approval Senate bill number eleven hundred and ninety-two, entitled "An act granting a pension to Alfred Denny."

It appears that the claimant entered the United States military service as captain and assistant quartermaster of volunteers on the 12th day of June, 1863, After remaining in such position for less than a year, he resigned to accept a civil position.

The short record of his military service discloses no mention of any accident or disability. But twenty years after his resignation, and on the 12th day of March, 1884, he reappears as an applicant for a pension, and alleges in his declaration, filed in the Pension Bureau, that in August, 1863, while in the line of duty, he was, by a sudden movement of the horse he was 'riding, thrown forward upon the horn of his saddle, and thereby received a rupture in his right side, which at some time, and in a manner wholly unexplained, subsequently caused a rupture in his left side also.

The number of instances in which those of our soldiers who rode horse during the war were injured by being thrown forward upon their saddles are presented to me which entitle it to charitable consideration.

GROVER CLEVELAND, EXECUTIVE MANSION, June 22, 1886.

EXECUTIVE MANSION, June 22, 1886.

[Forty-ninth Congress of the United States of America, at the first session, bagun and held at the city of Washington, on Monday, the seventh day of December, one thousand eight hundred and eighty-five.]

An act granting a pension to Alfred Denny.

Be it enacted by the Senate and House of Representatives of the United States of America Congress assembled, That the Secretary of the Interior be, and is hereby, au-

thorized and directed to place on the pension-roll the name of Alfred Denny, late a captain and assistant quartermaster, subject to the limitations and provisions of the pension laws.

JOHN G. CARLISLE Speaker of the House of Representatives.
JOHN SHERMAN,
President of the Senate pro tempore.

I certify that this act originted in the Senate.

ANSON G. McCOOK By CHAS. W. JOHNSON, Chief Clerk.

No. 17.-MARRILLA PARSONS,

The previous report of this committee sets forth the principal facts upon which this application is based. There are numerous precedents for granting pensions in cases precisely like this, and we have never known Congress to be appealed to in like case with an unfavorable result.

We append the report of the committee, together with the veto message, and recommend the passage of the bill, the veto of the President to the contrary notwithstanding.

[Senate Report No. 638, Forty-ninth Congress, first session.]

[Senate Report No. 638, Forty-ninth Congress, first session.]

The facts in the case show that Marrilla Parsons is the widow of the late exGovernor Andrew Parsons, of the State of Michigan, and the stepmother of the
late Daniel P. Parsons, who enlisted in Company B, Thirteenth Regiment of Illinois Infantry, on the 24th of May, 1361; that he was discharged on the lat day
of February, 1863, for promotion as captain of Company D, Eleventh Regiment
of Missouri Cavalry, and that from exposure incident to his service he was taken
sick and died of consumption at Sterling, Ill., of the 13th of August, 1864, leaving no widow or children surviving him. Under the law Mrs. Parsons is not
entitled to a mother's pension, being the stepmother of the deceased, but the
papers in the case show that from the time of her marriage until Daniel Parsons, the deceased, left home she exercised the same care over him as a mother
would have done, and that after the death of her husband and his father, in
1854, the said Daniel Paarsons contributed from his wages to her support as if he
had been her own son, and continued to do so up to the time of his death. She
received from him the same treatment and affection that would have been given
if he had been her own son. The papers also show that Mrs. Parsons, for whom
a pension is asked, was dependent upon the support given her by said Daniel
Parsons, and that since his death she has been dependent upon other friends,
having no property herself.

Your committee recommend the passage of the bill for the reason that Marrilla Parsons is as much entitled to a pension as if she had been the natural
mother of the late Daniel P. Parsons.

[Senate Ex. Doc. No. 178, Forty-ninth Congress, first session.] Message from the President of the United States returning Senate bill 342, with his objections thereto.

JUNE 23, 1886.-Read, referred to the Committee on Pensions, and ordered to be printed.

To the Senate:

I return herewith without approval Senate bill number three hundred and forty-two, entitled "An act granting a pension to Marilla Parsons, of Detroit, Michigan."

No claim has ever been made for a pension in this case to the Pension Bureau, probably for the reason that there is no pretext that the beneficiary named is entitled to a pension under the general law.

Daniel P. Parsons was herstepson, who enlisted in 1861 and died of consumption on the 13th day of August, 1864.

There are no special circumstances to distinguish this case from many others whose claims might be made by step-parents, and there are no facts stated in support of the conclusion embodied in the committee's report that the soldier was taken sick from exposure incident to the service.

To depart from all rules regulating the granting of pensions by such an enactment as is proposed would establish a precedent which could not fail to cause embarrassment and perplexity.

GROVER CLEVELAND.

No.18.-JOHN D. HAM.

No.18.—John D. Ham.

There is no dispute as to the accuracy of the statement of facts in the previous report of this committee. The bill was vetoed upon the ground that the claimant was not in the military service at the time he appears to have been injured. The evidence shows, however, that the injury was received after enlistment, after he was sworn in by the recruiting officer, and while he was on his way on horseback to join his regiment to be formally mustered in. There is no controversy that the injury was received as alleged, nor that a permanent injury resulted therefrom, the consequences of which he is now suffering.

There is no substantial dispute that if at the time this accident occurred this man had been formally mustered in, the Pension Office would have been obliged to allow the claim. This is shown by the decision of rejection made by the Commissioner himself, and Congress has in many cases granted this relief where the claimants had never been formally mustered, upon the ground that after enlistment the soldier was actually in the service and subject to orders, although perhaps not within the strict purview of the general pension laws.

It seems almost impossible to conceive of a great government like that of the United States taking advantage of such an informality as has been made the ground of the return of this bill by the Executive. The general law is perhaps

of so rigid and stringent a nature as to have required the decision of rejection by the Commissioner of Pensions, who is of course bound by its letter upon this technical ground; but that constitutes no necessity for the rejection of a bill after it had received the careful attention and sanction of both Houses, especially one so very clear, simple, and strong in its appeal to a sense of justice as this appears to be.

We append the previous report of this committee and the message of the President:

[Senate Report No. 293, Forty-ninth Congress, first session.]
That he enlisted in the month of January, 1862, and was sworn into the serv-

[Senate Report No. 233, Forty-ninth Congress, first session.]

That he enlisted in the month of January, 1862, and was sworn into the service by Sergeant Darwin Fenno.

Declaration for pension filed October 17, 1879. Claimant alleges that he was enrolled in January, 1862, by Sergeant Fenno, of Company G, First Regiment Wisconsin Cavalry; that next day while on his way to join the regiment his horse fell upon him and severely injured his left foot, so that he was unable to join his regiment, and has been lame ever since; that he was confined to his house several months after the injury, and never reported to the regiment.

That he remained at home until the 23d day of November, 1863, when he was drafted into the United States service and was ordered to report to Company E, of the Twenty-first Wisconsin Infantry. In October, 1864, was transferred to Company E, of the Twenty-first Wisconsin Infantry, until June, 1865, when he was transferred to Company E, Third Wisconsin Infantry, and remained with them until discharged, July 18, 1865.

Claimant's statement is corroborated by letter of D. T. Fenno, dated February 17, 1881, as to enlistment. Also by affidavit of Louisa McCarty, dated December 21, 1885, as to enlistment and as to the injury. Also by affidavit of James C. Greengo, dated September 13, 1890, as to claimant's service in the several companies and regiments mentioned, and also as to his lameness and inability to drill and as to the injury of foot, which prevented his walking or keeping place in his command. Also by affidavit of Albert Barden, dated September 6, 1890, as to service of claimant in the several commands, and also as to his lameness and inability to walk. Also by affidavit of Henry Brown, dated September 6, 1890, as to service of claimant in the several commands, and also as to his lameness and inability to walk. Also by affidavit of Henry Brown, dated July 9, 1883, as to injury, who was present with claimant at time of injury, and went after assistance to get claimant home, and also saw him i

MAY 26, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed.

To the Senate of the United States:

I return without approval Senate bill number nineteen hundred and ninety-eight, entitled "An act for the relief of John D. Ham," which grants a pension

eight, entitled 'An act for the relief of John D. Ham, white grains a pension to the party named.

The claimant alleges that he enrolled in the Army in January, 1862, and was "sworn in at his own home;" that the next day he started on horseback to go to the regiment he was to join, and that on the way his horse fell upon his left ankle, whereby he sustained an injury which entitles him to a pension.

His name is not borne upon any of the rolls of the regiment he alleges he was

on his way to join.

He filed his application for pension in the Pension Bureau October 17, 1879 (seventeen years after his alleged injury), which was rejected apparently on the ground that he was not in the military service when the disability claimed

the ground that he was not in the military service when the disability was incurred.

He was drafted in 1863, and served until he was mustered out in 1865.

It is entirely clear that this claimant was not in the military service at the time he claims to have been injured; and his conduct in remaining at home until he was drafted, nearly two years afterwards, furnished proof that he did not regard himself as in the mean time owing any military duty. These considerations, and the further facts that upon being drafted he was accepted as physically qualified for service, that he actually thereafter served a year and eight months, and that he waited seventeen years before claiming pension for his injury, in my mind present a case upon which the claimant is entitled to no relief even if charity instead of just liberality is invoked.

GROVER CLEVELAND.

No. 19.-Louis Melcher.

No. 19.—Louis Melcher.

This bill seems to have been returned because the surgeon's certificate upon which this soldier was discharged alleged disability as existing before enlistment, and not mentioned to the mustering officers at the time. It may be noted that in this case the same surgeon recommended the discharge who examined and passed the soldier upon his entry into the service. The captain made up his company out of over one hundred and fifty men, who were anxious to serve under him, and took his pick among them, selecting, as he says, this man because he was perfectly sure he was an entirely sound man. Four or five comrades, and others, say that he was perfectly sound at enlistment. Upon the evidence itself, it presents a strong case for a pension.

The surgeon was obliged, as a part of his duty as such, to thoroughly examine each man, and to find any such alleged sores or scars for himself, if they existed,

at the time of the enlistment, and it is no excuse to say that the soldier did not call the attention of the mustering officer to them, if he had any, and there is no reason to believe that he had any. The surgeon was probably prejudiced in some way when he gave the certificate of discharge. Such things were allogether too common, and in the hurry and excitement of the times many mistakes were made, and sometimes erroneous records from still worse motives. Even if there had been at some time a disability of the character alleged, it is evident that it was supposed to be fully healed, and that this man had fully recovered from its effects. The exacting service performed was sufficient of itself to produce the disability originally for which the claimant now asks to be pensioned. We consider the evidence clear and strong to sustain all the statements of the previous report made by your committee.

We append that report, and also the message of the President.

[Senate Report No. 585. Forty-ninth Congress, first session.]

[Senate Report No. 585, Forty-ninth Congress, first session.]

[Senate Report No. 585, Forty-ninth Congress, first session.]

The petitioner was a private in Company A, Second Michigan Infantry. He alleges that on the rapid march from Bull Run to Arlington Heights, through streams and without halting, he incurred disabilities which developed in ulcers in his legs, and for this he applied for a pension, which was denied by the Commissioner on the ground that the disability was not a result of the service.

The certificate of his discharge certifies that his incapacity is lameness, caused by previous repeated and extensive ulcerations of his legs, extending deeply among the muscles and impairing their powers and action by cicatrices, all existing before enlistment.

Witnesses who knew him testify that he was perfectly sound before enlistment. The examining surgeon finds the existence of the disabilities as claimed. The captain of his company testifies to the injuries and to their incurrence by hard marching. His neighbors testify that they were intimately acquainted with him long before enlistment, and that he was sound. The weight of testimony seems to be in favor of the claim. The medical skill of the examining surgeon who signs his discharge may have been at fault when he declares that the ulcers existed before enlistment; and this idea is favored from the fact that a man in the condition of this soldier at the time of this discharge would not have been able to endure a night's rapid march from Bull Run to Arlington Heights.

The committee report a bill for the relief of the petitioner, with a recomendation that it do pass.

[Senate Ex. Doc. No. 150, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill 2186, with his objections thereto.

May 24, 1886.-Read, laid on the table, and ordered to be printed. To the Senate of the United States:

To the Senate of the United States:

I herewith return without approval Senate bill number twenty-one hundred and eighty-six, entitled "An act granting a pension to Louis Melcher."

This claimant enlisted on the 25th day of May, 1861, and was discharged for disability on the 16th day of August, 1861, having been in the service less than three months.

The certificate of the surgeon of his regiment, made at the time of his discharge, stated his disability to be "lameness, caused by previous repeated and extensive ulcerations of his legs, extending deeply among the museles and impairing their powers and action by cicatrices, all existing before enlistment and not mentioned to the mustering officers at the time."

Upon this certificate, given at the time of the claimant's discharge, and while he was actually under the surgeon's observation, an application for a pension was rejected by the Pension Bureau.

In the absence of anything impeaching the ability and integrity of the surgeon of the regiment, his certificate should, in my opinion, be regarded as a true statement of the condition of the claimant at the time of his discharge, though the committee's report suggests that the surgeon's skill may have been at fault when he declared that the ulcers existed before enlistment. The cicatrices showing beyond a doubt the previous existence of this difficulty would be plainly apparent upon an examination by a surgeon, and their origin could hardly be mistaken. The term of the claimant's service was not sufficiently long to have developed and healed, even imperfectly, in a location previously healthy, ulcers of the kind mentioned in the claimant's application.

My approval of the bill is therefore withheld upon the ground that I find nothing in my examination of the facts connected with the case which impeaches the value of the surgeon's ecrificate upon which the adverse action of the Pension Bureau was predicated.

No. 20.-MRS. MARCHAND.

No. 20.—Mrs. MARCHAND.

Legislation ever since the war is full of precedents for granting a pension of \$50 to Mrs. Marchand. The rejection of this bill requires, as an act of justice, that the precedents of the country shall be reversed and the pensions of widows of a large number of officers of high rank, who have rendered long and distinguished service, should be reduced from \$50 to \$30 a month. The evidence certainly shows the origin of the fatal disease to have been in the service and the general process of the breaking down of Commodore Marchand's health, in consequence of his exposure in the service for many years, finally resulting in his death. The testimony shows that medical evidence can not be furnished, because his physician is dead, and the Pension Office rejected the claim in order that the applicant might obtain relief by special act.

We append the Senate report and the message of the President.

[Senate Report No. 171, Forty-ninth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (S. 226) granting a

The Committee on Pensions, to whom was referred the bill (S. 226) granting a pension to Margaret D. Marchand, beg leave to state that a bill for this same purpose was referred to the Committee on Pensions of the Senate during the second session of the Forty-eighth Congress and passed by the Senate, failing in the House only for want of time to bring the measure before that body.

This committee beg to state further that they have examined the facts in the case recited in the affidavits of Mrs. Marchand and of the witness, Alice P. Thornton, which are hereto appended and made a part of this report:

"On this 15th day of May, 1884, before me, Sprigg Harwood, clerk circuit court for Anne Arundel County, personally appeared Margaret D. Marchand, who, being duly sworn according to law, deposes and says as follows, to wit:

"In the year 1851 my husband, the late Commodore John B. Marchand, then commander, was in command of the steamer James Adger, off Charleston, S. C., engaged in the naval service of the United States Government in the late civil war. At that date he was in robust health and perfect physical condition. He had always been a man of unusually robust constitution, weighing over 200 pounds, and of perfectly regular habits, and from the day of our marriage, to wit, the 11th day of November. 1856, until the date of his taking command of the steamer James Adger, in 1861, have never known him to have any sickness with the exception of some trivial derangement of perhaps a day's duration, and never requiring any medical attendance. His habits throughout his entire life were uniformly regular and temperate.

"To the best of my knowledge he went upon blockade duty in the year 1861 in his usual health, and came to our home in Baltimore, in 1864, broken down in health and much reduced in flesh, after protracted blockade duty, and after the severe engagements while in command of the U.S. S. Lackawanna, in Mobile Bay. At the date of his promotion to the rank of commodore, in the year 1866, for distinguished services, the usual physical examination was waived. Soon after this date symptoms of defective circulation commenced, manifesting itself in the ends of his fingers, they becoming bloodless and livid in color. The committee also desire to attach and make a part of their report the following account of the service of Commodore Marchand in Mobile Bay:

"The morning of the 5th of August, 1864, found Admiral Farragut, with his fleet, consisting of the Richmond, Port Royal, Lackawanna, Seminole, Monorgahela, Kennebee, Ossipee, Itasca, Oneida, Galena, Brooklyn, Octorara. Metacomet, and lastly the Hartford, the admiral's flag-ship, at the mouth of Mobile Bay. Among the efficient officers who contributed to this important victory was Capt. John B. Marchand,* of the Lackawanna. At fifteen minutes of o'clock the whole fleet was under way, and just one hour afterwards the first gun was fired. The ships above mentioned entered the bay, lashed to each other in pairs side by side, in order to prevent any confusion in passing the formidable fortifications of the confederates guarding the entrance to the bay. The Brooklyn and Octorara were in the lead. The Lackawanna, with the Seminole, was in the center of the line of battle. Fort Morgan first opened fire upon the fleet, and the rebel boats Tennessee. Morgan, Gaines, and Selma, inside of the bay, raked the vessels with shot and shell.

"Just around the point of land behind Fort Morgan could be seen three saucylooking gunboats and the famous ram Tennessee. The latter was then considered the strongest and most powerful ironelad ever put afloat—looking like a great turite, with sloping sides, covered with iron plates 6 inches in thickness, thoroughly riveted together, and having a formidable iron beak projecting into the water. Her armament consisted of six heavy guns of English make, sending a solid shot weighing 110 pounds irresitibly against everything but the turrets of the monitors.

"In addition to these means of resistance, the narrow channel in front of the fort had been lined with torpedoces. These were in the water, anchored to the bottom, and were chiefly i

^{*}Since promoted to commodore.

to hand. A determined attempt was here made by the crew of Captain Marchand, under his orders, to board the enemy's ships, but was found to be impossible on account of the heavy coatings of tallow with which the enemy's iron decks were covered. Many of his men slipped off and fell into the water. In the attempt to run down the Tennessee the stern of the Lackawanna was cutand crushed far back of the plank ends, doing her great injury, and leaving her in places but a few inches above the water.

"From the disabled condition of the Lackawanna in coping with this much superior antagonist, the two vessels became separated, the ram going ahead, and the Lackawanna having nothing to hold on by, her captain oxdered the helm hard over to bring the ship around, in order to make another attempt at running down the ram, but the great length of his vessel and the shoalness of the water, which was not more than a foot under the keel, prevented his turning rapidly, and in going round he collided with the Hartford, the admiral's flag-ship, although every effort was made on his part to prevent the collision by backing the engine. Of this it has been aptly said by a personal friend of Admiral Farragut, the historian of this engagement, and who expressed the sentiment of the admiral, long after the occurrence, that 'the fault was as much with the Hartford as with the Lackawanna, each being too eager to reach the enemy,'—(J. C. Kinney, in Scribner's Monthly Magazine, June, 1881.)

"After the Lackawanna had cleared the Hartford she again started to run down the Tennessee, but before reaching her the rebel flag had been hauled down, a white one hoisted, and the ram had surrendered to the Union fleet, which by that time encompassed her on all sides, rendering her escape impossible."

The committee beg leave, therefore, to report the bill favorably.

The committee beg leave, therefore, to report the bill favorably.

[Senate Executive Document No. 186, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill 226, with his objections thereto.

JUNE 21, 1886.—Read and ordered to lie on the table.

JUNE 23, 1886.—Referred to the Committee on Pensions and ordered to be printed.

To the Senate .

I return herewith Senate bill number two hundred and twenty-six, entitled "An act granting a pension to Margaret D. Marchand," without approval.

The beneficiary named in this bill is the widow of John B. Marchand, who entered the United States Navy in 1828, who was promoted to the rank of commodere in 1866, and who was placed upon the retired-list in 1870. He died in August,

dore in 1800, and who was placed upon the retired-list in 1870. He died in August, 1875, of heart disease.

His widow filed an application for pension in 1883, claiming that his fatal disease was caused by exposure and exertion in the service during the war of the rebellion. The application was rejected because of the inability to furnish evidence to prove that the death had any relation to the naval service of the de-

ceased.

I am unable to see how any other conclusion could have been reached. The information furnished by the report of the committee to whom this bill was referred, and derived from other data before me, absolutely fails to connect the death of Commodore Marchand with any incidents of his naval service.

This officer was undoubtedly brave and efficient, rendering his country valuable service. But it does not appear to have been of so distinguished a character, nor are the circumstances of his widow alleged to be such as to render a gratuity justifiable.

GROVER CLEVELAND.

EXECUTIVE MANSION, June 19, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington, on Monday, the seventh day of December, one thousand eight hundred and eighty-five.]

An act granting a pension to Margaret D. Marchand.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Margaret D. Marchand, widow of Commodore J. B. Marchand, late of the United States Navy, and pay her a pension at the rate of fifty dollars per month from the date of the passage of this act.

JOHN G. CARLISLE, Speaker of the House of Representatives. JOHN SHERMAN, President of the Senate pro tempore.

I certify that this act originated in the Senate.

ANSON G. McCOOK.

By CHAS. W. JOHNSON, Chief Clerk.

No. 21.-ROBERT HOLSEY.

There is nothing to contradict the statement of facts contained in the Senate report; even the veto hardly undertakes to do so. There is no allegation nor suspicion of fraud. It is difficult to comprehend how an intelligent being could arrive at a conclusion adverse to this claim. This can not be the work of the Executive mind.

[Senate Report No. 612, Forty-ninth Congress, first session.]

[Senate Report No. 612, Forty-ninth Congress, first session.]

The petitioner was a private in Company H, Ninth Kansas Cavalry, and asks for a pension in consequence of disabilities contracted in the line of his duty. The report of the Surgeon-General shows that he was in the general hospital from September 14, 1863, to January 1, 1864; also that he was treated in January, July, and August, 1863. Three comrades testify to his sound condition when he enlisted.

Lieutenant Cram, who was in command of the company, gives evidence of the suffering condition of the soldier, and in consequence put him on light duty. The same witness says:

"That on the 20th of April, 1863, the claimant was sent with others from Leavenworth to Levy, Kans., as burial escort; that they were exposed to storm and night travel, after which the claimant was sick in camp and hospital, and that he was in feeble health when mustered out."

Comrade Crotts gives similar testimony, and adds that he was with claimant from December 20, 1863, to March 6, 1864, and was at his bedside every day.

His neighber, John G. Chase, was acquainted with him soon after muster-out, and knew that he was ill and totally unable to labor during the space of five years.

pears.

Dr. H. D. Hill testifies, in affidavit dated November 9, 1882—

"That he has known the petitioner during the past ten years, and that he has always appeared to be in feeble health, and that on examination he found him greatly reduced by a complication of diseases, including affection of lungs, liver, and kidneys."

There is a large amount of testimony from comrades and neighbors, all of

whom appear to be reliable and disinterested witnesses, which favors the petttioner's claim, and there is no evidence of an adverse description.

The claim was rejected by the Pension Office on the alleged insufficiency of
the medical proof.

We find a report of an examining board, dated November 12, 1882, which states
that the disability is permanent; that there is evidence of kidney trouble, which
is rated at half total.

A subsequent examination by the same board reports that the claimant has
Bright's disease, and rates the disability as total.

Your committee report the bill favorably, with a recommendation that it do
pass.

[Senate Ex. Doc. No. 177, Forty-ninth Congress, first session.]

Message from the President of the United States, returning Senate bill 1288, with his objections thereto.

JUNE 23, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed.

To the Senate:

I return without approval Senate bill number twelve hundred and eightyeight, entitled "An act granting a pension to Robert Holsey."
This claimant enlisted in 1882, and though he appears to have been sick on
two occasions during his term of service, he remained with his company until it
was mustered out in 1865.
This soldier was really sick during the time he remained in the Army; and
in this respect his claim for a pension has a better origin than many that are
presented. But the fact must be recognized, I suppose, that every Army aliment does not necessarily result in death or disability.
In 1882, seventeen years after his discharge, this soldier filed his declaration
for a pension, allegize that in 1863 he contracted intermittent fever, affecting
his lungs, kidneys, and stomach.
A board of surgeons, upon an examination made in 1882, find disease of kidneys, but no indication of lung and stomach trouble; and a medical referee reported in 1885 that there had been no disease of the stomach and lungs since the
filing of the claim, and that the difficulty affecting the kidneys had no relation
to the sickness for which the claimant had been treated while in the Army.
I am of the opinion that a correct conclusion was reached when the application for pension in this case was denied by the Pension Bureau.

GROVER CLEVELAND.

No. 22.-Annie C. Owen.

There is nothing revealed in the evidence to impeach the action of Congress in this case. The Senator who reported the bill will report further if it should be deemed necessary.

[Senate Report No. 491, Forty-ninth Congress, first session.]

[Senate Report No. 491, Forty-ninth Congress, first session.]

The evidence in the case shows that this officer entered the service as a second lieutenant in Company G. Frifty-seventh Pennsylvania Volunteers, on the 14th of December, 1861, and was discharged for disabilities, resulting from wound received while in the line of duty, in October, 1862. From the testimony presented to the committee of his subsequent treatment at different periods for diseases growing out of such wound, resulting finally in his death from heart disease in June, 1876, your committee are of the opinion that said disease was superinduced by the wound received in the ribs at the battle of Malvern Hill, and they therefore recommend the passage of the bill.

[Senate Ex. Doc. No. 157, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill 1850, with his objections thereto.

MAY 28, 1886.—Read, referred to the Committee on Pensions, and ordered to be printed.

To the Senale:

To the Senate:

I hereby return without approval Senate bill number eighteen hundred and fifty, entitled "An act granting a pension to Mrs. Annie C. Owen."

The husband of the claimant was mustered into the service as second lieutenant December 14, 1861, and discharged October 16, 1862. It appears that he died in 1876 from neuralgia of the heart. In 1883 the present claimant filed her application for pension, alleging that her husband received two shell wounds—one in the calf of his left leg and one in his left side—on the first day of July, 1862, and claiming that they were in some way connected with the cause of his death. On the records of his command there is no mention made of either wound; but it does appear that on the eighth day of July—seven days after the date of the alleged wounds—he was granted a leave of absence for thirty days on account, as stated in a medical certificate, of "remittent fever and diarrhea." A medical certificate dated August 5, 1862, while absent on leave, represents him to be at that time suffering from "chronic bronchitis and acute dysentery."

The application made for pension by the widow was rejected by the Pension Bureau February 1, 1886.

There is nothing before me showing that the husband of the claimant everfiled an application for pension, though he lived nearly fourteen years after his discharge; and his widow's claim was not made until twenty-one years after the alleged wounds, and seven years after her husband's death.

If the information furnished concerning this soldier's service is correct, this claim for pension must be based upon a mistake. It is hardly possible that wounds such as are alleged should be received in battle by a second lieutenant and no record made of them; that he should seven days thereafter receive a leave of absence for other sickness with no mention of these wounds, and that a medical certificate should be made (probably with a view of prolonging his leave) stating still other ailments, but silent as to wounds. The further facts

that he made no claim for pension and that the claim of his widow was long de-layed are worthy of consideration. And if the wounds were received as de-scribed there is certainly no necessary connection between them and death four-teen years afterward from neuralgia of the heart. GROVER CLEVELAND.

EXECUTIVE MANSION, May 28, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington on Monday, the seventh day of December, one thousand eight hundred and eighty-five.]

cember, one thousand eight hundred and eighty-five.]

An act granting a pension to Mrs. Annie C. Owen.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and he is hereby, authorized to place on the pension-roll, and subject to the limitations of the law, the name of Annie C. Owen, widow of Capt. Mortimer B. Owen, late of Company G, Fifty-seventh Regiment Pennsylvania Volunteers.

JOHN G, CARLISLE,

Speaker of the House of Representatives.

JOHN SHERMAN,

President of the Senate pro tempore.

I certify that this act originated in the Senate.

ANSON G. McCOOK, Secretary,
By CHAS. W. JOHNSON, Chief Clerk.

No. 23.-ELIZABETH S. DE KRAFFT.

No. 23.—ELIZABETH S. DE KRAFFT.

This bill is properly vetoed, for the reason, as stated in the veto itself, that it is of no possible advantage to the beneficiary mentioned. Mrs. De Krafft is already, and properly, pensioned at the rate of \$30 a month, under the general law. By a clerical mistake the concluding clause, which is usually inserted in such an original bill, was omitted, providing that she should be paid "a pension of fifty dollars a month in lieu of the pensionshe is now receiving." It was a mistake, at the same time it did nobody any harm, and it would hardly seem to afford occasion for the elaborate castigation of the two Houses of Congress that appears in the veto message.

We append hereto the Senate report and the veto message.

[Senate Report No. 723, Forty-ninth Congress, first session.]

[Senate Report No. 723, Forty-ninth Congress, first session.]

The petitioner, Elizabeth S. De Krafft, is the widow of John Charles Philip
De Krafft, late commodore United States Navy. She was pensioned under the
general law at the rate of \$30 per month, commencing November 25, 1885, with
an addition of \$2 a month for one minor child.

By her petition, which is hereto appended, she asks that her pension be increased to \$50 a month. It appears from the record of services of her husband
that he was promoted to the rank of rear-admiral October 23, 1885, and that he
died on the 29th of the same month.

It is believed that your committee have uniformly reported in favor of granting this increase to the widows of officers of this rank, and they therefore report
a bill to increase her pension to \$50 per month, with the recommendation that
it do pass.

Petition of Mrs. Elizabeth S. De Krafft for increase of pension.

To the honorable Senate and House of Representatives of the United States:

To the honorable Senate and House of Representatives of the United States:

The prayer of your petitioner showeth that she is the widow of Rear-Admiral J.C.P. De Krafft, United States Navy, who died October 29, 1885, after forty-five years' service in the Navy: that she is left with two children dependent upon her; that the small pension (\$30 per month) she now receives is insufficient for her support; that she is not able to provide a living by her own exertions for herself and children; and she prays that Congress will grant her an increase of pension to the sum of \$50 per month, as has been done in recent years in the case of widows and dependent families of senior officers of the Navy.

ELIZABETH S. DE KRAFFT.

ELIZABETH S. DE KRAFFT.

The undersigned concur in this request of Mrs. De Krafft, and desire that it be granted by Congress.

David D. Porter, Admiral; S. C. Rowan, Vice-Admiral; John L. Worden, Rear-Admiral; Wm. Rogers Taylor, Rear-Admiral, U.S. N.; Wm. Radford, U.S. N.; Th. Stevens, Rear-Admiral, U.S. N.; Thos. O. Selfridge, Rear-Admiral, U.S. N.; Thornton A. Jenkins, retired Rear-Admiral, U.S. N.; E. Simpson, Rear-Admiral, U.S. N.; D. B. Harmony, Commander, U.S. N.; J. E. Walker, Captain, U.S. N.; W.S. Schley, Chief Bureau of Equipment and Recruiting.

Record of service of John C. P. De Krafft.

[True copy from the records of the Navy Department, April 15, 1886.—Jno. W. Hogg, chief clerk.]

John C. P. De Krafft was appointed a midshipman in the Navy October 19, 1841.

December 4, 1841, he was ordered to the Independence; June 13, 1842, detached and ordered to the Congress; September 5, 1843, detached from the Preble and

[Senate Ex. Doc. No. 183, Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill No. 2223, with his objections thereto.

JUNE 21, 1886.-Read and laid upon the table,

JUNE 23, 1896.—Referred to the Committee on Pensions and ordered to be printed.

JUNE 23, 1886.—Referred to the Committee on Pensions and ordered to be printed. To the Senate:

I return without approval Senate bill number twenty-two hundred and twenty three, entitled "An ned granting a pension to Elizabeth S. De Kraft."

In yolipetion to this bill is that it is of o possible advantage to the beneficiary therein mentioned. It directs that her name be placed upon the pension-roil, subject to the provisions and limitations of the pension laws. The effect of such legislation would be to permit Mrs. De Kraft to draw a pension at the rate of thirty dollars each month from the date of the approval of the bill.

On the 26th day of February, 1889, under the provisions of the general pension law, she was allowed a pension of this exact sum; but the payments were to date from November 10, 1885.

I am so thoroughly tired of disapproving gifts of public money to individuals who in my view have no right or claim to the same, notwithstanding apparent Congressional sanction, that I interpose with a feeling of relief a veto in a case where I find it unnecessary to determine the merits of the application. In speaking of the promiscuous and ill-advised grants of pensions which have lately been presented to me for approval. I have spoken of their "apparent Congressional sanction" in recognition of the fact that a large proportion of these bills have never been submitted to a majority of either branch of Congress, that are the results of nominal sessions held for the express purpose of their consideration and attended by a small minority of the members of the respective Houses of the Thus, in considering these bills, I have not felt that I was aided by the deliberate judgment of the Congress; and when I have deemed it my duty to disapprove many of the bills presented, I have hardly regarded my action as a dissent from the conclusions of the people's representatives.

I have not been insensible to the suggestions which should influence every citizen, either in private station or official place, to exhibit not on

rejected.
In the mean time I venture to suggest the significance of the startling increase in this kind of legislation and the consequences involved in its continuance.

GROVER CLEVELAND.

EXECUTIVE MANSION, June 21, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington, on Monday, the seventh day of December, one thousand eight hundred and eighty-five.]

An act granting a pension to Elizabeth S. De Krafft.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Elizabeth S. De Krafft, widow of John Charles Philip De Krafft, late commodore and rear-admiral in the United States Navy.

JOHN G. CARLISLE, Speaker of the House of Representati JOHN SHERMAN, President of the Senate pro tempore.

I certify that this act originated in the Senate.

ANSON G. McCOOK. By CHAS. W. JOHNSON, Chief Clerk.

All which is respectfully submitted.

HENRY W. BLAIR,
For the Committee,

MARY J. NOTTAGE.

[Senate Report No. 1495, Forty-ninth Congress, first session.] IN THE SENATE OF THE UNITED STATES.

JULY 17, 1886.—Ordered to be printed.

Mr. Blair, from the Committee on Pensions, submitted the following report (to accompany vetoed bill S. 2005).

The Committee on Pensions, to whom was recommitted Senate Report 1424, in the case of Mary A. Nottage, Calendar No. 1630, having considered the same, report, recommending that the same do stand as the report of the committee, and that the bill pass, the objections of the President to the contrary notwithstanding.

VIEWS OF THE MINORITY.

The undersigned, a minority of the Committee of the Senate on Pensions, submit the following as their views in dissent to the report of the majority on Senate bill No. 2005, "granting a pension to Mary J. Nottage," and the message of the President returning the same to the Senate, with his objections to its pas-

sage.
By section 7, Article I of the Constitution of the United States, it is provided

By section 7, Article I of the Constitution of the United States, it is provided that—

"Every bill which shall have passed the House of Representatives and the Senate shall, before it becomes a law, be presented to the President of the United States. If he approves he shall sign it, but if not he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their Journal, and preceed to consider it. If, after such consideration, two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered, and if approved by two-thirds of that House it shall become a law."

reconsidered, and if approved by two-thirds of that House it shall become a law."

Under this constitutional provision the President, in the act of approving or disapproving a bill, becomes and is a part of the legislative power of the fovernment. In the performance of this duty he must consider every question of fact in its relation to existing law involved in the passage of every bill submitted to him for approval by the vote of the two Houses.

This is a wholesome and conservative provision in the fundamental law that unites the States. It was intended by its authors to secure the consideration of one power (so to speak) representing the entire body of the people of the whole Union as against the powers that represented States and localities, who, it might be supposed, would be more or less influenced by sectional or local as well as personal interests and sympathies.

In the history of its use its conservative and patriotic wisdom has been recognized and admitted by the marked approval which has been given by the people to each exercise of the veto power, almost without exception, from the period of the adoption of the Constitution to the present time.

The report, to which we dissent, is nominally one in the matter of S. 2005, granting a pension to Mary J. Nottage; but it will be seen that the author of the President to this bill, but the objections of the President to twenty-two other bills.

the report undertakes to review and consider, not alone the objections of the President to this bill, but the objections of the President to twenty-two other bills.

Waiving any criticisms upon the order, manner, or propriety of a report so made, save now to protest against the style and temper in which the objections of the President are reviewed and criticised therein, and which more become the hustings than the Senate, the undersigned have to express their dissent to the evident political and partisan animus manifested in the preparation of said report.

The true soldier of this country is the idol of all parties and all sections, and when misfortune of any character befalls him the warm sympathies of all hearts gather around him and his beloved ones with ready impulse to aid and relieve him or them. The records of Congress, as do the records of the executive department, show this to be true. It is this generous sympathy of all parties and all sections that has been taken advantage of by the designing, so that artful and interested parties, in multiplying abuses and frauds, have brought reproach on the administration of the kind, beneficent, and generous pension laws of the Government.

And now, when, as it appears to the undersigned, the President has sought in a patient, laborious examination of the large number of pension bills (individual in character and purpose) sent to him by this Congress (a small portion of which he has returned with his objections, and some of which are reviewed in the majority report) to show his willingness as well as determination to relieve this generous system of pension laws, made for the true soldier of the Republic, of the reproaches which admitted frauds and abuses, perpetrated and sought to be perpetrated, have brought on it, and, at the same time, has made manifest his purpose, courageously, to guard the Treasury, it would seem to be a grateful duty of every member of the legislative department of the Government, be needed in the remarkance of the compensated for such di

is akin to madness to ascribe to him unworthy motives in arriving to such conclusions.

In the committee and in the Senate honest, patriotic Senators widely differ in their conclusions upon the same array of facts. This is witnessed almost daily, and yet who that pauses to wait on reason, even for a moment, would denounce in bitter terms his brother Senator for such difference?

The undersigned do not now and here review the facts in each of the twenty-three cases, as presented either by the committee or the President—the general character of the majority report precludes them from doing so—in their view of what the usages and law of the Senate require as proper in such cases.

It is proper, however, to say that the facts in the case of Mrs. Mary J. Nottage, as now presented, show the propriety as well as need of close examination in cases depending upon the collection and marshaling of facts. By the original report of the committee, and as the facts are there arrayed and presented, the application of Mrs. Nottage is one of merit, yet it is even there evident, from the face of the papers, that its favorable consideration was urged by powerful but not improper personal influence, whose appeals were of a character to open the springs of sympathy. Its favorable report, therefore, was almost a matter of course. But the President, in submitting his objections to this bill, calls at-

tention to this array of facts, viz, that the husband of Mrs. Nottage was discharged for a disease of one character, and that over sixteen years after that discharge he dies of a disease different in character, being discharged September I7, 1882, and departing this life January 8, 1879, and that the medical testimony fails to show that the disease for which the soldier was discharged was directly or remotely the cause of his death. These facts, as thus marshaled by the President, are sufficient to call if not for the rejection of the bill, its more mature consideration.

Speaking from their knowledge of the mode of considering pension cases in committee and in the Senate, and witnesses, as they are, of the power and effect of personal appeals of applicants, their friends, and agents, the undersigned are convinced that a large number of cases pass Congress which are not maturely weighed and considered upon their abstract merits; hence they recognize the wisdom and fidelity of the President when, in the discharge of his constitutional duty, he returns this and other bills with his objections to their passage. Respectfully submitted.

W. C. WHITTHORNE.

W. C. WHITTHORNE, J. N. CAMDEN, E. K. WILSON,

MARGARET D. MARCHAND.

[Senate Report No. 1466, Forty-ninth Congress, first session.] IN THE SENATE OF THE UNITED STATES.

JULY 9, 1886.—Ordered to be printed.

JULY 9, 1886.—Ordered to be printed.

Mr. Sewell, from the Committee on Pensions, submitted the following report (to accompany bill 8, 226 and the veto message of the President thereto).

The Committee on Pensions, to whom was referred the message of the President of the United States returning the bill (8, 226) granting a pension to Margaret D. Marchand, widow of John B. Marchand, of the United States Navy, submit the following report:

The committee have carefully considered said message in connection with the previous report made by them in this case, recommending the passage of said bill, and find that the President has taken the course pursued by the Pension Bureau, which bureau refused to grant the desired pension to Mrs. Marchand upon the ground that the disease of which her late husband, Commodore Marchand, died could not be traced to disabilities incurred in the service while in the line of duty.

The committee beg leave to submit (1) said veto message as a part of their report. Also (2) their previous report, accompanying the bill and recommending its passage to the Senate. And further (3) a letter from the chief clerk of the Navy Department giving the service of this officer. They are as follows:

[Senate Ex. Doc. No. 186. Forty-ninth Congress, first session.] Message from the President of the United States, returning Senate bill 226, with his objections thereto.

I return herewith Senate bill number two hundred and twenty-six, entitled "An act granting a pension to Margaret D. Marchand," without approval.

The beneficiary named in this bill is the widow of John B. Marchand, who entered the United States Navy in 1823, who was promoted to the rank of commodore in 1886, and who was placed upon the retired-list in 1870. He died in August, 1875, of heart disease.

His widow filed an application for pension in 1883, claiming that his fatal disease was caused by exposure and exertion in the service during the war of the rebellion. The application was rejected because of the inability to furnish evidence to prove that the death had any relation to the naval service of the decased.

I am unable to see how any other conclusion could have been seeded.

deceased.

I am unable to see how any other conclusion could have been reached. The information furnished by the report of the committee to whom this bill was referred, and derived from other data before me, absolutely fails to connect the death of Commodore Marchand with any incidents of his naval service.

This officer was undoubtedly brave and efficient, rendering his country valuable service. But it does not appear to have been of so distinguished a character, nor are the circumstances of his widow alleged to be such as to render a gratuity justifiable.

GROVER CLEVELAND

GROVER CLEVELAND.

EXECUTIVE MANSION, June 19, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington, on Monday, the seventh day of December, one thousand eight hundred and eighty-five.]

An act granting a pension to Margaret D. Marchand.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Margaret D. Marchand, widow of Commodore J. B. Marchand, late of the United States Navy, and pay her a pension at the rate of fifty dollars per month from the date of the passage of this act.

JOHN G. CARLISLE,
Speaker of the House of Representatives. JOHN SHERMAN, President of the Senate pro tempore.

I certify that this act originated in the Senate.

ANSON G. McCOOK, By CHAS, W. JOHNSON, Chief Clerk,

[Senate Report No. 171, Forty-ninth Congress, first session.]

[Senate Report No. 171, Forty-ninth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (S. 226) granting a pension to Margaret D. Marchand, beg leave to state that a bill for this same purpose was referred to the Committee on Pensions of the Senate during the second session of the Forty-eighth Congress and passed by the Senate diring in the House only for want of time to bring the measure before that body.

This committee beg to state further that they have examined the facts in the case recited in the affidavits of Mrs. Marchand and of the witness, Alice P. Thornton, which are hereto appended and made part of this report:

"On this 15th day of May, 1884, before me, Sprigg Harwood, clerk circuit court for Anne Arundel County, personally appeared Margaret D. Marchand, who, being duly sworn according to law, deposes and says as follows, to wit:

"In the year 1861 my husband, the late Commodore John B. Marchand, then commander, was in command of the steamer James Adger, off Charleston, S. C., engaged in the naval service of the United States Government in the late civil war. At that date he was in robust health and perfect physical condition. He had always been a man of unusually robust constitution, weighing over 200 pounds, and of perfectly regular habits, and from the day of our marriage, to wit, the 11th day of November, 1856, until the date of his taking command of the

steamer James Adger, in 1861, have never known him to have any siekness with the exception of some trivial derangement of perhaps a day's duration, and never requiring any medical attendance. His habits throughout his entire life were uniformly regular and temperate.

"To the best of my knowledge he went upon blockade duty in the year 1861, in his usual health, and came to our home in Baltimore in 1864, broken down in health and much reduced in fleesh, after protracted blockade duty, and after the severe engagements while in command of the U.S. S. Lackawamna in Mobile Bay. At the date of his promotion to the rank of commodore, in the year 1866, for distinguished services, the usual physicial examination was waived. Soon after this date symptoms of defective circulation commenced, manifesting itself in the ends of his fingers, they becoming bloodless and livid in color. In 1871 he was a frequent sufferer from violent pains in his chest. In the winter of 1873 and 1874 Commodore Marchand was confined to the house, suffering extremely from the swelling of his fect. In the winter of 1874 and 1875 he had hemorrhages of the lungs; the last of these hemorrhages was the immediate cause of his death. Dr. Mahan, of Pennsylvania, our family physician, who attended Commodore Marchand during the early periods of his sickness, is now deceased. Drs. Dale and Ziegler, who attended him at his death, pronounced his complaint from which death resulted to be heart disease.

"My belief is further strengthened by the information of Dr. Rideout, of Annapolis, Md., that the defective circulation, pains in the chest, and swollen limbs were all symptoms of the heart disease which resulted in Commodore Marchand's death; and that all these symptoms and the disease which resulted in the commodore's death were produced by exposure consequent upon the continuous and excessive duties that he was called upon to perform while in the service of the United States Navy as above stated.

"Sworn to and subscribed the day and year first chera written

"MARGARET D. MARCHAND.

"Sworn to and subscribed the day and year first above written, before me.

"SPRIGG HARWOOD,

"Clerk Circuit Court for Anne Arundel County."

"On this 15th day of May, before me, Sprigg Harwood, clerk of circuit court for Anne Arundel County, personally appeared Alice P. Thornton, who, being duly sworn according to law, deposes and says:
"That she is a sister of the within-named Margaret D. Marchand, and that she has read and carefully examined the affidavit of her said sister hereto appended; that she has personal knowledge of the condition of health and different stages of disease that finally resulted in the death of Commodore Marchand; and also personal knowledge of the statements contained in the annexed affidavit, and that she verily believes the same to be true.

"ALICE P. THORNTON.

'Sworn and subscribed this 15th day of May, 1884, before me.
"SPRIGG HARWOOD,
"Clerk Circuit Court for Anne Arundel County."

"Sworn and subscribed this 15th day of May, 1884, before me. [SEAL.]

"Clerk Circuit Court for Anne Arunded County."

The committee also desire to attach and make a part of their report the following account of the service of Commodore Marchand in Mobile Bay.

"The morning of the 5th of August, 1864, found Admiral Farragut, with his fleet, consisting of the Richmond, Port Royal, Lackawanna, Seminole, Monorgahela, Kennebec, Ossipee, Itasca, Oneida, Galena, Brooklyn, Octorara, Metacomet, and lastly the Hartford, the admiral's flag-ship, at the mouth of Mobile Bay. Among the efficient officers who contributed to this important victory was Capt. John B. Marchand, of the Lackawanna. At fifteen minutes of 6 o'clock the whole fleet was under way, and just one hour afterwards the first gun was fired. The ships above mentioned entered the bay, lashed to each other in pairs side by side, in order to prevent any confusion in passing the formidable fortifications of the confederates guarding the entrance to the bay. The Brooklyn and Octorara were in the lead. The Lackawanna, with the Seminole, was in the center of the line of battle. Fort Morgan first opened fire upon the consumeration of the confederates guarding the entrance to the bay. The Brooklyn and Octorara were in the lead. The Lackawanna, with the Seminole, was in the center of the line of battle. Fort Morgan could be seen three saucy-looking gunboats and the famous ram Tennessee. The latter was then considered the strongest aud most powerful ironelad ever put affoat—looking like a great turtle, with sloping sides, covered with iron plates 6 inches in thickness, thoroughly riveled together, and having a formidable iron beak projecting into the water. Her armament consisted of six heavy guns of English make, sending a solid shot weighing 110 pounds irresistibly against everything but the turrets of the monitors.

"In addition to these means of resistance, the narrow channel in front of the fort had been lined with torpedoes. These were in the water, anchored to the

dered the helm hard over to bring the ship around, in order to make another attempt at running down the ram, but the great length of his vessel and the shoalness of the water, which was not more than a foot under the keel, prevented his turning rapidly, and in going around he collided with the Hartford, the admiral's flag-ship, although every effort was made on his part to prevent the collision by backing the engine. Of this it has been aptly said by a personal friend of Admiral Farragut, the historian of this engagement, and who expressed the sentiment of the admiral, long after the occurrence, that 'the fault was as much with the Hartford as with the Lackawanna each being too eager to reach the enemy."—(J. C. Kinney, in Scribner's Monthly Magazine, June, 1881.)

"After the Lackawanna had cleared the Hartford she again started to run down the Tennessee, but before reaching her the rebel flag had been hauled down, a white one hoisted, and the ram had surrendered to the Union fleet, which by that time encompassed her on all sides, rendering her escape impossible."

The committee beg leave, therefore, to report the bill favorably.

NAVY DEPARTMENT, Washington, August 10, 1883.

NAVY DEPARTMENT, Washington, August 10, 1883.

SIR: In reply to your letter of the 21st ultimo, you are informed that John P. Marchand was appointed a midshipman in the Navy May 1, 1823; October 27, 1828, ordered to the navy-yard, Philadelphia; August 22, 1829, detached and ordered to the Peacock; November 26, 1830, detached and ordered to the Experiment; December 18, 1882, detached and ordered to the Forpoise; August 22, 1822, detached and placed on waiting orders; June 14, 1824, promoted to passed midshipman; August 6, 1834, ordered to the navy-yard, Norfolk; November 11, 1833, detached and placed on waiting orders; June 14, 1834, promoted to passed midshipman; August 6, 1834, ordered to the Potomac; December 16, 1834, detached and ordered to the Shark: May 7, 1835, detached to the John Adams; May 26, 1837, detached and placed on waiting orders; June 12, 1837, ordered to the Porpoise; May 22, 1838, detached and placed on waiting orders; June 12, 1837, ordered to the Porpoise; May 22, 1838, detached and placed on waiting orders; October 25, 1838, ordered to the Woodbury; January 4, 1839, detached and wait orders; April 18, 1839, ordered to the Levant; September 6, 1839, detached and ordered to the Ontario; January 29, 1840, promoted to lieutenant; April 26, 1840, detached and ordered to the Warren; July 10, 1840, detached and to the Erie; October 1, 1840, detached and wait orders; August 11, 1841, ordered to the Van Buren; February 11, 1843, detached and to the Brandywine; September 19, 1845, detached and granted leave; November 13, 1845, ordered to the navy-yard, Philadelphia; November 13, 1846, detached and ordered to the Ontario; January 29, 1845, detached and ordered to the Ontario; July 2, 1855, detached and granted leave; January 10, 1861, ordered as the Cumberland; July 2, 1855, detached and granted leave; September 14, 1855, promoted to commander; October 25, 1855, ordered to the Bureau of Construction, &c.; September 23, 1855, detached and ordered to command the Lackawanna; November 26, 1864, detached

JNO. W. HOGG, Chief Clerk.

Hon. WM. W. DUDLEY, Commissioner of Pensions, Washington, D. C.

It appears that Commodore Marchand entered the Navy in 1828, and was placed upon the retired-list in 1870, thus serving his country forty-two years.

His widow, the claimant, makes affidavit as set forth in the foregoing report, as also does Alice P. Thornton, which satisfies the committee (in connection with such service of forty-two years) that the disease was incurred, or the causes which led to it, during the long period of service of this officer.

It has been the custom of Congress for some time to grant \$50 per month to the widows of brigadier-generals in the Army, and of commodores in the Navy, and also to the widows of officers of higher rank. This is, therefore, not an exceptional case.

These pensions to widows of naval officers are paid from what is known as the naval fund, which accrues from contributions of the officers and men of the Navy; and naval officers have always looked forward to having their families receive a portion of this fund to which they have contributed, and which they look upon as sacred to that purpose.

The committee believe this veto is the first of the kind ever transmitted to Congress by a President of the United States, and they take issue with his reasons for so doing, believing that if they did not have the positive evidence of Mrs. Marchand and Alice Thornton that it would be fair to infer that the disease of which this officer died must have been the result of, or must have originated in, the hardships of the service, covered by this lengthened period of forty-two years.

in, the hardships of the service, covered by this lengthened period of forty-two years.

The President does the memory of this officer credit by saying he "was undoubtedly brave and efficient, rendering his country valuable service," what does not appear to have been of so distinguished a character, nor are the circumstances of his widow alleged to be such, as to render a gratuity justifiable."

An officer who has gone through all the grades of the service from a cadet to a commodore; who was in that service during two wars; who commanded ship after ship, and of whose gallantry and ability no question has ever been raised—the committee say that the widow of such an officer should not now be told that the services of her husband were not of a distinguished character; nor should the natural shrinking of a woman to parade before the world the daily necessities of her life and home, to meet which the pension asked for would be, and is, most desirable, and especially so when it is to come from a fund in the participation of which she has an undoubted claim—such criticisms the committee assert can not be given as reasons by the Executive of the United States for depriving the widow of a brave and efficient officer of that which is her just right.

The committee, therefore, believing the claim to be a just and meritorious one, and the reasons presented for its refusal as of no avail, and adverse to a fit and proper recognition of manly, loyal, and efficient service running through a period of nearly half a century, do recommend the passage of the bill S. 226, the objections of the President to the contrary notwithstanding.

JOSEPH ROMISER

[Senate Report No. 1536, Forty-ninth Congress, first session.] IN THE SENATE OF THE UNITED STATES. JULY 20, 1886.—Ordered to be printed.

July 20, 1886.—Ordered to be printed.

Mr. Wilson, of Maryland, from the Committee on Pensions, submitted the following report (to accompany bill H. R. 1059):

The Committee on Pensions, to whom was referred the veto message of the President of the United States on the bill (H. R. 1059) granting a pension to Joseph Romiser, have carefully examined the same and report, recommending the passage of the bill, the objections of the President to the contrary notwith-standing; and, as the grounds for such report and recommendation, adopt the statement of facts and reasons set forth in the following unanimous report from the House Committee on Invalid Pensions:

The Committee on Invalid Pensions, to whom was referred the veto message of the President of the United States on the bill (H. R. 1059) to grant a pension to Joseph Romiser, submit the following report:

This bill was considered by the Committee on Invalid Pensions, and favorably reported May 1, 1886, as follows:

"The facts of this case, which are completely substantiated, are briefly as follows:

"The facts of this case, which are completely substantially lows:

"The claimant was a member of Captain Frank Mason's company of volunteers, of Frostburg, Alleghany County, Maryland. This company of volunteers was not mustered into either the United States or State service. On the 19th of June, 1861, claimant was with said company when they were ordered to proceed to Cumberland, Md., to repel a threatened attack of the confederate forces. Upon the arrival of the company in Cumberland the men were ordered to uncap their muskets. While doing this duty a musket in the hands of Alpheus Beall was accidentally discharged, and a minie-ball, with which it was charged, struck claimant in the left side of the neck, coming out near the left eye, entirely destroying the sight of his eye, the hearing of his left ear, and the 'hinge of his jaw.'

destroying the sight of his eye, the hearing of his left ear, and the 'hinge of his jaw.'

"Dr. George B. Fundenburg testifies that he was one of the surgeons who professionally attended claimant. He found that a minie-ball had entered at the back part of the neck, passed along on the outside of the skull, under the ear, breaking the jaw at its ramus, and making its exit through the molar bone below and to the outer side of the eye of the same side. The wound was a dangerous one, but after a long sickness he recovered, but has lost the hearing of the injured ear and the sight of the eye. There is considerable deformity of the face caused by exfoliation of the bone.

"The claim was rejected by the Pension Bureau because 'claimant was not in the military service of the United States.' The Committee on Invalid Pensions have heretofore uniformly declined to recommend the granting of a pension to soldiers not enrolled in the service of the United States or acting under the immediate orders of an officer in the United States service. They are fully satisfied that this rule is the proper one, and that it should be rigidly adhered to; otherwise it will be readily seen that the door would be opened wide to a great number of claimants of whom it would be impossible to obtain any official record.

to; otherwise it will be readily seen that the door would be opened wide to a great number of claimants of whom it would be impossible to obtain any official record.

"It will be observed, however, that this man joined a military organization very early in the late war, and before the matter of enlistment and military organization was understood. June 19, 1861, he went with his company in obedience to orders to repel a threatened attack on Cumberland, and in the performance of this duty he received a serious wound, which imperiled his life at the time and has materially disabled him ever since.

"To properly understand the full bearing of this case it may be well to speculate as to what public opinion would have been and what would have been the result if, instead of springing to arms and going without hesitation when ordered to a threatened point, every volunteer would have hesitated or declined to march until he was regularly enlisted, enrolled, and mustered into the service of the United States.

"This case differs in all respects from those who, for one consideration or another and later on the war, declined to enter the service of the United States, preferring organizations of a State or even local character.

"Your committee must content themselves with this brief statement of their views as to this particular case, and, by reason of the distinction attempted to be drawn between this and most other cases, they report the bill favorably and recommend its passage."

On the 5th of July, 1886, the bill, having passed both Houses and been presented to the President for his signature, was returned to the House with the following message:

To the House of Representatives:

To the House of Representatives:

To the House of Representatives:

The rewith return without approval House bill No. 1059, entitled "An act to grant a pension to Joseph Romiser."

The Pension Bureau reports that the records of the office fail to show that an application has been filed in favor of this claimant, though it is stated in the report of the House committee that such a claim was made and rejected on the ground that the claimant was not, at the time of injury, in the service of the United States.

It certainly appears from the report of the committee that the beneficiary named in this bill was not in the service of the Government at such a time, and also that he had not been mustered into the service of any State military organization. It is stated that he belonged to Capt. Frank Mason's company of volunteers, of Frostburg, in the State of Maryland.

Whether this company was organized for the purpose of co-operating at any time with the Union or State forces is not alleged, and it may well have been existing merely for the purpose of neighborhood protection.

Such as it was, the company was ordered in June, 1861, to proceed to Cumberland to repol a threatened attack of confederate forces. Upon arriving at that place the men were ordered to uncap their muskets. In doing this, and through the negligence of another member of the company whose musket was discharged, the claimant was wounded.

It does not seem to me that the facts in this case, so far as they have been developed, justify the passage of this act.

EXECUTIVE MANSION, July 5, 1886.

EXECUTIVE MANSION, July 5, 1886.

GROVER CLEVELAND.

An act to grant a pension to Joseph Romiser

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and he is hereby, authorized and directed to place the name of Joseph Romiser, late of Capt. Frank Mason's company of Maryland volunteers, on the pension-roll, subject to the provisions and limitations of the pension laws of the United States.

JOHN G. CARLISLE, Speaker of the House of Representatives. JOHN SHERMAN, President of the Senate pro tempore.

I certify that this act originated in the House of Representatives.

JNO. B. CLARK, JR., Clerk.

The files from the Pension Office from which the information was obtained upon which the report of the committee was based were returned to the Pension Office May 16, 1886, and were doubtless there when the veto message was written, but through the carclessness of some clerk were not presented to the President when he called for them, but on the contrary he was informed that "the records of the office fail to show that an application has been filed in favor of this claimant."

These files, which are now before your committee, show that the application was filed June 7, 1879, alleging:

"That at Cumberland, Md., June 19, 1861, claimant was shot through the left side of the neck, coming out at the corner of left eye, entirely destroying the sight of left eye and the hearing of the left ear, injuring the slight of the right eye and breaking the hinge of the jaw on the left side of the face by a musketball—gun being accidentally discharged in the hands of Private Alpheus Beall."

In support of the claim the following affidavits were filed:

In support of the claim the following affidavits were filed:

STATE OF MARYLAND, Alleghany County, ss, to wit:

STATE OF MARYLAND, Alleghany County, ss, to wit:

On this 13th day of May, A. D. 1879, personally appeard before me, the subscriber, Theo. Luman, clerk of the circuit court in and for the State and county aforesaid, James M. Shober, a citizen of good repute of Cumberland, Md., who having been first duly sworn according to law, did depose and say for himself that his name is James M. Shober; that his radience is Cumberland, Md.; that his age is forty-three years; that he was first lieutenant of Company I, Second Maryland Infantry, Purrell Home Brigade Volunteers; that he is well acquainted with Joseph Romiser, now a citizen of Cumberland, Md.; that said Romiser was a member of Capt. Frank Mason's company of volunteers of Frostburg, Md., who went to Cumberland, Md., in the month of June, 1861, at the request of the citizens and corporate authorities of Cumberland, Md., to resist a threatened attack upon the city of Cumberland by the confederate forces; that he recollects the time, place, and general facts in connection with the shooting of Joseph Romiser, through the left neck and face, by Alpheus Beall, which are as follows, to wit:

That he was one of Captain Mason's volunteers for this occasion; that he heard the report of the gun, and was in a few minutes afterward with Romiser, and saw where Romiser had been shot; that he set up with Romiser the same night that he was shot; that our company returned to Frostburg the next day; that he of his own knowledge knows that the said Romiser was disabled for a long

JAMES M. SHOBER.

Subscribed and sworn to the year and date first above written. In testimony whereof I have hereunto set my hand and the official seal of the circuit court for Alleghany County, Maryland.

STATE OF MARYLAND, Alleghany County ss, to wit:

State of Maryland, Alleghany County ss, to wit:

On this 13th day of May, A. D. 1879, personally appeared before me, the subscriber, Theo. Luman, clerk of the circuit court in and for the State and county aforesaid, John W. Hadley, a citizen of good repute, of Cumberland, Md., who, having been first duly sworn according to law, did dispose and say for himself that his name is John W. Hadley; that his residence is Cumberland, Md., that his age is fifty-three years; that he is well acquainted with Joseph Romiser, now a citizen of Cumberland, Md.; that he was a member of Capt. Frank Mason's company of volunteers of Frostburg, Md., who went to Cumberland, Md., in the month of June, 1861, at the request of the citizens and corporate authorities of Cumberland, Md., to resist a threatened attack upon the city of Cumberland by the confederate forces; that he recollects of the time, place, and general facts in connection with the shooting of Joseph Romiser by Alpheus Beall, which are as follows, to wit:

That he was one of the first persons present after Romiser fell; that he nursed Romiser for about one week, when two other nurses took charge of him. He was taken to the American House building; that he was attended by Surgeon George B. Fundenburg, M. D., of Cumberland, Md., and the surgeon of the Eleventh Indiana Volunteer Infantry, whose name he does not recollect, said regiment being commanded by Col. Lewis Wallace; that he has read the petition and deposition of the said Joseph Romiser, and it is correct in every particular.

JUHN W. HADLEY.

Subscribed and sworn to the year and date first above written. In testimony

Subscribed and sworn to the year and date first above written. In testimony whereof I have hereunto set my hand and seal of the circuit court for Alleghany County, Maryland.

THEO: LUMAN, Clerk of the Circuit Court for Alleghany County, Maryland.

STATE OF PENNSYLVANIA, Fayette County, to wit:

Fayette County, to wit:

On the 7th day of June, A. D. 1879, personally appeared before me, the subscriber, J. M. Oglevee, prothonotary of the court of common plens, a court of record in and for the State and county aforesaid, Alpheus Beall, who, having been first duly sworn according to law, did depose and say: That his name is Alpheus Beall; that his age is thirty-eight years; that his present post-office address is Uniontown, Fayette County, in the State of Pennsylvania; that in June, A. D. 1861, he was a member of Capt. Frank Mason's company of volunteers, who were not mustered into the United States or State service either, of Frostburg, Alleghany County, Maryland; that he was with said company when they were ordered to proceed to Cumberland, Md., on the 19th day of June, A. D. 1861; that said company were ordered to Cumberland, Md., to repel a threatened attack of the confederate forces.

That upon the company's arrival in Cumberland, Md., the men were ordered to take caps off of the muskets; that while doing this duty his (Beall's) musket, in his (Beall's) hands, was accidentally discharged, and the contents of his musket, being loaded with a minie-ball, struck Private Joseph Romiser, of said company, in the left side of the neck, coming out near the left eye, entirely destroying the sight of Romiser's left eye and the hearing of the left ear, and breaking the hinge of the left jaw, thereby disabling said Romiser for many months and injuring him permanently for life; that it was purely an accident, and neither Romiser nor your deponent was to blame or were responsible for said accident.

That this deposition is made for the purpose of assisting said Romiser to pro-

That this deposition is made for the purpose of assisting said Romiser to procure a pension from the General Government, as your deponent believes him justly and equitably entitled to same; that this deponent is not interested, directly or indirectly, in the prosecution of the invalid pension claim of said Joseph Romiser.

ALPHEUS BEALL.

Two witnesses: C. H. SEATON. H. C. RUSH.

Subscribed and sworn to this 7th day of June, A.D. 1879, before me, the subscriber, prothonotary of the court of common pleas of the county of Fayette, and State of Pennsylvania.

In testimony whereof I have hereunto set my hand and affixed the official seal of said court.

J. M. OGLEVEE,
Prothonolary of the Court of Common Pleas of the County of Fayette,
State of Pennsylvania.

STATE OF MARYLAND, Alleghany County, to wit:

On this 13th day of May, A. D. 1879, personally, before me the subscriber, Theodore Luman, clerk of the circuit court in and for the State and county aforesaid, Dr. George B. Fundenburg, M. D., a practicing physician, and a citizen of good repute, of Cumberland, Md., who, having been first duly sworn according to law, did depose and say for himself: That his name is George B. Fundenburg; that his residence is Cumberland, Md.; that his profession is a regular practicing physician, and that he has practiced medicine for upwards of forty years; that his age is sixty-four years; that he is well acquainted with Joseph Romiser, now a citizen of Cumberland, Md.; that said Romiser was a member of Capt, Frank Mason's company of volunteers, of Frostburg, Md., who went to Cumberland in the month of June, A. D. 1861, at the request of the citizens of Cumberland, Md., to repel a threatened attack upon the city of Cumberland by the confederate forces.

That he recollects well the time, place, and general facts in connection with the shooting of Joseph Romiser through the left side of the neck and face by Alpheus Beall, as he, the said Fundenburg, was one of the physicians and surgeons that professionally attended the said Romiser; that the facts are as follows, to wit:

I found that a minie-ball had entered at the back part of the neck, passed along on the outer side of the skull, under the ear, breaking the jawatiis ramus, and making its exit through the malar bone, below and to the outer side of the eye of the same side. The wound was a dangerous one, but after a long sickness he recovered, but has lost the hearing of the injured ear and the sight of the eye. There is considerable deformity of the face, caused by exfoliation of bone. He has suffered ever since with frequent and protracted attacks of neuralgia, and there is danger that sympathetic ophthalmia may cause the loss of the remaining eye.

I have known Romiser for twenty years, and know him to be a man of excellent cha

Witness my hand and seal of the circuit court for Alleghany County, Mary land, the year and date first above written.

THEO. LUMAN, Clerk of the Circuit Court for Alleghany County, Maryland.

Clerk of the Circuit Court for Alleghany County, Maryland.

It appears that the command of which claimant was a member was a provisional company at Frostburg, Md., under command of Capt. Frank Mason, organized for active service; that this company had marched to Cumberland, at the request of the corporate authorities of that place, to assist the Union forces there under the command of Col. Lew Wallace, of the Eleventh Indiana Volunteers, in resisting an attack of the confederate forces. This company had not been mustered into the military service of the United States, though it is shown that they were organized for the purpose of enlisting in the military service of the United States, that many of them did so enlist, and that this claimant had made all arrangements to enlist, and would doubtless have been regularly in the service in a few days had he not received the wound for which he now asks pension.

December 28, 1881, this claim was rejected in the Pension Office for the reason "not in military service of the United States. See 4693."

In an office letter the Pension Office sets forth more fully the reasons of rejection as follows: The Adjutant-General, United States Army, reporting that no such organization was at the time mustered into the military service of the United States, this office was constrained, under the provisions of law, especially paragraph 4693, Revised Statutes, to reject the claim, applicant having never been regularly enrolled and having failed to make and complete his application prior to date of limitation established by said section, namely, July 4, 184. Paragraph 3, section 4693, Revised Statutes, in reciting the persons who shall be entitled to pensions, reads:

"Any person not an enlisted soldier in the Army, serving for the time being as a member of the militar of any State, under orders of an officer of the United States, or who volunteered for the time being to serve with any regularly organized military or naval forces of the United States, or who otherwise volunteered and re

in consequence of wounds or injury received in the line of duty in such temporary service."

The paragraph further provides that all such claims must be prosecuted to a successful issue before July 4, 1874. The failure of this claimant to make his application and prosecute his claim before the expiration of the limitation has deprived him of his pension for nearly twenty-five years. It seems to your committee that it is the duty of Congress to grant it to him now when he does ask for it. The precedents for this kind of legislation are very numerous, and extend back many years.

It has never been held an insuperable bar to a pension that a claimant had not been regularly mustered into the military service. The established requirement has been that it should be shown that the party was wounded or received an injury while rendering service in defense of his country in a legitimate way and under the direction of a proper officer. In the Forty-eighth Congress a pension was granted to a civilian who was a volunteer employé of the Sanitary Commission, and who lost his leg by the boat upon which he had charge of stores being fired upon by a rebel battery. A bill was introduced and has become a law during this Congress granting a pension to Albert L. Allen, an employé of the Quartermaster's Department, who was wounded in an action.

In the case of Mrs. Mooneyhan (H. R. 6801) a pension was granted on account of the death of her husband, though he died of fever the day before he was to have been mustered into service, and the bill was approved by the President. A bill granting a pension to Mrs. Margaret A. Poland, widow of Alexandria Poland, a citizen of Virginia, who was murdered by confederate soldiers because he had sold supplies to the Union forces and had fed Union soldiers, was also approved by the President. Quite a number of bills granting pensions to militiamen who received injuries or incurred disabilities have been approved, though no claim was made that they had been mustered into the United States service.

A

service.

All of these bills met the hearty approval of your committee, for their rule has been to recommend the passage of bills granting pensions to persons who were wounded or injured while honestly defending the flag of the country, even though by some technicality their cases did not come within the scope of the general law. On the 15th of this month, by a vote of nearly three to one, this House passed a bill placing on the pension-roll the name of Catherine Waters, whose son, a steward on board of the steamer Benefit, was killed in an engagement with confederate forces.

The facts in this case, briefly stated, appear to be that an attack was threatened upon the Union forces at Cumberland; an appeal was made by the authorities to the local provisional company for help in defending the place. The company to which claimant belonged promptly responded. While this soldier was standing in the ranks of the Union forces with their guns loaded for the

enemy he received a severe wound, destroying the sight of one eye and the hearing of one ear, terribly disfiguring him, and very narrowly escaping with his life.

his life.

The question presented to your committee is not whether, under existing law, he is entitled to a pension. If he was, there would be no occasion for a special enactment; but the point presented is, did this man render such a service to the United States as to entitle him to receive from it a favorable consideration of his claim? Your committee believe he did. Voluntarily he responded to its call for aid, and in doing so received a terrible wound, from which he has ever since suffered, and the effects of which will follow him to his grave. Every true lover of his buntry, every man who desires to see justice done to those who freely suffered in behalf of that country will rejoice in the passage of this bill; and your committee frankly express the opinion that had it not been for the carelessness of the clerk in charge of the papers, and his failure to present them when they were called for by the President, there would have been no occasion to make this report.

Your committee, therefore, recommend the passage of this bill, the objection of the President to the contrary notwithstanding.

NEWCOMB PARKER.

[Senate Report No. 1561, Forty-ninth Congress, first session.] IN THE SENATE OF THE UNITED STATES.

July 24, 1886.-Ordered to be printed.

Mr. Blair, on behalt of the majority of the Committee on Pensions, submitted the following report:

(To accompany bill S. 1077 and message.)

(To accompany bill S. 1077 and message.)

The majority of the Committee on Pensions, to whom was referred the message of the President of the United States returning Senate bill No. 1077, granting a pension to Newcomb Parker, with his objections to the passage of the same, have considered the message and reconsidered the bill and the evidence in support thereof, and report:

This is really an interesting case. The claimant filed his declaration January 7,1880, six months before the expiration of the limitation for arrears, so that if granted he would be pensioned from the incurrence of the disability, and become entitled to considerable money. He proved that he had suffered from a broken ankle received in line of duty, and there was no doubt about it.

Two special examiners successively reported in favor of the claim. There must have been parties in the Pension Office who resented these favorable reports of their own agents. If two favorable reports result in rejection, how many are necessary to secure the admission of a claim under the rules of the Pension Office? Where the reports continue in a man's favor why should the office interrupt the flow of good results by interposing a rejection? It would seem that the best chance of success is to have a bad case, since verdicts for the plaintiff turn him out of court.

This is not an obscure case either, for the certificate of disability shows that claimant was discharged for this very permanent hurt "by reason of an old irreducible dislocation and fracture of right ankle-joint, received at Fort Totten, D.C. Is unfit for duty in Invalid Corps."

A permanent incurable hurt, contracted in the service, is proved by their own records, and then proved again by two reports of their own agents, who must have known better than to do justice if it could be avoided when their work had torun the gauntlet of such official supervision at Washington.

Well, the result of all this demonstration was the rejection of the claim, November 10. 1885, on the ground that claimant "is una

[Senate Report No. 561, Forty-ninth Congress, first session.]

[Senate Report No. 561, Forty-ninth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (S. 1077) granting a pension to Newcomb Parker, have examined the same, and report:
The claimant, Newcomb Parker, late private of Company K. E. eventh Vermont Volunteers, enlisted August 14, 1862, and was discharged February 8, 1864. He made application for pension January 7, 1890, alleging dislocation of right ankle by a falling stockade at Fort Slocum, D. C., about January 1, 1864. The claim was rejected November 10, 1885, on the ground that the claimant is unable to prove that he contracted or had any disability in the service that he did not have prior to enlistment.

It appears from the report of the Adjutant-General that this soldier was disabled by reason of lameness from the fracture of ankle-joint December 31, 1863, and that on February 8, 1864, was discharged for disability, but when and where fracture of ankle occurred the records do not show. The certificate of disability for discharge is, however, on file, and states that he was found unable to perform the duties of a soldier because of old and irreducible dislocation and fracture of right ankle-joint received at Fort Totten, D. C., and unfit for duty in Invalid Corps, discharged at his own request, disability one quarter.

The last examination by a medical board, August 6, 1885, rates the disability by reason of injury to right ankle at total.

The claimant has entered evidence of several parties who knew him before enlistment, showing that he was then a sound man and had no difficulty with his ankles, and also testimony as to the incurrence of the disability in the service.

The report of a special examiner, dated October 23, 1885, which closes as fol-

his ankles, and also testimony as to the incurrence of the disability in the service.

The report of a special examiner, dated October 23, 1885, which closes as follows, is also on file:

"From the testimony in this claim I am of the opinion it is one of merit, and therefore respectfully recommend it for admission."

The report of another special examiner, in which a large amount of testimony was taken, dated August 4, 1885, is also on file, in which he states:

"I think there is merit in the claim for injury of right ankle, and that on that account it may be admitted."

It would seem from this evidence that there can be no doubt that this disability was incurred in the service, and that this case should properly have been admitted as recommended—as recommended by the special examiners—in the Pension Office. Why it was not so admitted does not appear from the papers. Your committee recommend the passage of the bill.

On the 21st of April the bill passed the Senate, and on the 12th of June it passed the House of Representatives, was enrolled June 14, and went to the President for his approval on the 21st of June, whereupon such proceedings were had as the following letter indicates to be usual in such cases. It will be observed that enrolled bills can not come to the possession of the Interior Department save from the custody of the President, who receives them from Congress.

[From letter in other cases, June 14, 1886.]

[From letter in other cases, June 14, 1886.]

DEPARTMENT OF THE INTERIOR.

SIR: I send herewith enrolled bills, as follows: * * * Please cause the

same to be critically examined and report to this Department whether in your opinion any objections to their approval are known to exist. In cases where objections exist they should be specifically set forth.

Very respectfully,

H. S. MULDROW, Acting Secretary.

The COMMISSIONER OF PENSIONS.

February 6, all the papers on file in the Pension Office in this case were called for and sent to the Senate committee, and April 15 were returned to the Pension

Office.

Being now in possession of the Senate report and of the papers from and after April 15, and of the enrolled bill from the President, and his demand for the facts, the Commissioner overhauls the performances of his subordinates in this case, and the following report of the evidence on file is the result. It will be observed that this document itself proves that it is made after the Senate action took place, and was known to the Commissioner, who personally examined this case, as a document printed herewith, containing, as it does, these words: "The papers were sent to the Senate Committee on Pensions, February 6, 1886, and returned April 15, 1886."

[No. 335797. . Newcomb Parker, Company K, Eleventh Vermont Volunteers.]

[No. 335797. Newcomb Parker, Company K, Eleventh Vermont Volunteers.]
Claim was rejected November 10, 1885, on the ground that claimant is unable to prove that he contracted or had any disability in the service that he did not have prior to enlistment.

Soldier enlisted as private August 14, 1862, and was transferred to One hundred and twenty-ninth Company, Second Battalion Invalid Corps, December 31, 1863, at Clifburn barracks, by reason of lameness from fracture of ankle-joint and flat foot. Discharged February 8, 1864, for disability.

Certificate of disability shows that he was discharged by reason of an "old irreducible dislocation and fracture of right ankle-joint, received at Fort Totten, D. C., is unfit for duty in invalid corps, and is discharged at his own request; disability, one-fourth."

Regimental records not on file.

Claimant alleges in declaration filed January 7, 1880, that about January 1, 1864, at Fort Slocum, D. C., he had his right ankle dislocated by the falling of a stockade.

Regimental records not on file.

Claimant alleges in declaration filed January 7, 1830, that about January 1, 1864, at Fort Slocum, D. C., he had his right ankle dislocated by the falling of a stockade.

In deposition before special examiner he states that as near as he can remember, it was in October, 1853, at Fort Slocum, D. C., a detachment of his company were engaged in strengthening the earthwork by driving a stockade. He was on top of the parapet handling one of the timbers, when he slipped and fell into the ditch, and the timber came down on him and crushed his right ankle. Was picked up by his comrades and taken to regimental hospital, which was between Fort Totten, where Company K was stationed, and Fort Slocum. Never had any trouble with his feet or ankle prior to enlistment, and has never received any injury to right foot or ankle since discharge, but admits an injury to left hip by being squeezed between two cars in 1873 or 1874. Was stripped and examined at enlistment.

Special examiner reports not reliable.

Moses Demarse, late private Co. K, 11th Vt. Vol., testifies that in the fall of 1863, at Fort Totten, he had just come off of picket duty and he saw claimant lying in his bunk, and he had crutches made for him. He said, and they all said, that he was warm of get duty, and was larger where the was a warm of the said of the said of the said with the was warm of the said of the said of the said with the was a work of the said of the said of black color and bruised. His foot was kind of flat when he enlisted, but he used if perfectly well, only it turned out a little more than the other. Can not say which foot it was.

Reputation good, by special examiner.

Nathan K. Martin testifies that he was a member of Company K, Eleventh Vermont Volunteers, and claimant seemed all right at enlistment, except that he had a twisted ankle and flat foot. Claimant was examined at enlistment at same time affiant was. Remembers that in fall of 1862 (same affiant was. Remembers that he had any trouble with his foot

feature of the narrative.

"Good."

George H. Soules, late lieutenant, Company K., Eleventh Vermont Volunteers, states, in reply to a letter from this office, that he remembers claimant was off duty at Fort Totten in 1863 on account of his foot and ankie being bad. As to his being sound at enlistment knows that he was stripped and examined, and he supposed that was good evidence of soundness.

M. S. Lillie, late private Company K., Eleventh Vermont Volunteers, states, in reply to letter from special examiner, that he remembers Parker, and was on duty with him when he was injured, and he never did any duty afterwards.

Thinks it was his hip or ankle that was injured by a small tree hitting him, but can not recall the particulars to mind.

The surgeons of the regiment have been corresponded with, but they fail to remember claimant.

Henry C. Hill, postmaster, Isle La Motte, Vt., testifies that he has known claimant since he was a boy, and prior to 1862 he seemed to have some trouble with his ankles and he had a flat foot. He walked with the right foot more turned than the left and it was flat, broken down in the instep so that there was no hollow; sold him boots from the time he was old enough to wear them until he enlisted, and he walked on the "inner side" of his feet, but he turned the right foot more than the other, wore it out on the inner side of the sole, and broke

down the shank directly. It is reported that he has met with two or three accidents on the railroad since the war. He has no bias or prejudice in this mat-

down the shank directly. It is reported that he has met with two or three accidents on the railroad since the war. He has no bias or prejudice in this matter.

Polly A. Goodsell testifies that she is claimant's sister, and that when he was a boy eight or nine years old he fell off a car and sprained his ankle; it was not broken, and he got well in a little while and never was a cripple until he came home from the war. He never had a flat foot until he came home from the Army, and always wore his boots as straight as any of the other boys, and nothing was the matter with his feet when he enlisted; remembers of two accidents received since the war. Last winter he got jammed in coupling cars and hurthis stomach, and about sixteen years ago he had his shoulders squeezed.

Elizabeth Parker testifies that she is claimant's mother, and that when he was about 15 years of age, in attempting to get off a train while it was in motion the heel of his boot dragged along the ground as he hung on, and turned his right ankle and sprained it. In two weeks he was walking around again, and he never had any more trouble with that foot until he went into the Army. Both feet were alike when he enlisted, and he walked as well as ever he did, had no flat foot and did not break down the shank of his boot. He got doubled together on the cars about fifteen years ago and dislocated his right hip. Is certain that it was his right hip, because we have spoken about it a good many times; that all the injuries he has received have been on that limb. Has noticed that his foot has changed since then. He had a lump on his ankle as big as her fist when he came from the Army, but she did not see that his foot was any different from what it was when he enlisted; but since he got that hip hurt she can see a change in his foot, and it is flattened out and turned sideways. He has met with two other accidents on the railroad since, and both of them to the right limb, and of course that goes to affect the foot and ankle. He said when he returned that he

The papers were sent to the Senate Committee on Pensions February 6, 1885, and returned April 15, 1886.

Medical examination by the Plattsburg board, held August 6, 1885, shows as follows:

follows:

The internal malleolus of the right foot is extra prominent. Immediately below this malleolus is another bone, one of the tarsus, which is nearly as prominent as the malleolus. Below this other bone is a large callus of the integument. The ball of great toe and the internal border of the same toe are also the seat of hard calluses of the integument. The foot is everted, so that he walks on the internal border of this foot. The arch of this foot is entirely obliterated. His boot shows that he walks constantly on the internal border. There is considerable motion of the ankle, and the motion of the toes are not interfered with. with

With.

Rated total for injury of right ankle.

The wrapper or jacket in which the papers were kept has the following indorsement (we call especial attention to that, which shows that a special act was pending):

Returned from S. C. (Senate Committee) April 15, 1886.

[Indorsed on jacket.] [Indorsed on jacket.]

No. 335797.

Newcomb Parker; P.O., Rouse's Point, N.Y.

Service: Co. K., 11th Vt. Vols.

Enlisted July 14, 1862.

Discharged Feb'y 8, 1864.

Application filed Jan'y 7, 1880.

Alleges dislocation of right ankle.

Attorney: George L. Clark, Plattsburgh, N.Y.

Nov. 19, 1885, Clark informed rejected; claimant is unable to prove any dis. in ervice he did not have prior thereto.

June 22, 1886, date and cause of rejection to claim't through Hon. H. G. Bureigh.

June 22, 1886, date and cause of rejection to claim't through Hon. H. G. Burleigh.

Ret'd from S. C. April 15, 1886.

June 24, 1886, letter to Att'y Clark (see copy).

In the indorsement of April 15 the letters "S. C." are used for "Senate Committee" by the custom of the office, and indicate, of course, to any one examining the papers that the papers have been in the possession and on that date returned from possession of that committee.

June 24, the Commissioner makes the order indicated by the following paper now among the files:

[335797. Newcomb Parker, Co. K, Eleventh Regiment Vermont Volunteers.]

Mr. MACE

Chief Eastern Division:

The honorable Commissioner directs that this claim be allowed under his ruling No. 181.

Prior to June 29 all these things have taken place at the Pension Office, the bill and the action of the Pension Office considered by the Executive, and on the 29th the President of the United States sends the following veto message to the

[Senate Ex. Doc. No. 194, Forty-ninth Congress, first session.] Message from the President of the United States returning Senate bill 1077 without his approval.

To the Senate:

I hereby return without approval Senate bill number ten hundred and seventy-seven, entitled "An act granting a pension to Newcomb Perker."

This claimant filed an application for a pension in the year 1880.

Before the passage of the bill herewith returned, the Commissioner of Pensions, in ignorance of the action of Congress, allowed his claim under the general law. As this decision of the Pension Bureau entitles the beneficiary named to draw a pension from the date of filing his application, which, under the provisions of the special bill in his favor, would only accrue from the time of its passage, I am unwilling that one found worthy to be placed upon the pension-rolls by the Burean to which he properly applied should be an actual loser by reason of a special interposition of Congress in his behalf.

GROVER CLEVELAND.

EXECUTIVE MANSION. June 29. 1886.

EXECUTIVE MANSION, June 29, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington, on Monday, the seventh day of December, one thousand eight hundred and eighty-five.]

An act granting a pension to Newcomb Parker.

Be il enacted by the Senate and House of Representatives of the United States of Amera in Congress assembled, That the Secretary of the Interior be, and he is hereby,

authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of Newcomb Parker, late of Company K, Eleventh Regiment of Vermont Volunteers.

JOHN G, CARLISLE,

Speaker of the House of Representatives.

JOHN SHERMAN,

President of the Senate protempore.

I certify that this act originated in the Senate.

ANSON G. McCOOK,

By CHAS, W. JOHNSON, Chief Clerk.

The following letter of the Commissioner, addressed to the committee, dated February 6, 1886, proves that as early as that date he was informed of the action going on in Congress, that from and after that date he was not in ignorance of the proceedings for a special act, and that up to that date, when he transmitted the papers to the Senate, nothing had been done in the way of reconsidering the case, and as matter of fact nothing was done until in the month of June last:

Department of the Interior, Pension Office, Washington, D. C., February 6, 1886.

Washington, D. C., February 6, 1886.

Sin: In response to your request, I have the honor to transmit herewith the papers in the claim for pension of Newcomb Parker, late private of Company K, Eleventh Vermont Volunteers, original number 33579. The claim was rejected on the ground that the claimant is unable to prove that he contracted or had any disability in service that he did not have prior to enlistment.

Very respectfully,

JOHN C. BLACK, Commissioner.

Commissioner.

Hon. John I. Mitchell,
Chairman Committee on Pensions, United States Senate.

The Senate kept the papers until the bill was reported and returned to them April 15. During the time the papers were in possession of the Senate nothing would have been done by the Commissioner. The bill passed the House on the 12th of June. It was in possession of the House from and after its passage by the Senate, April 21, up to June 12. It was reported to the House some days earlier, on May 11, and after the House report was made, the papers, if the House had called for them, would have been returned to the Pension Office. Accordingly, on the 12th of June, we find the Pension Office astir, as by the following appears:

BOARD OF REREVIEW, June 12, 1883.

[No. 335797. Newcomb Parker, Co. K, 11th Reg't Vt. Vols.]

[No. 335797. Newcomb Parker, Co. K., 1113. Acg.

Respectfully referred to the medical referee.

Please look over this case and state whether, in your opinion, claimant's present condition is due entirely to injury of right ankle and flat foot, shown to have existed prior to enlistment; or whether if it is accepted that he received an injury to said ankle in the service, you can separate the two, and rate for the disability which may be due to the service, as per Commissioner's ruling No. 181.

GEO. O. EVANS,

Gereviewer.

Approved: F. W. Poon, Acting Chief Board Rereviewer.

MEDICAL DIVISION, PENSION OFFICE, Washington, D. C., June 14, 1886.

[No. 335797. Newcomb Parker, Co. K, Ilth Reg't Vt. Vois.]

Respectfully returned to Mr. Poor, acting chief board of rereview.

To say exactly what degree of disability is due to the injury received before enlistment and to that alleged to have been received in service is impossible, but if the alleged injury is accepted legally, then it is, in my opinion, the duty of the medical division to separate the injuries received before and after enlistment, and grant a rating for the injury as legally accepted.

GEORGE P. DU BOSE,

Medical Examiner.

Approved:
P. H. Barton,
Acting Medical Referee. This completes the light thrown upon the subject by the records, except as by the following unsigned document which comes to us among the files:

[No. 335797. Newcomb Parker, Company K, Eleventh Vermont Volunteers.]

DEPARTMENT OF THE INTERIOR, PENSION OFFICE,
Washington, D. C., June 23, 1886.

SIR: In reply to your communication of recent date relative to the aboveentitled claim, I have the honor to state that I have caused the evidence to be
carefully examined and have personally considered the same.
You are informed that the case is now under consideration with a view to its
allowance, and certificate will be issued as soon as the exigencies of the work of
this office will admit.

Very respectfully,

Commissioner.

GEORGE I. CLARK, 916 F street, City.

George I. Clark, 916 F street, City.

Now, we submit in this connection the French proverb that "he who excuses accuses," and also the legal maxim, "unusual clauses always induce a suspicion." With all the rest, why does the President in his message suppress the fact that this claim had been formally rejected by the Pension Office, so that the claimant had no remedy but in the interposition of Congress? Why does he take pains to state that" in ignorance of the action of Congress? Why does he proceed to express his anxiety to save the claimant from the loss of arrears of pension by the action of Congress when such action would have no such effect, not in the least impairing his right to the allowance of the arrears, save by the force of a recent unaccountable ruling of the present Commissioner, reversing all previous practice and violating all equity and, we believe, all legal right, made apparently as a punishment to those who dare to apply to Congress for relief, no matter what the outrage they may have suffered in the toils of the office.

Why does the President so write this message as to place Congress (whose action was based upon the rejection of the claim by the Commissioner), himself, and the Commissioner, and unfavorable to the Legislature of the country?

Can any one believe that the Commissioner of Pensions reversed his own deliberate action rejecting this claim without a particle of further evidence or any trace of reason save as the result of the proceedings in Congress, of which it is simply absurd or worse to deny his knowledge, or at least knowledge of those who reviewed and reversed his previous action, and allowed this claim just in season to enable the President to write this peculiar veto which places Congress in the attitude of inflicting hurt to the claimant by its meddlesomeness?

The President could not have been familiar with the facts in this case; all he knows of them comes from the Commissioner of Pensions or from his office.

Who told him that the Commissioner had reversed the rejection and allowed the claim in ignorance of the action of Congress? That assertion must have come from the Commissioner, for no one else could have known of his want of knowledge. The Commissioner decided June 24 to allow the claim. June 21 the enrolled bill went to the President. Was the enrolled bill in possession of the Commissioner before he decided to allow this claim? However that may be, is it conceivable that, with the office stirred up by this pension controversy and the constant watchfulness of the office over the proceedings of Congress and the correspondence going on between committees and the office, the overhauling and transmission of files, and the special attention thus called to each case, besides the public proceedings, reports, passage of bills recorded in our Congressional daily, which goes in numbers to all Executive Departments, to say nothing of the omnipresent newspapers of the land, that the eyes of the men who do the work in the office were not fixed upon their mjust and unreasonable decision in this case, and that whether or not those who were urging the claim in Congress called the attention of the Commissioner to it, the allowance of this claim is not wholly due to the action of Congress and not "in ignorance" of that action?

There can be no good cause assigned for this ruling of the Commissioner, refusing, by reason of special acts, the right to prosecute under the general laws for arrears justly due, except in the few cases where Congress makes express or plainly implied provision that the pension granted is in lieu of all claims whatsoever. Even then, when the claim is for a vested right under existing and general laws, which is the fact in this and nearly all other cases, the action of the legislative power would fail, for a vested right can not be taken away by act of Congress, and pensions due by virtue of laws existing when the contract of enlistment should be, held to be, in effect, vested rights protected by all subse

committee:
"At a regular meeting of the Committee on Pensions, June 29, 1886—
"Ordered, That the several veto messages of the President be referred, respectively, to the members of the committee who reported the bills vetoed, with instructions to examine and report the same back to the Senate, submitting any questions to the committee for advice and re-examination which they think necessary, and that any member of the minority of the committee have leave to present dissenting views."

JOHN S. KIRKPATRICK.

[Senate Report No. 1562, Forty-ninth Congress, first session.] IN THE SENATE OF THE UNITED STATES.

JULY 24, 1886.-Ordered to be printed.

In the Senate of the United States.

Juny 24, 1886.—Ordered to be printed.

Mr. Blair, on behalf of the majority of the Committee on Pensions, submitted the following report (to accompany bill S. 1787 and message):

The majority of the Committee on Pensions, to whom was referred the message of the President of the United States, returning Senate bill No. 1797, granting a pension to John S. Kirkpatrick; with his objections to the passage of the same, have considered the message and reconsidered the bill and the evidence in support thereof, and report recommending the passage of the bill not withstanding the objections of the President.

The principal portion of the evidence on file in the Pension Office in this case is herewith printed, as well as the Senate report, the veto message, and the petition of the applicant praying for the passage of the bill over the veto.

It will be perceived the message of the President is founded upon the declaration of the Commissioner that this case has not been in effect rejected by the Commissioner. The letter of the Commissioner so notifying the applicant of the rejection is printed herewith, and it is quite idle if not an unwarrantable trifling with the proper verity of official statement to say that this case was still pending before the Commissioner of Pensions when application was made to Congress for relief. Besides, were this so, there is no impropriety in the petition of this man addressed to Congress for relief; and it is an invasion of the right of petition on the part of the citizen, and of the right and duty of the legislative power to hear such petition, and in its discretion—not that of the Executive—to determine whether and in what form it will grant relief, to say that this bill shall be rejected, or ought to be rejected, because the applicant had no right to apply as yet to Congress for redress of grievances.

There may be good grounds for vetoing this bill, but the fact that Congress has seen fit to pass it or to entertain it before the Commissioner of Pensio

sions.

A bill for that purpose has been reported to the Senate by your committee, and if it should become a law it would remove from Congress to the jurisdiction of local courts and juries of their neighbors at least four-fifths of all the cases which now overwhelm Congress and the Executive, and try the strength, not to say the patience, of both.

If there never had been any Pension Office for other purposes than to furnish transcripts of record and the like, who believes that it would have taken a quarter of a century for local tribunals in the States to find one-half or two-thirds of their soldiers who were or are entitled to pensions? The system, however, must

stand, probably. There might be improvement by the removal of its imperfections and abuses. We have suggested one. A wise and vigorous Commissioner, properly sustained, can remove many of the existing evils, and it is to be hoped that a great opportunity will not be lost by the present incumbent of that important office.

The committee have taken care to criticise the system rather than the individual men who administer it, in order that they may not confound themselves in the execution of their practical duties with the legislative power.

The committee will leave the Senate and the country to judge between the parties on the evidence in this case. It does not seem to us that the nation can evade the payment of this pension, but perhaps it can be done. The committee, however, respectfully beg leave to be excused from participation in this work, and recommend the passage of the bill, the objections of the President to the committee, of which the following is a copy:

At a regular meeting of the committee June 29, 1885—

Ordered, That the several veto messages of the President be referred respectively to the members of the committee who reported the bills vetoed, with instructions to examine and report the same back to the Senate, submitting any questions to the committee for advice and re-examination which they think necessary, and that any member of the minority of the committee have leave to present dissenting views.

[Senate Report No. 618, Forty-ninth Congress, first session.]

[Senate Report No. 618, Forty-ninth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (8,1797) granting a pension to John S. Kirkpatrick, have examined the same, and report:

a pension to John S. Kirkpatrick, have examined the same, and report:

That the records in this case show that claimant was a private in Company K, First Regiment Colored Volunteers; that he was a sound, strong man when he enlisted, and that during a long, tedious March from Fort Craig to Fort Union, New Mexico, he contracted varicose veins, which have ever since that time prevented him from performing manual labor. That he is sixty-five years of age, and totally unfit for any manual labor. Statement of claimant is corroborated by testimony of comrades and neighbors; also, by certificates of examining surgeons L. D. Hall and Max Kennedy, who both testify that this is the worst case of varicose veins they ever saw; and rate his disability total therefor.

Taking into consideration all the testimony on file in this case, the committee believe it to be their duty to report in favor of this bill, and recommend its pas-

Message from the President of the United States returning Senate bill 1797 without his approval.

JUNE 30, 1886.—Read and referred to the Committee on Pensions and ordered to be printed

To the Senate:

I hereby return Senate bill number seventeen hundred and ninety-seven, entitled "An acting granting a pension to John S. Kirkpatrick."

This claimant appears to have enlisted December 10, 1861, and to have been discharged December 20, 1864. He is borne upon the rolls of his company as present up to June, 1862; in July and August, 1862, as on detached service as hospital attendant, and so reported February 28, 1863. In March and April, 1863, he is reported as present, and in May and June, 1863, as on detached service. There is nowhere in his service any record of disability.

He filed his application for a pension in 1880, in which he alleged that from hardship and exposure on a long march in New Mexico in the month of December, 1862, he contracted varicose veins in his legs.

As I understand the record given above, this claimant was on detached service from July, 1862, to February, 1863.

It will be observed that his claim is that he contracted his disability within that time, and in December, 1862. He appears also to have served for two years after the date of his alleged injury, and that he did not file his application for pension till about sixteen years afterwards.

His claim is still pending, undetermined, in the Pension Bureau, and if there is merit in it there is no doubt that he will be able to make it apparent.

GROVER CLEVELAND, Executive Mansion, June 29, 1886.

EXECUTIVE MANSION, June 29, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington, on Monday, the seventh day of December, one thousand eight hundred and eighty-five.]

one thousand eight hundred and eighty-five.]

An act granting a pension to John S. Kirkpatrick.

Be it enacled by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension-roll, subject to the provisions and limitations of the pension laws, the name of John S. Kirkpatrick, late a private in Company K, First Colorado Regiment.

JOHN G. CARLISLE,

Speaker of the House of Representatives.

JOHN SHERMAN,

President of the Senate pro tempore.

I certify that this act originated in the Senate.

ANSON G. McCOOK, By CHAS, W. JOHNSON, Chief Clerk. etary,

To the honorable Congress of the United States :

To the honorable Congress of the United States:

I, John S. Kirkpatrick, your petitioner, would respectfully say that it has just come to my knowledge that the President has vetoed the bill recently passed by Congress requiring my name to be placed on the pension-roll.

The circumstances in my case are peculiar. At the time I became injured I was many hundreds of miles away from my company and practically alone, and did not rejoin the company for nearly four months thereafter, consequently few knew of my injury. Our company was made up of men from seventeen States and many foreign countries and became widely scattered. Ten years' searching has enabled me to find only three of the old members, and they know nothing that could be of any use in this case.

In November, 1882, I sent an affidavit to the Pension Office in which I stated that I had no more proof to offer, and asked the office to allow the claim or reject it on the proof then offered. I have ceased to seek for proof, believing it to be useless.

I do not think it was the intent of the law that it should be administered so

to be useless.

I do not think it was the intent of the law that it should be administered so as to compel a man to bankrupt himself in order to sustain a just claim. I believe that the rule of the Pension Office requiring direct proof is the cause of most of the frauds in the pension business.

I could have satisfied the requirements of the Pension Office years ago by dividing the money with men who would have sworn to the best advantage and stuck to it, but I prefer defeat to fraud.

All of our company officers are dead. The President could probably understand the difficulty of obtaining their evidence.

Had there been any probability of my obtaining testimony I would not have risked the loss of more than twenty years of back pension by appealing to Con-

gress. Had I not been disabled I would have remained in the Army longer, as the \$800 of Government and local bounties then obtainable was a great temptation, as the end of the war was visible.

For nearly twenty-four years I have never for one hour been free from pain. I have striven to live without the aid to which I was justly entitled. My sixty-five years of age notifies me that the end is not far off. I am no longer able to earn a living, and appeal to judgment of Congress as against the malignant injustice of the President.

A victim of the brutal want of system of the American military system, I appeal to you for a fraction of justice. No amount of money would compensate my suffering, but a reasonable amount would add to my comfort. I admit that the proof is meager, but when did genuine courage and endurance take thought to leave a plain trail behind? I throw myself on your mercy. Pass the bill—the Pension Office objections to the contrary—or acknowledge that your pension system is a fraud and a delusion.

And for this I will ever pray.

JOHN S. KIRKPATRICK.

JOHN S. KIRKPATRICK.

CLAY CENTER, KANS., June 30, 1886.

APPENDIX.

COPIES OF PAPERS FILED IN ORIGINAL PENSION CLAIM OF JOHN S. KIRKPAT-RICK.

Declaration for original invalid pension.

STATE OF KANSAS, County of Clay, ss:

STATE OF KANSAS, County of Clay, ss:

On this 11th day of June, A. D. one thousand eight hundred and eighty, personally appeared before me, clerk of the district court, a court of record within and for the county and State aforesaid, John S. Kirkpatrick, aged 58 years, a resident of the township of Oakland, county of Clay, State of Kansas, who, being duly sworn according to law, declares that he is the identical John S. Kirkpatrick who was enrolled on the 10th day of December, 1861, in Company K, of the First Regiment of Colorado Volunteers, commanded by Capt. Samuel M. Robbins, and was honorably discharged at Denver on the 20th day of December, 1864; that his personal description is as follows: Age, 58 years; height, 6 feet 1½ inches; complexion, medium; hair, dark; eyes, hazel. That while a member of the organization aforesaid, in the service and in the line of his duty between Ft. Craig and Ft. Union, in the Territory of New Mexico, on or about the 13th day of December, 1862, he, from hardship and exposure on the route, he contracted varicose veins of the legs, and that he has suffered with said varicose veins continually since that time, and is unable to do any considerable amount of manual labor.

veins continually since that time, and is unable to do any considerable amount of manual labor.

On or about the 15th day of December, 1862, he was attached to Co. B, 2d Col. Volunteers, and was reported to the post surgeon on the company sick-list. That he was treated in hospitals as follows: Fort Union about the 22d of December and for some days thereafter; that he has never been employed in the military or naval service otherwise than as stated above; that since leaving the service this applicant has resided in the counties of Douglass, Ottawa, and Clay, in the State of Kansas, and his occupation has been that of a farmer; that prior to his entry into the service above named he was a man of good, sound physical health, being, when enrolled, a carpenter; that he is now partially disabled from obtaining his subsistence by manual labor by reason of his injuries, above described, received in the service of the United States, and he therefore makes this declaration for the purpose of being placed on the invalid pension-roll of the United States.

He hereby appoints, with full power of substitution and revocation, E. H.

the United States.

He hereby appoints, with full power of substitution and revocation, E. H. Gelston & Co., of Washington city, District of Columbia, his true and lawful attorneys to prosecute his claim; that he has never received nor applied for a pension; that his post-office address is Oak Hill, county of Clay, State of Kansas.

JOHN S. KIRKPATRICK.

Attest:

A. F. SCHAEBER, J. W. EWING.

Also personally appeared A. F. Schaeber, residing at Clay Center, and J. W. Ewing, residing at Oak Hill, persons whom I certify to be respectable and entitled to credit, and who, being by me duly sworn, say they were present and saw John S. Kirkpatrick, the claimant, sign his name (or make his mark) to the foregoing declaration; that they have every reason to believe, from the appearance of said claimant and their acquaintance with him, that he is the identical person he represents himself to be; and that they have no interest in the prosecution of this claim.

A. F. SCHAEBER. J. W. EWING.

Sworn to and subscribed before me this 11th day of June, A. D. 1880, and I hereby certify that the contents of the above declaration, &c., were fully made known and explained to the applicant and witnesses before swearing, including the words "at" and "State of" erased; and that I have no interest, direct or indirect, in the prosecution of this claim.

[L. S.]

JOHN F. RYERSON.

Received direct from cl'm'nt.

JOHN F. RYERSON, Clerk Dist, Court Clay Co., Kansas.

E. H. G. & CO. Filed by E. H. Gelston & Co., Washington, D. C. (Stamped:) Department of the Interior, Pension Office, Jun. 16, 1880.

Examining surgeon's certificate in the case of an original applicant. [No. of application, 378,687; State, Kansas; county, Cloud.]

Post-Office, Concordia, Nov. 24/h, 1881. I hereby certify that I have carefully examined John S. Kirkpatrick, late a private Co. "K," lat Reg't, Col. Vols., in the service of the United States, who is an applicant for an invalid pension by reason of alleged disability resulting

is an applicant for an invalid pension by reason of alleged disability resulting from varieose veins.

In my opinion the said John S. Kirkpatrick is totally (\$8.00) incapacitated for obtaining his subsistence by manual labor from the cause above stated.

Judging from his present condition, and from the evidence before me, it is my belief that the said disability did originate in the service aforesaid in the line of duty.

The disability is likely to continue.

A more particular description of the applicant's condition is subjoined:

Height, 6 ft. 1\frac{1}{2} in.; weight, 165 aprox.; complexion, dark; age, 60; pulse, ——;

Height, 6 ft. 14 in.; weight, 160 aprox.; complexion, dark; age, 60; pulse, —; respiration, —.

The worst case of varix that I have ever met with. On left leg the veins are distended to an enormous size from the groin nearly to the toes, making it necessary to abandon a No. 9 boot and wear a No. 12. Right leg is affected from the knee to the instep, but not so bad as its fellow. There is on the right leg, below the knee, a varicose tumor, so to speak, as large as half of a goose egg. He says that work or exercise on his legs makes them much worse, sometimes swelling to twice their natural size.

L. D. HALL.

L. D. HALL, xamining Surgeon.

(Stamped:) U. S. Pension Office, Nov. 28, 1881.

*See diagram.

Examining surgeon's certificate in the case of an original applicant.

[No. 378,687. Name of claimant, John L. Kirkpatrick, private Company K, first Colorado Cavalry. Examining surgeon's address: Junction City, Davis County, Kansas. Date of examination, November 15, 1882.]

I hereby certify that I have carefully examined this applicant, who claims that while in the service of the United States, at or near a place named —, and while in line of duty, on or about the — day of —, 18—, he incurred varicose veins, and that in consequence thereof he is totally disabled for earning his subsistence by manual labor.

He states that he is 61 years of age, that he weighs 165 pounds, and that he is 6 feet 1½ inches in height.

His pulse rate per minute is 66, his respiration 17, and his temperature not taken.

His pulse rate per minute is 66, his respirator of taken.

The examination reveals the following facts:

This is the worst case of varicose veins it has been my lot ever to see. I have never seen anything like them, extending from the lower part of the abdomen down each leg to the toes. He said he never had any of it until after he entered the Army, and although he suffered very much with them, he never complained or spoke of his condition to any one, and always was on duty, and never was treated for them by any physician or surgeon; says he is not able to produce any testimony in regard to his condition while in the service; he looks like an honest man speaking the truth, and if so, should have a total pension; he says he never pretends to work; can not stand upon his legs very long at a time.

From the condition and history of the claimant, it is my opinion the disability was incurred in the service as claimed, and that it is not aggravated or protracted by vicious habits.

I find the disability as above described to entitle him to total rating.

MAX. KENNEDY,

Examining Surgeon.

OAK HILL, KANS., Nov. 10, 1882.

[J. George Dieter, dealer in dry goods, groceries, boots, shoes, hats, caps, drugs, etc.]

WM. W. Dudley,
Commissioner of Pensions, Washington, D. C.:

Sir: Yours of 10 | 19 to hand. Have been trying to find particulars in ease J.
L. Kirkpatrick, but failed, as there was nobody from here in the same company

L. Kirkpatrick, but laned, as there was the with him.

I know him personally since 1868; has been sickly ever since I know him, but have never asked him what was the matter. He is a strict, quiet citizen; has filled the office of township trustee, and also as justice of the peace; has filled both offices with credit. This is all I know about him, as he is very quiet. If you wish me to inquire of him, let me know.

Very respectfully yours,

J. GEO. DIETER, P. M.

STATE OF KANSAS, County of Clay ss:

In the matter of a pension for John S. Kirkpatrick, late private of Co. K, 1st Cavalry of Colorado, personally comes the afflant, who, being first sworn, on oath says: I was a lieutenant in Company F, 1st Cavalry of Colorado, and was partially acquainted with the aforementioned John S. Kirkpatrick while in the Army, and have been well acquainted with him for the past fifteen years, and know him to be an upright, honorable gentleman, and would have no doubts of the truth of any statement he may make in regard to his disability; and afflant further swears that he is not interested in the prosecution of the claim, and his post-office address is Oak Hill, County of Clay, State of Kansas.

S. N. ACKLEY.

post-office address is Oak Hill, County of Clay, State of Kansas.

JOHN D. WELLS, J. P.

On the sixth day of February, 1882, John S. Kirkpatrick, of the township of Oakland, in Clay County, Kansas, did appear before the clerk of the district court for the county of Clay, and being duly sworn says: That he is the person who has filed a claim for pension in the Pension Office at Washington, D. C., said claim being numbered 378687, and that he is unable to furnish direct proof of disability, as claimed by any officer or soldier of Company K, of the First Colorado Volunteers, or by any other person.

When the last companies of Colorado troops were about to leave Ft. Craig, N. M., to return northward some members of the regiment were left in the Ft. Craig Hospital, and I was detailed by regimental order to remain with them and take care of them. The hospital regulations prohibited me keeping any private blankets or clothing at the hospital. When the sick men got able to ride in a wagon we left Ft. Craig and went to Peralto, soon after to Santa Fé and Fort Union. Having no blankets except two small hospital blankets, no overcoat, and not half clothed otherwise, I suffered severely. Sleeping in the snow at night and walking fast every day to keep up with the wagon, the intense cold and excessive fatigue together produced my disability. (I had to give my blankets to the cripples in the day-time and had to walk or freeze.) There was no officer in charge of us during the trip, and no officer or man of our company knew anything of me at this time. The fact that I made that terrible march from Denver to Fort Craig is indisputable proof that I was a sound man when I enlisted; I was thoroughly examined and pronounced sound by the assistant regimental surgeon. The company was formed of men who were total strangers to me, and generally to each other, whose homes were in more than twenty different States and countries, consequently our friendships were slight and soon forgotten. I have not known the address of any member of the company for about eight years. I make this statement to show why direct proof is impossi

Medical evidence.

STATE OF KANSAS, County of Clay:

STATE OF KANSAS, County of Clay:

John S. Kirkpatrick, whose post-office address is Oak Hill, county of Clay, State of Kansas, and whose age is now sixty years, being first duly sworn, says that he is not a regular practicing physician of — years' standing, and that he gave medical advice and treatment to himself, late a private in Company K, of the First Regiment of Colorado Vols, as follows: Commencing in April, 1865, I wrapped my limbs in tight bandages from the toes to above the knees, and then applied cold water by pouring on the bandages. This practice was continued until June, about two months. In the latter part of June I was compelled to go to work, when treatment had to be discontinued. It had done no good, however, further than temporarily to allay the feverishness. I find by my account-book that for the next five months I worked, when able, at the rate of three dollars per day; that my best week's work brought me \$10.50, and my average earnings was only \$4.50 per week; two-thirds of this loss was caused by this disability.

I further swear that I am interested in this claim for pension.

JOHN S. KIRKPATRICK.

Subscribed and sworn to before me this 27th day of February, 1882. The affiant is the person he represents himself to be, and a credible witness. I am not interested in this claim. Witness my hand and seal the day and year above written. Certificate filed. JOHN D. WELLS, J. P.

(Stamped:) U. S. Pension Office, Mar. 11, 1882.

Claimant's affidavit.

STATE OF KANSAS, County of Clay, ss:

Comes now John S. Kirkpatrick, claimant for original pension No. 378587, who, being first duly sworn on his solemn oath, deposes as follows:

I am the claimant above named; for five years prior to my enlistment in the U.S. service my place or places of residence were as follows: Washington, Franklin Co., Mo., until 1859, then in various parts of Colorado, principally near Breckenridge, on Blue River. My occupation during said time was house carpentering and gold-mining chiefly. My occupation since discharge has been chiefly stock-raising. Since my discharge to the present time I have resided at the following place or places: At Denver, Colorado, until March, 1865; at Lawrence, Kansas, until May, 1896; and have occupied a place partly in Ottawa and also Clay Cos., Kansas, till now.

The following is a full and complete history of my disability and its incurrence from the time it first appeared to the present: On account of excessive fatigue and extreme cold the veins of both legs became variose in December, 1862, so as to be very annoying and somewhat painful. Before quitting the service I could hardly mount a horse. For six or seven years I could do \(\frac{1}{2}\) a man's work; for the last 10 y, less than a \(\frac{1}{2}\).

The following is a complete statement of all the treatment I have received for said disability, together with the names and places of residence of all the doctors who have treated me: I described my feelings and symptoms to the post physician at Fort Union, N.M., in December, 1862. Without any examination he pronounced it rheumatism, and prescribed a dose of "magnesia." I never called on him again.

I have been my own doctor for more than thirty years, except while in the Army. Never employed but one doctor in my life.

I have had no disease of any kind since my discharge from the Army, except occasional biliousness, which never lasted more than two or three days at a time. I have been greatly troubled with fevers whenever I took any severe exercise or attempted any real labor.

In the summer of 1866 I wrought at the carpenter's trade about half time, and a few days occasionally since. My chief occupation for the past ten years was feeding stock.

And I further declare that my present P.O. address is Oak Hill, Clay County, State of Kansas.

JOHN S. KIRKPATRICK.

JOHN S. KIRKPATRICK.

Sworn and subscribed to before me this 6th day of February, 1882. I have no interest whatever in the prosecution of this claim.

[SEAL.]

JOHN F. RYERSON. JOHN F. RYERSON, Clerk District Court, Clay County, Kansas.

(Stamped:) U. S. Pension Office, Feb. 21, 1882.

[Original Pension Claim No. 378687.]

[Original Pension Claim No. 378687.]

I, John S. Kirkpatrick, claimant in the above claim, having received from the Pension Office at Washington [3-078] and [3-474] calling for further testimony in the case, do say on oath:

That when I enlisted at Denver, Col., about Dec. 10th, 1861, I was a sound man in every respect, and entirely free from varicose veins, and rely on the examination by the assistant regimental surgeon for proof of the same. I also claim as good incidental proof that I served the U.S. Government faithfully and fully for more than three years. I can furnish no further proof of my condition at enlistment.

With recent to my condition of the same of the condition of the same of the condition at enlistment.

for more than three years. I can furnish no further proof of my condition at enlistment.

With regard to my condition after discharge, I have heretofore submitted the best proof attainable. The affiants could not testify to the nature of my disability, for they never knew until I informed them when I applied for their statements. I did not go around the country naked trying to make a case, but did try all those years to conceal my disability until I concluded to move for a pension. I have nothing more direct to offer.

With regard to the officers whose addresses were furnished by the Department I say that I never saw Dr. Hamilton but once to know him, and never spoke with him. I knew Maj. Wyncoop well by sight but never spoke to him. Dr. Tolles I have not spoken with since the 25th day of March, 1862. It would be useless to apply to either of them.

Proof of my destitution at the time my disability was contracted may be found in the accounts of Co. B of 2d Col. Vols., for I drew clothing through that company to the amount of over thirty dollars, which is still unpaid for by me. Further proof may be found in the U.S. Land Office. I took a homestead claim in 1870, but being unable to build on it, I had to allow it to revert to the Government. The land was principally in sec. 24, T.9 S., R.1 west. I have never obtained title to 1 acre of land from the United States.

STATE OF KANSAS,

STATE OF KANSAS, Davis County, ss:

John S. Kirkpatrick, being sworn, says the above and foregoing statement is true. [SEAL.] JOHN S. KIRKPATRICK.

Subscribed and sworn to before me this 15 day of November, A. D. 1882. S. D. UNDERWOOD, Probate Judge of Davis Co., Ks. (Stamped:) U. S. Pension Office, Nov. 28, 1882.

[Original pension claim 378687, Iowa division.]

OAK HILL, CLAY Co., KANS., Sept. 8, 1882.

Hon. W. W. Dudley:

Let my 61 years of age and almost twenty of unceasing suffering plead for early action on the above claim.

Very respectfully, &c.,

JOHN S. KIRKPATRICK,

Formerly of Company K, 1st Colorado Volunteers.

Settle if complete. Desk of Commissioner. Filed Sept. 11, 1882.

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, D. C. Oct. 19, 1882.

Sir: Will you please inform this office what you may know regarding John S. Kirkpatrick, who has applied for a pension under claim No. 378687, and who was a member of Co. K., 1st Col. Cav., and who alleges that he contracted varicese veins Dec. 13, 1862, between Forts Craig and Union, N. Mex., and has suffered from the same ever since. Any information you may be enabled to furnish, will be duly appreciated. Please return this letter.

Very respectfully,

WM. W. DUDLEY,

Commissioner. B.

The Postmaster, Oak Hill, Clay Co., Kas. (Stamped:) U.S. Pension Office, Nov. 16, 1882. STATE OF MINNESOTA

County of Nicollet, ss:

County of Nicollet, ss:

In the matter of the invalid pension claim acct. of John S. Kirkpatrick, Pension Office, No. 37887, of Company K. First Regt. Colorado Volunteers.

On this 12th day of March, A. D. 1883, personally appeared before me, Jonas Anderson, a resident of St. Peter, Nicollet County, in the State of Minnesota, a respectable citizen and entitled to credit, who, being duly sworn, says that he was formerly a private in Co. K. First Regt., Colorado Vols., and was well and intimately acquainted with said Kirkpatrick from the time of affiant's enlistment, or a few days after that time, until a long time after being mustered out of the service, and that from about the month of March, in 1863, affiant and said Kirkpatrick slept together as "bunkies" until mustered out as aforesaid; that when said command left Denver in February, 1862, on the march to Forts Union and Oraig, said Kirkpatrick had the appearance of, and acted as, a man in the enjoyment of perfect health. And he endured the march to Fort Craig as well as any man in the company, and while the command remained at Fort Craig he

took as much exercise as any man in the co., and when we left him at that place in August, 1862, he appeared and acted as being perfectly sound and

took as much exercise as any man in the co., and when we left him at that place in August, 1862, he appeared and acted as being perfectly sound and healthy.

Afflant states that he took the blankets and clothing of sald Kirkpatrick with him to Denver and delivered them to him there about the latter end of March, 1863. Afflant further states that from the intimacy existing between them he is satisfied that said Kirkpatrick would have mentioned the fact to him if he had not been sound and healthy, but that he never did mention such fact prior to their separation at Fort Craig in August, 1862. Afflant further states that after said Kirkpatrick did rejoin the command at Denver, in March, 1863, as aforesaid, he told this afflant for the first time that he suffered, and that his blood was disordered in some way. Upon the march to Fort Larned, in Kansas, the regt., being then mounted, Lieutenant Hill of said co. always excepted said Kirkpatrick when requiring the co. to walk. Afflant also noticed that after March, 1863, he, the said Kirkpatrick, when eating, did not sit down as others did if the ground was wet or damp, but stood up; and that when sitting upon dry ground it was with his legs extended, and that when after "squatting" down and attempting to rise after a few minutes he would fall as though he had been shot, none of which symptoms or actions were exhibited by him until after he rejoined the command at Denver, in March, 1863.

And afflant further declares that he has no interest in the prosecution of this claim directly or indirectly.

Subscribed and sworn to before me this 12th day of March, A. D. 1883, and I certify that the foregoing affidavit was read and explained to affiant before he signed the same, and that I have no interest direct or indirect in this claim—the words "for the first time" interlined before signing.

BENJ. ROGERS, Clerk of the District Court, Nicollet County, Minn'a.

(Stamped:) U.S. Pension Office, March 26, 1883.

ST. PETER, MINNESOTA, April 11, 1883.

St. Peter, Minnesota, April 11, 1883.

Washington, D. C.:

Sir: In answer to your favor of April 2, 1883, in the matter of pension claim 378,687, John S. Kirkpatrick, late private Co. K., 1st Col. Vols.

I have no personal knowledg that he received alleged varicose veins in service and line of duty nor did I remember seing the same, nor am I personally acquainted with the circumstances under which same was contracted, nor can I state of my own knowlegd that he was ever treated for the same while in the service.

My affidavit filed in the case contains the substance of all that I know about it, to which I refer you. I would add that he was a splendid soldier physicaly at the date of his enlistment and up to the time I left him at Fort Craig; that after his return he was not at all the same person in that respect, his actions and manner indicating that he had undergone a good deal suffering, that impaired his motions and lively action. But he would never shrink from his duties as long as it was in his power to perform it, so he was very seldom of from dutie. He was always a man of veracity and strict integrity while I knew him, saying but little about anything unless questioned, and still less about himself. I was prehaps more intimate with him than anny one else, and allways placed the utmost confidence in what he said.

From your, respectfuly,

JONAS ANDERSON,

JONAS ANDERSON.

(Stamped:) U.S. Pension Office, April 17, 1883. B.

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, July 16, 1883.

Sir: In response to the personal request of Hon. P. B. Plumb, you are informed that in your invalid pension claim No. 378687, you should furnish the testimony of two comrades who have personal knowledge that you had varicose veins while in the Army. Your comrades who have already testified do not actually know whether your disability existed while in the Army, and their testimony is of no value. Very respectfully,

C. B. WALKER, Acting Commissioner.

JOHN S. KIRKPATRICK, Oak Hill, Kans., Clay County. (Stamped:) U. S. Pension Office, Aug. 9, 1883.

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, D. C., August 18, 1883.

Washington, D. C., August 18, 1883.

Sir: In your claim as above referred to, you are informed that a careful reexamination of the papers in this case discloses that the claim is inadmissible on
account of inability to furnish the evidence of commissioned officer or two or
more comrades who can testify of their own knowledge as to the incurrence of
alleged varicose veins. It is not within the power of this office to complete the
claim until the evidence indicated is furnished.

Very respectfully,

Acling Commissioner.

John S. Kirkpatrick, Esq., Oak Hill, Clay Co., Kans.

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, D. C., Oct. -, 1883.

Washington, D. C., Oct. —, 1883.

Sin: In response to the personal request of Hon. P. B. Plune, you are informed that your invalid pension claim, as above referred to, is inadmissible without the evidence of a commissioned officer or two comrades who have personal knowledge of the incurrence of the alleged varioose veins, of which fact you were informed on the 17th ult., and that it is not within the power of this office to complete the claim until the evidence indicated is furnished. The office is not informed as to the post-office address of Capt. Robbins or any of the officers of your command.

Very respectfully,

Commissioner.

CLM'T., Oak Hill, Clay Co., Kansas.

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, D. C., March 18, 1884.

Hon. John I. MITCHELL,

Chairman Committee on Pensions, U.S. Senate:

Sir: In compliance with your request, I have the honor to transmit herewith the papers in the case of John S. Kirkpatrick, late private Company K, First Colorado Volunteers, application 378687. The soldier alleges that between Fort

Craig and Fort Union, New Mexico, about December 13, 1862, from hardship and exposure, he contracted varicose veins. He has recently been informed that his claim is inadmissible unless he can establish origin in the line of duty by the testimony of comrades having personal knowledge.

Very respectfully,

W. W. DUDLEY.

[Original pension claim No. 378687.]

CLAY CITY, KAS., Sep. 30, 1885.

I have long since submitted all the proof I could obtain in support of the above

I may long since submitted at the claim.

Will you please to have the testimony re-examined, and then if, under the law, it is held to be not direct enough, or insufficient, please send me about six blanks for affidavits. All the officers of the company are dead, but some of the men are probably alive yet, and I will have money enough soon to advertise extensively for them; and still I dislike to be put to that unnecessary expense if it can be avoided, for I firmly believe that I have submitted sufficient proof years ago.

Years ago.

I am a lonely bachelor, sixty-four years old; it is full time I was married.

Whether I ever do have a home depends on your office.

I am, very respectfully, &c.,

JOHN S. KIRKPATRICE

JOHN S. KIRKPATRICK.

To the COMMISSIONER OF PENSIONS, Washington, D. C.

(Stamped:) U. S. Pension Office, October 5, 1885.

[Original pension claim No. 378687.]

CLAY CENTRE, KANS., Nov. 13th, 1885.

To the Commissioner of Pensions, Washington, D. C.:

Washington, D. C.:

Some two months ago I wrote to request a re-examination of my pension claim proof, and asking you, if the proof was deemed insufficient, to send me a few blank affidavits, but I have received no reply as yet. If one-fourth of the energy required of us in the field was employed by the multitude of clerks in your office, it would not be necessary for an old soldier to wait for years, or even for weeks, for a reply to anything. I have long ago furnished all the proof that a reasonable construction of the pension law requires, and all that I can furnish without great and, it appears to me, unnecessary expense, and the least that the Pension Office should do would be to give a prompt reply to a reasonable and strictly legal inquiry.

I am, &c.,

JOHN S. KIRKPATRICK.

(Stamped:) U.S. Pension Office, Nov. 16, 1885, B.

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, D. C., Nov. 25, 1885.

Six: Your claim for invalid pension No. 378687 is inadmissible until you furnish the testimony of comrades who have positive personal knowledge that you contracted varieose veins in the service and in line of duty.

Very respectfully,

JOHN C. BLACK, Commissioner.

John S. Kirkpatrick, Oak Hill, Kans.

DEPARTMENT OF THE INTERIOR, PENSION OFFICE, Washington, D. C., July 2, 1886.

Sin: In response to your request I have the honor to transmit herewith the papers in the claim of John S. Kirkpatrick, late private of Co. K, 1st Colorado Vols., original No. 378687.

The claim is still pending before this office.

Very respectfully,

JOHN C. BLACK,

Hon. John I. Mitchell, Chairman Committee on Pensions, U. S. Senate.

ANNIE C. OWEN.

[Senate Report No. 1565, Forty-ninth Congress, first session.] IN THE SENATE OF THE UNITED STATES.

JULY 27, 1886.—Ordered to be printed.

JULY 27, 1886.—Ordered to be printed.

Mr. Sewell, from the Committee on Pensions, submitted the following report (to accompany bill S. 1850, and the veto message of the President thereto):

The Committee on Pensions, to whom was referred the message of the President of the United States, returning the bill (S. 1850) granting a pension to Mrs. Annie C. Owens, have examined the same, and report as follows:

In returning this bill to the Senate without his signature, the President alleges reasons for so doing which lead the committee to a careful revision of the evidence and a thorough re-examination of the papers in the case.

In their previous report, recommending the passage of the bill, it was brief but conclusive that the claim was a valid one, and that the soldier's widow was entitled to a pension. This opinion was based upon the proof presented in the papers and examined by them. The committee did not then, and do not now, think it necessary to go into the details of the evidence submitted to them, but assumed that their conclusions and recommendation would be taken as the necessary sequence of a full and earnest consideration of the case.

They append hereto and make a part of this report the said message of the President and their previous report upon this case. The following is the message of the President Ex. Doc. No. 157, Forty-ninth Congress, first session.]

[Senate Ex. Doc. No. 157, Forty-ninth Congress, first session.]

I hereby return without approval Senate bill number eighteen hundred and fifty, entitled "An act granting a pension to Mrs. Annie C. Owen."

The husband of the claimant was mustered into service as second lieutenant December 14, 1861, and discharged October 16, 1862. It appears that he died in 1876 from neuralgia of the heart. In 1883 the present claimant filed her application for pension, alleging that her husband received two shell wounds—one in the calf of his left leg and one in his left side—on the first day of July, 1862, and claiming that they were in some way connected with the cause of his death.

On the records of his command there is no mention made of either wound; but it does appear that on the eighth day of July—seven days after the date of the alleged wounds—he was granted a leave of absence for thirty days on account, as stated in a medical certificate, of "remittent fever and diarrhae." A medical certificate dated August 5, 1862, while absent on leave, represents him to be at that time suffering from chronic bronchitis and acute dysentery."

The application made for pension by the widow was rejected by the Pension Bureau February 1, 1886.

There is nothing before me showing that the husband of the claimant ever filed an application for pension, though he lived nearly fourteen years after his discharge; and his widow's claim was not made until twenty-one years after the alleged wounds, and seven years after her husband's death.

If the information furnished concerning this soldier's service is correct, this claim for pension must be based upon a mistake. It is hardly possible that wounds such as are alleged should be received in battle by a second lieutenant and no record made of them; that he should seven days thereafter receive a leave of absence for other sickness with no mention of these wounds, and that a medical certificate should be made (probably with a view of prolonging his leave) stating still other aliments, but silent as to wounds. The further facts that he made no claim for pension and that the claim of his widow was long delayed are worthy of consideration. And if the wounds were received as described there is certainly no necessary connection between them and death fourteen years afterwards from neuralgia of the heart.

GROVER CLEVELAND.

EXECUTIVE MANSION, May 28, 1886.

EXECUTIVE MANSION, May 28, 1886.

[Forty-ninth Congress of the United States of America, at the first session, begun and held at the city of Washington on Monday, the seventh day of December, one thousand eight hundred and eighty-five.]

An act granting a pension to Mrs. Annie C. Owen

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and he is hereby, authorized to place on the pension-roll, and subject to the limitations of the law, the name of Annie C. Owen, widow of Captain Mortimer B. Owen, late of Company G, Fifty-seventh Regiment Pennsylvania Volunteers.

JOHN G. CARLISLE,

Speaker of the House of Representatives.

JOHN SHERMAN, President of the Senate pro tempore.

I certify that this act originated in the Senate.

ANSON G. McCOOK. By CHAS. W. JOHNSON, Chief Clerk.

The committee's previous report is as follows:

[Senate Report No. 491, Forty-ninth Congress, first session.]

The committee's previous report is as follows:

[Senate Report No. 491, Forty-ninth Congress, first session.]

The Committee on Pensions, to whom was referred the bill (S. 1850) granting a pension to Mrs. Annie C. Owen, having examined the same, report as follows:

The evidence in this case shows that this officer entered the service as a second lieutentant in Company G, Fifty-seventh Pennsylvania Volunteers, on the 14th of December, 1861, and was discharged for disabilities, resulting from wound received while in the line of his duty, in October, 1862. From the testimony presented to the committee of his subsequent treatment at different periods for diseases growing out of such wound, resulting finally in his death from heart disease in June, 1876, your committee are of the opinion that said disease was superinduced by the wound received in the ribs at the battle of Malvern Hill, and they therefore recommend the passage of the bill.

The objections of the Executive to the passage of this bill are not of such weight as to convince the committee that they erred in their recommendation in the former report. His approval is withheld upon much the same grounds as caused its rejection by the Pension Bureau—that the disability of the soldier, from which death ensued, was not incurred while in the line of his duty. In addition, the message recites two other reasons for exercising the veto power, namely: (1) That the records of his command make no mention of either wound (that in his side, and the one in his leg), by the explosion of a shell; and (2) that the soldier never made application for a pension in his lifetime.

The committee are not aware, and do not believe, that either or both of these reasons are a bar to the granting of a pension to a deserving soldier's widow. It was a common occurrence that the company books, after a severe battle, should be turned in with a meager showing of the men and their casualties, and that the missing links were never found, thus rendering the records uncertain authority as to t

work by the Pension Bureau or other Departments of the Government.

The message says:

"It is hardly possible that wounds such as are alleged should be received in battle by a second lieutenant and no record made of them."

The committee believe that it is not only possible, but very likely to happen in the terrific hurricane of events on a battlefield. The doubt implied, and all but uttered, in the following language of the message, as to the integrity and honor of the soldier, is, in the opinion of the committee, gratuitous: "It is hardly possible," states the Executive, "that he should, seven days thereafter, receive a leave of absence for other sickness with no mention of these wounds, and that a medical certificate should be made (probably with a view of prolonging his leave) stating still other ailments, but silent as to wounds," It would be charitable to believe that these words were uttered thoughtlessly rather than think they were a direct attack upon the honorable motives of the dead soldier.

In support of the President's allegations as to the want of sufficient and proper

think they were a direct attack upon the honorable motives of the dead soldier.

In support of the President's allegations as to the want of sufficient and proper testimony to establish the validity of the widow's claim is the following evidence of Capt. G. S. Peck, of the soldier's company, which it will be seen is not positive, but only supposititious, he being absent at the time, and sick:

He thinks it highly improbable that soldier was wounded as alleged. He (affiant) was away sick at the time, and when he received information of the casualties at Malvern Hill he heard nothing of the soldier's (Owen's) injuries.

First Lieutenant Mehan testifies same as Captain Peck.

M. M. Eddy, second sergeant, was present at battle of Malvern Hill and had all opportunities for knowing the facts, but recollects nothing of alleged wounds.

Does not think they were received.

Privates Richard Morrison and William W. Allen testify in substance same as Sergeant Eddy. Lieut, J. N. Gillespie, of Company B, Fifty-seventh Pennsylvania Volunteers, knew soldier, and was at Malvern Hill fight, but does not know that soldier was wounded.

This is the sum total of the proof presented in support of the President's position on this case, and discloses the grounds upon which he vetoes the bill. It is not based upon facts, it is wholly negative in its character, and is merely the substance of the opinions of three or four men who have not and do not offer a single proof of their own knowledge. They do not deny the statement of the soldier as to the time and incurrence of his disabilities; they do not deny or controvert the sworn testimony of the claimant, his wife, nor that of her witnesses; they simply express an opinion that it is not probable it is so.

To offset this is the following summary of positive evidence, from personal knowledge, and corroborative testimony by physicians, comrades, and friends: An uncle of soldier (Isaac N. Owen, of fair reputation for veracity) testifies that he was in the Army and knows the soldier was wounded in battle of Malvern Hill. He says that immediately after said battle he looked up the soldier, and was told by some one (thinks it was an officer) that he was wounded by explosion of shell, and had been sent home to New York. Affiant saw soldier some months afterwards and he told him of the injury, and that he had come back to the Army to resign, in consequence of said wound.

John Sullivan, comrade (of fair reputation), testifies that soldier was wounded in his side by shell at Malvern Hill. Affiant swears he was near soldier when he was wounded; soldier was put on a boat and taken away, and witness never saw him afterward.

Two physicians testify to his death from neuralgia of heart; neuralgia originated at seat of wound in his side.

Claim was referred for special examination, and the following testimony was taken:

Howard Bunting swore that soldier came home in 1862 not well, and claimed to have had some ribs broken by explosion of shell; never well afterward.

W.G. Schenck testifies to complaints of broken ribs and heart trouble subse-

W. G. Schenck testifies to complaints of broken ribs and heart trouble subsequent to enlistment.

Jno. W. Moffat testifies soldier came home in 1862 much debilitated and complained of wound in leg and body.

Dr. Varick, who gave certificate to extend furlough, does not now recollect soldier.

Dr. Shepard testifies soldier died of heart disease; he (the soldier) claimed to have had some ribs broken in the Army; suffered much from neuralgic pains in left side near heart, where there was evidence of injury as alleged by claimant.

Dr. Bowen treated soldier some time after the way for neuralgic of left side.

Dr. Bowen treated soldier some time after the war for neuralgia of left side, which he (the soldier) said was the result of wound or injury received in the

Dr. Bowen treated soldier some time after the war for neuralgia of left side, which he (the soldier) said was the result of wound or injury received in the service.

Dr. Wells testifies to the same. His treatment was in 1876.

Benjamin G. Clarke, employer after service, well recollects that soldier said he was wounded somewhere. Witness doesn't remember when, how, or where. John Sullivan, comrade, adheres to his original statement, and says that he saw soldier lying on the ground and Surgeon Lyman (dead) had his shirt open and was examining his side; deponent glanced at the place and saw it was scratched and slightly bloody. Deponent asked the surgeon if the wound was a bad one, and he answered that a piece of shell had broken two or three ribs. Soldier was conscious, and wound appeared but slight to deponent; witness never saw soldier again; it runs in his mind that the injury was on the right side, but is not positive; it was in front and among the lower ribs.

William W. Chase, sergeant-major, remembers that soldier was injured at Malvern Hill, but does not remember how.

Isaac N. Ourn (soldier's uncle) corroborates his original testimony (briefed above). He knows nothing personally of much value to case.

In addition to the foregoing the committee may mention that most of the special examiners—many were employed in the case—close their reports to the Department with the significant comment that the case is a meritorious one.

Albert Gregory, special examiner, says:

"I believe that the claim possesses merit."

F. C. Loveland says:

"There is no doubt in my mind but that this is a meritorious case."

Dr. Hood says:

"There is no doubt in my mind but that this is a meritorious case."

Dr. Hood says:

"In view of evidence I think the fatal neuralgia of heart was a result of injury to side from shell, provided he did receive such injury."

Which proviso is, in the opinion of the committee, clearly established in the foregoing testimony.

The President refers to the fact that the soldier never applied for a pens

MARTIN MURPHY AND P. B. MURPHY AND OTHERS.

The PRESIDENT pro tempore. The Chair lays before the Senate the bill (S. 22) for the relief of Martin Murphy and P. B. Murphy, returned from the House of Representatives with an amendment. amendment will be stated.

The CHIEF CLERK. The amendment of the House of Representatives is, in line 3, after the word "dollars," to strike out "with interest at 4 per cent. per annum from the 18th of April, 1881;" so as to make the bill read:

Be it enacted, &c., That the Secretary of the Treasury be, and hereby is, authorized and directed to pay to Martin Murphy and P. B. Murphy the sum of \$10,000 in full payment and satisfaction for the site of the light-house on Point Conception, on the Pacific coast, conveyed to the United States by the said Martin Murphy and P. B. Murphy by deed dated April 18, 1881; said sum to be paid out of unexpended balances of appropriations made for the support of the Light-House Board and light-houses for the fiscal years ending June 30, 1881 and 1882.

Mr. JONES, of Arkansas. This is a bill introduced by the Senator from Tennessee [Mr. HARRIS] which was for the payment of \$10,000 to Messrs. Murphy, in California, a claim that the Treasury Department said ought to be paid. After the bill was reported by the committee and when it was being considered in the Senate, on the motion of the Senator from Vermont [Mr. EDMUNDS] a provision was incorporated in the bill to give the parties interest on the money. It went the House and they have amounted the bill by striking out the provisthe House and they have amended the bill by striking out the provision for interest.

Now, as I understand, the gentlemen who are interested in this bill prefer that it shall be passed without further delay, preferring to lose

the interest than to have any delay.

In the same matter of the loss of money by the embezzlement of a treasury clerk in California there was about \$8,000 of other money in addition to this \$10,000 which belonged to divers small claimants, and a House bill has passed providing for the payment of this \$10,000 to the Messrs. Murphy and about \$8,000 additional to other persons who are certified also by the Treasury Department as being clearly entitled

to the money named. That bill has been referred to the Committee on Claims and reported favorably by that committee unanimously. a bill the facts concerning which my friend the Senator from California [Mr. STANFORD] is familiar with, and every one, I believe, of the California delegation thinks the claim a just one and ought to be passed. The Treasury Department reports that it ought to be passed, and I move that the Calendar number 640, House bill 190, which covers this same matter and the additional claims amounting to \$8,000 more, be taken up and passed by the Senate at this time.

The PRESIDENT pro tempore. The Senator from Arkansas asks the unanimous consent of the Senate to take up House bill 190 in lieu of the pending bill.

the pending bill. Mr. EDMUNDS.

Mr. EDMUNDS. Let it be subject to a call for the regular order. The PRESIDENT pro tempore. Is there objection?
Mr. BLAIR. I do not propose to object, but I wish to make a statement that there are quite a number of vetoed pension bills to which I anticipate no opposition, and the gentlemen who introduced the bills and who are interested in securing their passage will bring them to the attention of the Senate. The general discussion, if there is any occasion for general discussion, it would seem to me could well await the printing of the reports in accordance with the resolution now adopted; but there are quite a number of cases that might be disposed of to-day, and I desire that there be opportunity at least given for the consideration of those cases.

Mr. HARRIS. An explanation of the bill referred to by the Senator from Arkansas is all that will be necessary, and I undertake to say for the Senator from Arkansas that if it leads to any debate he will with-

draw it.

Mr. BLAIR. I did not observe this particular case, but I wish it understood that I do not object, reserving the right, however.

The PRESIDENT pro tempore. If there is no objection the House bill referred to will be taken up.

Mr. EDMUNDS. Subject to objection.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 190) for the relief of certain employés and others of the twelfth United States light-house district. It provides for the payment tweith United States light-house district. It provides for the payment of \$18,465.65, in payment of certain claims against the United States Government not heretofore paid because of the defalcation and forgeries of John T. Best, late clerk of the engineer of the twelfth light-house district, and due the several claimants as follows: Employés at Point Conception Light, \$3,784.70; Miguel Ortego, \$478.14; Charles Ashton, \$270; Pigeon Point Light-Station, \$980.99; sundry small bills, \$1,200.95; Martin and P. B. Murphy, \$10,000; O. B. Shaw, \$1,748.87.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

a third reading, read the third time, and passed.

The PRESIDENT pro tempore. The bill (S. 22) for the relief of Martin Murphy and P. B. Murphy will be indefinitely postponed.

ORDER OF BUSINESS.

Mr. CONGER. I ask unanimous consent to take up-

Mr. CONGER. I ask unanimous consent to take up—
Mr. BECK. I rise to morning business.
Mr. EDMUNDS. Regular order.
Mr. CONGER. I ask unanimous consent to take up Order of Business 1683, being the bill (S. 2126) for the relief of L. B. Townsend, Louis S. Lovell, W. C. Page, Alonzo Sessions, Hampton Rich, Harvey Harter, Benjamin Harter, and Peter Hackett. I have asked to call it up several times. I have labored for several weeks to get at the Calendar which gave other gentlemen an opportunity to pass bills they liked, but we could not reach the consideration of this.

The PRESIDENT pro tempore. The Senator from Michigan moves

The PRESIDENT pro tempore. The Senator from Michigan moves to proceed to the consideration of a bill.

Mr. CONGER. I ask unanimous consent.

Mr. SEWELL. We are not through with morning business. The PRESIDENT pro tempore. The morning business has been gone

through regularly in its due course. Mr. PLATT. I do not understand that the morning business is

through.

Mr. CONGER. I have asked unanimous consent in the morning business and out of it, and I have yielded to every Senator who has

asked for anything else.

The PRESIDENT pro tempore. Pending the motion of the Senator from Michigan the Chair asks unanimous consent of the Senate to be

allowed to receive morning business.

Mr. CHACE. I was present at the opening of the Senate and have been watching and waiting to make a report.

The PRESIDENT pro tempore. Reports were distinctly called for. The Chair will receive morning business if there be no objection.

CONSIDERATION OF HOUSE BILLS.

Mr. BECK. I offer the following resolution to be acted on now:

Resolved, That at the next meeting of the Senate, after the routine morning business is disposed of the Senate will proceed under the provisions of Rule VIII to the consideration of bills which have passed the House of Representatives and have been reported favorably by the Senate committees.

Mr. EDMUNDS. Let that go over. The PRESIDENT pro tempore. The resolution goes over.

Mr. SEWELL. I move to amend by striking out "bills which have passed the House of Representatives."

The PRESIDENT pro tempore. The resolution is not before the Sen-

REPORTS OF COMMITTEES.

Mr. CHACE, from the Committee on Post-Offices and Post-Roads, to whom was referred the bill (H. R. 4865) to extend the system for the immediate delivery of letters, and amendatory of sections 3, 4, and 5 of the act approved March 3, 1885, entitled "An act making appropriations for the service of the Post-Office Department for the fiscal year ending June 30, 1886, and for other purposes," reported it without

ending June 30, 1886, and for other purposes," reported it without amendment, and submitted a report thereon.

Mr. SEWELL, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (H. R. 8827) granting a pension to John Buchanan;
A bill (H. R. 6817) granting a pension to Thomas Brown;
A bill (H. R. 6832) granting a pension to Abraham P. Griggs; and A bill (H. R. 6832) granting a pension to Mrs. Catharine Sattler.

Mr. EDMUNDS. I am instructed by the Committee on the Judiciary, to whom was referred the letter of the Secretary of War transmitting the petition of Private Richard Murray, of the band of the United States Seventh Infantry, praying for relief from the political disabilities imposed on him by section 1218 of the Revised Statutes, which should have gone to the Committee on Military Affairs, to report the should have gone to the Committee on Military Affairs, to report the paper back and ask that it be referred to the Committee on Military Affairs.

The PRESIDENT pro tempore. That order will be made if there be

no objection.

Mr. EDMUNDS, from the Committee on the Judiciary, to whom were referred the following bills, reported them severally without

A bill (H. R. 2848) for the relief of Benjamin P. Loyall, of the State

of Virginia;
A bill (H. R. 8278) for the relief of Seth M. Barton;
A bill (H. R. 8192) to remove the political disabilities of J. R. Eg-

gleston, of Mississippi; and
A bill (H. R. 9115) for the relief of Eugene E. McLean.
Mr. PLUMB. The Committee on Public Lands, to whom was referred the bill (H. R. 3186) to declare a forfeiture of lands granted to the New Orleans, Baton Rouge and Vicksburg Railroad Company, to confirm the title to certain lands, and for other purposes, instruct me to report it without amendment. I ask permission for the minority to file their views at any time before the bill is considered.

Mr. VAN WYCK. At a convenient time I shall present a minority report on that subject. While the title of the bill speaks of the forfeiture of the lands, in fact it only confirms patents already issued.

REPORTS OF INTERNATIONAL MONETARY CONFERENCES

Mr. GORMAN. I am instructed by the Committee on Printing, to whom was referred the joint resolution (H. Res. 87) providing for the printing and distribution of documents of the monetary conferences of 1878 and 1881, to report it with an amendment, and to ask for its present consideration.

Mr. EDMUNDS. Let it be read subject to objection.

The CHIEF CLERK. The Committee on Printing report to amend the resolution by inserting, in line 6, after the date "1881:"

Also the report of the monetary commission created under the joint resolution of August 15, 1876, being Senate Report No. 703, second session, Forty-fourth Congress, with such indices to the three reports as may be supplied by the Secretary of State.

Mr. EDMUNDS. I have not heard the original resolution read yet. The PRESIDENT pro tempore. The joint resolution will be read as it will stand if amended.

The Chief Clerk read as follows:

Resolved by the Senate and House of Representatives, &c., That there be printed and bound in cloth 5,000 copies each of the Reports of the International Monetary Conferences of 1878 and 1881; also the report of the monetary commission created under the joint resolution of August 15, 1876, being Senate report No. 703, second session, Forty-fourth Congress, with such indices to the three reports as may be supplied by the Secretary of State; 3,000 copies of each for the use of the House of Representatives, and 1,500 copies of each for the use of the Senate; and that the Public Printer hold the remaining 500 copies of each for sale, at 10 per cent, advance on cost price, to any person applying for the same.

The PRESIDENT pro tempore. If there be no objection the joint resolution is before the Senate as in Committee of the Whole. The question is on the amendment reported by the Committee on Printing.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the joint resolution

The amendment was ordered to be engressed and the joint resolution to be read a third time.

The joint resolution was read the third time, and passed.

The title was amended so as to read, "A joint resolution providing for the printing and distribution of documents of the monetary conferences of 1878 and 1881, and the report of the monetary commission created under the joint resolution of August 15, 1876."

Mr. GORMAN. I move that the Senate insist on its amendment and ask for a conference thereon with the House of Representatives.

The motion was agreed to.

By unanimous consent, the President pro tempore was authorized to appoint the conferees on the part of the Senate.

NAVIGATION AND CUSTOMS COLLECTION LAWS.

Mr. GORMAN, from the Committee on Printing, to whom was referred the following House concurrent resolution, reported it without amendment; and it was considered by unanimous consent, and agreed to:

Resolved by the House of Representatives (the Senate concurring). That there be printed 5,000 copies of the navigation and customs collection laws relating to vessels, including the laws relating to merchant seamen, and the regulation of steam-vessels, compiled by the Bureau of Navigation in the Treasury Department, of which 1,000 copies shall be for the use of the Senate, 2,000 copies for the use of the House of Representatives, and 2,000 copies for the use of the Bureau of Navigation. of Navigation.

PACKING AND SELLING CUT TOBACCO.

Mr. EUSTIS. I move that the Senate proceed to the consideration of Order of Business 1725, being the bill (H. R. 8738) to so further amend section 3362 of the Revised Statutes, as amended, and section 3363 as makes a distinction in the mode of packing and selling cut

The PRESIDENT pro tempore. That motion is not now in order. Morning business is being received.

ART AND INDUSTRY.

Mr. HAWLEY. I am directed by the Committee on Printing, to whom was referred a resolution to print additional copies of Senate Executive Document No. 209 on art and industry, to report it with an amendment in the nature of a substitute. I ask for its present consideration.

By unanimous consent, the Senate proceeded to consider the resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That there be printed — additional copies of Senate Executive Document No. 209 on art and industry; of which — copies shall be for the use of the Senate, — copies for the use of the House of Representatives, and — copies for the use of the Bureau of Education.

The amendment reported by the Committee on Printing was to strike out all after the resolving clause of the resolution and insert:

That there be printed and bound 5,000 additional copies of the report of the Bureau of Education on art and industry; of which 1,000 copies shall be for the use of the Senate, 2,000 copies for the use of the House, and 2,000 copies for the Bureau of Education.

The amendment was agreed to.

The resolution as amended was concurred in.

COMMITTEE ON PRINTING.

Mr. McPHERSON. If it is in order now I should like to call up a bill.

Mr. MANDERSON. I hope we shall go on with the morning busi-

The PRESIDENT pro tempore. It is not now in order.

Mr. MANDERSON, from the Committee on Printing, reported the following resolution; which was considered by unanimous consent, and agreed to:

Ordered, That the Committee on Printing have leave to sit during the recess of Congress.

PROGRESS OF PANAMA CANAL.

Mr. MANDERSON. I am directed by the Committee on Printing to report back favorably a House concurrent resolution, with amendments, and I ask for its present consideration.

By unanimous consent, the Senate proceeded to consider the following resolution:

Resolved by the House of Representatives (the Senate concurring), That the Committee on Printing be directed to cause to be printed, for distribution by the Senate and members of the House in the usual proportion, 5,000 copies of the special intelligence report, by Lieutenant Kimball and Naval Cadet Capp, United States Navy, upon the progress of the Panama Canal during the year 1885, which report was transmitted to the House by the honorable Secretary of the Navy on May 20, and referred to the Committee on Printing.

The amendment of the Committee on Printing was to make the resolution read:

Resolved by the House of Representatives (the Senate concurring), That the special intelligence report on the Panama Canal, by Lieutenant Kimball and Naval Cadet Capp, transmitted to the House by the Secretary of the Navy, be printed, and that 3,000 additional copies be printed; of which 1,000 copies shall be for the use of the Senate and 2,000 copies shall be for the use of the House.

The amendments were agreed to.

The resolution as amended was concurred in.

Mr. MANDERSON. I move that the Senate insist on its amendment and ask for a conference with the House of Representatives thereon.

The motion was agreed to.

By unanimous consent, the President pro tempore was authorized to appoint the conferees on the part of the Senate.

REPORT ON EDUCATION IN ALASKA.

Mr. MANDERSON. I am directed by the Committee on Printing,

to whom was referred a concurrent resolution of the House of Representatives to print 10,000 copies of Senate Executive Document No. 85, Forty-ninth Congress, to report it with amendments. I ask for its present consideration.

By unanimous consent the Senate proceeded to consider the follow-

ing House concurrent resolution:

Resolved by the House of Representatives (the Senate concurring therein), That 10,000 copies of Senate Executive Document No. 85, Forty-ninth Congress, be printed; one-half for the use of the Senate and the other half for the use of the House.

The amendments of the Committee on Printing were, in line 2, to strike out the word "ten" and insert "six;" in line 5, to strike out the word "one-half" and insert "fifteen hundred;" and, in the same line, strike out "the other half" and insert "three thousand five hundred;" dred;" so as to make the resolution read:

Resolved by the House of Representatives (the Senate concurring), That 6,000 copies of Senate Executive Document No. 85, Forty-ninth Congress, be printed; 1,500 for the use of the Senate and 3,500 for the use of the House.

The amendments were agreed to.

Mr. FRYE. What is that executive document?

Mr. MANDERSON. A report on education in Alaska, a document that is very much inquired for.
The resolution was concurred in.

Mr. MANDERSON. I move that the Senate insist on its amendment, and ask for a conference with the House of Representatives

The motion was agreed to.

By unanimous consent, the President pro tempore was authorized to appoint the conferees on the part of the Senate.

BULLETINS OF THE BUREAU OF ETHNOLOGY.

Mr. MANDERSON. I am instructed by the Committee on Printing, to whom was referred the joint resolution (H. Res. 120) to print the annual bulletins of the Bureau of Ethnology, to report it favorably with amendments. I ask for its present consideration.

By unanimous consent, the Senate, as in Committee of the Whole, pro-

ceeded to consider the joint resolution.

The first amendment of the Committee on Printing was, in line 6, after the word "Indians," to insert:

Provided, That the authorization shall apply only to matter now on hand or collected during the fiscal year ending June 30, 1887.

So as to read:

That there be printed at the Government Printing Office 10,000 copies of any matter furnished by the Bureau of Ethnology relating to researches and discoveries connected with the study of the North American Indians: Provided, That the authorization shallapply only to matter now on hand or collected during the fiscal year ending June 30, 1887; the same to be issued in parts and the whole to form an annual volume of bulletins; 4,000 copies of which shall be for the use of the House of Representatives, 1,500 copies for the use of the Senate, and 4,500 copies for the use of the Bureau of Ethnology.

The amendment was agreed to.

The next amendment was to add as a new section the following:

SEC. 2. The sum of \$3,000, or so much thereof as may be necessary, for the printing and binding of the aforesaid annual bulletins, is hereby appropriated out of any money in the Treasury not otherwise appropriated.

The amendment was agreed to.

The joint resolution was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time, and passed.

Mr. MANDERSON. I move that the Senate insist on its amendments and ask a conference with the House of Representatives thereon. The motion was agreed to.

By unanimous consent the President pro tempore was authorized to appoint the conferees on the part of the Senate.

The PRESIDENT pro tempore. The Chair appoints the members of the Committee on Printing as the conferees on the part of the Senate on the various House resolutions about printing which have been passed to-day with amendments.

BILL INTRODUCED.

Mr. CONGER introduced a bill (S. 2885) donating fifty unserviceable muskets and bayonets to Wallace Brown's Post, No. 190, Grand Army of the Republic, of Birch Run, Mich.; which was read twice by its title, and referred to the Committee on Military Affairs.

WITHDRAWAL OF PAPERS.

On motion of Mr. GORMAN, it was

Ordered, That D. W. Mullen have leave to withdraw the papers in his case from the files of the Senate.

Ordered, That Philip G. Hopkins have leave to withdraw the papers in his case from the files of the Senate.

MARGARET D. MARCHAND.

A Senate bill granting a pension to Margaret D. Mr. SEWELL. Marchand, the widow of Commodore Marchand, passed both Houses and was vetoed by the President. A House bill passed and came to the Senate granting her a pension of \$30 a month, which is what she

is entitled to under the law. That bill, in consequence of the pass of the Senate bill, was indefinitely postponed. I have reason to be-lieve that that bill can now become a law. Therefore, I ask unanimons consent-

The PRESIDENT pro tempore. It is not now in order. Strictly morning business is all that is now in order.

Mr. SEWELL. I presume I can ask unanimous consent at any time. The PRESIDENT pro tempore. The Senator from New Jersey asks unanimous consent to proceed to the consideration of a certain bill.

Mr. SEWELL. I ask unanimous consent to reconsider the vote by

which the bill (H. R. 2060) granting a pension to Margaret D. Marchand was indefinitely postponed, in order that it may be placed on the Calendar, this not being the vetoed bill.

The PRESIDENT pro tempore. If there be no objection, that order will be made. The Chair hears no objection.

INTERNATIONAL USE OF SILVER COINAGE.

Mr. EVARTS. I offer resolutions which, with the permission of the Senate, I will read:

Senate, I will read:

Resolved, That the President be requested, if he shall deem it compatible with the public interests, to open a correspondence with the principal commercial powers of Europe with the view of ascertaining their estimate of the effect now operating upon commercial exchanges, and the values of commodities therein exchanged, by the great fall in silver bullion and the disuse of free silver coinage, which date, progressively, from the demonetization of silver by Germany in 1873. And, further, by such correspondence, to ascertain whether such powers or any of them are disposed, separately or in concert with others, either with or without the United States, to engage, either by domestic regulation or international convention, in any movement toward the restoration of parity between gold and silver in full function as intrinsic money, upon a ratio to be established by law.

Resolved, That the President be requested, if he shall deem it compatible with the public interests, to lay this correspondence before Congress at its part sea.

Resolved, That the President be requested, if he shall deem it compatible with the public interests, to lay this correspondence before Congress at its next ses-

Mr. President, I should be glad if the resolutions might be now considered, but if objection is entertained, I shall ask that the resolutions be printed, and I will on Monday ask leave to have them considered,

and then accompany them with some brief observations.

The PRESIDENT pro tempore. The Senator from New York offers for adoption resolutions and asks for their present consideration.

Mr. EDMUNDS. They had better be printed. Mr. RIDDLEBERGER. I object.

The PRESIDENT pro tempore. Objection being made, the resolutions go over under the rule, and will be printed.

COMMITTEE ON INDIAN TRADERSHIPS.

Mr. PLATT. I offer a resolution, and permit me to say before it is read that inasmuch as it is probable I shall not be able to be in the Senate after to-day by reason of sickness in my family at home—I hope I may be able to be here, but it is highly probable I may not—I trust there will be no objection to the consideration of the resolution

The resolution was considered, by unanimous consent, and agreed to, as follows:

Resolved. That the select committee to investigate the matter of licenses to Indian traders, appointed by resolution of the Senate passed June 3, 1886, he authorized to sit during the recess, and to employ a clerk.

J. A. HENRY AND OTHERS.

Mr. HARRIS. The House of Representatives passed the bill (S. 289) for the relief of J. A. Henry and others, making sundry small appropriations to several different individuals. It is now in the hands of the enrolling clerk. I find in line 19 of that bill a clerical error in the name of "N. C. Blanton," as it should be. It is there "Blonton." I ask an order of the Senate that the enrolling clerk be directed to correct that clerical error.

Mr. EDMUNDS. Let us have the paper here, so that we may see

the thing itself.

Mr. HARRIS subsequently said: I now ask that an order be made changing the name of "Blonton" to "Blanton," as I suggested a moment since, in the bill (S. 289) for the relief of J. A. Henry and others.

The Secretary now has the bill.

The PRESIDENT pro tempore. The Senator from Tennessee asks unanimous consent to correct an error in the enrollment of a bill, the bill being present in the Senate. Is there objection? The Chair hears none, and the correction will be made.

COMMITTEE ON ENROLLED BILLS.

The PRESIDENT protempore. The Chair advises the Senate that two members of the Committee on Enrolled Bills are unavoidably absent, the Senator from Colorado [Mr. Bowen] and the Senator from Georgia [Mr. Colquitt], and it becomes necessary to have a temporary appointment of members of that committee in order to carry on the

daily business. What is the pleasure of the Senate?

Mr. HOAR. I ask unanimous consent that the Chair be authorized to appoint two members of that committee to hold during the remainder of the present session or until the other members shall return.

The PRESIDENT pro tempore. If there be no objection that order will be made. The Chair hears none. The Chair appoints the Senator from Michigan [Mr. PALMER] and the Senator from Arkansas [Mr.

JONES] upon the Committee on Enrolled Bills during the present session or until the return of the absent members of the committee.

TREASURY SURPLUS.

The PRESIDENT protempore appointed Mr. Allison, Mr. Aldrich, and Mr. BECK the conferees on the part of the Senate on the amendments of the Senate to the joint resolution (H. Res. 126) directing payment of the surplus in the Treasury on the public debt.

SURETIES OF JOHN C. DEXTER.

Mr. CONGER. Now, if the morning business is concluded, I renew

my motion.

The PRESIDENT pro tempore. The Senator from Michigan moves to proceed to the consideration of bill (S. 2126) for the relief of L. B. Townsend, Louis S. Lovell, W. C. Page, Alonzo Sessions, Hampton Rich, Harvey Harter, Benjamin Harter, and Peter Hackett.

The motion was agreed to; and the Senate, as in Committee of the

Whole, proceeded to consider the bill.

It proposes to release and discharge L. B. Townsend, Louis S. Lovell, W. C. Page, Alonzo Sessions, Hampton Rich, Harvey Harter, Benjamin Harter, and Peter Hackett, of Ionia, Mich., sureties upon the several bonds of the late J. C. Dexter, given as security for the faithful performance of his duties as receiver of public moneys and disbursing agent of the Unitel States land office at Ionia, Mich., from 1861 to 1867, of and from all and every obligation and liability whatsoever on account of these bonds.

Mr. CONGER. I ask that the report of the committee be read.

do not wish to make any remarks.

The Secretary proceeded to read the report, submitted by Mr. SPOONER from the Committee on Claims, July 8, 1886.

Mr. CONGER. I do not insist on the reading of the report unless somebody else wants to hear it.

Mr. INGALLS. Let it be read,
Mr. SPOONER. The report is quite lengthy. I think I can state
in a word the proposition involved in this bill. I reported it from the
Committee on Claims.

The PRESIDENT pro tempore. Is the call for the reading of the report withdrawn?

Mr. INGALLS. No, sir; but I do not object to its being explained. Mr. SPOONER. If the report is read it will explain itself.

The Secretary resumed and concluded the reading of the report, as

The Secretary resumed and concluded the reading of the report, as follows:

The Committee on Claims, to whom was referred the bill (S. 2126) for the relief of L. B. Townsend, Lewis S. Lovell, W. C. Page, Alonzo Sessions, Hampton Rich, Harvey Harter, Benjamin Harter, and Peter Hackett, have had the same under consideration, and respectfully report:

The persons named in the bill and for whose relief the same is proposed were sureties on the official bonds of one John C. Dexter, who was receiver of the United States land office at Ionia, Mich., from April 29, 1861, to August, 1867. There are four suits pending in the circuit court of the United States for the western district of Michigan against the sureties on four bonds given by Mr. Dexter, one on the bond of April 29, 1861, to recover \$1,566.67 against Alonzo Sessions and six other sureties; one on the bond of August 24, 1866, called "disbursing bond," for \$189.11 against Benjamin Harter as surety. It is stated that an accounting made subsequent to the commencement of the suits has developed the fact that nothing is due the United States on either of the suits has developed the fact that nothing is due the United States on either of the suits has developed the fact that nothing is due the United States on either of the suits has developed the fact that nothing is due the United States on either of the suits has developed the fact that nothing is due the United States on either of the suits has developed the fact that nothing is due the United States on either of the suits has developed the fact that nothing is due the United States on either of the suits has developed the fact that nothing is due the United States on either of the suits has developed the fact that nothing is due the United States on either of the suits has developed the fact had nothing is due the United States on either of the suits has developed the fact had nothing is due the United States on either of the suits has developed the fact had nothing the United States on either of the suits has

ter was short in his accounts, or that there was any claim in behalf of the Government upon them.

Mr. Dexter is shown to have been a man whose reputation for integrity was above reproach. It is stated of him that "his habits were good, his manner of living simple and not extravagant, that he was industrious and energetic, and as a business man held the continued confidence of the people." Six years after the alleged deficit occurred in his accounts he was elected a State senator, no suggestion being made that he was short in his accounts with the Government. After the expiration of his senatorial term, in 1873, he left Ionia, and was engaged up to the time of his death in the milling and lumber business at Evart, in Oscola County. The record shows that he was worth \$15,000. The streties not knowing of the existence of any claim, or alleged claim, upon the bonds, his estate was, after paying his debts, distributed among the wife and brothers and sisters, and the minor heirs of some of them.

Under the statute of Michigan the General Government is a preferred cred-

itor, and this claim might have been realized out of the principal. The sureties now living might also have taken measures, had they known of the existence of the claim, to secure the payment from the estates of co-sureties now dead the proportion of each.

The committee are of the opinion that so long a time has elapsed that these sureties should be released. The bill is in most respects not unlike the bill passed by the Senate, at the present session, for the relief of Emerson Etheridge and William B. Stokes.

The committee report the bill back with the recommendation that the same days are supported by the senate of the same that the s

Mr. McPHERSON. I have not the bill before me, but I should like to ask the Senator in charge of it if it is proposed to remit the penalties on these bonds?

Mr. SPOONER. Only to release the sureties from liability to the

Government.

Mr. McPHERSON. It is to my mind the most extraordinary bill I have ever heard read in the Senate. I have watched closely the reading of the report, and I find there are seven different specifications in which this man, acting as a Government officer, was a defaulter, a persistent, chronic defaulter. Six or seven different bonds were given for six or seven different offices he held under the General Government as a disburser of public money and as receiver, and so on and so forth. In every case he gave a separate bond, and in seven distinct separate cases he turns out to have been a defaulter to the Government. I do not think a parallel case can be found in the whole scope of legislation.

If I am wrong in any particular about this matter, certainly I have been led into error by an imperfect hearing of the report; but as I understood the reading of the report you propose to release these various bondsmen; from the reading of the report, as I understand, forty or fifty in number, a different set of bondsmen for each particular position he held. You propose to pay out of the public Treasury the sum of \$12,000, and make it a donation practically to some forty or

fifty persons who were the bondsmen.

Mr. CONGER. The Senator could not have heard the report correctly or he would not have made such a statement. There were four bonds given by this gentleman in connection with his office of receiver of public money, and only in reference to that, except one that was given as disbursing agent of some public money in connection with the land office. The amount of that was \$152. The amount on the the land office. The amount of that was \$152. The amount on the other bonds is \$3,000, with interest amounting to \$3,000 more. The whole amount of the claim of the Government is only three thousand

and a few hundred dollars, except the interest.

Mr. Dexter, I think, stood as high in Michigan as a business man and an honest man as any man we ever had in the State, and was so acknowledged by everybody. He was an old settler there, a pioneer in that country. All the offices and duties he had to perform with which these funds were connected terminated nineteen years agotwenty years ago on some of these bonds, but nineteen years ago every obligation and every duty closed with his service, and if he owed the Government a cent he was worth from that time to his death money enough to respond in double and treble and quadruple any sum that enough to respond in double and treble and quadruple any sum that could have been claimed. His sureties were at that time all able to respond, and he was himself able up to the time of his death and until his property was distributed to his heirs at law, who are generally the children of brothers and sisters, many of them minors at that time. That was distributed seven or eight years ago, and has been used up.

On looking over the books there is found some apparent claim against

him and his bondsmen twenty years old. I have myself talked to Judge Durham and examined the books about it. On examination of the books as to the claims on which suit has been brought in Michigan on two of the bonds, the books themselves show, as stated in this report and as Judge Durham stated to me, that there is nothing due. Therefore on those two bonds the correction of the books felieves the sureties. But the investigation is still being pressed on the other bonds. Judge Durham said from the fact that they had commenced suit perhaps hastily on some of these old bonds, he desired that the matter should be brought to Congress, and whether the bill passed or not Congress should allow further time for the investigation which is going on

now. The suits by order of the Department are held in abeyance subject to the action of Congress or to a further investigation.

Many of these bondsmen have died and their property has been dis-tributed to their children. There is a balance of six or seven thousand dollars apparently on the books due. Of that amount the amount of \$113 on one bond and \$3,000 on another, the books show that he was not indebted as the report states, and Judge Durham, the Comptroller, told me and I examined it myself. On the other two bonds there is still a belief that they can find and do find a claim for allowance to Mr. Dexter, perhaps enough to equal the apparent claim of the Government. These people have heard nothing of this, through the laches of the Government, for twenty years; the opportunity has not been given them to have the property of the principal or the aid of the other sure-ties. It is a matter where I think in justice to people who have become bound, the Government should not prosecute against innocent par-ties bonds that have been left to slumber by somebody's fault for twenty years without giving the least notice of any claim.

Mr. McPHERSON. When were these suits commenced?

Mr. CONGER. This last summer and spring. They have not been

The parties took the earliest opportunity they could to long pending.

have an investigation made by their agents here, and already in the Departments two of the bonds are found to have been satisfied; already it is shown that there are notes on the books referring to other

ready it is shown that there are notes on the books referring to other things which, if found to be correct, would satisfy another of these bonds, so that there is only one left.

There is an equity in this case, which I think appeals to everybody, that minors and heirs who have had property left them and have used it for eight or ten years, shall not now be called into court to contribute to the payment of these little balances.

The proof before the Comptroller—and I assert it myself—is that there never was a more honest man as we thought in Michigan than Mr. Dexter. That was his reputation everywhere, a careful, prudent He never had notice that could be found from any paper nor did one of his sureties; they never had the least intimation during all these twenty years that there was an unsettled matter of Mr. Dexter's on which they were liable and there is nothing to show that even Mr. Dexter himself ever received any notice that his accounts had not been all square. Instead of this being an extraordinary bill, I think it is extraordinary that the Government should not in some way have notified

some of these persons if there was any claim against them.

Now, if the Senator from New Jersey will read the report prepared by the Senator from Wisconsin [Mr. Spooner], it sets forth the case I believe correctly, and also the character of Mr. Dexter, and also the fact that two of these bonds are found by the Department to have been satisfied, so that no further action should be taken. But the district attorney of Michigan having been instructed to bring these suits has commenced them, and they involve a large number of persons and their heirs in a trouble which they never anticipated. We have relieved the bondsmen to a much larger extent in other cases, where

equity required us to do so, even where parties had had some notice. I submit that this is a proper case for relief.

Mr. HARRIS. Allow me to ask the Senator from Michigan how long it was after the default of the public officer, before the defalcation was discovered and proceedings were instituted against the officer and his

Mr. CONGER. The last settlement was nineteen years ago on one

bond, and twenty years ago on another.

Mr. HARRIS. And when were proceedings instituted? When was suit brought against the sureties?

Mr. CONGER. Some time in April or May of this year, I think. Mr. HARRIS. Some eighteen or nineteen years after the default was

Mr. CONGER. I think nineteen years had elapsed before the sureties or the family of Mr. Dexter ever had the least intimation that the

accounts were not all settled and correct.

Mr. McPHERSON. I still affirm that I was quite right in the statement I made, from the reading of the report which I now have before me. I stated that there were six or seven distinct charges on which suit had been brought. It seems, in the first place, that on April 29, 1861, while holding a certain office—he was receiver of the United States land office at Ionia, Mich.—we find a claim against him then as a defaulter to the Government. There are four distinct suits against his bondsmen.

Mr. CONGER. Does the Senator say there was a suit brought nine-

teen years ago?

Mr. McPHERSON. No; but I say suits have been brought in four distinct cases. This is the first section of the report. Then it says: Another suit is pending on the bond of March 27, 1865, which was on the reap-pointment of Dexter as receiver.

It seems that under this bond there is claimed to-day, with interest, \$12,284,19.

Mr. CONGER. With the interest for twenty years.

Mr. McPHERSON - It seems that on that bond there were twelve or fourteen different sureties at different times-I suppose the renewals of the bonds with different sureties.

There is also a suit pending on the bond of August 24, 1866, which was given upon a reappointment. The Government claims that there is due on this bond \$311.31, with interest for nineteen years, making an aggregate of \$666.20. On this bond there is another distinct set of bondsmen.

I concede that at times the Congress of the United States have remitted penalties on bonds, for instance in the Navy Department. I happen to be a member of the Naval Committee, and I know of such cases coming before our committee, but in no case I believe has that committee reported a bill for the relief of a naval paymaster, except when during the civil war the naval paymaster had died or his funds had been stolen, and there were circumstances showing that it was absolutely beyond the power of the paymaster to have done otherwise than he did; and the Army paymasters have been treated in like manner. The same thing has been done in the custom-house, where money had been stolen from the custom-house, but in no case, so far as I can recollect, was there anything of this kind in which the Government officer in every single office he held under the Government was a persistent defaulter. This is a case most extraordinary, of a man having held four or five different recitions under the Government and see for act this record roses to anything of this kind in which the Government officer in every single office he held under the Government was a persistent defaulter. This is a case most extraordinary, of a man having held four or five different positions under the Government and, so far as this report goes to his estate, which was very considerable, more than enough to have liqui-

show, in every case he has been a defaulter, and now it is proposed to remit the penalty on his bonds.

Mr. CONGER. The charge that John C. Dexter, of Michigan was

The charge that John C. Dexter, of Michigan, was a defaulter knowingly to himself or to his friends, made by the Senator from New Jersey, could have been made with just as much assurance of propriety against the gentleman or his father, or any man in the world.

Mr. McPHERSON. Very true and very properly, but the Depart-

ment gives us the dates and amounts.

Mr. CONGER. There is no pretense here that he was a defaulter. The claim only is that on four of these bonds the books, twenty years after, do not show a settlement by allowing certain credits-that is all—but the books themselves when examined as to two of the bonds clear him from any charge of not having made settlement. Is that

clear him from any charge of not having made settlement. Is that any indication that he was a defaulter?

Mr. McPHERSON. Let me ask the Senator if the books of the Treasury Department had been written up during those twenty years when this man appears to have had a deficit on the books of the Treasury, why was not suit brought against him?

Mr. CONGER. I do not know. What I complain of is that suit was not brought. What I say is that there should be some time when, as between the Government and individuals, as between private indias between the Government and individuals, as between private individuals, suit should be brought or the matter should drop. There should be some statute of limitations within reasonable limits against the Government. But for the Senator to say that in the offensive or wrong sense John C. Dexter, the pride of my State, is to be upbraided after he is dead, or his children to be upbraided by having him called a defaulter, I resent it, and I could make the same charge against any man in the State of New Jersey with equal propriety.

There is nothing anywhere to show that this man ever in any way violated any trust, and the good people of Michigan will hear with surprise the venerable Senator from New Jersey charging John C. Dexter, of Michigan, the pioneer and patriarch of that region, with being either corrupt or knowingly a defaulter, with plenty of money in his possession all the while up to the day of his death to meet any demand of citizen or Government either.

Mr. McPHERSON. One word more. The Senator from Michigan states that for twenty long years, during which time the political party to which the Senator belongs was in control of the Treasury Department of the United States, this default existed. I use the term because of the fact that according to the books of the Treasury this gentleman owed on the 29th of April, 1861, a certain sum of money to the Treasury which was not settled up, and notwithstanding all that he was re-appointed, and four different suits have been brought against him. The matter was allowed to sleep in the Treasury Department for twentyfour long years until a new administration come into power, and they propose to write up the books of the Treasury to know how they stand, and we find some twelve thousand and odd dollars due from Mr. Dex-

and we find some twelve thousand and odd dollars due from Mr. Dexter or from the bondsmen of Mr. Dexter, of the State of Michigan.

The Senator objects to my calling Mr. Dexter a defaulter. I know of no other term to apply that will fully comprehend the whole meaning of the affair. He was in deficit at all events to the Treasury at various times in every office he held, and it was not discovered until the Democratic administration came into power, when they asked his bondsmen to pay up the sum of money that the books of the Treasury show that he owed the United States. Now it is proposed to release his bondsmen, thirty or forty in number, upon the seven different bonds he gave in the suits brought against them. If that is not an extraordingry proceeding I have no words to characterize it. dinary proceeding I have no words to characterize it.

Mr. CONGER. I suppose everybody present in the

I suppose everybody present in the Senate understands this attack as personal. I hope my friends in Michigan will not suffer for it; these personal matters I settle myself when I have the

Mr. INGALLS. Mr. President, I hope some time before the close of my public service to have the opportunity of voting for a bill that shall prevent the institution of such suits as those which are mentioned in this bill by the Government of the United States. It is an old maxim that time does not run against the king. That is one of the principles that time does not run against the king. That is one of the principles which are quoted in regard to the liability of persons upon contracts; but there is no civilized power anywhere that I know of which does not recognize the obligation of those who have claims against their fellows to use due diligence in their enforcement.

Statutes of limitation are sometimes criticised with disfavor, and the debtor who avails himself of a statute of limitation, as it is sometimes called, to avoid the payment of a debt is not always regarded as strictly honest; but statutes of limitation have their foundation in sound reason, and the wisdom of such statutes was never more apparent, and the reason why they should be applied to claims that the Government may have was never more evident than will appear upon inspection of the statement of the facts in this bill, for which I hope I shall have the pleasure of voting.

dated all these demands, was distributed among his heirs and is now incapable anywhere of recognition. Of the sureties upon these bonds, some have paid the debt of nature, others have themselves become insolvent; some are only able to pay a portion ratably of the amount which they would be called upon to pay if this claim should be enforced as it should be against all, in the nature of a contribution, who declared themselves at the time of the original contract to be liable to the Government of the United States for whatever deficit might occur in the

In the one case nineteen years and in the other twenty years have elapsed since this obligation, whatever it is, arose. There never has been an instant of time since this man went out of office or since he died in which the Government by its proper accounting officers had not been able to ascertain and declare the exact state of his accounts. There never has been an instant when any one of these sureties upon these bonds had that opportunity. The power and the evidence have all been in the control of the Government of the United States, and more than three times the period that is fixed in all civilized States as the time beyond which suits shall not be brought upon matters of contract like this has elapsed.

Now, as the Senator from New Jersey states, at last the books having been inspected and the account having been stated, it is proposed to accomplish this act of monumental injustice against a few remaining sureties upon these bonds by compelling them to pay not alone the principal that was found to be due, but an amount of interest that aggregates five or six times the amount of the principal.

Mr. McPHERSON. Was it not the right of the bondsmen at any time during these twenty-four years to have made inquiry at the Treas ury Department and ascertained whether the account was settled? Was it not the duty of the Treasury Department at all times to have that account made up in such a manner that a demand could have been made; and should not a demand have been made at an earlier time?

Mr. INGALLS. Everybody undertands how sureties sign their names to official bonds. It is a friendly act. No man voluntarily goes upon an official bond. It is an act which everybody performs with reluctance, and yet it is an act that must be performed by somebody-by personal and political friends. I have no doubt that these men performed this duty for Mr. Dexter exactly the same as every one of us enters his obligation as surety upon the official undertaking of those

who have been appointed to office.

Mr. MAXEY. Will the Senator from Kansas permit me to refresh his memory about a bill that has heretofore passed substantially like this? Several years ago during the lifetime of Senator Anthony, of Rhode Island, I introduced a bill for the relief of the sureties of George W. Clarke, formerly an Indian agent. Those sureties were Jesse Turner, James M. Brown, S. F. Cottrell, and some others. That bond was made I think for Mr. Clarke as Indian agent years prior to the war. No suit was brought until long after the war-about the time I introduced that bill, seven or eight years ago.

The bill introduced by me was reported by Mr. Hereford, of West Virginia, from the Committee on Claims, and was discussed in the Sen-Then the doctrine that there was no laches against the Government was invoked, but the Senate after mature deliberation came to the conclusion that when by the laches of the Government the sureties had been allowed to die, to become broken up, to be scattered, leaving two or three instead of ten or twelve, it was not justice or right to hold those few responsible, and the bill passed the Senate and the House and became a law. I mention this because it occurs to me as a parallel case.

Mr. INGALLS. I am obliged to the Senator from Texas for refreshing my mind on that precedent.

Mr. HARRIS. At this session, if the Senator will allow me, both Houses have passed a bill to relieve Emerson Etheridge and William B. Stokes in a case identical, as it seems to me, with this one.

Mr. INGALLS. That precedent is quoted in the report of the com-

The bill is in most respects not unlike-

The committee say-

the bill passed by the Senate at the present session for the relief of Emerson Etheridge and William B. Stokes.

The Senator from New Jersey would apply the rigid and harsh rules of the law, and I should have no hesitation in saying in response to his question, as was stated to the interrogatory of Shylock, it is undoubtedly so nominated in the bond and under the existing law if the Government sees fit to take the pound of flesh, I do not know that there is any statute except the statute of justice that is written in every patriotic soul that would prevent it, but I would apply the doctrine of Portia to this also and say:

The words expressly are a pound of flesh:
Then take thy bond, take thy pound of flesh;
But, in the cutting it, if thou dost shed
One drop of Christian blood, thy lands and goods
Are, by the laws of Venice, confiscate
Unto the state.

Here in this case there are but two or three or it may be half a dozen out of all these sureties that remain responsible, and therefore the whole

burden of the Government is allowed to rise after a slumber of nineteeen or twenty years and say that this debt shall be paid, and this claim shall be enforced against those who will be called upon to bear the burden when it appears abundantly from the report of the committee that long after the principal himself went out of office, and before his death, he was amply able in his estate to meet any claims against him.

Mr. President, I make these remarks for the purpose of showing the absolute cruelty and absolute injustice and wrong of applying any other rule to the Government in cases like this than would be applied to in-

dividuals. I have in the list of my own acquaintance an illustration that sheds some light upon this subject. A friend of mine was an agent for a tribe of Indians, appointed, I think, in 1861 upon the incoming of the Republican administration. He served two or three years and went out of office, and more than twenty years after he had left that place, and without knowing that there was a dollar of indebtedness against him, one of the sureties upon the bond was notified that in consequence of a review of the accounts there had been found to be an indebtedness; and a suit was ordered to be brought that would, if it had been enforced, have abwas ordered to be brought that would, it it had been enforced, have absorbed the entire amount of that man's property that he had acquired by a life of industry and temperance for a period of nearly a quarter of a century. Is there any justice in that? Is there any right in it? Is there any reason why, when the Government possesses all the sources of information and has the power to accomplish whatever it desires, it should be allowed, after the lapse of many years (it may be a century, because there can be no limitation of time, according to the Senator from New Jersey), when all the active agents in the whole business have passed away, men have died, their estates have been distributed, and their heirs have come after them—why the Government should be permitted, in opposition to the regulations and rules of every civilized people on earth and against the rules that are enforced against every private claimant, to come up and perform such an act of monumental wrong and injustice as that?

Now, Mr. President, to my mind the facts in this case make out a

clear defense

Will the Senator pardon me for making a suggestion Mr. HOAR. in the line of his argument?

Mr. INGALLS. Yes, sir.

Mr. HOAR. The principle, which he has so clearly and strongly shown the injustice of, has been applied by this Government to the volunteer officers of the late war, who had occasion of course to have military accounts with the Government. I have known instances of officers who went into the war at great sacrifice-not persons seeking office for their own advantage, but going into the Army for purely patriotic purposes-who had held over their heads for fifteen or twenty years accounts which they could not get settled in any way.

Mr. INGALLS. Yes, Mr. President, and my sole object in calling attention to the facts in this claim—I am obliged to the Senator from Massachusetts for re-enforcing the argument I have presented-is to say that the Government ought not to be permitted to attempt to enforce claims of this description against innocent sureties upon bonds which the laches of the Government itself has rendered it impossible to collect from the principal; and if anything that I have said or anything that the Senator from Massachusetts has said or the Senator from Michigan, shall bring the attention of Congress and of the Government and of the people to this subject, so that we may have some public declaration by statute that some time shall come in the lifetime of the nation, in the lapse of centuries and in the progress of all the generations of men that are to succeed each other until this Government shall be no more, when the Government shall be estopped, it having slept more than the sleep of Rip Van Winkle upon its rights, from enforcing such claims as this, I shall be satisfied that I have discharged a not unimportant duty to the public.

Mr. DAWES. Mr. President, there is a bill pending somewhere, and I wish this discussion might have the effect at least to bring it before the Senate for action, putting a limitation of six years upon any attempt of the Government to pursue sureties on a bond after that time.

Mr. MANDERSON. I should like to interrupt the Senator from Massachusetts long enough to say that the bill to which he refers was introduced by myself at three different sessions of Congress and has been referred three different times to the Committee on the Judiciary, and is as yet without a report from that committee.

Mr. DAWES. This discussion will at least have informed the Senate of where the bill is, and I hope that it will have the further effect

of bringing it before the Senate.

Mr. DOLPH. Will the Senator give way to me for a moment? I will state that when the case of Etheridge and others was up I opposed the bill because that would only relieve one case out of a thousand by a special act, and I introduced a resolution, and had it referred to the Committee on the Judiciary, instructing them to report whether or not there ought to be a time fixed by statute within which these accounts should be settled in the Treasury Department and a limitation of time within which these actions should be brought, and that has not been

reported by the Committee on the Judiciary.

Mr. DAWES. Some good beyond the relief of these sureties, I think will come out of this discussion. I sought merely to emphasize

this discussion with my abhorrence of the manner in which the Government of the United States hunts sureties on old bonds on file in the Departments and of the men who go groping around among the pigeon-holes of the different bureaus of the Treasury Department finding out technical defaults of principals and then hunting up what remains of the sureties upon those bonds. The man who goes around the country hunting up defects in men's title is held in scorn by the public everywhere; and the man who goes into the Department and makes contracts, sometimes for a percentage of what he can recover upon these old bonds, and then hunts up the sureties, is no better. I have in my mind, and I have not only had in my mind but I have had anxiety and I have had much to do with the Treasury Department in an instance which illustrates this matter.

Mr. McPHERSON. Do I understand the Senator from Massachusetts to say that the Treasury of the United States gives out the collec-

tion of the moneys due from sureties by contract?

Mr. DAWES. No. I say men sometimes undertake to hunt up and

ollect and have a percentage of what can be got for their expenses.

Mr. McPHERSON. Who gets the percentage?

Mr. DAWES. The men who go prowling around the country trying to find some technical defect in the administration of an office not involving any moral fault at all.

Mr. McPHERSON. They must be detectives employed by the De-

Mr. DAWES. I do not care what you call them. It is the character of the men and the character of the business to which I call the attention of the Senate much more than the style under which they go

about the country.

Sir, a single case came under my observation and has been about me for years here, where an innocent man in Massachusetts was deluded into the idea that he had better be an Indian agent, and he was appointed to an Indian agency away up in the northern country. I hope he is the last of the men of Massachusetts who will ever go into such an undertaking as that. He was as honest a man as ever lived, but utterly unacquainted with the complications of doing business as an Indian agent 500 miles from business men. He was called upon to carry on the business of that agency, and after he had served out his time and his accounts had been here years, some one found technical defects in his accounts and they were hung up and he was indicted in Wisconsin and tried there on a charge of criminal neglect and acquitted there before the jury left their seats. Then his sureties were hunted up in Massachusetts and all but one of them were dead. A suit was brought against him in the United States courts in Massachusetts; and year after year, he spending every dollar he had in defending himself against that outrage, received a verdict of acquittal in the civil suit; and just because the judge submitted to the jury the honest question whether the United States had suffered the loss of a dollar or not, rather than whether this man had departed technically from the requirements of the law in making out his case, when the jury brought in their verdict on the ground that the United States had suffered no loss of a dollar, he is still hung up here in the Supreme Court by the United States taking an appeal after the verdict of a jury twice told has

acquitted the principal of all wrong.

Sir, there should be an end of litigation. Good morals, good law as to any other party in a suit but the United States, requires that some time or other there should be an end of litigation. I trust that this discussion will drag out from its sleep in the Judiciary Committee a bill that shall put a reasonable limitation upon such actions.

I do not speak of this as peculiar to this administration. know that this administration especially has departed from the customs of administrations before. I am not here hunting after little things to arraign one administration against another. I acquit them of any idea of pursuing any new policy in this matter, but if they had condemned the policy rather than followed it they would have commended themselves to me much more than they do by the zeal with which they are following it now.

Mr. McPHERSON. A single word further in regard to this matter

and I will stop.

I should be very glad to vote for a law which would require the Government of the United States to commence within two years suits against bondsmen upon every official bond held by the Government, and in case it was not done the Government should be forever estopped from collecting the money due it upon official bonds. I suppose I am as guilty as anybody else for not trying to bring to the attention of the Senate before this time a bill having that object in view. I think that my votes in the Senate will show that I have exercised perhaps as much sympathy as any other Senator with respect to people who come here and ask for the interposition of Congress upon these bonds after they have been running for a long term of years. Certainly in every case in which naval paymasters and Army paymasters have asked relief, I have voted for it.

But this is a most extraordinary case, and it is one which if the Senate can consent to the remission of this penalty on these bonds it must do so in every case, because a more aggravated one has hardly ever come before the attention of the Senate.

In the first place, as receiver, in 1861 this person was in default to

the Government, and upon his disbursing bond later he was in default to the Government. In 1865, upon his reappointment, he was again a defaulter to the Government, and in 1866, after another reappointment, again as receiver he was once more in default to the Government, and later in 1866 he was again in default to the Government.

Can the Senate remit this penalty to a man who was persistently in default in every office he ever held, because the report goes to show that he continued in office first as receiver, then as disbursing agent, after-ward reappointed as receiver on two different occasions, and in every instance he failed to make his accounts good to the Government of the United States. That is the nature of this case, and hereafter, if it passes, the Senate might just as well close its eyes, because I do not

think we shall ever have another such case

Mr. SAULSBURY. I shall vote for this bill. I voted for the bill cited in the report of the Senator from Wisconsin, for the relief of Etheridge and Stokes, on the ground that the Government had slept upon its rights, had been guilty of laches, and that ought to exonerate the sureties from liability on the bond. I do not concur, however, in the remarks that have been made which reflect upon the executive officers of the Government for instituting suits. On the contrary, I think they would have been derelict in duty if they had not done so. Finding the accounts of Mr. Dexter in the condition in which they were, it was their duty, a legal obligation resting upon them, and they would have been derelict in duty if they had not pursued the bondsmen in this case.

The books of the Treasury Department show that Mr. Dexter was in default if the books are correct, and liable to the Government for the amount stated in the report. What was the duty of the officers of the Government? It was to recover for the Government of the United States the amount which by the books appeared to be due. Against that suit the equitable claim was set up, which I recognize. There has been laches on the part of the Government. There is no legal defense to the suit, so far as I understand, but an equitable defense is set up that this being an obligation of years ago the laches of the Government per-

mitted an equitable defense against the claim.

So far as these sureties are concerned, in my judgment they have, when they appeal to Congress, an equitable defense that justifies Congress in interposing in their behalf. I again repeat that it was the duty of the executive officers of the Government finding the accounts of Mr. Dexter in the shape they did to institute suit against the bondsmen to recover the amount due and leave to the defendants any equi-

table claim they might have.

I do therefore not concur in the quasi criticism of the Senator from Kansas [Mr. INGALLS] and more especially with the Senator from Massachusetts [Mr. DAWES] of the executive officers for pursuing these They have done nothing but the duty which the law imposed on them; and I am glad we have officials to-day who are determined to do their duty to the Government. They have no objection to these parties coming in here and presenting any equitable claim they may have. They are perfectly willing that these persons should show that they ought to be relieved and that Congress should grant the relief; but their duty is plain under the law to collect this amount.

Now we are called upon by this equitable claim to stop an executive duty on the part of executive officers under their information. I am willing to join in that act; at least I am willing to relieve these persons, but I can not do it upon any ground which supposes that the executive officers of the Government on their information were derelict in the performance of their duty. They ought to have stated these amounts; they ought within two or three years at the farthest to have called the principal to the test, and if he was living and able to respond to the call, very well. The claim against the sureties stands in a dif-ferent light, especially when it comes here at the expiration of nineteen or twenty years.

I shall vote for the bill. I think the sureties ought to be released, and I should be glad to see some such law enacted by Congress as has been talked about this morning, fixing a limitation on suits; and I should like to see some further enactment which would compel all administrations, Republican and Democratic, to adjust accounts in the Treasury Department in proper time so that those liable to the Government may be held responsible.

Mr. DAWES. I congratulate the Senator from Delaware in being able to find a case for the application of his sense of justice and equity in his ability to throw the blame and the opportunity for the exercise of it upon distant administrations-anything to obtain equity.

Mr. CONGER. If I said anything reflecting upon the officers who have charge of this matter in the Department I said it unintentionally, for I say now that on personal application to those officers every facility has been given that it was possible to give to present these matters of defense and account and equity, and they have given every opportunity to these gentlemen with perfect fairness, and they have agreed that the case should be brought to Congress for its judgment.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PACKING AND SELLING CUT TOBACCO.

Mr. EUSTIS obtained the floor.

Mr. EDMUNDS. I am going to move an executive session.
Mr. ALDRICH. I rise to a privileged motion.
The PRESIDING OFFICER (Mr. HAWLEY in the chair). The Chair

will hear the statement of the privileged motion.

Mr. ALDRICH. I move to take up Order of Business 1813; being the bill (S. 183) for the relief of Thomas S. Hopkins, late of Company C, Sixteenth Maine Volunteers—a vetoed pension bill.
Mr. EDMUNDS. That is not privileged.

Mr. EUSTIS. Being recognized by the Chair, I ought to state for

The PRESIDING OFFICER. The Senator from Louisiana is entitled to the floor.

Mr. EUSTIS. I move that the Senate proceed to the consideration

of Order of Business 1725.

The PRESIDING OFFICER. The Chair does not understand that the motion of the Senator from Rhode Island is any more privileged than the motion of the Senator from Louisiana. The Senator from Louisiana moves that the Senate proceed to the consideration of the bill he has named, the title of which will be reported.

The SECRETARY. "A bill (H. R. 8738) to so further amend section 3362 of the Revised Statutes, as amended, and section 3363, as makes a distinction in the mode of packing and selling cut tobacco.

Mr. EDMUNDS. Pending that motion, I move that the Senate proceed to the consideration of executive business.

Mr. EUSTIS. I appeal to the Senator from Vermont to withdraw that motion. I have tried on three successive days to get up this bill for the purpose of having considered the motion for its recommitment.

Mr. EDMUNDS. Is that all the Senator desires?

Mr. EUSTIS. That is all I desire.

Mr. EDMUNDS. How long will it take? Mr. EUSTIS. Not more than five minutes to make a statement.

Mr. EDMUNDS.

Mr. EDMUNDS. I withdraw the motion for the moment. The PRESIDING OFFICER. The question is on the motion of the Senator from Louisiana.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 8738) to so further amend whole, proceeded to consider the bill II. It. 18. 363 to Statistical michals section 3362 of the Revised Statutes, as amended, and section 3363, as makes a distinction in the mode of packing and selling cut tobacco.

Mr. EUSTIS. I can state what the bill is.

Mr. PLATT. I should like to hear the bill read.

The PRESIDING OFFICER. The bill will be read.

The bill was read.

Mr. EUSTIS. This bill was apparently reported by the Committee on Finance without any objection from any member of that committee, except, perhaps, those who were absent. Two members of that comexcept, perhaps, those who were absent. Two members of that committee were absent, the Senator from Ohio [Mr. Sherman] and the Senator from New York [Mr. MILLER], as I understand. Now, a motion has been made by a member of the Finance Committee to recommit this bill.

Mr. HARRIS. By an order of the Finance Committee.

Mr. EUSTIS. By order of the Finance Committee, I desire to have that motion disposed of by the Senate. If the motion to recommit prevails that will dispose of this bill for this session. If that motion does not prevail I will call up the bill itself as a bill upon the Calendar. But I wish to make a brief statement to show that there exists not only in the minds of Senators, but elsewhere, a complete misapprehension of what this bill is.

The change proposed in the existing law is this: That whereas cut tobacco can only be put up in packages now of from 1 to 16 ounces, this bill gives the right to any manufacturer of cut tobacco in the United States to put up that cut tobacco in packages up to the weight of 10 It still leaves it at the option of the manufacturer of cut tobacco whether he shall pack that tobacco in small packages or in a large

package equal to 10 pounds.

Mr. President, this bill originated in the Treasury Department. It is not a bill which is in the interest of any class of manufacturers. will show incidentally, and for reasons outside of the proposed law, why the manufacturers in New Orleans are interested in the passage of this bill. The Treasury Department—Mr. Fairchild, acting Secretary—wrote to Mr. Harris, a member of the House, and also a member of the Committee on Ways and Means, a letter, in which he said:

I also inclose a draught of a bill-

Which is this bill-

prepared by the Commissioner for amending sections 3362 and 3363 of the Revised Statutes, relating to the packing and selling of cut tobacco, together with two letters addressed to the Commissioner by the head of the tobacco division in his office, showing the necessity for the proposed amendments, in which the Commissioner says he fully concurs.

Therefore we have the statement of the Secretary of the Treasury that this is necessary legislation. The Commissioner of Internal Revenue wrote to the Secretary of the Treasury as follows:

I also take the liberty to inclose to you a copy of a bill which I have prepared for amending sections 3362 and 3363, United States Revised Statutes, relating to the packing and selling of cut tobacco. And in connection with these bills I inclose two letters addressed to me by the head of the tobacco division showing the necessity for these amendments, and particularly so with regard to section 3362, in which I fully concur.

Upon these recommendations the House of Representatives passed this bill, without any objection, after full explanation of its scope and its purpose, and it was sent to the Senate. When it reached here the purpose, and it was sent to the Senate. bill was referred to the Committee on Finance, and the Commissioner of Internal Revenue, showing his extreme anxiety and desire to have it passed, wrote the following letter to a member of the Committee on

Finance:

Sir: Allow me to call your attention to House bill 8738, now pending before the United States Senate.

I am very anxious to have Congress act upon that bill soon, as its passage will relieve the Government and the trade. The bill only relates to the packing of cut tobacco, at the option of the manufacturer, in packages not to exceed, in any case, 10 pounds. But its ultimate effect will be to dispose of a delicate and difficult question, to wit, making a distinction between fine-cut chewing and other kinds of cut tobacco.

I would be gratified to have your opinion as to the probability of early action by the Senate on this bill. It was urged in the House by the Secretary of the Treasury, and I suppose his correspondence on the subject will be transmitted to the Senate, if it has not already been sent there.

So we see that when this bill came to the Senate the Commissioner of Internal Revenue thought that this legislation was so much needed by the service with the responsibility of which he was charged that he wrote this emphatic indorsement of the bill to a member of the Committee on Finance, urging that the committee should act promptly on the bill, and hoping that the Senate of the United States would adopt it. Not only that, but the Commissioner of Internal Revenue, not satisfied with the force which his recommendation ought to have, went in person and appeared before the Finance Committee and urged a favorable and prompt report from that committee to the Senate of the United States, in order that the House bill should become a law. Therefore I say there has been extraordinary anxiety and extraordinary zeal displayed by the Treasury officials that the bill should be passed by the

Can any one suppose for a moment that they did not make those recommendations in favor of the service which they represent? This is a mere question of detail of administration. There is no question of policy, no question of principle involved. It is merely a question for the convenience of the internal-revenue service, and I do not think that the Senate of the United States in the face of these earnest and urgent recommendations made by the officials of the Treasury Department will disregard those recommendations and repudiate their indorse-

ment of the bill.

Although not a word of opposition was heard when the bill was pending in the House of Representatives, although not a word of opposition was heard when the bill was considered by the Committee on Finance, I am told that since then, all of a sudden, there have been protests sent here from manufacturers in the Northern cities, and also from North Carolina. Why is this? It is simply that those manufacturers want to be put upon the same footing with reference to other classes of tobacco; for instance, granulated tobacco, as the manufacturers of cut tobacco. That has not been recommended by the Department. Why? For the simple reason that this legislation has been considered by the Department a necessity, and it in no possible sense applies to any other class of tobacco. That is stated by the chief of the tobacco division in a communication to a member of the Committee of Ways and Means.

In New Orleans there is manufactured cut tobacco which is used both for the purpose of smoking and chewing, but on account of the dampness of the climate the manufacturers there can not put up the cut tobacco in small packages, because the tobacco becomes funky and deteriorates. Therefore they have put it up in large packages, which has brought about a very serious litigation with reference to their right to use large packages. No manufacturer of granulated tobacco, or any other kind but cut tobacco, has raised such a question as that. We all know that granulated tobacco is only used for smoking, as are other tobaccos which are manufactured of a certain class; but the service found itself confronted with this very serious litigation and serious controversy, that the manufacturers of cut tobacco in New Orleans claimed that they had the right to put up cut tobacco in large packages, and they asserted that right for the reason, and the very strong reason, that cut tobacco could be used indifferently for chewing or smoking purposes. The head of the tobacco division, in his communication, says

These modes of manufacture open a wide field for difference of opinions, and this office has found it utterly impossible to reconcile these differences under

this office has found it utterly impossible to reconcile these differences under the law as it now exists.

For this reason I have thought proper to recommend a change in the mode of packing cut tobacco in bulk, allowing all cut tobacco to be thus packed, but confining the size of the package to 10 pounds each. This change, if adopted, will allow manufacturers in every part of the country the same privilege of packing, and the same privilege of selling their cut tobacco wherever they can find purchasers, and will not very greatly facilitate the reuse of packages without the payment of the tax.

Inclosed please find draught of a bill providing for such a change in the mode of packing cut tobacco as is herein recommended.

Mr. President, that is the whole case. Here is a measure the necessity for which has been most earnestly urged and recommended by the Treasury officials, the Secretary of the Treasury at the head, involving a mere question of detail of the administration of the service with which they are charged and nothing else. It is true that incidentally and outside of the measure it does confer a privilege upon manufacturers in New Orleans, but that is not the reason why the recommendation is made by the Secretary of the Treasury. No one will charge here that the Secretary of the Treasury or the Commissioner of Internal Revenue has recommended Congress to enact a law by which a favoritism shall be shown to one class of manufacturers as against another. No one will assume that those high officials have recommended this legislation in the interest of parties who may desire to commita fraud upon the

This bill can be acted upon and considered by the Senate like any other If a majority of the Senate are not in favor of the bill let them so declare. If any one wants to amend the bill, if it is defective, that privilege exists; but why shall this unusual motion prevail, which has not been made during this entire session? The bill being on the Calendar by the votes of the Finance Committee, acting upon the recommendations of the Treasury officials, it is now proposed that it shall be recommitted, which means the defeat of the measure, for the simple reason that others who are not entitled to the favors which they claim demand that they shall be put upon an equality with reference to other classes of tobacco.

No question of trade-mark is involved. No one proposes to use or imitate anybody else's trade-mark. The mode of packing is merely as to the size of the package. No one is compelled to adopt a large-sized package. The object is simply to have determined and solved a complicated and difficult question which has harassed those who are charged with the execution of the tobacco laws and has brought about serious litigation which the Government think it is for their interest to avoid, that these recommendations have been made, and I say it would be disrespectful, in my judgment, for the Senate of the United States in the face of these recommendations, in the face of the deliberate action of the Finance Committee, to state to the Treasury officials that we will disregard and utterly ignore the recommendations which they have made, and carry the bill back to the committee and defeat this proposed legislation at this session.

I ask for a vote on the motion.

Mr. EDMUNDS. I move that the Senate proceed to the consideration of executive busines

Mr. EUSTIS. I should like to have a vote on the motion to recom-

it. Let us just take a vote.

The PRESIDING OFFICER (Mr. HARRIS in the chair.) The Senator from Vermont moves that the Senate proceed to the consideration of executive business

Mr. HOAR. Will the Senator from Vermont allow me to make a statement in regard to a committee which was appointed this morning? The PRESIDING OFFICER. Does the Senator from Vermont withdraw his motion?

Mr. EDMUNDS. Subject to my right.
Mr. HOAR. Pending that motion I wish to make a statement.
The PRESIDING OFFICER. The Senator from Massachusetts The Senator from Massachusetts will proceed.

AMERICAN ANNIVERSARY CELEBRATION.

Mr. HOAR. The committee appointed in regard to the matter of the centennial celebration was by the vote of the Senate to consist of the President of the Senate and six other members. It was the intention in framing the resolution that the President of the Senate should be the chairman of the committee. He has announced the committee. putting my name at the head. I ask unanimous consent that it shall be the understanding of the Senate that the President of the Senate shall stand at the head of that committee.

The PRESIDING OFFICER. The Senator from Massachusetts asks the unanimous consent of the Senate to reform the committee as he suggests, by putting the President of the Senate as the chairman of the committee. If there be no objection, that order will be made.

committee. If there be no objection, that order will be made.

Mr. HOAR. I now desire that the resolution reported from the Committee on the Library on the subject be indefinitely postponed, so as to get it off the Calendar, the Senate having passed a similar one.

The PRESIDING OFFICER. If there be no objection the resolution suggested by the Senator from Massachusetts will be indefinitely postponed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. Clark, its Clerk, announced that the House had passed the bill (S. 1532) to regulate commerce, with an amendment; asked a conference with the Senate on the bill and the amendment, and had appointed Mr. Reagan, Mr. Crisp, and Mr. A. J. Weaver the managers at the conference on the part of the House.

The message also announced that the House had passed the following bills; in which it requested the concurrence of the Senate:

A bill (H. R. 7988) granting an increase of pension to Bryant Waters;

A bill (H. R. 8180) to increase the pension of Charles Hahneman; A bill (H. R. 9129) granting a pension to Rebecca Wiswell; and A bill (H. R. 7696) for the relief of George W. Robaugh.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 190) for the relief of certain employés and others of the twelfth United States light-house district; and it was thereupon signed by the President pro tempore.

PACKING AND SELLING CUT TOBACCO.

The PRESIDING OFFICER (Mr. HARRIS in the chair). The question is upon recommitting House bill 8738 to the Committee on Fi-

Mr. EDMUNDS. No, Mr. President.
The PRESIDING OFFICER. Pending which the Senator from Vermont moves that the Senate proceed to the consideration of executive business

Mr. CAMERON. I hope that motion will not prevail.
The question being put, there were on a division—ayes 20, noes 15.
Mr. ALDRICH. I ask for the yeas and nays.
The yeas and nays were ordered, and the Secretary proceeded to call

the roll.

Mr. SAULSBURY (when his name was called). I am paired with

the Senator from Vermont [Mr. Morrill].

The roll-call having been concluded, the result was announced—yeas 21, nays 26; as follows:

YEAS-21

Allison,		Edmunds,	Maxey,	Walthall,
Berry,		Harris,	Platt,	Wilson of Iowa.
Blair,		Harrison,	Ransom,	Wilson of Md.
Butler,		Hoar,	Sherman,	
Camden,		Ingalls,	Spooner,	
Dawes,	110 31	Jones of Arkansas,	Stanford,	THAT ST. LINES OF LIGHT

NAYS-26.

Aldrich, Beck.	Dolph, Eustis,	McPherson, Miller,	Teller, Vance,			
Blackburn,	Frye,	Mitchell of Oreg.,	Vest.			
Call,	Gray,	Palmer,	Voorhees,			
Cameron,	Hampton,	Plumb,	Whitthorne.			
Conger,	Hearst,	Sawyer,				
Cullom,	Jones of Nevada,	Sewell,				

	ABSE	NT-29.	
Bowen, Brown, Chace, Cockrell, Coke, Colquitt, Evarts, Fair,	George, Gibson, Gorman, Hale, Hawley, Jones of Florida, Kenna, Logan,	MeMillan, Mahone, Manderson, Mitchell of Pa., Morgan, Morrill, Payne, Pike,	Pugh, Riddleberger, Sabin, Saulsbury, Van Wyck.

So the motion was rejected.

The PRESIDING OFFICER. The question is on the motion to re-commit to the Committee on Finance the bill (H. R. 8738) to so further amend section 3362 of the Revised Statutes, as amended, and section 3363 as makes a distinction in the mode of packing and selling cut to-

Mr. ALDRICH. I was instructed by the Committee on Finance by a unanimous vote to move that the bill be recommitted to that committee.

I stated the other day in discussion some of the reasons which led to this action. It is true that the committee ordered a favorable report to be made upon the bill upon a statement made by the Commissioner of Internal Revenue and by the Senator from Louisiana [Mr. Eustis].

That statement was made at a session of the committee at which there was barely a quorum present, and the statement was that the bill met with the approval of the Department and of the trade, and that there were no objections to it in any quarter.

The bill had barely been reported to the Senate when it was found that two members of the committee who were absent when this action was

taken had at the time protests in their possession from the leading manufacturers of the country against the passage of the bill, and that they understood no action was to be taken upon it at the meeting of the committee to which I have alluded. It soon became apparent that a very large portion of the trade in all parts of the country, I think with a single exception of one or two small manufacturers in the city of New Orleans, was strongly opposed to the bill on the ground that it opened the door to the gravest and grossest frauds.

The committee have not determined whether that state of affairs is

true or not, but considering the unusual circumstances under which the approval of the committee was obtained, and the fact that almost without exception the manufacturers of the country believe that the bill ought not to pass and that it does open the door to fraud upon the revenue and upon their business, the committee by a unanimous vote instructed me to have the bill recommitted to the committee. The bill stands here to-day in that way. Instead of having the approval of the committee it has the adverse report of the committee, if the Senator chooses to press it, because upon the state of affairs as we now understand it I am sure that no member of the committee would vote in favor of the passage of the bill.

Mr. EUSTIS. Will the Senator allow me to ask him a question?

Mr. ALDRICH. Certainly.

Mr. EUSTIS. I should like to ask the Senator how a fraud can be committed under the provisions of the bill, and whether he does not think that the Treasury officials are as competent as manufacturers to determine the question whether a fraud can be committed under its provisions?

Mr. ALDRICH. In my experience as a member of the Finance Committee I have found that it is very unsafe to follow the Treasury offi-

cials upon questions of this kind. I think the members of the committee have all found that it is safer to trust to their own judgment.

I do not care to discuss the merits of the bill. I say that the manu-I do not care to discuss the merits of the bill. I say that the manufacturers throughout the country are entitled to be heard before the committee. They have not been heard.

Mr. SEWELL. Will the Senator allow me to interrupt him?

Mr. ALDRICH. Certainly.

Mr. SEWELL. The largest tax-paying tobacco manufacturers of New Jersey are in favor of the bill.

Mr. EUSTIS. Also the second largest manufacturer in New York. I have a telegram stating that he approves it.

Mr. ALDRICH. I think the Senator from New Jersey is mistaken

I think the Senator from New Jersey is mistaken Mr. ALDRICH. about the bill which is now before the Senate for consideration. that the Senator's colleague stated that the manufacturers in his State were opposed to the bill, and he stated so to the committee.

Mr. McPHERSON. No; the Senator is mistaken. All the manu-

facturers of my State with whom I have been in communication favor

the House bill

Mr. PALMER. Mr. President, I do not know whether the bill should ass or not, but I feel convinced that it should not pass in the closing hours of the session.

The Senator from Louisiana has said that there was no objection to it in the House. That arose from the fact that the manufacturers throughout the country were not apprised of the fact that it was pending. He says it is very much desired by the Treasury officials. I think that it may possibly be a good bill to pass, but those interested in the business should be heard before the measure is passed.

In this connection I send to the desk and ask to have read a remonstrated in the send to the desk and ask to have read a remonstrated in the send to the desk and ask to have read a remonstrated in the send to the desk and ask to have read a remonstrated in the send to the desk and ask to have read a remonstrated in the send to the desk and ask to have read a remonstrated in the send to the desk and ask to have read a remonstrated in the send to the send that the send to the send that the manufacturers are send to the send that the manufacturers are throughout the country were not apprised of the fact that it was pending. He says it is very much desired by the Treasury officials.

strance from my city, from persons who are very largely interested in

the tobacco business.

The Chief Clerk read as follows:

To the honorable Senate of the United States:

To the honorable Senate of the United States:

We, the undersigned tobacco manufacturers and dealers in manufactured tobacco, do most earnestly protest against the passage of House bill 8738, in so far as it refers to the changing of the present style of packing manufactured tobacco. We give a few of the many reasons which may be urged against it.

First. The present manner of packing smoking tobacco prevents frauds in the collection of the tax. Smokings can be made with small expense and with little or no machinery. Chewings require expensive machinery and skill to manufacture. If smokings are packed in bulk the packages can be refilled, and thus defraud the Government and legitimate manufacturers.

Second. Packing smokings in bulk would allow the substituting of other goods for well-known brands. As long as a tax is collected on tobacco, legitimate manufacturers should be protected.

Third. The records of the Internal Revenue Office must show the great number of frauds which were perpetrated on the Government under the old law which allowed smokings to be packed in bulk, and the many reasons urged for the adoption of the present system now so satisfactory to all.

Mr. PALMER. From that remonstrance it is apparent that the proposed method of packing smoking tobacco was in vogue some years and it was changed on account of frauds. At least it is so stated in that memorial. I do not know whether that is the fact or not; but there seems to be a wonderful amount of ignorance existing as to the merits of the bill, and I think it is no more than just and fair to the manufacturers of the United States that the bill should be recommitted to the Committee on Finance.

Mr. BECK. Mr. President, I reported the bill under instructions from a majority of the Finance Committee after a somewhat limited hearing. The Senator from Louisiana [Mr. Eustis] and a very intelligent gentleman, Mr. Curtis, I believe, presented the case very fairly. We sent for the Commissioner of Internal Revenue to ascertain what his views were, he having written to me in the mean time a letter which I hold in my hand, and which was referred to by the Senator from Louisiana. The letter is as follows: Louisiana.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE, Washington, July 6, 1886.

Washington, July 6, 1886.

Sir: Allow me to call your attention to House bill 8738, now pending before the United States Senate.

I am very anxious to have Congress act upon that bill soon, as its passage will relieve the Government and the trade. The bill only relates to the packing of cut tobacco, at the option of the manufacturer, in packages not to exceed, in any case, 10 pounds. But its ultimate effect will be to dispose of a delicate and difficult question, to wit, making a distinction between fine-cut chewing and other kinds of cut tobacco.

I would be gratified to have your opinion as to the probability of early action by the Senate on this bill. It was urged in the House by the Secretary of the Treasury, and I suppose his correspondence on the subject will be transmitted to the Senate, if it has not already been sent there.

I remain, sir, yours, very respectfully,

JOS. S. MILLER, Commissioner.

Hon. James B. Beck, United States Senate, Washington, D. C.

We sent for Mr. Miller and he announced before the committee that he could only say to the whole committee what he had written to me. Therefore I ordered his letter to be published as a document and reported the bill, not being able to see any wrong in it, but on the contrary it seemed to me that the words should be stricken out which exist in the present law. The law at present reads "fine-cut chewing to-bacco." The change now proposed is to make the law read "fine chewing tobacco," leaving out the word "cut."

Not being able to see any serious reason why that should not be done.

Not being able to see any serious reason why that should not be done either then or now, I reported the bill believing it to be desired by the Department. But at once remonstrances came from Michigan, from

New York, from all over the country, the Senator from New York [Mr. MILLER], whom I see before me, avowing that he had left the committee before action was taken, and that he would have opposed it if he had been there because of remonstrances sent to him, and the Senator from Ohio, the President of the Senate, having left the committee. When I submitted it to him he said if a majority of the committee desired to report it, let it be done, but he received remonstrances from Cincinnati, and the remonstrances came from such and so many respectable sources that it seemed to me justice to the trade required that we should not act upon the bill now, but that we should postpone it and give to the gentlemen who are interested in this business a hearing.

So I united with the committee in asking that the bill should be rereferred to it in order that whatever objection gentlemen from Michigan, North Carolina, Ohio, New York, or anywhere else had against the measure should be made known.

All the effect of the postponement will be to give us until December to look into it. We do not defeat the House bill. All the complaints may prove not to be worthy of serious consideration; but the rule in the committee has been, and fair dealing requires, that when men think they are going to be injured and desire to have a hearing and have not had a hearing, which they would have had if we had known before what we know now, we ought to have the bill recommitted so that they can all be heard.

Men who are manufacturing what is called granulated tobacco think they have as much right as those who are manufacturing cut tobacco to put it in 10-pound packages, and perhaps they will be able to show that they have. They surely ought to have a chance to do so. Perhaps there is no fraud and might not be any in allowing tobacco to be so put up, whether it was fine-cut chewing or simply cut that might be used for smoking, or cut that might be used either for smoking or chewing, for there is where the difficulty comes in in the Department. The distinction which has existed before ought to be carefully looked at.

While I believe from all the information I have now that I shall vote for the bill as reported and am sorry that this confusion has arisen, I think it ought to go back to the committee so that there shall be no complaint by any respectable number of manufacturers that they have

not had a chance to be heard.

Mr. EUSTIS. Will the Senator allow me to ask him a question?

Mr. EUSTIS. Will the Senator allow me to ask him a question?
Mr. BECK. Certainly.
Mr. EUSTIS. I ask the Senator whether in reference to all other legislation it would not be fair to assume that when a printed protest, as in this case, has been sent to the United States Senate, that protest contains all the arguments and all the objections against the measure?

Mr. BECK. It may be that it contains all that those particular persons making the protest have, but others may have many other reasons against it. For example, the protest from Michigan which has been read does not state any of the objections which the North Carolina tobacco manufacturers have, and they have sent their protests to us, and very emphatic ones.

Mr. EUSTIS. I should like to know what the objection stated by the North Carolina manufacturers is.

Mr. BECK. It is simply that gaanulated tobacco ought to have the

same right as cut tobacco.

Mr. RANSOM. That is one point.

Mr. BECK. They say that if granulated tobacco is limited to 16 ounces and cut tobacco has a right to be put up in 10 pounds that is a discrimination against the granulated which ought not to be given.

Mr. EUSTIS. That is simply a one-sided argument. No one chews

granulated tobacco, whereas people do chew and smoke cut tobacco, and that is the reason why this measure is recommended. I wish to ask the Senator what possible reason can there be for putting granulated tobacco upon the same footing as cut tobacco.

Mr. BECK. I am not sure that there is any reason why it should

be done, but I believe the men who manufacture granulated tobacco ought to have a right to come before the Finance Committee of the

Senate and show what they can, and not be cut off without a hearing.

Mr. EUS IIS. I suggest to the Senator from Kentucky that the court has been open for a very long time, so far as a hearing is concerned. These protests and appearances might have been made before the House of Representatives. It looks to me like an extraordinary proposition when not a word of protest was heard while this measure was pending in the House of Representatives and when it was sent here and was before the Senate committee and considered, that we are now to arrest this legislation merely because A, B, and C choose to send a protest to the United States Senate. I say that it is unusual and unprecedented in this body.

Mr. BECK. I desire to say that it is neither unusual nor unprecented. We have taken back in the Finance Committee very many reports since I have been a member of it in order to give men a fuller hearing.

Mr. EUSTIS. At this session?

Mr. BECK. I am not sure. I can not name any bill at this session,

but I can find many such cases.

Mr. HARRIS. The Journal will show a number of instances at this session where bills which have been reported from committees have been recommitted.

Mr. EUSTIS. On the ground that persons have filed protests against the proposed enactment? I ask the Senator from Tennessee if he can name a single case where a bill has been recommitted because a protest was filed against it.

Mr. BECK. Let me state—
Mr. HARRIS. I will answer the Senator from Louisiana—
Mr. EUSTIS. Can the Senator name a single instance where a bill

has been recommitted solely and exclusively for the reason that some-body filed a protest against that bill in the Senate?

Mr. HARRIS. I will answer the Senator from Louisiana by saying that I know of no instance where a committee of this body have asked to have a bill recommitted that the Senate has refused to recommit.

Mr. EUSTIS. That is not an answer to my question.
Mr. HARRIS. And whatever reason the committee may have had for asking a recommittal is not a matter that I have known the Senate to inquire about.

Mr. EUSTIS. That is not an answer to my question.

The PRESIDING OFFICER (Mr. HAWLEY in the chair). The

Senator from Kentucky has the floor.

Mr. BECK. I only desire to add that the practice of the Finance Committee is in accordance with fair dealing to all men by giving all a hearing. The gentlemen who think with the Senator from Louisiana a hearing. The gentlemen who think with the Senator from Louisiana that the bill ought to pass will not be prejudiced. They may be delayed a few months by giving others a hearing, but whatever is just in their bill will be fairly considered.

For one, I see no difficulty in granting the request they make, nor do I see any difficulty in putting granulated tobacco in packages of 10 pounds; but I may after hearing everything change my views. I design to be said and the committee unanimously design.

sire to hear all that can be said, and the committee unanimously desire to hear all that may be said, believing that when that is done all parties will be better satisfied.

Mr. CULLOM. I understand that the motion is to recommit the

bill to the Committee on Finance.

The PRESIDING OFFICER. That is the pending motion.

Mr. CULLOM. I do not pretend to know what the merits of the bill are, but under the circumstances I hope that the bill will be recommitted. Since the bill was reported from the committee, and placed on the Calendar of the Senate, I have had very many letters from business men in my State protesting earnestly against the passage of the bill as it is. I therefore hope that the committee will have an opportunity to reconsider it, and when they do reconsider the bill and report it back to the Senate we can dispose of it as the judgment of the Senate may dictate.

Mr. CONGER. I feel it due to myself to say that I have received from constituents of mine in different places urgent telegrams asking that the bill be defeated or recommitted to the committee so that they was he heard in regard to the injury that they are not as the passage of the bill as it.

may be heard in regard to the injury that they can see will come to them and their business if the bill should be passed. A petition, signed by ten or fifteen of the largest fine-cut tobacco manufacturers in Detroit and one or two other places in Michigan, requests me to use whatever effort I may use to have the bill either defeated or recommitted with an opportunity of being heard.

The bill passed along through the House and came to the Senate, and I venture to say that the manufacturers of Chicago and Michigan had no idea that a bill which may so seriously affect their interests was under consideration or they would have been heard, for they are a kind

of men who generally speak in time.

I hope that the bill will be recommitted, and that between now and the next session, when it may be reported upon again, all the different tobacco interests may be heard, and a proper bill, just and equal to all and to the Government, may be presented to the Senate.

The PRESIDING OFFICER. The question is on agreeing to the

motion to recommit the bill to the Committee on Finance.

The motion was agreed to.

HOUSE BILLS REFERRED.

The following bills this day received from the House of Representatives were severally read twice by their titles and referred to the Committee on Pensions:

A bill (H. R. 7988) granting an increase of pension to Bryant Waters:

A bill (H. R. 8180) to increase the pension of Charles Hahneman; A bill (H. R. 9129) granting a pension to Rebecca Wiswell; and A bill (H. R. 7696) for the relief of George W. Robaugh.

COURTS IN PENNSYLVANIA.

Mr. CAMERON. I move that the Senate proceed to the considera-tion of the bill (H. R. 2124) amendatory of and supplementary to "An act to alter the judicial districts of Pennsylvania, and for other purposes," approved May 26, 1824, and providing an additional place for holding the several courts thereof.

The bill was reported from the Committee on the Judiciary with

amendments

The first amendment was, in section 1, line 9, after the word "next," to strike out the remainder of the section in the following words:

And be continued and adjourned from time to time as the courts may deem expedient for the transaction of the business thereof.

The amendment was agreed to.

The next amendment was to strike out section 2 in the following

SEC. 2. That all suits which shall be brought against persons residing in the counties of Lackawanna, Susquehanna, Wyoming, Luzerne, Bradford, and Columbia shall be determined at the sessions of the courts herein provided to be held at Scrantor; but nothing herein contained shall be construed to limit or confine the business of said terms to said counties.

The amendment was agreed to.

The next amendment was to strike out section 3 in the following words:

SEC. 3. That the clerk of the district and circuit courts for the western judicial district of Pennsylvania, and marshal and district attorney for said district, shall perform the duties appertaining to their offices, respectively, for said courts; and said clerk and marshal shall appoint deputies who shall reside and keep their offices at Scranton, Pa. Said deputies shall keep in their offices such records as appertain to their offices, and said deputy clerk shall keep in his office full records of all actions, proceedings, and judgments in said courts.

The amendment was agreed to.

The next amendment was, in section 4, line 2, after the word "being," to insert the words "and with the approval of the Attorney-General;" so as to make the section read:

SEC. 4. That the marshal of said western judicial district shall for the time being, and with the approval of the Attorney-General, provide a suitable place at the city of Scranton for holding the several courts and for keeping the records thereof.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

INTERSTATE COMMERCE.

The PRESIDENT pro tempore laid before the Senate the amendment of the House of Representatives to the bill (S. 1532) to regulate commerce, which was to strike out all after the enacting clause and insert a substitute.

On motion by Mr. CULLOM, it was

Resolved, That the Senate disagree to the said amendment and agree to the conference asked by the House on the disagreeing votes of the two Houses thereon.

By unanimous consent, it was

Ordered. That the conferees on the part of the Senate be appointed by the President pro tempore.

The PRESIDENT pro tempore appointed Mr. CULLOM, Mr. PLATT, and Mr. HARRIS the conferees on the part of the Senate.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. CLARK, its Clerk, announced that the House had disagreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7480) making approthe amendment of the Senate to the bill (H. R. 1480) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, further insisted on its disagreement to the said amendment, asked for a further conference thereon, and had appointed Mr. WILLIS, Mr. GLOVER, and Mr. MARKHAM managers at the further conference on the part of the House.

The message also announced that the House had passed the bill (H. R. 3280) to restrict the ownership of real estate in the Territories to American citizens, &c.; in which it requested the concurrence of the

RIVER AND HARBOR BILL.

Mr. McMILLAN, from the third committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7480) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, submitted a report; and,

On motion by Mr. McMILLAN,

Resolved, That the Senate still further insist upon its amendment to the said bill disagreed to by the House of Representatives and agree to the further con-ference asked by the House on the disagreeing votes of the two Houses there-

By unanimous consent, it was

Ordered, That the conferees on the part of the Senate be appointed by the President pro tempore

The PRESIDENT pro tempore appointed Mr. McMillan, Mr. Con-GER, and Mr. RANSOM the conferees.

HOUSE BILL REFERRED.

The bill (H. R. 3280) to restrict the ownership of real estate in the Territories to American citizens, &c, was read twice by its title, and referred to the Committee on Public lands.

TAX ON DISTILLED SPIRITS.

I move that the Senate proceed to the considera-Mr. ALDRICH. ion of the bill (H. R. 4833) relating to the taxation of factional parts of a gallon of distilled spirits.

Mr. INGALLS. I move that the Senate proceed to the consideration

of executive business.

The PRESIDENT pro tempore. The Senator from Kansas will allow the Chair to state the question. The Senator from Rhode Island moves

that the Senate proceed to the consideration of the bill indicated by him. The question is on agreeing to the motion of the Senator from Rhode Island.

The motion was agreed to.

CONSIDERATION OF THE CALENDAR.

Mr. EDMUNDS submitted the following resolution for consideration:

Ordered. That on Monday, August 2, subject to conference reports and action thereon, the Senate will, immediately after the strict morning business, proceed to matters on the Calendar at No. 1565 and proceed therewith in order. The five-minute provision of Rule VIII shall apply to debate, and one objection shall be sufficient to pass the matter over, retaining its place.

EXECUTIVE SESSION.

Mr. INGALLS. The bill called up by the Senator from Rhode Island being before the Senate, I move that the Senate proceed to the consideration of executive business

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After three hours and fifty-four minutes spent in executive session the doors were reopened, and (at 6 o'clock and 32 minutes p. m.) the Senate adjourned to Monday, August 2, 1886, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate the 31st day of July, 1886.

UNITED STATES MINISTER.

Dabney H. Maury, of Virginia, to be envoy extraordinary and minister plenipotentiary of the United States to the United States of Colombia, vice Charles D. Jacob, resigned.

UNITED STATES ATTORNEY.

Cornelius C. Watts, of West Virginia, to be attorney of the United States for the district of West Virginia, vice W. H. H. Flick, whose commission expires August 3, 1886.

PROMOTION IN THE NAVY.

Paymaster Charles F. Guild, to be a pay inspector, from the 16th of

July, 1886, vice Swan, retired.

Passed Assistant Paymaster Samuel R. Colhoun, to be a paymaster, from the 16th of July, 1886, vice Swan and Guild, promoted.

COLLECTOR OF INTERNAL REVENUE.

Mahlon D. Manson, of Crawfordsville, Ind., to be collector of internal revenue for the seventh district of Indiana, vice William W. Carter, resigned.

POSTMASTERS.

Robert Newell, to be postmaster at Salem, Salem County, New Jersey, vice Lambert L. Mulford, commission expired.

W. R. Chapple, to be postmaster at Little Falls, Herkimer County, New York, vice Alonzo H. Greene, whose commission expires August 3, 1886.

John W. Cage, to be postmaster at Mineola, Wood County, Texas, vice Thomas Breen, whose commission expires August 4, 1886.

INDIAN AGENT.

William M. Campbell, of Trigg, Ky., to be agent for the Indians of the Uintah and Ouray agency (consolidated), in Utah, to fill an original vacancy.

ASSISTANT COMMISSIONER OF INDIAN AFFAIRS.

Alexander B. Upshaw, of Nashville, Tenn., to be Assistant Commissioner of Indian Affairs, to fill an original vacancy created by the act of Congress making appropriation for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30,

COMMISSIONER OF EDUCATION.

Nathaniel H. R. Dawson, of Selma, Ala., to be Commissioner of Education, vice John Eaton, resigned.

REGISTER OF LAND OFFICE.

A. C. Bradford, of San Francisco, Cal., to be register of the land office at San Francisco, Cal., vice William R. Wheaton, resigned.

COLLECTORS OF CUSTOMS.

George Hines, of California, to be collector of customs for the district of Wilmington, in the State of California, to succeed John R. Brierly, whose term of office has expired by limitation.

James Brady, jr. of Massachusetts, to be collector of customs for the district of Fall River, in the State of Massachusetts; reappointment.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 27, 1886. INDIAN INSPECTOR.

Morris A. Thomas, of Baltimore, Md., who was designated during the recess of the Senate, to be an Indian inspector.

ASSOCIATE TERRITORIAL JUSTICE.

William F. Henderson, of Arkansas, to be associate justice of the supreme court of the Territory of New Mexico.

Executive nominations confirmed by the Senate July 30, 1886.

SOLICITOR-GENERAL.

George A. Jenks, of Pennsylvania, to be Solicitor-General. COLLECTOR OF INTERNAL REVENUE.

John B. Redman, of Maine, to be collector of internal revenue for the district of Maine.

Executive nomination confirmed by the Senate July 31, 1886.

ASSISTANT COMMISSIONER OF INDIAN AFFAIRS.

Alexander B. Upshaw, of Nashville, Tenn., to be Assistant Commissioner of Indian Affairs.

REJECTIONS.

Executive nominations rejected by the Senate July 27, 1886. COLLECTOR OF INTERNAL REVENUE.

Thomas Hanlon, of Indiana, nominated to be collector of internal revenue for the seventh district of Indiana.

Clinton Rosette, nominated to be postmaster at De Kalb, in the county of De Kalb and State of Illinois.

HOUSE OF REPRESENTATIVES.

SATURDAY, July 31, 1886.

The House met at 11 o'clock a. m. Prayer by Rev. Dr. BULLOCK, of Washington, D. C.

The Journal of the proceedings of yesterday was read and approved.

PUBLIC BUILDING, SPRINGFIELD, MO.

The SPEAKER laid before the House the following message from the President of the United States; which was read, and, on motion of Mr. WADE, referred to the Committee on Public Buildings and Grounds:

To the House of Representatives:

CONGRESSIONAL RECORD—HOUSE.

To the House of Representatives:

I hereby return without my approval House bill No. 1391, entitled "An act to provide for the erection of a public building at Springfield, Mo." It appears from the report of the committee of the House of Representatives, to which this bill was referred, that the city of Springfield is in a thriving condition, with stores, banks, and manufactories, and having, with North Springfield, which is an adjoining town, about 20,000 inhabitants. No Federal courts are held at this place, and apparently the only quarters which the Government should provide are such as are necessary for the accommodation of the post-office and the land office located there. The postmaster reports that six employés are engaged in his office. The rooms used as a post-office are now furnished the Government free of expense, and the rent paid for the quarters occupied as a land office amounts to \$300 annually. Upon the facts presented I am satisfied that the business of the Government at this point can be well transacted for the present without the construction of the proposed building.

GROVER CLEVELAND. GROVER CLEVELAND.

EXECUTIVE MANSION, July 30, 1886.

WESTERN JUDICIAL DISTRICT OF WISCONSIN.

The SPEAKER laid before the House the bill (H. R. 9857) in relation to the western judicial district of Wisconsin, with the Senate

amendments thereto.

Mr. PRICE. Mr. Speaker, I ask that the House concur in the amend-tents of the Senate. The bill as amended has been submitted to each ments of the Senate. member of the Judiciary Committee and to each member of the Wisconsin delegation, and it is satisfactory to all of them.

Mr. RANDALL. Let the amendments be read.

The amendments were read.

Mr. PRICE. The whole object of the amendments is to prevent the possibility of some marshal, in some contingency, getting some fees more than the Senate Judiciary Committee think he ought to have.

The SPEAKER. In the absence of objection, the Clerk will report the bill as it would stand if amended.

The Clerk read as follows:

Be it enacted, éc., That the regular terms of the circuit and district court shall be held at the times and places following: At Eau Claire, on the first Tuesday of June; at La Crosse, on the third Tuesday in September; and at Madison on the first Tuesday in December in each year; and the clerk residing at Madison shall attend all terms of said court at Eau Claire as clerk thereof.

The SPEAKER. This is the whole bill as it would stand if amended.

The amendments of the Senate were concurred in.

Mr. PRICE moved to reconsider the vote by which the amendments of the Senate were concurred in; and also moved that the motion to reconsider be laid on the table.

The latter motion was agreed to.

DISTRICT JUDGE FOR SOUTHERN DISTRICT OF ALABAMA.

The SPEAKER also laid before the House the bill (H. R. 28) to provide for the appointment and compensation of a district judge for the southern district of Alabama, the bill having been returned from the Senate with amendments.

Mr. OATES. I ask that the House concur in the amendments of the Senate. While they are necessary, they are not of great consequence. In the first instance the Senate put on this bill as an amendment the substance of a bill on the Calendar here for the increase of the salaries of judges. Subsequently the Senate recalled the bill, and that amendment has been taken off. The remaining amendments merely modify the terms of court as prescribed by the House bill; provide for a salary of \$3,500 for this judge, the same as the other judge gets, and restrict the jurisdiction of this additional judge to his own district and that of the judge of the northern and middle districts to those districts.

Mr. EDEN. This does not now affect in any way the general ques-

tion of the salaries of judges? Mr. OATES. Not at all.

Mr. HENDERSON, of Iowa. Has the amendment of the Senate, providing for the general increase of the salaries of judges, been receded

Mr. OATES. It has been receded from as an amendment to this bill. There is on the Calendar a general bill to that effect, which has been mr. OATES. That is a fact; but the Senate afterward recalled the

bill and receded from that amendment, relying on the passage of the general bill now on the Calendar.

The SPEAKER. That proposition with reference to a general increase of salaries of judges is not now in this bill at all.

Mr. HENDERSON, of Iowa. I understand it is not there now; but it was there when the bill first came from the Senate.

Mr. HOLMAN. I ask to have the amendments read.

The amendments were read.

Mr. HOLMAN. I will not press further any objection to this measure, though I think, as I have heretofore remarked, that we are extending the Federal judicial system far beyond the necessities of the country.

This additional judge in Alabama is very necessary. Mr. HOLMAN. As the House has already passed upon this question I will not urge any objection.

Mr. HENDERSON, of Iowa. I shall not object; but I am very sorry

that the Senate receded from its original amendment.

The amendments of the Senate were concurred in.

Mr. OATES moved to reconsider the vote by which the amendments of the Senate were concurred in; and also moved that the motion to re-consider be laid on the table.

The latter motion was agreed to ..

PHŒNIX NATIONAL BANK OF NEW YORK.

The SPEAKER also laid before the House the bill (S. 1599) for the relief of the Phœnix National Bank of the City of New York. The following message, accompanying the bill, was read:

Resolved. That the Senate disagree to the amendment of the House of Representatives to the bill (S. 1599) for the relief of the Phenix National Bank of the City of New York, and ask a conference with the House on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Evaris, Mr. Ingalls, and Mr. Vest be the conferees on the part of the Senate. IN THE SENATE OF THE UNITED STATES, July 30, 1886.

Mr. HOLMAN. Is it in order to refer this bill back to the committee from which it came—the Committee on Claims?

The SPEAKER. There is nothing now pending in relation to this bill except the amendment of the House, to which the Senate has dis-The bill has reached that stage of proceeding when the apagreed. pointment of a conference committee is in order.

Mr. JAMES. I ask that the request of the Senate for a conference

be agreed to.

Mr. HOLMAN. But, Mr. Speaker, it is in order, is it not, to move a reference to the Committee on Claims?

The SPEAKER. It would be in order, because the committee might recommend that the House recede from its amendment.

Mr. HOLMAN. I move that reference.

The SPEAKER. The gentleman from Indiana moves to refer this bill, with the accompanying amendment, to the Committee on Claims. Mr. JAMES. I move to amend so as to send the bill to a committee

of conference

The SPEAKER. That is not a proper motion in the form of an amendment, but if the House should decline to refer the bill the motion to agree to the request of the Senate for a conference will be in order.

Mr. JAMES. I hope the House will disagree to the motion for reference.

The SPEAKER. The Chair will state further that if the bill should be referred to the Committee on Claims and reported back it would be privileged, because it has reached the stage of actual disagreement between the two Houses.

The question being taken on the motion of Mr. HOLMAN, there were—ayes 27, noes 54.

Mr. HOLMAN. While I reserve the question of a quorum I hope

the fact will appear as to what this amendment is. The House in adopting the amendment acted no doubt deliberately, and I think that with a knowledge of the present posture of the question the House would probably insist on the amendment.

The SPEAKER. The gentleman has the right to have the amend-

ment read. The House is now voting on the question of reference.

Mr. HOLMAN. I ask for the reading of the amendment.

Mr. JAMES. All I want is to have this matter go to a conference committee to be fairly and fully considered.

The Clerk read the amendment, as follows:

In lines 1 and 2 strike out "\$29,624.35" and insert "\$12,117.38."

Mr. JAMES. This is the unanimous report of the Committee on Claims, and the amendment proposes to cut off at least half of the money that was expended necessarily by this Phoenix Bank in defending the suit. The facts of the case are that the United States Government confiscated the money which belonged to the Bank of Georgetown, S. C., at the close of the war, which amount was covered into

the Treasury of the United States.

Subsequently suit was brought in the supreme court of the State of New York, and it went through the various courts of that State, in every case being decided that the bank should pay the second time. On writ of error it was appealed to the Supreme Court of the United States writ of error it was appealed to the Supreme Court of the United States and when it went to the court of appeals of the United States and was under consideration in that court, the Attorney-General was brought in to the counsel, and every step in defending the suit was under his advice and guidance. The bank paid the money the second time, and this bill propose to pay them the expenses incurred in defending the suit and the money originally taken, without interest. It is simply giving the money back as they paid it, without interest; and now the proposition is to amend by paying them less than half the amount which they actually paid out under the order of the courts of the United States.

Why, it is a case as clear as the sunlight, and the attempt to strike down. Why, it is a case as clear as the sunlight, and the attempt to strike down, to cut off, half of the money ought not to receive a moment's consideration in this House.

Mr. HOLMAN. I think the only question is as to the propriety of refunding to this bank the amount of money paid by them—something

over \$12,000. So far as the costs and interest—
The SPEAKER. The Chair will state that under the rules of the

House this question is not debatable at all.

Mr. HOLMAN. I know that.

The SPEAKER. All the committee could do would be to recommend that the House recede, or insist and agree to the conference.

The question now is on the motion to agree to the conference.

Mr. JAMES. I think that was carried.

The SPEAKER. It was, but the gentleman from Indiana reserved the right to make the point of order.

the right to make the point of order.

Mr. HOLMAN. I think it ought to go to the Committee on Claims.

Mr. JAMES. Why, that committee have already reported it, unanimously.

Mr. HOLMAN. But I think they did not consider the question of interest.

They have the right to report it back under the motion. I make the point of order that no quorum has voted.

The SPEAKER. The point of order being made that no quorum

has voted, the Chair will appoint tellers.

Mr. Holman and Mr. James were appointed tellers.

The House again divided; and the tellers reported—ayes 43, noes 105.

So (no further count being demanded) the motion of Mr. Holman was not agreed to.

Mr. JAMES. I now move that the House agree to the conference.

The motion was agreed to.

The SPEAKER. The Chair will announce the managers during the

day.

RETURN OF JOINT RESOLUTION FROM THE SENATE.

The SPEAKER. The joint resolution (H. Res. 209) providing for a change in the authority for the construction of a public building at Savannah, erroneously numbered 295, has been returned from the Senate. If there be no objection, the number will be corrected and it will be returned to the Senate again.

There was no objection, and it was so ordered.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows: To Mr. Johnston, of Indiana, indefinitely, on account of sickness. To Mr. Wade, for the remainder of the session. To Mr. Green, of New Jersey, for four days.

To Mr. ERMENTROUT, for the remainder of the session, on account of important business.

To Mr. Comstock, for the remainder of the session, on account of important business.

To Mr. Dingley, indefinitely.

To Mr. Brumm, indefinitely, on account of sickness.

LEAVE TO PRINT.

By unanimous consent, leave was granted to Mr. SMALLS to print in

the RECORD remarks in relation to the joint resolution introduced by him on yesterday and referred to the Committee on Appropriations.

WITHDRAWAL OF PAPERS.

By unanimous consent, leave was granted to Mr. SAWYER to withdraw from the files of the House papers in relation to House bill No. 1972, Forty-sixth or Forty-seventh Congress.

IMPROVEMENT NEW YORK HARBOR.

Mr. JOHNSON, of New York. I ask unanimous consent to have printed in the RECORD a communication addressed to my colleague Mr. BURLEIGH, with an accompanying letter from the engineer in charge of the work of improvement of New York Harbor in reference to that improvement, and have it referred to the Committee on Rivers and Har-

There was no objection, and it was so ordered. The communication is as follows:

Office of the Chief of Engineers, United States Aemy, Washington, D. C., July 26, 1886.

Office of the Chief of Engineers, United States Army, Washington, D. C., July 26, 1886.

Dear Sir: I send you herewith a copy of a letter from Lieutenant-Colonel McFarland, corps of engineers, stationed in New York city, now temporarily absent on sick leave.

The bill referred to by Colonel McFarland is S, 2157, which is used by the opponents of the improvement of the bar at the Sandy Hook entrance, New York Harbor, as a means to defeat the appropriation intended for that purpose. I understand from the debates the opponents of the improvement are equally opposed to the methods by jetties or by dredging unless the improvement is made at the spot which they have selected, and not the principal entrance at Gedney's Bar already appropriated for by Congress.

I beg leave to say in addition that the idea of waiting for a complete and elaborate survey of New York Harbor before the project of the improvement of the bar could be adopted is a far-fetched one and will not stand investigation by experienced engineers. The survey now in progress and not finished may be of use for the interior harbor and contiguous waters thereto, especially in view of laying down the harbor lines on the New Jersey side and in deciding what encroachments, if any, might be tolerated upon the tidal area without future injury to the harbor; but when it is attempted to be shown that the completion of this survey is necessary before a project should be stadied for the improvement of the depth over the bar it manifests a want of examination and a decided inattention to the features of the shoals and channels at the bar. These shoals and channels have in their general features possessed a permanence for a long lapse of years not often met with at the sea entrances to harbors, and no one who has been practiced in the observation of such phenomena could fail to see by an examination of the charts already existing not only the causes of the shoal depth, but the remedy also for this defect. In fact, the substantial permanence of the shoals and channels

JOHN NEWTON, Chief of Engineers, Brig. and. But. Maj. Gen.

Hon. H. G. Burleigh, U. S. House of Representatives.

SHARON SPRINGS, N. Y., July 24, 1886.

Gentlemen: The newspaper statements concerning the discussions that have recently taken place in Congress and before some of its committees in relation to the bills for the improvement of New York Harbor, now pending, have but just come to my notice.

I regret exceedingly that my illness and absence for three months have prevented me from learning earlier the course that was being followed in respect to these bills, for as the engineer now in charge of the river and harbor improvements in the vicinity of New York I should have been glad to have given to the Congressional committees such aid as my knowledge of the subject under discussion enabled me to furnish.

As it is, at this late date, I can only put hastily in writing some of my ideas upon the subject, hoping that the committee will give them due consideration. There are two bills now before Congress affecting the welfare of the harbor of New York. One is the river and harbor bill, which provides for its protection against dumping ashes and other things in it, and makes the usual annual appropriation for its improvement; and the other is the one known as the New York Harbor commission bill. This bill originated in the desire to prevent the dumping of ashes and garbage in the waters of New York Harbor, and so far as this provision of it is concerned there is no objection to it, except that in view of the similar provisions contained in the present river and harbor bill, which apply to all the waters of the United States, it is wholly unnecessary and would involve a large and useless annual expenditure.

But its promoters are not content with this, for they had a much greater object in view, though it was carefully concealed at first, and that was nothing more nor less than the taking of the whole matter of the improvement of New York Harbor out of the hands of the engineers who had skillfully and creditably managed it for so many years, and placing it in the hands of a mixed body, only one of whom is required to be an engineer; and yet the questions involve

and whom it means to put in their places in charge of the improvement of York Harbor.

General Newton, Chief of Engineers, is one of the first; who has spent more than forty years in the practice of engineering; whose work on the Hudson River and at Hell Gate has given him a world-wide reputation, and who has done more for the improvement of New York Harbor than any other engineer, living or dead.

General Duane is another, a New Yorker with thirty-eight years of engineer service in every variety of work, and remarkable for his sound judgment in questions of engineering.

General Abbot, with more than thirty years' service in every variety of hydraulic work especially, a member of the National Academy of Sciences, and an authority on the subject of hydraulics.

General Comstock—of more than thirty years' experience in engineering—a member of, and for a long time president of the Mississippi River Commission,

a member also of the National Academy of Sciences, and one of the best informed river and harbor engineers in the world.

These last three gentlemen constitute the board of engineers which prepared the scheme for the improvement of New York Harbor for the beginning of which an appropriation was inserted in the river and harbor bill now before Congress, and this is the appropriation which one of the distinguished Representatives from New York declares conceals a job, and which he says should be stricken out of the river and harbor bill until the opinion of the proposed harbor commission is obtained. It is difficult to imagine what misrepresentation of facts could have led him to make so serious a charge as this, but whatever it may have been I must believe that he will withdraw it when he learns that his attack is directed toward officers of the Corps of Engineers.

Now let us see what kind of a body it is whose judgment on questions of harbor improvement is to be substituted for that of the board of engineers who proposed the plan for the improvement of New York Harbor. This harbor commission, it appears, is to be composed of one engineer officer of the Army, one officer of the Navy, one Coast Survey officer, and two civilians, one to be appointed from the State of New York and one from the State of New Jersey.

This would be a good enough commission for determining where ashes and other matter should be dumped, but for this purpose, as before shown, the river and harbor bill renders it unnecessary and a useless expense. But in regard to harbor improvements, which require not only engineering knowledge but engineering experience, it is difficult to see in what respect its opinion could have any value as compared with the opinion of a body of engineers trained to their profession. Neither the naval officer nor the Coast Survey officer have any such training or experience, and there is nothing in the bill which requires the civilians to be engineers; and as appointments are usually made they probably would not be

Every member of Congress from the city of New York was seen—the Chamber of Commerce was besieged and all opposition was to be allayed and conflicting interests were to be united by having the proposed commission consist of a number of members of different occupations, coming from different localities, and among which the engineering profession and the Corps of Engineers, to whom are intrusted all the other works of river and harbor improvement in the country, were to be represented by a hopeless minority of one. And all this for the management of purely engineering questions!

ties, and among which the engineeric profession and the Corps of Engineers, to whom are intrusted all the other works of river and harbor improvement in the country, were to be represented by a hopeless minority of one. And all this for the management of purely engineering questions?

The chief movers in this scheme were a naval officer and an ex-officer of the British navy who had been employed for awhile on the East River improvement, and afterward, so I am informed, by the Chamber of Commerce and the Coast Survey. The original draught of the harbor commission bill provided a comfortable place for him, but this provision was subsequently thrown out. This gentleman has made a model of a part of New York Harbor which has been shown and lectured on in various places, by means of which he has endeavored to show that by dredging through a sand-bank a shorter channel seaward from New York Harbor would be formed than the main channel which nature has laid out and has kept in permanent good order for over a hundred years, or as far back as our records extend.

No engineer familiar with hydraulic work would think of making such a mistake as this, and the author's ignorance of the subject is shown by the very suggestion. Yet he has talked it up so much that he has found some unprofessional followers, and it is this wild proposition that has led the distinguished representative from New York Harbor has not yet been determined, and to express the fear that the harbor of New York may be ruined if the opinion of the board of expert engineers who recommend the improvement of the main channel be not thrown aside, and the opinion of the mongrel harbor commission which is not yet formed be not taken in its stead.

Now, through all this, from beginning to end, not a single officer of engineers nor any other engineer that I have heard of has been asked one solitary question about the wants of New York Harbor or the merits of this bill.

It is plain to me that neither this bill nor any other bill affecting the public good ought t

\$6,000,000.

At the best possible rate of work it will take five or six years to get this depth, and in the interest of the commerce of the city it is very much to be desired that this appropriation may not be struck out; for the distinguished member is plainly wrong in every one of his statements concerning it.

Very respectfully, your obedient servant,

WALTER McFARLAND, Lieutenant-Colonel of Engineers.

COMMITTEE ON RIVERS AND HARBORS, Washington, D. C.

ENROLLED BILLS SIGNED.

Mr. NEECE, from the Committee on Enrolled Bills, reported that they had examined and found duly enrolled bills of the following titles; when the Speaker signed the same:

A bill (S. 1008) to empower the Board of Foreign Missions of the Methodist Protestant Church to hold property in the District of Co-

lumbia; and
A bill (S. 2530) for the relief of the legal representatives of John Wightman, deceased.

Mr. FISHER, from the Committee on Enrolled Bills, reported that they had examined and found duly enrolled bills of the following titles;

when the Speaker signed the same: A bill (S. 13) for the relief of William J. Smith, late surveyor of cus-

toms for the port of Memphis, in the State of Tennessee;
A bill (S. 68) for the relief of S. B. Cranston, of Oregon

A bill (S. 28) to confirm the title to certain lands in Platte County, Missouri, and authorize patents to be issued therefor to Kinsey B. Cecil;

A bill (S. 224) for the relief of Charles F. Bowers; A bill (S. 304) to compensate physicians for services rendered under the order of the United States court for the northern district of Ala-

A bill (S. 380) for the relief of Mrs. Henrietta Cole;

A bill (S. 632) to provide for the settlement of the estates of deceased

Kickapoo Indians in the State of Kansas, and for other purposes;

A bill (S. 699) to authorize the Secretary of the Interior to issue to George K. Otis duplicates of certain land-warrants lost while in the possession of officers of the Government;

A bill (S. 708) for the relief of Stephen H. Smith; A bill (S. 718) for the relief of Francis Gilbeau; A bill (S. 936) for the relief of John M. McClintock; A bill (S. 972) for the relief of Thomas P. Morgan, jr.;

A bill (S. 1899) for the relief of Mrs. Lizzie Maynadier Phelps, widow of Capt. Seth Ledyard Phelps, late minister of the United States to Peru; and

A bill (S. 2415) for the relief of the trustees of the Christian Brothers' College, Saint Louis, Mo.

PUBLIC BUILDING AT ANNAPOLIS.

Mr. COMPTON. I ask unanimous consent that the Committee of the Whole House on the state of the Union be discharged from the further consideration of the bill (S. 201) to provide for the erection of a public building in the city of Annapolis, Md., and that the same be now considered.

The bill was read.

The SPEAKER. Is there objection to the present consideration of the bill?

Mr. BRADY. I object.
Several members called for the regular order.

RIVER AND HARBOR APPROPRIATION BILL.

The SPEAKER. The regular order is the consideration of the report of the committee of conference on the river and harbor appropriation bill.

I desire to submit a point of order on the report and Mr. HATCH. the statement of the House conferees

Mr. BLANCHARD. The report has been read, but not the statement.

The SPEAKER. The report of the conference committee has been read, but the statement which the rules of the House require the managers of the conference on the part of the House to make has not been read. The Clerk will read the statement.

The Clerk commenced to read the statement.

Mr. PAYSON (interrupting the reading). Would it be in order to ask unanimous consent to dispense with the further reading of the statement.

The SPEAKER. It would.

Mr. PAYSON. I make that request.

The SPEAKER. Is there objection to the further reading of the statement being dispensed with?

There was no objection.

The statement in full is as follows:

The statement in full is as follows:

House of Representatives, United States,
Washington, D. C., July 30, 1886.

The undersigned, managers on the part of the House, make the following statement in respect to the conference report on H. R. 7480, known as "the river and harbor bill."

The Senate struck out all after the enacting clause in the House bill and inserted a bill of their own, taking the House bill as the basis therefor. Their action was treated as one amendment.

The House receded from its disagreement to this amendment and concurred in the same with an amendment to which the Senate agreed.

The bill as it passed the Senate appropriated \$14,013.393.25; the amount of the amendment agreed upon by the conferees of the two Houses increases the above amount about \$728,031.75, making the total amount appropriated by the proposed amendment about \$14,766,400. 'The changes made in the bill as it came from the Senate are as follows:

Lines 12 and 13, strike out "\$11,250" and insert "\$12,500."

Lines 22 and 23, strike out "\$11,250" and insert "\$15,000."

```
Lines 25 and 26, strike out "$7,500" and insert "$10,000."
Line 43, strike out "$4,500" and insert "$6,000."
Lines 45 and 46, strike out "$11,250" and insert "$15,000."

N. C. BLANCHARD,
THOS. J. HENDERSON.
                                                                                                                                          I desire to make a parliamentary inquiry.
                        The SPEAKER. The gentleman from Missouri [Mr. HATCH] has
       a question of order pending.

Mr. WILLIS. If the gentleman will yield to me for a moment I desire to make this inquiry: If the House rejects the present conference
          report can it order a further conference on this bill?
       The SPEAKER. Certainly. If the House refuses to agree to this report the whole subject is where it was before the report was made.

Mr. DUNN. Of course the gentleman from Kentucky understands that that loses the bill.
                       The SPEAKER.
                                                                                                                                                                   The gentleman from Missouri [Mr. HATCH] will
       state his point of order.

Mr. HATCH. I send to the Clerk's desk and ask to have read, as
```

Resolved, That the managers of the said further conference on the part of the House be, and they are hereby, instructed that it is the sense of the House that the item in the Senate amendment to said bill, making an appropriation for the Portage Lake and Lake Superior Ship-canal, be stricken from said Senate amendment.

Resolved, That the managers of the said further conference on the part of the

the basis of my point of order, the instructions given by the House to

the conference committee. The Clerk read as follows:

House be, and they are hereby, instructed to insist on striking out from the amendment of the Senate to said bill the item making an appropriation for the Lake Michigan and Hennepin Canal.

Resolved, That the managers of the said further conference on the part of the House be, and they are hereby, instructed to insist upon striking out from the amendment of the Senate to said bill the item making an appropriation for Sturgeon Bay and Lake Michigan Ship-canal.

Resolved, That the managers of the said further conference on the part of the House be, and they are hereby, instructed to insist upon striking out from the amendment of the Senate to said bill the item commencing with line 1446, down to and including line 1525, providing for the improvement of the Mississippi River from the head of the passes to the mouth of the Ohio River.

Resolved, That the managers of the said further conference on the part of the House be, and they are hereby, instructed to insist upon striking out from the amendment of the Senate to said bill so much thereof as appropriates \$375,000 for continuing the improvement of the Potomac River in the vicinity of Washington.

Mr. SPRINGER. I raise the point of order on that proposition.

The SPEAKER. A point of order is pending.

Mr. SPRINGER. Is that a resolution instructing the conference committee?

The SPEAKER. The gentleman from Missouri has caused to be read as part of his remarks the resolutions heretofore adopted by the House

Mr. SPRINGER. What is the point of order? The SPEAKER. It has not been stated.

Mr. HATCH. If the gentleman from Illinois [Mr. SPRINGER] will contain himself for a few minutes I will state my point of order

Mr. Speaker, the items embraced in the instructions just read from the Clerk's desk were adopted by this House by direct votes, and in two or more instances by a yea-and-nay vote on record. They were positive and direct instructions to the conference committee then appointed to insist upon striking from the Senate amendment the items designated. Now, my point of order is that the report made by that conference committee appointed in pursuance of the instructions of the House is in direct violation of every single statement read from the Clerk's desk as part of the instructions, and therefore that the report and statement are not in order and should not be received by the House.

There is nothing in the record of the proceedings of the House to show that since these instructions were passed the House has taken any action conferring any additional authority upon the conference committee to make any such report as they have put in here upon this bill. The report is in direct violation of the instructions of the House, and therefore it is not in order and should not be received by

Why, Mr. Speaker, if this report can be received what confidence can the House hereafter repose in a conference committee when it gives them positive and direct instructions how to act and when they come into conference with the Senate conferees they violate and refuse to carry out the positive instructions of the House as to their action? In that event the action of this House in occupying its time for nearly one whole day in expressing its opinions on these several propositions is simply a farce. I undertake to say that since the first day of the first Congress no such record has ever been made by a conference committee appointed by the House of Representatives. It stands here alone withont a single precedent. It never has had one and I trust it will never in the future be duplicated by a conference committee of this House.

Mr. CLARDY. May I ask my colleague a question?

Mr. HATCH. Yes, sir.

Mr. CLARDY. I ask the gentleman if he holds the conferees on the

part of the House were utterly powerless to listen to the overtures of the conferees on the part of the Senate?

Mr. HATCH. I hold the conferees on the part of the House were bound in honor by the instructions of the House, and that they had no power to exceed those instructions until they reported back that they were unable to agree

Mr. CLARDY. If they had no power why go through the farce of appointing them?

Mr. HATCH. The farce is not in appointing them, but in their having violated the instructions of the House. They should have come back, as every conference committee has done when it found it could not carry out the instructions of the House, and report that fact to the House and let the House take further action.

1 Mr. CLARDY. Will the gentleman tell us how this amounts to anything more than non-concurrence in the Senate amendments?

Mr. HATCH. The conferees are simply the agents of the House to carry out the instructions given them, and they can not exceed those instructions, and it never has been done before by a committee of con-

Mr. DUNN. Let me ask the gentleman from Missouri [Mr. HATCH] did not the House the other day, on the sundry civil bill, non-concur in more than two hundred amendments of the Senate, and on the legislative bill likewise; and did not the conferees bring in a report agree-

ing to a large majority of the items that had been non-concurred in?

Mr. HATCH. Ah! yes; but that is a very different question.

Mr. RANDALL. The gentleman from Arkansas [Mr. DUNN] is mistaken. The sundry civil bill has not yet come back from conference.

Mr. DUNN. But the legislative bill has. And has not that been the history of every report that has been made on these appropriation bills?

Mr. RANDALL. The line of distinction is this: Where the House by a vote has given expression to its will, the conferees should conform to that instruction until it is reversed by a contrary vote.

Mr. DUNN. I do not remember a case of non-concurrence in numerous amendments where the managers of the conference on the part of the House did not make a report concurring in a great many of those amendments. In fact there could not be a conference under instructions. Such a thing could not exist.

The gentleman from Missouri [Mr. HATCH] talks about a farce of a report. How much more a farce would it be to undertake a conference

under instructions!

Mr. RANDALL. When the will of the Houthe conferees are in honor bound to execute it. When the will of the House has been expressed,

Mr. HATCH. The difference between the case presented by the gentleman from Arkansas [Mr. DUNN] and this one is too plain for any gentleman to fail to see it. In the ordinary course of proceedings the House non-concurs in a number of amendments, and, as has been suggested, that action is simply an informal motion to send the bill to a conference; but in this instance these items were separated and voted upon separately and specifically by the House, and now, for the first time in the history of Congress, the conferees on the part of the House have violated its instructions, and brought in a report which, instead of striking out the items condemned by the House, retains every one of them in the bill.

Now, Mr. Speaker, I desire to emphasize the point of order that, in the face of the record, which the Speaker is bound to know and of which he must take official notice, this report is in direct violation of the instructions of the House, and therefore is not in order and should not be received, but should be sent back to the conferees, leaving them to bring in a report in consonance with the instructions of the House.

Mr. BRECKINRIDGE, of Arkansas. Will the gentleman from Missouri permit me to ask the Chair a parliamentary question?

Mr. HATCH. Certainly.

Mr. BRECKINRIDGE, of Arkansas. I wish to ask the Chair whether, under the rule, the House now has the power to have a separate vote upon the points upon which instructions were given.

The SPEAKER. Not while this report is pending.

Mr. HATCH. I am obliged to the gentleman from Arkansas for his question, for that is the point in the case. This report comes in here and must be accepted or rejected by the House as a whole. The conferees, by their action, have taken away the power of the House to vote again upon these questions separately. That is what renders the report even more obnoxious to the objection I make. They have grouped these items together in the report, and the House must now accept that report or reject it as a whole. The power is taken away from the House to again take those items one by one and have separate votes upon them. Therefore the entire report, as I have said, is out of order. upon them.

npon them. Therefore the entire report, as I have said, is out of order.

Mr. BLANCHARD. Mr. Speaker, the conferees on the part of the
House do not propose to take their ideas of what is honor from the gentleman from Missouri [Mr. HATCH], as I am pleased to inform him in
the outset of my remarks. It is not true, as stated by the gentleman
from Missouri, that every one of the propositions which the House voted
upon separately the other day is in this bill just as voted on, and the

gentleman knows it is not true.

Mr. HATCH. Did I say—
Mr. BLANCHARD. I do not yield to the gentleman from Missouri.
Every one of the propositions which were voted upon separately has been modified in essential and vital particulars, except the one in relation to the Potomac flats. The gentleman knows that to be the fact if he has read the report, and I judge he knows what the report contains, since he insisted upon its being read last evening. This very tains, since he insisted upon its being read last evening. This very question which the gentleman has raised—and I know that in raising it he does not expect his point of order to be sustained; I know that it is only a part of his plan and that of other would-be leaders on this floor is only a part of his plan and that of other would be leaders on this hour to defeat this bill by raising this question and provoking a long and angry debate; I know that it is the purpose and motive of the gentleman from Missouri—this very question, I say, which the gentleman has raised here was debated at length in the Senate when it was reported to that body, that the House had asked a further conference and had instructed its conferees to insist upon the disagreement to certain amendments put into the bill by the Senate.

It was debated by some of the ablest and most experienced members of the Senate, and the view was taken that what the House had done did not amount to an instruction to its conferees to adhere to its disagreement to those amendments, and the distinction was there pointed out, which the gentleman from Missouri [Mr. HATCH] with all his astuteness seems to have overlooked, that there is a difference in parliamentary law between the House insisting upon its disagreement to certain amendments and the House instructing its conferees to adhere. The House did not instruct its conferees to adhere to the disagreement to the Senate amendments. It instructed its conferees that it was "the sense of the House" that they should insist upon the

disagreement.

Mr. WHEELER, And I understand that the conferees did insist just as long as they could.

Mr. BLANCHARD. And I am here to state, Mr. Speaker, that we

did insist, that we used every persuasion which argument could suggest and every honorable means that ingenuity could invent to carry out the instructions of the House as conveyed to us in those separate votes. And it was only after a majority of the conferees on the part of House saw that this bill was about to be lost, entailing a loss of millions of dollars to the Government of the United States in the way of the destruction of works now in an incompleted state, as well as in the way of deterioration of plant owned by the Government, which would necessarily lie idle and decay, that for the purpose of saving this great loss to the Government and great loss to the commerce of the country the House conferees or a majority of them receded from the Senate amendment with important modifications, except in one particular.

Mr. BLAND. Why did not the conferees come back to the House and ask further instructions instead of receiving instructions from the

Senate conferees

Mr. BLANCHARD. I will answer that question and state that it was fully considered by us. We received no instructions from the Senate conferees.

It ought to have been considered by the House. Mr. BLAND.

Mr. BLANCHARD. We all appreciated that the element of time was essential; in fact that it was vital to the fate of this bill. We feared we did not have time to come back to the House and ask another vote on the propositions. It was thought Congress would speedily adjourn, perhaps by Monday. It was either a choice of taking the bill with these modifications, or the cessation of all of river and harbor im-Now, with reference to the point of parliamentary law I wish to read from the Digest the following language:

Mr. BRECKINRIDGE, of Arkansas. From what page?

Mr. BLANCHARD. Page 320.

In the case of disagreeing votes between the two Houses, the House may either recede, insist and ask a conference, or adhere, and motions for such purposes take precedence in that order.

When we reported back to the House that the conferees were unable to agree, the first motion was not made, that the House recede from its disagreement to the Senate amendments; but the second motion was made, that the House ask another conference; and in that connection the House adopted certain specific resolutions that it was the duty of the House conferees to insist on their disagreeing to certain amendments.

The third motion which might have been made, providing for an adherence to the disagreement on the part of the House, was not made, and no instructions to adhere were given by the House. All that was done was to ask another conference and insist on the disagreement to certain specific amendments. In a parliamentary sense, nothing more was meant by the House by its separate dissenting votes. That is all the significance the resolutions adopted by the House have; and that was the view taken of the question by the best parliamentarians in the debate in the Senate. And, Mr. Speaker, I would be glad to have the gentleman from Missouri [Mr. HATCH] understand that before I, a comparatively inexperienced member of this body, yielded on that point I sought the advice of discreet friends in both Houses, men who are the peers of the gentleman from Missouri in all that goes to make up character, and fully his equal in intellectual ability; and it was upon their assurance that there was involved no question of personal or legislative honor that I, at length, with important modifications to the Senate amendments, assented to the report in the shape it was presented.

Mr. HATCH was recognized.

Mr. HENDERSON, of Illinois. I desire to be heard for a few mo-

The SPEAKER. The Chair has recognized the gentleman from Mis-The Chair presumes the gentleman from Illinois rises to oppose the point of order

Mr. HENDERSON, of Illinois. Yes, sir.
The SPEAKER. The Chair has just recognized a gentleman to opose it, but after the gentleman from Missouri has concluded the gen-

tleman from Illinois will be recognized.

Mr. HATCH. Mr. Speaker, I am not aware of having said anything in my remarks calling in question the honor of the gentleman from Louisiana. If I used that word at all I have forgotten it. I am satisfied, however, that a careful examination of the report of my remarks will show that I never used it.

Mr. DUNN. Yes; you used the word. Mr. BLANCHARD. Let the RECORD judge.

Mr. HATCH. I am content that it shall. As I remember, I never used the word in connection with my remarks about the gentleman from Louisiana; and I am sure I do not desire the tutelage of the gentleman on that subject. I have not offered my services to him. I want to instruct gentlemen upon points of honor I will select my own pupils.

Mr. BLANCHARD. And the "gentleman from Louisiana" will

select his own preceptor.

Mr. HATCH. But if the gentleman wants to consult the history of similar cases in past Congresses for the wisdom to guide him on the

floor of the House, and not adopt the suggestions of the Senate conferees with whom he comes in contact, he had better read the Con-GRESSIONAL RECORD for the past ten years. I do not understand why the gentleman should go to the Senate for their instructions as to what would be right and proper in carrying out the instructions of the House of Representatives with regard to the action of its conference commit-

Mr. BLANCHARD. And the gentleman from Louisiana did not do it. Mr. HATCH. The gentleman stated positively and emphatically more than once what the arguments of those distinguished gentlemen in the Senate were upon this question.

Mr. BLANCHARD. That is correct; I did so state.
Mr. HATCH. Yes, sir; and the inference from the gentleman's remarks was that he had been guided by the instructions of the Senate conferees and not by the action of the House. Well, we have had enough of the Senate controlling this body, and it is pretty nearly time for us to come to the point where the House of Representatives shall control its own matters while in conference; and when we instruct gentlemen what they are to do they should be expected to carry out the instruc-

The gentleman says I stated what was not true in connection with these matters all being in the bill. I reiterate just what I said: the gentleman and his fellow-conferees were instructed to insist upon striking from the Senate amendments each one of these paragraphs. what I say now, that every one of these is still in the bill. I did not say that any of them had not been modified. They have been modified. They have been oiled just a little to induce the House of Representatives to swallow them; that is all.

A MEMBER. A little eleomargarine has been put on them. Mr. HATCH. They would be better if they had on them even a little of the meanest eleomargarine that ever was manufactured, rather than that oil which the gentlemen of the conference committee have put on

them. [Laughter.] Mr. MURPHY. The only difference between the oleomargarine used by this conference committee and that used by the gentleman from Missouri is, that it was hatched by a different person. [Laugh-

ter.]
Mr. HATCH. Well, it was hatched out of a mighty bad egg when you brought it in here in violation of the instructions of the House of

Representatives. [Laughter and applause.]

Now it is a fact, Mr. Speaker, that every one of those items which the House insisted should be struck out has been retained in the bill. That there has been a change in an amount or a change in phraseology I have never disputed. But what I maintain is that the House instructed these gentlemen to insist upon striking those paragraphs from

the bill, yet every one of them is retained.

Mr. HENDERSON, of Illinois. Mr. Speaker, as one of the conferees I desire to say that this matter was, as has been stated, fully discussed in the conference committee; and, as I understand, there was no disagreement whatever on the part of the conferees either of the House or the Senate as to our freedom of action under the resolutions of the House. As for myself, being a young member of conference commit-tees at least, and not knowing clearly what my duty might be under the circumstances, I advised with as eminent men as are in either branch of Congress; and they clearly stated there was no objection to our taking the course which was taken in reaching an agreement; and, so far as I am concerned, I did not act until the resolutions of the House had first been receded from as to some of the propositions which were contained in the Senate amendment.

I will say further that I am told now by men of experience around me here, who have been on conference committees, that these resolutions amount to nothing more nor less than a non-concurrence on the part of the House; that an insistence is not an adherence; that if this House wanted to conclude the action of the conferees, it should have instructed them to adhere to the disposition of the House in regard to any of the subjects contained in this bill; that in resolving that it was the sense

of the House

Mr. WILLIS. Was there not in this instance a difficulty in adhering, from the fact that the Senate has sent us only one amendment? Mr. HENDERSON, of Illinois. Did you find any difficulty in disobeying the resolution of the House?

Mr. WILLIS. I am not discussing that question.

Mr. HENDERSON, of Illinois. That is the question I propound to

Mr. WILLIS. Nor am I criticising my colleagues on the conference committee. I have not raised this point of order. I only desire to call attention to the fact that the Senate sent us one amendment, and I would like to have that discussed.

Mr. HENDERSON, of Illinois. Why did you not discuss that, and Mr. HENDERSON, of Illinois. Why did you not why did you not insist upon that?

Mr. WILLIS. That does not answer my question.

Mr. HENDERSON, of Illinois. Mr. Speaker, I can not be interrupted further by the gentleman. I believe that the gentleman wants to defeat this bill; and I have believed for a week that he has wanted to do so.

Mr. WILLIS. The gentleman has no authority in the world for

that statement—not a particle.
Mr. HENDERSON, of Illinois. I want to say further-and I am going to speak plainly while I have the floor—it was, as has been stated by my co-conferee who united in this report, the belief that if any river and harbor bill whatever was to be passed by this House at this session we should act, and act speedily. It was generally believed that Congress might adjourn to-day or at the farthest on Monday next, so that whatever was to be done must be done promptly; and no one pressed this consideration more than the gentleman from Kentucky, who urged that if we did not act promptly there would be no possibility of passing any bill at this session. He repeated that again and again. Yet Mind him to-day asking a parliamentary question, whether if this conference report be voted down we can not then have another conference. I want to say now that if any bill is to be passed at all, in my opinion, at this session, it must be passed now, and upon this

I want it to be understood distinctly in answer to what the gentleman from Missouri [Mr. HATCH] has said, that this is an entirely different proposition as to every one of the subjects of the bill upon which resolutions were passed by the House. Every one of them that comes back here, with the exception of that in relation to the Potomac Flats, is modified, and materially different from what they were, and it is sub-mitted to the sense of the House whether it will adopt this report or not. If it be voted down, I will try to accept the verdict of the House as cheerfully as anybody else. But I shall then say to the friends of river and harbor improvements, "You may bid farewell to any river and harbor bill at this session of Congress." That is perhaps what is wanted by the gentleman from Missouri who raises the point of order; it is certainly what is wanted by many other members of this House;

and they must take the responsibility-not myself.

[Here the hammer fell.]

Mr. MURPHY. It does by indirection what they have not the man-

hood to do directly.

Mr. HATCH. Mr. Speaker, I wish to say in reply to the gentleman from Illinois, as the members of this House well know, that a proper, legitimate river and harbor appropriation bill has had no firmer or more constant friend for four Congresses than myself. I am in favor now of a proper river and harbor bill, and I am insisting on the point of order and the rejection of this report in favor of a legitimate river and harbor bill. I believe propositions for the building of canals throughout the country have no place on a legitimate river and harbor appropriation bill. Every one of them is out of order under the rules of this House, and they have been rejected when brought up in the ordinary course of business in the House.

Gentlemen standing here in the interest of these canal projects are attempting to force them on this river and harbor appropriation bill. They are attempting to force members on this floor in favor of such a bill to pass it with such projects or to have no bill at all. That is their proposition, Mr. Speaker, and so far as I am concerned I am not to be driven from my purpose by any such threat. I will vote for a proper river and harbor appropriation bill; but, sir, I will never vote for any

one of these canal projects.

"Mr. SPRINGER." Mr. Speaker, the gentleman from Missouri [Mr. HATCH] has intimated this as an unusual proceeding on the part of conferees to differ from the resolution of the House expressing the sense of the House. I desire to inform the gentleman, and also to call the attention of the House to the fact, that on the contrary it is an unusual proceeding to instruct or to attempt to trammel in any way a conference committee. There are but few instances in parliamentary history where such a thing has ever been attempted in parliamentary bodies, and in nearly every case where formal instructions were at-tempted to be given to a conference committee by one House the other House has refused longer to consider the matter, because there can be no free conference when the hands of one House are tied.

Why, sir, the object of a conference is to have a free discussion of all

the differences between the two Houses

Mr. HENDERSON, of Iowa. And they are always subject to the

ratification of the House.

Mr. SPRINGER. Yes; as my friend from Iowa suggests, they are always subject to the ratification of the two Houses. There is no such thing as a free conference if one side goes there saying they are in the position they can not approve or disapprove; and in that condition of affairs the other conferees of course at once say there can be no free conference in such a condition of affairs, and they withdraw.

Now, Mr. Speaker, there can be no action of a conference committee that does not advance a step in one direction or the other. Every attempt which takes a step in advance differs as a matter of course from what has been done by one side or the other. You can not have a conference committee that does not dissent or disagree on one side or the other from action already taken. It is because of the disagreements which have occurred between the two Houses that a conference has been appointed to harmonize and adjust such differences.

What does the conference committee propose to do? Do they propose to go into conference and stand like stubborn mules, refusing to

yield on one side or the other? Not at all. Their object is to harmonize the differences between the two House

This House has expressed some opinion on this bill. The Senate has expressed some different opinion on it. This conflict can not be harmonized in the open Houses, and consequently the two Houses have appointed a committee of conference to adjust the differences between The House has said what it would like to have in regard to two or three propositions. They were careful to state, however, in their amendment itself, in reference to the Portage Lake and River Improvement Company Canal, and the Lake Superior Ship-canal Railway and Iron Company Canal, that it is the sense of the House the item in the river and harbor bill for that purpose merely expresses the sense of the House that such and such works should be included if possible, leaving the determination of the matter, of course, to the conference com-

That is undoubtedly true, because if this House had desired to say to the other House that it would not under any circumstances yield in reference to those points there was a parliamentary motion well-recognixed in all parliamentary bodies which would completely effect their purpose, and that was, not a motion to instruct the conferees, but a motion to adhere on the part of the House to its disagreement. motion to recede cuts off all discussion on the part of the conferees and settles the matter finally. It is a motion which instructs the conferees to stop parleying, and when that motion to adhere is adopted the duties of the conferees are at an end and the bill itself is defeated.

That time has not yet been reached, and we are now considering the report of a committee of conference whereby agreement can be reached between the two Houses, and unless we are resolved to adhere to our disagreement and defeat the bill this conference report should be

adopted.

Mr. SOWDEN. Will the gentleman permit me to ask him a question?

Mr. SPRINGER. Certainly.
Mr. SOWDEN. Is there not a marked difference between insisting and yielding? [Laughter and applause.] Has not this conference committee yielded to the Senate and abandoned the instructions given to it by the House? Is the House bound by the acts of a conference when the conferees on the part of the House have transcended the authority dele-

gated to them?

Mr. SPRINGER. The House is not bound by anything that has occurred. The conference committee has made a recommendation to the House, and you can vote down this report, if you choose, and appoint another committee. But we are now endeavoring in the ordinary course of conferences between the two Houses to reach an agreement, and these gentlemen have exercised their best discretion in bringing forward an approach to an agreement and asking the House to ratify it. If you do so the bill passes; if not, chaos has come again so far as this bill is concerned.

The SPEAKER. The proceedings when there has been a disagreement between the two branches of a legislative body are different in many respects from the proceedings in other cases. The paramount object of all such proceedings is to bring the two branches to an agreement. Therefore either may, without reconsidering previous votes, take action in a directly opposite direction. For instance, the House may refuse to concur in an amendment and may afterward insist again and again upon its disagreement to the amendment, and yet it may ultimately, without reconsidering any of these votes, recede absolutely from its disagreement or recede from it with an amendment as its judgment may dictate. And while it is competent under the recent practice of the House to instruct conference committees, still the House in that case as in the other may ultimately recede from its disgreement to the very amendment in regard to which it had instructed its conferees to insist on a disagreement; and that may be done with or without a conference report upon the subject.

The whole effect of the conference report in such a case is to bring the matter again directly before the body for its consideration and action. That is the whole effect of this conference report. It does not bind the House at all. The House may refuse to agree to it, in which case the whole subject is again open; and the House may absolutely recede from its disagreement to the Senate amendment, or recede with an amendment, which is the course recommended by the present managers of the conference on the part of the House. So the Chair thinks the point of order is not well taken.

In a case where the House instructs one of its ordinary committees to report back a proposition with an amendment, it would be a very serious question whether it could report back without that amendment, or with that amendment and others. But that is not this case.

In the case supposed the House instructs its committee what it shall

report to the House. In this case the House has not instructed its conferees what they shall report, but has expressed its judgment on the question and directed them to insist upon striking out certain clauses. They have now brought it back to the House in order that it may have an opportunity to recede from that action if it desires to do so, or fur-Mr. HATCH. I raise the question of consideration.

The SPEAKER. The gentleman from Missouri on yesterday raised be question of consideration against this report. The question is, the question of consideration against this report. Will the House now proceed to consider it?

The question being taken, the Speaker stated that the "ayes" seemed to have it.

Mr. HATCH. I call for a division.

The House divided; and there were-ayes 111, noes 24.

So (further count not being called for) the House determined to con-

sider the report.

Mr. BLANCHARD. I move the previous question on the adoption of the report.

The previous question was ordered.

The SPEAKER. Under the rules of the House thirty minutes are allowed for debate, fifteen minutes in support of the report and fifteen minutes in opposition. [Cries of "Vote!" "Vote!"]

Mr. WILLIS. Mr. Speaker, I did not sign this conference report because I honestly and firmly believe that if this House by its vote today ratifies this report it is not only an end of this bill but the end of every river and harbor bill in the future. That was my firm and deliberate conclusion, and as my position in the conference committee has been referred to, I will state that that was my position there. The vote of the House upon these disputed propositions only confirmed me in that position. Fully convinced myself and sustained by the House which gave me the authority to act, I found no avenue of escape from the stand I had taken.

I did not raise the point of order this morning. I did not know that it would be raised. My colleagues in the conference committee are known here and known to the country as gentlemen of the highest integrity and intelligence. They acted from the very best motives. I do not come before this House to criticise them. I come to plead with the friends of rivers and harbors to vote down this conference report, and I state it as my belief that if it is voted down and other conferees promptly named, before this sun sets we will have another report free from these objectionable features-one that can pass this Congress and become a law.

I object, Mr. Speaker, to this report for various reasons, but mainly because it embraces three canal projects. I would have gone as far as any one in-attempting to come to some compromise in the conference committee had these three canals been omitted from this bill, but I did not, and could not, after a most careful and impartial examination, see that it was right or prudent to put these canals on a river and har-

At least one of these projects—the Hennepin Canal—is an intruder. Under the rules of this House it has twice been stricken from this bill on a point of order. But aside from this and other objections, the time when it comes before this House does not admit of an examination into its practicability, into the engineering propositions involved in it, or into the amount that will be involved if we commit the Government to its construction. Before we act finally all these questions should be fully discussed. By the clause adopted in this conference report we

accept the Illinois and Michigan Canal.

That question was submitted to the people of Illinois upon a bill which contains a clause requiring us, if we accept that canal, to go forward and complete the Hennepin Canal. If, therefore, you adopt this conference report, you commit this Government to the construction of a canal which may cost anywhere from nine to nineteen millions of dollars. How many men in this House are to-day fortified with facts upon which to vote this enormous appropriation? How many men have studied the engineering features of this proposed Hennepin Canal? Here, sir, is a map made by an engineer of the United States, from which it appears that when you leave the Illinois and Michigan Canal at Hennepin, within a distance of 25 miles, you have got to climb to-ward the skies 208 feet before you reach the point where the canal feeder begins, and between that and a certain other point you have another 84 feet to climb. Will any one say that that is a practicable scheme? It may be; but whose mind is satisfied that such is the case? Are we prepared to vote to-day upon such an immense and unique proposition as that?

The scheme, as I have said, involves from nine to twenty million dol-The widening of the Illinois and Michigan Canal, 96 miles long, will, according to the official estimate, cost over two millions. lowest estimate made by the engineers for the Hennepin project is from five to six millions; but the opinion is freely expressed, and I firmly believe it is correct, that fifteen millions will not complete the two And how are you going to complete it? Upon an appropriation bill? You appropriate here \$300,000. Even putting the total cost at ten millions, which is the lowest estimate, a quarter of a century will be required to complete the canal, and by that time we may be ballooning over the country, or the Keely motor may have solved

this great question of freight transportation.

At this rate of appropriation, therefore, twenty-five years will elapse before the work is completed, or else you must increase your appropriation for it upon your river and harbor bills to such an extent that the great harbors and rivers of this country, the legitimate subjects of a river and harbor bill, will be stricken down. Are we prepared to go before the country and say, as has been said here, that unless we can

have the Hennepin Canal we will have no river and harbor bill? Is that the spirit in which the American Congress is invited to the consideration of a great engineering problem which involves a new departure in our relations to the people? I ask to have read from the Clerk's desk a telegram from the city of Chicago which illustrates the

spirit in which this proposition is urged upon us.

For one, I protest against that method of forcing through any proposition. For one, my ear will be closed to its merits, if merits it has,

as long as a threat is held over me that unless I vote for it no river and harbor bill shall be passed.

Mr. HENDERSON, of Illinois. Will the gentleman allow me a

question?

Mr. WILLIS. I ask to have that telegram read. My time is very brief, and there are several points that I wish to notice.

The Clerk read as follows:

The following dispatch, signed by the mayor, the president of the board of trade, and other prominent citizens, was sent to-day to Senators Cullom, Wilson, and Warner Miller:

"We, in behalf of the board of trade and the citizens of Chicago, beg you to insist upon the Hennepin Canal amendment or to defeat the river and harbor bill."

Mr. WILLIS. Now, Mr. Speaker, are these the methods by which the judgment of the members of this House is to be influenced? Is this the "argument" by which we are to be coerced into accepting this proposition? Sir, when that issue is made I will appeal to that very Northwest, that Northwest which is more deeply interested in rivers and harbors than any other part of this country, and I will do so with a confident expectation that the appeal will be heard and that these threats will not dare be executed. I am ready at any time to consider fairly and properly this Hennepin proposition, but not under duress, not on a river and harbor bill in the last hours of Congress.

As I have already said, it has under our rules no part or place in this ll. True it was put in by the Senate, and it is claimed that the Senate, through its Committee on Commerce, has jurisdiction of the subject. It has jurisdiction also of light-houses, but we would promptly strike from this bill a proposition for a light-house had it been put there by the Senate, and with equal promptness we should strike out

from this bill every extraneous proposition.

But, sir, there are two other canals included in this conference re-One is the Sturgeon Bay Canal, connecting the waters of Green Bay with Lake Michigan, in the State of Wisconsin. It was, sir, built with the money of the people of the United States. Indeed, the most extraordinary financial operation contained in the grotesque and marvelous financial history of this country is presented in these reports, a part of which I shall embody in my remarks. A body of land comprising 200,000 acres was given by the United States to this canal com-The officers of the company paid themselves high salaries; they paid for the canal; they paid compound interest to all those who had advanced money; and after they had made out their own accounts in their own way and presented them to the engineer who was "investigating" them by accepting their statements, the result was that there was still \$25,000 to the credit of the United States.

Sir, why press this canal upon us with such urgency? There are many and serious facts which confront us when we examine this transaction. the "canal" is an open ditch, without lock or dam, and only 7,600 feet in length. It was "completed" by the company, chartered and authorized by the State of Wisconsin, on December 5, 1881. A resolution was promptly introduced and passed in Congress to negotiate for the purchase of it that it might be made "free to commerce." This was March 9, 1882, less than ninety days after it was accepted by the State. When the United States engineer sought information it was only to be had from the company's books. The act of Congress provided that "an accurate account of the sales and net proceeds of the lands hereby granted and of all expenditures in the construction, repair, and operating of said canal and of the earnings thereof" should be kept by the State and a statement of the same should be annually returned to the

Secretary of the Interior.

The governor, when applied to by the board of engineers seeking information, informed them that "there is no public record of what the company realized for the land grant." "There being no other source of information," so says the board, the President of the company was applied to, who informed it that the "net sum realized from the land grant was \$344,687." Certainly this was a munificent sum with which to construct a short ditch less than 2 miles long. The board also applied to the governor for the account of construction, and was informed that "no such record was on file." The law provided for a canal free from toll when these expenses had been reimbursed. And now they coolly step forward and ask \$100,000 or \$150,000 for the purchase of that which rightly belongs to the United States; and here, although this bill was sent to the Senate on the 6th of May, we are called upon within, it may be, forty hours of adjournment to face this proposition. venture to say that there are not twenty members of this House who have ever considered it, who have ever discussed it, who are at all familiar with the facts connected with it. For me, I want more light before I go further.

Then we have another canal, the Portage Lake Canal, only 21 miles in

length and without a single lock or dam, for which the sum of \$200,000 to \$350,000 is appropriated in this conference report. In this case, too, the Government has given 400,000 acres of land, worth half a million of dollars; and upon an investigation of the manner in which that land was used, an investigation made by a committee of Congress, it was charged that those lands were selected from the very richest mineral lands of Michigan, and that they were worth anywhere from \$5,000,000 to \$15,000,000. Yet this company, claiming now that the interests of commerce demand that this channel be opened, wants from \$200,000 to \$350,000 more of the public money. The average annual toll for a

period of ten years appears to have been only \$7,500.

Sir, let these propositions wait a while. Michigan and the Northwest have been liberally dealt with in this bill. Over \$1,200,000 has been appropriated—and I am glad to know it—for the State of Michigan alone. We have liberally appropriated for all of her great harbors and water ways; and in behalf of those I appeal to the Michigan delegation not to destroy by connecting these canal schemes with this bill the just hope that they have of receiving appropriations for the objects which properly belong to the bill.

I urge my appeal in the name of humanity. Ships may be cast where these breakwaters would protect them. Precious human lives will find shelter and safety in the protecting arms of these great harbors. Commerce may have its fields of enterprise enlarged, cheap transportation—the chief question of the hour—will be hastened if we secure the passage of this measure. But by hampering it, by weighing it down, by putting upon it propositions which do not properly belong to it, by exciting criticism which does not justly attach to the bill, we shall, in my judgment, not only defeat this bill, but I honestly believe defeat every bill of a similar character in the future.

Sir, the Hennepin Canal is not the only canal that stands at this bar sking for help. When the Chesapeake and Delaware Canal asks your votes, what answer can you make? When the great Erie Canal is urged upon you, what answer can you make? When the great shipcanal across the isthmus of Florida demands a place in your river and harbor bill, what answer can you make? Can you turn all these aside? They are all great measures; and there are a dozen others having equal merit with the Hennepin. You could not, if you would, resist their merit with the Hennepin. combined strength.

I am not discussing the merit of these canal projects. I am com-plaining that we have not time to enter into all the facts connected with their construction. But when these dozen or twenty canals are brought forward for appropriation in your next river and harbor bill you can not deny the application; and you will have a bill of canals, you can not deny the application; and you will have a bill of canals, while the natural water ways and harbors of the country will be pushed aside because of these canal propositions. As it is we barely appropriate one-third of what the War Department says it needs for the year. It declares it can "profitably expend" forty-two millions; we give only fourteen millions in this bill. Let us complete, or at least partially complete, existing works before we begin in this hasty manner new, bold, and expensive experiments. Therefore, I repeat, I believe that this bill, if passed in its present form, is the death-knell of all legitimate appropriations for rivers and harbors. Hence I appeal to the friends of propriations for rivers and harbors. Hence I appeal to the friends of river and harbor improvements to stay their hands. Let us reject this report. I am not a prophet nor the son of a prophet; but I predict that if this report be rejected we shall in time have here a report with these propositions eliminated; and we can pass it.

[Here the hammer fell.]

Mr. BLANCHARD obtained the floor.

Mr. CLARDY. Will the gentleman from Louisiana yield a moment, that I may put a question to the gentleman from Kentucky [Mr. WILLIS?

Mr. BLANCHARD. I can not yield if it is to be taken out of my time. I yield five minutes to the gentleman from Illinois [Mr. HEN-DERSON

Mr. HENDERSON, of Illinois. I yield for half a minute to the gentleman from Pennsylvania [Mr. BAYNE].

Mr. BAYNE. Mr. Speaker, in that half-minute I desire to say it is my firm conviction that if you do not take this bill you will get no

Mr. BLAND. Then we ought not to have any.

Mr. BAYNE. In the second place, I wish to say the canals are in this bill to stay; and in my opinion there will be no more river and harbor bills passed by the Congress of the United States without canals. Canals have been voted for in Texas and South Carolina and on the Ohio River and elsewhere for some years past, and I see no good reason why the Hennepin Canal should not go into this bill.

[Here the hammer fell.]
Mr. HENDERSON, of Illinois. Mr. Speaker, I ought, perhaps, to qualify a remark which I made a little while ago in reference to the gentleman from Kentucky [Mr. WILLIS], when I said he wanted this river and harbor bill defeated. I ought, perhaps, to have said that I thought the course pursued by him was calculated to defeat this bill. And that gentleman knows that no stronger threat has been made in regard to the defeat of this bill than he himself made in the first instance, that he never would vote for this bill with either of these canals in it. I said to him that was a game that two could play at.

Mr. HENDERSON, of Illinois. I do not yield.
Mr. WILLIS. As the gentleman misstates my position—
Mr. HENDERSON, of Illinois. I can not yield, and have not mis-

stated your position.

Mr. WILLIS. If the gentleman is willing to rest on a misstatement

he may do so.

Mr. HENDERSON, of Illinois. I do not yield for anything that is to come out of my time. The gentleman himself has said right here and now exactly what was said in the dispatch which he caused to be read from the city of Chicago. He says here on this floor that he will never support this bill with these propositions in it. There is any number of men here who will be justified when he makes that statement in taking the same position that he does.

But, Mr. Chairman, the position of the chairman of the Committee on Rivers and Harbors seems strange to me when I remember that on one or two different occasions he has here on the floor of this House voted against striking out the very proposition he now insists shall not remain in this bill; I mean the Hennepin Canal. On two occasions he

voted against striking it out.

Mr. WILLIS. If you wish to be true to yourself, you will state the

circumstances under which I voted.

Mr. HENDERSON, of Illinois. You have often stated them yourself. I wish to say here, Mr. Speaker, that we are not forcing this matter through the House without discussion. Why, sir, this matter has been before Congress for fourteen or fifteen years. It has been discussed at almost every session of Congress. Members have examined maps and plats and surveys and estimates, and the measure has often been discussed. And now the gentleman talks about forcing the measure upon Congress without discussion, and comes here and tells you it will cost, in his opinion, \$15,000,000 to construct this canal, while competent engineers, and more than one of them, have, after careful surveys and estimates, reported that it would not cost but about \$6,000,-000, or perhaps a little more, to construct it. I am not an engineer, and must leave these engineering questions with engineers, who are skilled in their profession; and they say the surveys demonstrate a perfectly feasible route for this canal.

The lift is not an extraordinary lift at all in the construction of canals. On the contrary, it is often double what he has stated it to be in

this instance.

But, Mr. Speaker, the point I wish to make here is this: That on two different occasions the gentleman from Kentucky himself voted with us against striking the Hennepin Canal out of the river and harbor bill. Now he says I ought to state the reasons why. How can the gentleman explain his votes against striking out the Hennepin Canal consistently with his present action unless he was insincere, which I will not state but leave others to judge? Members know about this canal or have heard about it. It has been discussed. Boards of trade and transportation and boards of commerce, here and there all over the and transportation and boards of commerce, here and there all over the country, have declared themselves in favor of this internal improvement. Yet you want forty or fifty Representatives interested in the construction of these canals to vote with you for all sorts of improvements, which are local in character and of but little value to commerce, and still you vote to strike out this great improvement which has been regarded favorably by the country.

[Here the hammer fell.]
Mr. BLANCHARD. No one regrets, Mr. Speaker, more than I do
that the distinguished chairman of the Committee on Rivers and Harbors [Mr. Willis] has been unable to agree to the bill presented to the House. I wish to disabuse the minds of the House, or the minds of any members who entertain any such idea, that if this bill is voted down to day there is any hope whatever of a river and harbor bill. know whereof I speak. I warn the House if this conference report be rejected there is no chance of a river and harbor bill at this session of

Mr. Speaker, the remark made by the gentleman from Kentucky [Mr. WILLIS] that in ceding the Illinois and Michigan Canal to the United States Government a condition was attached whereby the Government of the United States absolutely pledged itself to the construc-tion of the Hennepin Canal. I understand from the friends of the Hennepin Canal measure, who are more familiar with the subject than

myself, that such is not the case.

Mr. WILLIS. Will the gentleman permit me to read two or three lines from the act itself?

Mr. BLANCHARD. I will yield to the gentleman to read it. I am only speaking from information.
Mr. WILLIS. It is as follows:

Its right of way and all its appurtenances, and all right, title, and interest which the State may now have in any real estate ceded to the State by the United States for canal purposes, be, and are hereby, ceded to the United States, for the purpose of making and maintaining an enlarged canal and water way from Lake Michigan to the Illinois and Mississippi Rivers; and this cession is made upon the condition that the United States shall, within five years from the time this act takes effect, accept this grant, and thereafter maintain the said canal and water way for the purpose aforesaid.

Mr. BLANCHARD. The canal referred to there means the canal known as the Michigan and Illinois Canal, which connects the Illinois River with the lake at Chicago and through the Illinois River to the

Mississippi River.
Mr. HENDERSON, of Illinois. And with the Gulf at New Orleans. Mr. BLANCHARD. And with the Gulf at New Orleans. With reference to the Sturgeon Bay Canal, it will be seen by reference to the bill that a board of engineers is to be appointed, and they are to determine how much this company is to receive for their work there after debiting them with the value of the land granted and the amount paid to them in tolls which they have collected. So that it is not giving to this canal company a land grant and in addition thereto buying their works.

With respect to the Lake Portage Canal, it is not to be purchased until after a board of engineers shall have reported to the Secretary of War touching the value of that property, and even then only in the event that the Secretary of War and the Chief of Engineers shall become satisfied that it is expedient and advisable for the Government of the United States to acquire the ownership of the water way so as to relieve the commerce of the country from toll.

Mr. Speaker, I yield three minutes to the gentleman from Missouri [Mr. O'NEILL].

[Mr. O'NEILL].

The SPEAKER. The gentleman has five minutes remaining.

Mr. O'NEILL, of Missouri. Mr. Speaker, the rapidly decreasing attendance in this House indicates that this is the last opportunity we have a staining a river and harbor bill at this session. We failed in the last Congress to obtain the passage of a river and harbor bill, and the work of improving our water ways, with the view of less-

ening the cost of transportation, and thereby saving millions of dollars to the people, has stopped, and the expensive plants formerly engaged in the work are now rotting at the wharves.

I favored a separate distinct Mississippi River improvement bill in the last Congress, but the judgment of the House and the judgment of the friends of river improvement was that this combination plan of embracing all the river and harbor items in one bill gave the best guarantee of success by enlisting the active support of many members.

I appeal to the friends of internal improvement to waive their prejudices in the interest of the great benefit that the entire country will experience from the benefit to commence by the continuation of the present works and an extension of the process of deepening our chan-

nels to conform to the requirements of to-day.

The \$15,000,000 that will be distributed over this country through the instrumentality of this bill, nearly every dollar of which will go to labor, is too great a question and too important—it is of much more material importance to the people-to allow this bill to be defeated by

a mere prejudice against the canal system.

The people of the sections where these canals exist are as much interested in their improvement or their opening to commerce and have as good a right to stand up here and petition for cheap transportation of their grain and supplies as the people of the Mississippi Valley have to come here and ask Congress for the improvement of the Mississippi River.

The present House has by its legislation on the land question, by the passage of bills in the interest of labor and other important measures, made a magnificent record in favor of the labor interests of the country. Now let them pass this crowning act to distribute \$15,000,000 in the interests of cheap transportation throughout the whole country, giving

work to thousands of unemployed men.

Mr. BLANCHARD. I now yield the remainder of the time to the gentleman from Iowa [Mr. HENDERSON].

Mr. HENDERSON, of Iowa. Mr. Speaker, it has been said on the other side in the course of this debate that the Hennepin Canal has no business on this bill. It need only be said in reply that it is in this bill, and under the rules of the House. I want to say beyond that that the people I represent are interested vitally in cheap transportation. They have little or no interest in this bill outside of that single question; and they are not going to pause to know about rules of order.

We have a bill here involving the question of transportation by water,

and if this great improvement is thrown out here, if only certain methods of transportation are to be recognized, we must accept that gauntlet, and be governed by the challenge. For one, I am willing with its many imperfections to stand by this bill. But if we are to be stripped of this great avenue by which to transport the commerce of the country, if the farmers of the State of Iowa are to be cut off from this avenue, I for one, sir, shall not feel that I am justified in giving an affirmative vote for it. If I did I could not meet my people and justify that action. There are imperfections, as all know, many imperfections in the bill; imperfections enough to stagger any man who approaches it with an affirmative vote. I understand the difficulties that lie in the way of getting up such a great bill as this. But here is a proposition familiar to all, a proposition familiar to the country, one that the great Northwest demands, and I warn you all, who are friends of the commerce of the country, friends of the river and harbor bill, that they do not strike down this amendment, opening up as it does such great advantages to those whose industries depend upon getting cheaply to a market for their products.

The SPEAKER. The time for debate has expired.

Mr. MURPHY. I would like to ask unanimous consent to offer some memorials from Knights of Labor in regard to this canal question and have them printed in the RECORD. [Cries of "Regular order!"]

Mr. HEWITT. I ask unanimous consent to print some matters in this connection also.

Several members demanded the regular order.

The SPEAKER. The regular order is demanded. Mr. SPRINGER. But there are requests to print.

The SPEAKER. They are requests for unanimous consent, and the regular order cuts off all such demands.

ENROLLED BILLS SIGNED.

Mr. NEECE, from the Committee on Enrolled Bills, reported that the committee had examined and found duly enrolled bills of the following titles; when the Speaker signed the same:

A bill (H. R. 28) to provide for the appointment and compensation of a district judge for the southern district of Alabama; and

A bill (H. R. 9857) in relation to the western judicial district or Wisconsin.

RIVER AND HARBOR APPROPRIATION BILL.

The SPEAKER. The question is on agreeing to the report of the committee of conference.

Mr. RANDALL. I call for the yeas and nays.

The yeas and nays were ordered

The question was taken; and there were—yeas 102, nays 134, not voting 86; as follows:

J. Miller, Mills, Morrow, Steele, Stewart, J. W. Stone, W. J., Mo. Store, W. J., Mo Storm, Taylor, E. B. Taylor, I. H. Taylor, J. M. Thomas, J. R. Thomas, O. B. Thompson, Throckmorton, Negley, Burrows, Cabell, Campbell, T. J. Candler, Cannon, Caswell, Oates, O'Donnell, O'Hara, Grosvenor, Hale, Hammond. Phelps, Hanback, Haynes, Henley, Ranney, Reed, T. B. Reese,

Tillman. Turner, Van Schaick, Wade, Wadsworth, Ward, T. B.

Wellborn, West, White, Milo Winans.

So the report was not agreed to.

Mr. PAYSON. I ask unanimous consent to dispense with the feading of the names.
Mr. BLANCHARD. I object.

Mr. TUCKER. I desire to say I have been paired on most questions with Mr. Stewart, of Vermont. On this question he has voted as I vote to-day. He voted against the canal provision the other day, and I voted the same way. I therefore have felt at liberty to vote on this proposition.

The following pairs were announced:

Until further notice:

Mr. TURNER with Mr. DORSEY. Mr. HALE with Mr. WADE.

Mr. Green, of New Jersey, with Mr. Burleigh. If present, Mr. Burleigh would vote for and Mr. Green against the river and harbor bill.

Mr. HENLEY with Mr. HANBACK. Mr. COMSTOCK with Mr. BURBOWS. Mr. McKinley with Mr. Mills.

Mr. ERMENTROUT with Mr. WHITE, of Minnesota.

Mr. CANDLER with Mr. HAYNES.

Mr. John M. Taylor with Mr. IKE H. Taylor.

Mr. MILLER with Mr. BUCHANAN. Mr. WINANS with Mr. CUTCHEON. Mr. Winans with Mr. Cutcheon.
Mr. Wellborn with Mr. O'Donnell.
Mr. Hammond with Mr. O'Donnell.
Mr. Throckmorton with Mr. Wadsworth.
Mr. Reese with Mr. Adams, of Illinois.
Mr. Stoem with Mr. Dunham.
Mr. Rogers with Mr. Ezra B. Taylor.
Mr. Robertson with Mr. Steele.
Mr. Hill with Mr. Houk.
Mr. Sadler with Mr. Van Schaick.
Mr. Tucker with Mr. Stewart, of Vermont.
Mr. Rabour with Mr. Libber.

Mr. BARBOUR with Mr. LIBBEY. Mr. BRAGG with Mr. CASWELL.

Mr. BARKSDALE with Mr. DAVENPORT.

Mr. Dawson with Mr. RANNEY.

Mr. ARNOT with Mr. THOMAS, of Illinois.

Mr. DAVIDSON, of Florida, with Mr. Gallinger.
Mr. Oates with Mr. Clardy, on the conference report on the river and harbor bill; Mr. Oates would vote against it, Mr. Clardy for it.
Mr. Reed, of Maine, with Mr. Grosvenor, on the river and harbor bill. If present, Mr. Grosvenor would vote for and Mr. Reed against the bill.

Mr. Gibson, of West Virginia, with Mr. Allen, of Massachusetts, on the river and harbor bill.

For this day:

Mr. King with Mr. Morrow.

Mr. Landes with Mr. Anderson, of Kansas.

Mr. Tarsney with Mr. Thompson.

Mr. Cabell with Mr. Cannon.

Mr. Anderson, of Ohio, with Mr. Long, on this vote.

Mr. NEGLEY. I ask unanimous consent to be allowed to vote in the affirmative. I was in my committee-room and left word that I should be notified when the roll was called but by some oversight this. should be notified when the roll was called, but by some oversight this

was not attended to.

The SPEAKER. Under the rules the Chair can not entertain a request for unanimous consent under those circumstances. But the gentleman has stated which way he would have voted had he been present.

Mr. TARSNEY. I am paired with Mr. Thompson, of Ohio, but as I understand only on political questions. I have voted on this measure, not regarding it as a political measure.

The SPEAKER. The gentleman must decide that matter for him-

self.

Mr. TARSNEY. I understand the gentleman from Ohio would have voted as I have done.

The result of the vote was then announced as above stated.

Mr. WILLIS. I move that the House insist upon its disagreement to the Senate amendments and ask for a further conference, and upon that I demand the previous question.

The previous question was ordered. The motion of Mr. WILLIS was

then agreed to.

The SPEAKER. The Chair will announce the managers on the part of the House during the day.

CONTINUING APPROPRIATIONS.

Mr. RANDALL. Mr. Speaker, I report a privileged resolution from the Committee on Appropriations, and ask its present consideration.

The SPEAKER. The resolution will be read.

The Clerk read as follows:

Joint resolution to continue the provisions of the joint resolution entitled "A joint resolution to provide temporarily for the expenditures of the Government."

Resolved by the Senate and House of Representatives, &c., That the provisions of the joint resolution entitled "A joint resolution to continue the provisions of the

joint resolution approved July 1, 1886, entitled "A joint resolution to provide temporarily for the expenditures of the Government, approved July 15, 1886,'" be, and the same are hereby, extended and continued in full force and effect to and including the 10th of August, 1886.

Mr. HISCOCK. I object.

ALIEN LANDHOLDERS IN THE TERRITORIES.

Mr. PAYSON. Mr. Speaker, I desire to present a privileged report from the Committee on Public Lands. I report back the bill (H. R. 3280) to restrict the ownership of real estate in the Territories to American citizens, &c., and ask its immediate consideration.

The SPEAKER. The bill will be read.

The bill was read, as follows:

Be it enacted, &c., That no non-resident alien or foreigner, nor any resident alien or foreigner who has not declared his intention to become a citizen of the United States, nor any corporation or association where, at most, one-tenth of its stock or right of property is owned or controlled by aliens or foreigners, shall acquire or own, hold, or possess, by right, title, or descent accruing hereafter, any real estate in any of the Territories of the United States: Provided, That the provisions of this act shall not apply to the real estate necessary for the construction and operation of any railroad.

Mr. PAYSON. The report of the committee which I send to the Clerk's desk is a unanimous one, and I ask that it be read in support of the bill.

The report was read, as follows:

Clerk's desk is a unanimous one, and I ask that it be read in support of the bill.

The report was read, as follows:

Mr. Patsox, from the Committee on Public Lands, submitted the following report (to accompany H. R. 3280):

The bill is as follows:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no non-resident alien or foreigner, nor any resident alien or foreigner who has not declared his intention to become a citizen of the United States, nor any corporation nor association where, at most, one-tenth of its stock or right of property is owned or controlled by aliens or foreigners, shall acquire or own, hold, or possess, by right, title, or descent accruing hereafter, any real estate in any of the Territories of the United States; Provided, That the provisions of this act shall not apply to the real estate necessary for the construction and operation of any railroad.

It has for its basis the proposition that American soil shall be owned by Americans, so far as Congress can control it.

The Committee on the Public Lands in this Congress, as well as in the last, is thoroughly committed to the policy of so adjusting and administering our public-land system that the agricultural lands of the nation shall be parted with, without cost, to be held in small tracts by actual settlers only, for the purpose of cultivation by the owner, securing thereby the thrift of the citizen and economy in his management which ownership always simulates.

This policy, we submit, should become the national one.

The experience of so many thousands of our people in the securing of homes of the control of the provision of the securing of homes of the provision of the security of the Government of turnish to its people cheap homes: to aid the actual settler whose labor would make the land fruitful and productive, giving added wealth to the locality, and stability and strength to the country; and it had the great, magnificant possession, the public domain of that time,

This list could be greatly enlarged. Only the more important cases are given. Cases of like character are very numerous, but small in area, aggregating over 30,000,000 acres.

The reasons for the passage of this bill readily suggest themselves; but a memorial recently presented to the Senate and printed in the Record so clearly expresses the views of your committee that we insert the substance of it.

The memorial relates that the rapid absorption of the public domain by non-resident aliens furnishes occasion for much anxiety to the people. A few years ago the citizens had little difficulty in acquiring desirable land for actual settlement, and there were homes for multitudes besides, but within a recent period the conditions have changed. Large portions of the public land have been acquired by non-resident aliens, as individuals or in syndicates, and nearly all of what remains is either arid or difficult of access.

The remainder of the public lands should be preserved from the encroachment of aliens whose birth and education create and foster sentiments infinical to the country from which they are attempting to derive wealth to maintain an aristocratic splendor in their own country. It may happen that the nation which failed to conquer us with its arms may yet prevail with its treasure. The history of our own and of all countries has shown most emphatically that the public domain whose title is vested in and held by the Government is a God-given property of the people. It can not be alienated either by loss or misappropriation, whether by the sword or money of aliens, except at imminent peril to the life of the nation. Our land in its entirety is a sacred heritage, and it ought to be as a sacred trust transmitted in its entirety to posterity with the same unfailing care with which we hand down the record of the glories of the fathers of the Republic. The public lands have not been regarded as a source of revenue to the Government.

The policy of holding the public domain as a trust to be held by the central p

There is no question as to the power of Congress over the subject.
England exercised it during all the years of her progress, and it has only been till very recent years that the right to hold real estate there has been granted to The question as to how cheap homes for the poor can best be secured will soon

The question as to how cheap homes for the poor can best be secured will soon be upon us.

At the present rate of disposition this generation will see the last acre of public land worth taking for a home by a farmer disposed of.

This committee has devoted its best efforts and most earnest endeavors to perfect and present to the House for its consideration and action such measures as in its judgment would reclaim such lands as had been improvidently granted to corporations, and to which they are not entitled; also, for the repeal of such laws as rendered possible the improper acquisition of great areas of land from the Government, and to preserve what it had and should reclaim of the public lands as a reservoir, to be drawn upon by the actual settler, without cost, in homesteads, in small allotments for actual cultivation, believing, as we do, that not only the fostering of the home sentiment and individual prosperity, would result, but, in addition, that there is no greater safeguard against public disorder, tumults, and riots than a generally distributed ownership of lands and homes. Such a general condition of affairs would be a guarantee in favor of law and order, and we therefore recommend the passage of the bill.

MESSAGE FROM THE SENATE.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Johnson, one of its clerks, informed the House that the Senate had passed without amendment the bill (H. R. 190) for the relief of certain employés and others of the twelfth United States light-house district.

The message also informed the House that the Senate had passed with amendments the bill (H. R. 6664) to increase the naval establishment.

The message further announced that the Senate had passed the joint resolution (H. Res. 126) directing payment of the surplus in the Treasury on the public debt, with amendments, asked for a conference on the joint resolution and the amendments, and had appointed as conferees on the part of the Senate Mr. Allison, Mr. Aldrich, and Mr. Beck.

ALIEN OWNERSHIP OF LANDS.

Mr. HEPBURN. Mr. Speaker, I ask the gentleman from Illinois [Mr. PAYSON] to yield to me to offer an amendment to this bill.

Mr. PAYSON. I decline to yield.

Mr. Speaker, several gentlemen have expressed a desire that at the proper time I should ask general leave for members who wish to print remarks upon this bill in the RECORD. If it is in order now, I make

The SPEAKER. In the absence of objection it will be so ordered.

Mr. PAYSON. Mr. Speaker, the report just read expresses the views of the Public Lands Committee with reference to this bill, and I shall not consume the time of the House by discussing it. I therefore call the previous question upon ordering the bill to be engrossed and read a third time.

Mr. ROWELL. Why not take up the bill that has passed the Senate, which covers the ground, and more than is covered by this bill, and pass it, so as to be certain of getting a bill that will become a law?

Mr. PAYSON. Because the Senate bill is not as good a bill as this,

and because it is before the Judiciary Committee and will probably

never be reported. That is my answer.

Now, Mr. Speaker, I demand the previous question upon ordering this bill to be engrossed and read a third time.

Mr. BENNETT. Mr. Speaker, when may I have an opportunity of being heard in opposition to this bill?

The SPEAKER. Not at all, if the House orders the previous ques-

Mr. WEAVER, of Nebraska. Regular order. Mr. BENNETT. I thought so, and that is Mr. BENNETT. I thought so, and that is the reason I made the inquiry. I would like to be heard a few minutes on this bill in order to enlighten the conscience of the House a little bit. [Laughter.] Mr. O'NEILL, of Missouri. The gentleman has leave to print, has

he not?

The SPEAKER. All gentlemen who desire to print remarks on this bill in the RECORD have leave to do so.

Mr. McADOO. Regular order. Mr. BENNETT. Is there any way, Mr. Speaker, by which I can be heard in opposition to this bill now?

The SPEAKER. If the House refuses to order the previous ques-

tion the bill will be open to debate.

Mr. BENNETT. May I ask unanimous consent to be heard five min-

utes in opposition to the bill?

The SPEAKER. The gentleman can ask it. The gentleman from North Carolina [Mr. BENNETT] asks unanimous consent that he may be allowed to speak five minutes in opposition to the bill. [Cries of

"Regular order!"] Mr. PAYSON. I object.

The SPEAKER. The question is upon ordering the previous ques-

The question was taken; and there were—ayes 87, noes 26.

Mr. BENNETT. No quorum has voted. Mr. PAYSON. I call for the yeas and nays.

Mr. PAYSON. I call for the yeas and nays.

The yeas and nays were ordered.

Mr. BENNETT. I desire to make a proposition to the gentleman from Illinois [Mr. PAYSON]. [Cries of "Regular order!"] I want leave to imparl a moment. I will withdraw this point of no quorum if the gentleman will allow me to occupy ten minutes.

Mr. PAYSON. General leave to print! That is discussion after the question adjacent of I haved to any something that might influence the

tion is disposed of. I hoped to say something that might influence the action of the House

Mr. BUTTERWORTH. I desire to make a parliamentary inquiry. Will there not be thirty minutes for debate after the previous question

The SPEAKER. There would be if no discussion had taken place; but before the previous question was demanded there was a discussion.

Several papers were read, which were in the nature of debate.

Mr. CANNON. Mr. Speaker— [Cries of "Regular order!"]

The SPEAKER. The regular order is demanded on all sides.

Mr. CANNON. I desire to make a request for unanimous consent.

If this bill is strong enough to stand discussion I hope my friend from Illinois who is in charge of it will agree now that at least ten min-utes of the time which would be occupied in this roll-call be given to debate.

Mr. PAYSON. So far as I am concerned, I would be perfectly willing to agree to that. I only demanded the previous question because there seemed to be a universal desire for it by gentlemen in all parts of the House.

Many Members. Regular order!
The SPEAKER. The regular order is insisted upon by a number

gentlemen.

Mr. BENNETT. -I have been thus importunate in my request to be heard because I reported from the Judiciary Committee a bill identical in terms with this and reported it adversely. This bill will not

The question was taken; and it was decided in the affirmative-yeas 183, nays 21, not voting 118; as follows:

So the previous question was ordered.

Mr. PAYSON. I ask unanimous consent that the reading of the names be dispensed with.

Mr. NELSON. I object. A gentleman could not get ten minutes to speak in opposition to the bill, but a half hour has been occupied by the roll-call.

The list of names having been read,

The following pairs were announced:

Mr. Anderson, of Ohio, with Mr. Grosvenor, until further notice.

Mr. Peel with Mr. Allen, of Massachusetts, until further notice.

Mr. Croxton with Mr. Johnston, of Indiana, on this vote.

Mr. Dibble with Mr. Milliken, for the rest of the day.

The result of the vote was announced as above stated.

The SPEAKER. The question is now on ordering the bill to be engrossed and read a third time.

Mr. Brankert addressed the Chair.

Mr. BENNETT addressed the Chair.

The SPEAKER. The previous question is now operating.

Mr. PAYSON. At the proper time I propose to yield to the gentleman from North Carolina [Mr. BENNETT].

The question being taken on ordering the bill to be engrossed and read a third time, there were—ayes 78, noes 7.
Mr. NELSON. No quorum.

Tellers were ordered; and Mr. PAYSON and Mr. NELSON were appointed.

INTERSTATE-COMMERCE BILL.

The SPEAKER. If there be no objection, while the House is dividing the Chair will appoint as managers of the conference ordered on the disagreeing votes of the two Houses on the bill known as the interstatecommerce bill Mr. REAGAN, Mr. CRISP, and Mr. WEAVER of Ne-

ALIEN OWNERSHIP OF LANDS.

Mr. NELSON. Mr. Speaker, I am not opposed to the principle of the bill if the gentleman from Illinois will consent to reasonable de-bate and reasonable opportunity for amendments. The SPEAKER. The gentleman from Illinois can not himself con-

sent to amendments, because the House has ordered the previous ques tion. It would require unanimous consent of the House to offer amendments, but the gentleman might make a motion to reconsider.

Mr. BLAND. I think we should have the yeas and nays, which would settle it.

Mr. PAYSON. We only lack a few votes of making a quorum.

only lack I believe 8 votes. There is a quorum in the House, I am satisfied.

The House again divided; and there were—ayes 155, noes 10.

So the bill was ordered to be engrossed and read a third time; and

being engrossed, it was accordingly read the third time.

Mr. PAYSON. In order to save time, Mr. Speaker, I have agreed with the gentleman from North Carolina [Mr. BENNETT] to yield to him ten minutes for debate. I yield that time now.

Mr. BENNETT. I sent forward an amendment which I wish to offer

to the bill.

The SPEAKER. It can be read, but it is not in order to offer amendments to the bill at this time.

Mr. BENNETT. I will ask then unanimous consent of the House to accept it.

The Clerk read as follows:

Add to the end of section 1:

"Also provided that this act shall not prevent any alien or foreigner from taking up by devise or descent any lands now owned by any alien or foreigner who has not declared his intention of becoming a citizen."

Mr. BENNETT. If in order I ask unanimous consent to offer that amendment.

The SPEAKER. The gentleman from North Carolina asks unanimous consent to offer that amendment.

Mr. NELSON. I object.

The SPEAKER. The gentleman will proceed; he has ten minutes.

Mr. BENNETT. Mr. Speaker, John Randolph, of Roanoke, said many years ago in a speech on the Army bill: "That one of the dangers to the free institutions of this country was this, That the people would sacrifice some great principle of free government to temporary passion."

If this bill shall pass it will not only be a change of law, but it will be

a change of front of a continent.
On the 28th day of July, 1855, Caleb Cushing, Attorney-General of the United States, published this opinion—I read from the head-notes the poverty of my time not allowing me to read from the body of the opinion [laughter and applause]: "Under the land laws of the United States aliens are entitled to purchase the public lands, subject only, as to their tenure, to such limitations as particular States may enact, with this exception, however, that pre-emptions are secured to aliens who have declared their intentions to become naturalized according to law, and to citizens whether native-born or naturalized, and none other

This opinion of Mr. Cushing has controlled the Departments of this Government from that day until now.

I will not try to recount the services of foreigners to this Government in war and in peace.

Under the provisions of the common law aliens were not permitted to hold lands in England, except leasehold and qualified estates. Every single possible provision of the common law in that particular has been cut up by the root.

In this connection I can not help but think upon this bill the Anglo-Saxon greed for land cuts a great figure. Every State in this Union except Vermont has a statute or a provision in its constitution enabling aliens to hold lands. The great State of Wisconsin has that provision in its fundamental law.

By the statutes, thirty-third and thirty-fourth Victoria, chapter 14, section 2, in Great Britain, Scotland, and Ireland every disability in the matter of holding land has been removed, and aliens are absolutely free to take and hold the soil of those precious islands, and yet this great country, that has accepted the services of foreigners in war and in peace, this country that extends from "sunrise around to sunrise," is afraid of the presence of these people in the territories of the General Government. There is not phariseeism. [Laughter.]
Mark the bill: There is nothing more splendid in the long annals

No non-resident alien or foreigner, nor any resident alien or foreigner who has not declared his intention to become a citizen of the United States, nor any corporation or association where, at most, one-tenth of its stock or right of property is owned or controlled by aliens or foreigners, shall acquire or own, hold, or possess, by right, title, or descent accruing hereafter, any real estate in any of the Territories of the United States.

Foreigners hold lands now in the Territories of the United States; they die, and those that come after them, in whom they live again, can not hold them by descent.

Mr. BROWN, of Pennsylvania. They can get naturalized. Mr. BENNETT. This country has not the constitutional power to

Mr. BENNETT. This country has not the constitutional power to say, where a right of property has attached, and the person in whom it is attached dies, that his children shall not take and hold the property; and in support of that I cite that great and massive name John Marshall, who was esteemed a very considerable man in his day.

All change is now vulgarly called "reform." [Laughter and applause.] "And progress means taking something from somebody that does not belong to the taker." [Renewed laughter.] If this bill is to pass, this great body which is always just [laughter] ought to see to it that an amendment which saves to these people who have not violated the law and are not responsible for their birth the benefit of the propthe law and are not responsible for their birth the benefit of the property which their ancestors earned by the sweat of their faces should be incorporated in this bill. As for me, while I do not believe that the policy of this Government in the matter of its public domain has been directed with sufficient regard to the natural increment of population,

yet, sir, I could not be brought to the support of this measure unless its execution should be postponed to a day so far ahead that all the world might take notice of its unseemly provisions and guard against

its injustice. [Laughter and applause.]

Mr. NELSON. I wish to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. NELSON. I desire to know whether I can make a motion to recommit the bill now, or must I wait until after the previous question

The SPEAKER. The previous question has been demanded, and pending that motion, or after the previous question is ordered, the motion to recommit is in order.

Mr. NELSON. Then I move to recommit the bill to the Committee on the Public Lands with instructions to report it back immediately with the following amendment:

The Clerk read as follows:

At the end of section 1, add:
"Provided, That this act shall not prevent any alien or foreigner from taking by devise or descent any lands now owned by any alien or foreigner who has not declared his intention of becoming a citizen."

Mr. HALL. I move to amend by adding the following additional

Mr. NELSON. If I understand the gentleman's amendment I will

The SPEAKER. The Chair will then consider that the gentleman has modified his amendment?

Mr. NELSON. Let it be read.

The Clerk read as follows:

That no non-resident alien or foreigner who may now be seized or shall hereafter become so seized of real estate in the Territories by descent or devise from such alien or foreigner who has not declared his intention to become a citizen of the United States shall hold any such real estate at law or in equity for a longer period that five years from the date of the passage of this act; and every such title so held after the lapse of such period shall vest in the United States in trust for the use and behoof of such person or persons, their heirs or devisees; said lands to be sold and disposed of by the Secretary of the Interior, and the proceeds paid to the beneficiaries under such regulation as may be prescribed by said Secretary.

Mr. NELSON. I was under a misapprehension as to the gentleman's amendment. I supposed it was simply to perfect mine, but I

find it to be an entirely different matter. I can not accept that.

The SPEAKER. The gentleman from Iowa has the right to offer it in his own right, the previous question not having been demanded on the motion to recommit with instructions.

Mr. HALL. Then I offer it as an amendment.

Mr. NELSON. He offers it, then, as an amendment to my amendment?

The SPEAKER. The Chair so understands.

Mr. NELSON. I have no objection to that; but I do not accept it.

The SPEAKER. The first question then is on the amendment of the gentleman from Iowa [Mr. Hall] to the motion of the gentleman from Minnesota [Mr. Nelson.]

Mr. HALL. I wish to explain the purpose of that amendment.

The SPEAKER. The question is not debatable.

Mr. HALL. I understand that. [Cries of "Regular order!"]
Mr. BAYNE. I ask unanimous consent that the gentleman

I ask unanimous consent that the gentleman from Iowa be permitted to explain his amendment.

Objection was made.

Mr. OATES. Is a substitute in order?

The SPEAKER. A substitute for the proposition of the gentleman from Minnesota [Mr. Nelson] is in order, the previous question not

Mr. OATES. I offer then, as a substitute, to recommit the bill with instructions to substitute for the bill what I send to the desk.

Mr. NELSON. I demand the previous question.
The SPEAKER. The gentleman from Minnesota demands the previous question on the motion to recommit and the amendments pending. Mr. McADOO. Is debate in order on the motion of the gentleman from Minnesota?

The SPEAKER. It is not, even without the previous question ordered on it; because it is made pending the demand for the previous question on the bill. The gentleman now demands the previous question on his motion, the effect of which is to cut off further amendments.

Mr. OATES. Is not the motion for the previous question made too

late to exclude other amendments?

The SPEAKER. It does not exclude the amendment of the gentleman from Alabama

Mr. OATES. My amendment has not yet been read.

The SPEAKER. It is pending.

Mr. NELSON. I meant to include the substitute of the gentleman

from Alabama in my motion for the previous question.

The SPEAKER. It is included, because the gentleman from Alabama was recognized and sent his substitute to the Clerk's desk. The Clerk will now report it.

The Clerk read as follows:

That no alien or person who is not a citizen of the United States shall acquire title to or own a greater interest than a leasehold for five years in any lands anywhere within the United States of America and their jurisdiction; and any deeds or other conveyances of lands acquired after the approval of this act by

any alien or unnaturalized foreigner, or by any company, firm, or corporation composed of such, shall be void,

The previous question was ordered.

The SPEAKER. The question is first on the amendment of the gentleman from Iowa [Mr. Hall] to the motion of the gentleman from Minnesota.

The amendment was not agreed to.

The SPEAKER. The question is now on the substitute proposed by the gentleman from Alabama [Mr. OATES] for the motion of the gentleman from Minnesota [Mr. Nelson].

Mr. OATES. Upon that I call for the yeas and nays.

The yeas and nays were not ordered, only 25 members voting therefor—not one-fifth of the last vote.

Mr. BUTTERWORTH. I ask that the substitute offered by the gen-tleman from Alabama may be again read.

The substitute was again read.

Mr. HERBERT. I ask that the original bill be read. The SPEAKER. That is not before the House on the That is not before the House on this question. I mean the bill for which this is a substitute. Mr. HERBERT. The SPEAKER. It is a substitute for the motion of the gentleman

from Minnesota.

The question being taken on agreeing to the substitute, the Speaker stated that the "ayes" seemed to have it.

Mr. OATES. I call for a division.

The House divided; and there were—ayes 24, noes 73.

Mr. OATES. No quorum.

The SPEAKER. The Chair appoints as tellers the gentleman from Alabama, Mr. OATES, and the gentleman from Minnesota, Mr. NELSON.

The House again divided; and the tellers reported—ayes 30, noes 130.

Mr. OATES (one of the tellers). Mr. Speaker, I desired an opportunity to discuss the instruction that I offered; but I see no opportunity, and I do not think I will reach any by insisting on the point of no quorum, and I therefore withdraw it.

So (further count not being called for) the substitute was not agreed to. Mr. NELSON. I ask that the instruction I have offered be again read.

The Clerk read as follows:

At the end of section I add the following:
"Provided, That this act shall not prevent any alien or foreigner from taking by devise or descent any lands now owned by any alien or foreigner who has not declared his intention of becoming a citizen."

The SPEAKER. The question is on the motion of the gentleman from Minnesota to recommit the bill with the instruction which has just been read. Mr. OATES.

Mr. OATES. I ask for the yeas and nays.

On the question of ordering the yeas and nays there were—ayes 26, noes 102.

So (the affirmative being more than one-fifth of the whole vote) the yeas and nays were ordered.

RIVER AND HARBOR APPROPRIATION BILL.

The SPEAKER. The Chair appoints as conferees on the part of the House on the disagreeing votes of the two Houses on the river and harbor appropriation bill the gentleman from Kentucky, Mr. Willis, the gentleman from Louisiana, Mr. Blanchard, and the gentleman from

Illinois, Mr. HENDERSON.

Mr. BLANCHARD. I think under the circumstances the House will excuse me from further service on the conference committee. I understand also that is the position of the gentleman from Illinois [Mr. Henderson]. In fact, he told me so. I will ask that the gentleman from Illinois and myself be excused from service on the conference committee.

The SPEAKER. The gentleman from Louisiana asks for himself and the gentleman from Illinois [Mr. Henderson] that they be excused from service on the conference committee. If there be no objection that request will be granted.

There was no objection.

The SPEAKER. The Chair appoints as the conferees on the part of the House the gentleman from Kentucky, Mr. WILLIS, the gentleman from Missouri, Mr. GLOVER, and the gentleman from California, Mr. MARKHAM.

ELECTION OF PRESIDENT AND VICE-PRESIDENT.

Mr. CALDWELL, in accordance with leave heretofore given, submitted the views of the minority of the Select Committee on the Election of President and Vice-President on the joint resolution (H. Res. 61) proposing an amendment to the Constitution of the United States creating and defining the office of Second Vice-President of the United States, accompanied by a substitute therefor; which were referred to the House Calendar, and ordered to be printed.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

Several messages in writing from the President of the United States were communicated to the House by Mr. PRUDEN, one of his secretaries, who also informed the House that the President had approved bills of the following titles:

An act (H. R. 1580) for the relief of Emily B. Baker; An act (H. R. 1802) for the relief of Moses B. Walker; An act (H. R. 2475) to amend an act approved May 25, 1882, entitled "An act for the construction of a public building at Galveston, Tex.;"

An act (H. R. 5705) granting a pension to Charles Wyant; An act (H. R. 5179) to prohibit the passage of local or special laws in the Territories of the United States to limit Territorial indebtedness,

and for other purposes;
An act (H. R. 5921) granting an increase of pension to John Ryan;
An act (H. R. 6747) granting a pension to Mary A. Thomas;
An act (H. R. 7193) granting a pension to Sarah A. Tucker;
An act (H. R. 4335) making an appropriation to continue the construction of the public building at Clarksburg, W. Va., and changing

the limit of cost thereof; and
An act (H. R. 8974) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1887, and for other purposes.

ALIEN OWNERSHIP OF LANDS.

The question was taken: and there were-veas 85, nays 127, not voting 110; as follows:

Managers on the part of the Senate.

Mr. GROUT. I move that the House recede-

The SPEAKER. The first question is upon accepting the report just read, which will be done if there be no objection.

There was no objection.

Mr. GROUT. I move that the House recede from its amendment.

Mr. SPRINGER. What is the amendment? The SPEAKER. The amendment will be read:

The Clerk read as follows:

In line 6 strike out "one hundred" and insert "fifty." In line 7 strike out "June 1, 1886," and insert "the passage of this act;" so

In line 7 strike out June 1, 1009, and the the line of the pension laws, the name of Emily C. Stannard, widow of the late George J. Stannard, brevet major-general of volunteers, and to pay her a pension at the rate of \$50 a month from and after the passage of this act.

The SPEAKER. The question is on the motion of the gentleman from Vermont [Mr. GROUT] that the House recede from its amend-

Mr. GROUT. Mr. Speaker, I propose in the fewest possible words to make clear the grounds on which the House is asked to recede from this amendment, which reduces the amount expressed in the Senate bill from \$100 per month to \$50 per month as the allowance for the widow of General Stannard. I want to say that it is not alone because of the distinguished services of this officer, though it must ever remain a proud passage in the history of our common country how at Gettys-burg, in the very nick of time, Stannard swung out the "Green Mount-ain boys" upon the flank of Pickett's division, changing front forward on the right in the midst of shot and shell, and thus getting home upon the flank of that advancing column. When close upon the flank of Pickett's force, Stannard's men poured volley after volley straight into those brave fellows, who were pressing forward to break through our center. This continuous fire was more than the stoutest and best disciplined troops could endure, and the column fell back in confusion, and the day was won.

I say, however, it is not alone because of this historical achievement of Stannard that this pension of \$100 per month, as proposed by the Senate, should be granted; yet so distinguished service should receive the attention of the House and be properly understood. I desire to read from the report of the committee who favorably reported this bill a portion of the account of this attack and repulse as given by Colonel Benedict, the military historian of the State of Vermont, who was himself a participant in this affair, being at that time upon the staff of Gen-

eral Stannard:

The front of our regiments, where they opened fire, was hardly a dozen rods from the enemy's flank, and they advanced while firing, so that that distance was much lessened. At this short range the Thirteenth fired ten or fifteen rounds, and the Sixteenth probably half that number, into a mass of men on which every bullet took effect, and many doubtless found two or three victims. The effect upon the rebel lines was instantaneous. Their progress ceased close upon the breastworks of the Second Corps. For a moment they crowded to-

gether in bewilderment, falling like wheat before the reaper; then breaking into a disorderly mob they fied in all directions. The larger portion, on their right and center, dropped their arms and rushed within our lines as prisoners. On their left, where Pettigrev's division had made a less resolute advance, the larger portion retreated whence they came. Their dead and wounded and small arms by thousands strewed the ground over which they charged.

But the work on the left center was not yet ended. The rebel brigade, which formed the support to Pickett's division on the right, was now advancing across the open fields. It did not follow the flank movement which had proved so disastrous to the main column, but marched straight forward, directing its course upon the position of the Fourteenth Regiment. The Fourteenth received it with a hot fire in front, while the Sixteenth (which had been already faced about by Colonel Veazey and started back in anticipation of the order) was ordered back to take them on the flank. The Thirteenth was at the same time directed to take its former position. The enemy's batteries, which had ceased their fire, now reopened with redoubled fury, and shot and shell tore thickly through the ranks of our regiments as these orders were obeyed. They sustained it without being thrown into disorder, some of the rebel accounts to the contrary notwithstanding.

The Thirteenth resumed its place in the line in good order, while the Sixteenth, marching by flank, hurried back at double quick across the open field, losing many men Killed or wounded, but keeping its formation as perfectly as if marching on parade. Soon changing front to the left, the regiment formed in line of battle, facing obliquely the left flank of the rebel force, now brought nearly to a halt by the front fire. At Colonel Veazey's request, preferred in person to General Stammard, he was now given permission to charge. The regiment feld, losing a shot. The movement was so sudden that the rebel commander could effect no change of

I desire also to read some extracts from Richmond papers published within a few days after the battle of Gettysburg, and which will be accepted as good authority, giving an account of this movement. The Richmond Sentinel of July 13, 1863, speaking of Pickett's charge, contained the following passage:

The order-

To advance-

was given at 3 p. m., and the advance was commenced, the infantry marching at common time across the field, and not firing a musket until within 75 yards of the enemy's works. As Kemper's brigade moved up it swung around to the left and was exposed to the front and flanking fire of the Federals, which was very fatal. This swinging around unmasked a part of the enemy's force, five regiments being pushed out from their left to the attack.

Directly after this force was unmasked our artillery opened on it with terrible precision."

Soon confederate flags were planted on the stone fence, but there not being enough men to support them, they were captured by the advancing Yankee force, and nearly all of our severely wounded were left in the hands of the

enemy.

The First Virginia carried in one hundred and seventy-five men, about twenty-five having been detailed for ambulance and other duty. They brought out between thirty and forty, many even of them being wounded. There was but one officer of the regiment who was not killed or wounded, and that was Lieutenant Ballou, who now commands it.

Another account in the same paper is derived from a surviving officer of the First Virginia. He says:

When the firing of cannon ceased the order for the infantry to advance was given, which was done at common time—no double-quicking or cheering, but solemnly and steadily those veterans directed their steps toward the heavy and compact columns of the enemy. The skirmishers were at once engaged, the enemy having a double line of skirmishers to oppose our single line. The enemy were driven from their position behind a stone fence, over which intrenchments had been thrown up, and our forces occupied their position about twenty minutes. About this time a flanking party of the enemy, marching in a column by regiments, was thrown out from the enemy's left on our extreme right, which was held by Kemper's brigade, and by an enfilading fire forced the retirement of our troops.

That was Stannard's force.

That was Stannard's force.

With their repulse the heavy fighting of the day terminated. Our loss here was heavy, and our forces, after the most desperate fighting, were forced to fall back beyond the range of fire.

The correspondent of the Richmond Inquirer, in a vivid account of the charge, after stating that Pettigrew's division, on the left, first broke, adds:

"Pickett is left alone to contend with the hordes of the enemy pouring in on him on every side. Garnett falls, killed by a minie ball, and Kemper, the brave and chivalrous, reels under a mortal wound, and is taken to the rear. Now the enemy move around strong flanking bodies of infantry, and are rapidly gaining Pickett's rear. The enemy press heavily our retreating line, and many noble spirits who had passed safely through the advance and charge now fall on right and left. Armistead is wounded and left in the enemy's hands. The shattered remnant of Wright's Georgia brigade is moved forward to cover their retreat, and the fight closes here."

Similar extracts might be multiplied, but those given are sufficient to show that on the rebel side, at least, and corroborative evidence is not wanting on our own.

own.

In Major-General Doubleday's testimony before the Congressional Committee on the Conduct of the War he says, after describing the flank attack: "The prisoners stated that what ruined them was Stannard's brigade on their flank, as they found it impossible to contend with it in that position, and they drew off, all in a huddle, to get away from it."

Bachelder says: "Stannard, whose brigade was at the front, moved it by the right flank, changed front forward on first company, and with his Green Mount-

ain Boys opened a murderous fire upon their (the enemy's) exposed flank. The effect was resistless. The ground lay thickly covered with killed and wounded; hundreds, thousands threw down their arms; while the broken, shattered mass sought refuge behind the hills from which they had emerged."
